Las publicaciones de Eurostat están clasificadas por temas y por series. La clasificación se encuentra al final de la obra. Para mayor información sobre las publicaciones, rogamos se pongan en contacto con Eurostat. Para los pedidos, diríjense a las oficinas de venta cuyas direcciones figuran en la página interior de la contracubierta.

Eurostats publikationer er klassificeret efter emne og serie. En oversigt herover findes bag i hæftet. Yderligere oplysninger om publikationerne kan fås ved henvendelse til Eurostat. Bestilling kan afgives til de salgssteder, der er anført på omslagets side 3.

Die Veröffentlichungen von Eurostat sind nach Themenkreisen und Reihen gegliedert. Die Gliederung ist hinten in jedem Band aufgeführt. Genauere Auskünfte über die Veröffentlichungen erteilt Eurostat. Ihre Bestellungen richten Sie bitte an die Verkaufsbüros, deren Anschriften jeweils auf der dritten Umschlagseite der Veröffentlichungen zu finden sind.

Οι εκδόσεις της Eurostat ταξινομούνται κατά θέμα και κατά σειρά. Η ακριβής ταξινόμηση αναφέρεται στο τέλος κάθε έκδοσης. Για λεπτομερέστερες πληροφορίες σχετικά με τις εκδόσεις, μπορείτε να απευθύνεσθε στην Eurostat. Για τις παραγγελίες μπορείτε να απευθύνεσθε στα γραφεία πώλησης, των οποίων οι διευθύνσεις αναγράφονται στη σελίδα 3 του εξωφύλλου.

Eurostat's publications are classified according to themes and series. This classification is indicated at the end of the publication. For more detailed information on publications, contact Eurostat. Orders are obtainable from the sales offices mentioned on the inside back cover.

Les publications d'Eurostat sont classées par thème et par série. Cette classification est précisée à la fin de l'ouvrage. Pour des informations plus détaillées sur les publications, contactez Eurostat. Pour les commandes, adressez-vous aux bureaux de vente dont les adresses sont indiquées à la page 3 de la couverture.

Le pubblicazioni dell'Eurostat sono classificate per tema e per serie. Tale classificazione è precisata alla fine dell'opera. Per informazioni più dettagliate sulle pubblicazioni rivolgersi all'Eurostat. Per eventuali ordinazioni rivolgersi a uno degli uffici di vendita i cui indirizzi figurano nella 3^a pagina della copertina.

De publikaties van Eurostat zijn ingedeeld naar onderwerp en serie. Deze indeling is achter in het boek opgenomen. Voor nadere informatie over de publikaties kunt u zich wenden tot Eurostat. Gelieve bestellingen op te geven bij de verkoopbureaus, waarvan de adressen op bladzijde 3 van de omslag zijn vermeld.

As publicações do Eurostat estão classificadas por tema e por série. Esta classificação está indicada no fim da obra. Para mais informações sobre as publicações é favor contactar Eurostat. Encomendas: serviços de venda cujos endereços estão indicados na contracapa.

Mit der monatlich erscheinenden Veröffentlichung *Eurostatistik - Daten zur Konjunkturanalyse* werden innerhalb kürzester Frist die neuesten statistischen Daten über die Europäische Gemeinschaft als Ganzes (EUR12), über jedes Mitgliedsland sowie über die Vereinigten Staaten und Japan bekanntgegeben.

Eurostatistik enthält nicht die Gesamtheit des bei Eurostat verfügbaren statistischen Materials, sondern eine Auswahl der relevantesten Reihen über die konjunkturelle Entwicklung.

Schnelligkeit und Pünktlichkeit sind die wichtigsten Vorzüge dieser Veröffentlichung.

Aus diesem Grunde wurde sie im Umfang bewußt klein gehalten und enthält keine Anmerkungen zur Methodik, die im übrigen in den spezialisierten Veröffentlichungen von Eurostat zu finden sind.

Die in *Eurostatistik* veröffentlichten Daten stammen aus dem ICG -Bereich der On-line-Datenbank Cronos von Eurostat.

Wer Zugang zu Cronos besitzt, kann jederzeit die Tabellen dieser Veröffentlichung abfragen, wobei die Daten täglich auf den neuesten Stand gebracht werden (Hinweise zur On-line -Benutzung finden sich auf der letzten Seite). Darüber hinaus sind die Daten in der Datenbank Eurocron verfügbar, die vom Host Eurobases der Kommission angeboten wird.

WECHSELKURSE: Dänische Krone kehrt in ihre frühere enge Bandbreite zurück

In den ersten Januartagen erfuhr die dänische Krone eine Wertsteigerung gegenüber der D-Mark, die über ihren früheren unteren Interventionspunkt hinausging. In den sechs Wochen nach der Einführung erweiterter Bandbreiten (15 %) innerhalb des Wechselkursmechanismus des EWS im August 1993 sank der Kurs der Krone um etwa 8 %, bevor er sich ab Mitte September wieder nach oben entwickelte. Am 24. Januar erreichte er 3,871 gegenüber der D-Mark und lag damit geringfügig über dem unteren Interventionspunkt der früheren engen Bandbreite von 3,9016.

Das bedeutet, daß nunmehr alle Währungen, für die seinerzeit die engen Bandbreiten des Wechselkursmechanismus galten (D-Mark, holländischer Gulden, französischer und belgischer Franc, dänische Krone und irisches Pfund), inzwischen wieder in die Bandbreiten von vor August 1993 zurückgekehrt sind. Ende Januar war das irische Pfund die stärkste Währung im Wechselkursmechanismus, gefolgt vom Gulden und von der D-Mark.

Der Trend hin zu niedrigeren europäischen Zinssätzen setzte sich im Januar fort. Mehrere Zentralbanken verfolgten weiterhin ihre Politik der häufigen Zinssatzsenkungen in kleinen Schritten. In Belgien, Dänemark, Spanien, Irland, den Niederlanden und Portugal senkten die Zentralbanken ihre Leitzinsen, in einigen Fällen sogar mehrfach. Diese Senkungen hatten jedoch meist nur geringe Auswirkungen auf die Wechselkurse.

Auch in anderen Ländern des Europäischen Wirtschaftsraums (EWR) wurden Sätze gesenkt: Mitte Januar kündigte die finnische Zentralbank die Senkung ihres Basiszinssatzes um 0,25 % auf 5,25 % zum 1. Februar an, was den niedrigsten Stand seit 1954 bedeutete. In Schweden wurde der Diskontsatz am 4. Januar um 0,5 % auf 4,5 % und der Marginalzins am 24. Januar um 0,25 % auf 7,5 % gesenkt.

Nach dem Rücktritt des Ersten Stellvertretenden Ministerpräsidenten Jegor Gajdar fiel der Kurs des russischen Rubel gegenüber dem Dollar Mitte Januar auf immer neue historische Tiefstände. Gajdar war allgemein als der Architekt der russischen Wirtschaftsreformen angesehen worden, und sein Rücktritt ließ deshalb den Reformprozeß ungewiß erscheinen. Anfang Januar lag der Kurs des Rubels gegenüber dem US-Dollar bei ungefähr 1 200, bis zum 19. Januar fiel er jedoch auf 1 607.

Die türkische Zentralbank sah sich gezwungen, die Zinssätze am 20. Januar zu erhöhen, um den Druck auf die türkische Lira zu stoppen, die am Vortag etwa 12 % ihres Wertes verloren hatte. Die Zinsen wurden von 105 auf 135 % heraufgesetzt, was zu einer Stärkung der Währung beitrug, die einen Kurs von 17 000 gegenüber dem US-Dollar erreichte, verglichen mit etwa 18 500 am Vortag. Einige Tage danach rutschte der Kurs jedoch wieder auf 17 900 ab.

RENDITEN VON STAATSANLEIHEN: Weiterhin rückläufige Renditen

Die Renditen von Staatsanleihen sind im Dezember in den meisten EG-Ländern gesunken. In vielen Fällen blieben sie weiterhin auf dem niedrigsten Stand aller Zeiten oder nahe daran. Der stärkste Rückgang war im Vereinigten Königreich (0,6 %) und in Italien (0,5 %) festzustellen. Mit 5,86 % lagen die durchschnittlichen monatlichen Renditen von Staatsanleihen in Frankreich im Dezember zum ersten Mal seit mindestens 20 Jahren unter 6 %. Nachdem nun fast alle Daten für Dezember zur Verfügung stehen, ist ein Vergleich zwischen den durchschnittlichen Renditen 1993 und den Renditen 1992 und davor interessant. Angesichts der Entwicklung der europäischen Zinssätze in den letzten 12 Monaten überrascht es nicht, daß die durchschnittliche Höhe der Renditen von Staatsanleihen in allen EG-Ländern 1993 geringer war als 1992. Die stärksten Rückgänge waren zu verzeichnen in Spanien, wo die Durchschnittsrenditen 1992 bei 12,2 % und 1993 bei 10,2 % lagen, und in Frankreich, wo die Durchschnittswerte 9,0 % bzw. 7,0 % betragen.

In vielen EG-Ländern sind die realen (inflationsbereinigten) Renditen immer noch relativ hoch, besonders wenn man die konjunkturelle Entwicklung in diesen Ländern berücksichtigt. In Belgien, Dänemark, Frankreich, Irland, Italien und im Vereinigten Königreich betragen die Renditen real zwischen 4 und 5 %. In diesen Ländern ist die Inflationsrate meist relativ niedrig (in Dänemark, in Irland und im VK betrug sie im November etwa 1,5 %), und wieweil die Renditen nominal gesunken sind, sind sie doch gemessen an der Inflationsrate hoch.

GELDVOLUMEN: Schnelleres Wachstum in Griechenland, Spanien und im VK

In den letzten Monaten des Jahres beschleunigte sich das Geldmengenwachstum in Griechenland, Spanien und im VK. In Griechenland beschleunigte sich das M3-Wachstum auf das Jahr umgerechnet in den letzten fünf Monaten und erreichte bis November 7,6 %, während die Wachstumsrate im Sommer noch weniger als 4 % betrug.

Die auf Jahresbasis umgerechnete Wachstumsrate des spanischen Geldmengenaggregats ALP, das sich aus den Komponenten der Geldmenge M3 und verschiedenen finanziellen Aktiva im Besitz von Nichtbanken zusammensetzt, hat sich seit April beschleunigt. Die Daten für Oktober lassen eine Zuwachsrate von fast 10,5 % erkennen, verglichen mit einem Zielkorridor von 4,5 bis 7,5 %.

Im Vereinigten Königreich beschleunigte sich die Wachstumsrate der Geldmenge M4 weiter. Sie lag im November auf das Jahr umgerechnet bei fast 5 % und bewegte sich damit auf die Mitte des von der Bank of England vorgesehenen Zielkorridors von 3-9 % zu.

In Irland hingegen scheint die Zeit des schnellen Geldmengenwachstums dem Ende zuzugehen: Die auf das Jahr umgerechnete Wachstumsrate von M3 fiel von 31,5 % im September auf 26,7 % im Oktober und 23,6 % im November.

AMTLICHE WÄHRUNGSRESERVEN: Im September 1993 EUR-12-Reserven in Höhe von 264 Milliarden ECU

Die amtlichen Währungsreserven aller EG-Länder zusammen beliefen sich im September 1993 auf 265 Milliarden ECU, das sind etwa 6 % weniger als Ende 1992, aber etwas mehr als im selben Monat des Vorjahres.

Deutschland hat den größten Anteil an den EG-Währungsreserven (27 %), gefolgt von Spanien (13 %). Irland verdoppelte seine Währungsreserven in den ersten neun Monaten des Jahres 1993 auf knapp 6 Milliarden ECU. Damit steht das Land an zweitletzter Stelle in der EG. Im gleichen Zeitraum stiegen die Währungsreserven in den Niederlanden um mehr als 50 %.

VIERTELJÄHRLICHE GESAMTRECHNUNGEN: Zweites Quartal 1993: Schwaches Wirtschaftswachstum in der EU (BIP +0,3%); Inflation unverändert (+0,8 %).

Im zweiten Quartal 1993 war die Wirtschaft der Europäischen Union (EU) insgesamt durch eine wenigleich schwache Zunahme der Produktion (BIP +0,3 %) gekennzeichnet. Allerdings ist dieses Ergebnis nach zwei Quartalen negativer Entwicklung mit großer Vorsicht zu interpretieren, denn das auf vierteljährlicher Ebene verzeichnete leichte Wirtschaftswachstum dürfte eher die Folge einer Konsolidierung der vorangegangenen Situation sein als ein echtes Signal für eine Erholung. Dies wird deutlich, wenn man die Entwicklung der Wirtschaftstendenzen analysiert, wo ein erneuter Wachstumsrückgang festzustellen ist (BIP -0,5 %). Diese Ergebnisse dürften darauf hinweisen, daß für die Wirtschaft der EU kurzfristig nicht mit einer Tendenzumkehr zu rechnen ist. Im übrigen bestätigen sowohl die wichtigsten Wirtschaftsindikatoren als auch die Prognosen der GD II, daß ein Aufschwung im Jahre 1993 unrealistisch sein dürfte. Überdies sind die Anzeichen für eine Erholung der amerikanischen Wirtschaft weiterhin widersprüchlich und geben keine konkreten Anhaltspunkte dafür, daß die Volkswirtschaft dieses großen Landes in der Lage wäre, zum Motor für eine Erholung der Weltwirtschaft zu werden. Ein solcher Aufschwung hängt in erster Linie von zwei aufs engste miteinander verknüpften Faktoren ab: Wiederbelebung der Inlandsnachfrage, vor allem nach Gütern des letzten Verbrauchs und Abbau der staatlichen Defizite in allen Ländern. Für die EU ist darüber hinaus ein Abbau der monetären Spannungen erforderlich, die noch immer innerhalb des EWS herrschen. Ferner ist darauf hinzuweisen, daß die von den meisten Mitgliedstaaten während des Jahres geführte Zinspolitik, die bereits zu einem deutlichen Nachgeben der Zinssätze geführt hat, bislang ohne größere Auswirkungen auf die Realwirtschaft geblieben ist. Die jüngsten positiven Entwicklungen bei den Gatt-Verhandlungen und das von der Kommission vorgelegte Beschäftigungsprogramm könnten sich als zwei wichtige Faktoren für eine wirtschaftliche Tendenzumkehr in der EU erweisen.

Was die anhand des impliziten BIP-Deflators gemessene Preisentwicklung betrifft, so ist die vierteljährliche Inflationsrate relativ konstant geblieben (+0,8 %), während die jährliche Preissteigerungsrate leicht rückläufig war (+3,1 %).

Bei den Bestandteilen des BIP muß auf den fünften aufeinanderfolgenden Rückgang der Investitionstätigkeit (-1,6 %) hingewiesen werden. Der private Verbrauch ebenso wie der Staatsverbrauch wiesen hingegen einen leichten Anstieg auf (+0,5 % bzw. +0,1 %).

Was die Situation in den einzelnen Mitgliedstaaten angeht, so liegen für Deutschland, Frankreich, Italien, die Niederlande, Spanien und das Vereinigte Königreich Angaben zum dritten Quartal 1993 vor. Während sich das Wirtschaftswachstum im Vereinigten Königreich und den Niederlanden beschleunigt hat (BIP +1,0 % bzw. +0,7 %), ist es in Deutschland und Frankreich nach wie vor schwach ausgeprägt (BIP jeweils +0,3 %). In Spanien war die Wachstumsrate nach vier negativen Quartalen zum erstenmal wieder leicht positiv (BIP +0,1 %). In Italien war das Wirtschaftswachstum dagegen im dritten Quartal 1993 erneut negativ (BIP -0,5 %), nachdem im zweiten Quartal eine deutliche Wiederbelebung der Wirtschaftstätigkeit zu verzeichnen war.

In den Vereinigten Staaten hat sich das Wirtschaftswachstum im dritten Quartal 1993 leicht beschleunigt (BIP +0,7 %). Gleichzeitig ging die vierteljährliche Inflationsrate erneut zurück (+0,4 %), während die jährliche Inflationsrate leicht anstieg (+2,7 %). Bei den Komponenten des BIP ist auf die positive Entwicklung des privaten Verbrauchs (+1,0 %) und der Investitionen (+1,8 %) hinzuweisen; der Staatsverbrauch dagegen war erneut rückläufig (-0,3 %).

In Japan lassen die Zahlen für das dritte Quartal 1993 eine Wiederbelebung der Wirtschaftstätigkeit (BIP +0,5 %) und einen Anstieg der vierteljährlichen wie auch der jährlichen Inflationsraten (+0,5 % bzw. +1,0 %) erkennen. Bei den Komponenten der Inlandsnachfrage ist eine relativ deutliche Zunahme sowohl der Investitionstätigkeit (+0,7 %) als auch des privaten Verbrauchs (+0,5 %) festzustellen.

PREISE : Die Jahresinflation für 1993 beträgt 3,3%

Die Jahresinflationsrate für die Europäische Union stieg zwischen Dezember 1992 und Dezember 1993 um 3,3%; dies ist die niedrigste Rate für ein Kalenderjahr seit 1987 (3,4%).

Zwischen November und Dezember 1993 blieb der EUR-12 Index unverändert, dank der Rückgänge der Preisindizes der Niederlande (-0,3%), Dänemarks (-0,2%) und Frankreichs (-0,1%) und der Tatsache, dass der italienische Index im Dezember unverändert blieb.

Ausserdem waren die Preissteigerungen in den übrigen Mitgliedstaaten eher niedrig: Luxemburg +0,1%, Belgien, Deutschland und das Vereinigte Königreich +0,2%, Portugal 0,3%; nur Spanien (+0,5%) und Griechenland (+1,0%) verzeichneten stärkere Anstiege, welche in beiden Ländern durch bedeutende Preissteigerungen für Lebensmittel verursacht wurden.

In aufsteigender Reihenfolge nach der derzeitigen Inflation geordnet, sind die Raten der einzelnen Mitgliedstaaten wie folgt :

	DEZ. '93	DEZ. '92		DEZ. '93	DEZ. '92
	DEZ. '93	DEZ. '91		DEZ. '92	DEZ. '91
Irland**	1,5%	2,4%	Luxemburg	3,6%	2,9%
Dänemark	1,5%	1,5%	Deutschland*	3,7%	3,7%
Niederlande	1,7%	2,9%	Italien	4,4%p	4,6%
Ver. Königreich	1,9%	2,6%	Spanien	4,9%	5,3%
Frankreich	2,1%p	1,9%	Portugal	6,4%	8,5%
Belgien	2,7%	2,4%	Griechenland	12,1%	14,3%

* Der Verbraucherpreisindex der Bundesrepublik Deutschland bezieht sich weiterhin auf den Gebietsstand vor dem 3. Oktober 1990

** November/November
p = vorläufig

Zur Zeit erfüllen Irland, Dänemark, die Niederlande, das Vereinigte Königreich, Frankreich und Belgien das Konvergenzkriterium des Vertrags über die Europäische Union, daß die jährlichen Inflationsraten der Mitgliedstaaten nicht mehr als 1,5 Prozentpunkte über den Durchschnitt der drei Länder mit der niedrigsten Inflation liegen dürfen.

Die Beitrittskandidaten Finnland (1,5%) und Norwegen (1,8%) erfüllen ebenfalls dieses Kriterium, während die Inflationsraten in Oesterreich (3,5%) und Schweden (4,0%) oberhalb dieser Grenze liegen.

Die Jahresinflationsraten für einige andere Nicht-EG-Länder waren : Vereinigte Staaten 2,7%, Japan 1,1%, Canada 1,9%, Schweiz 2,5%.

ARBEITSLOSIGKEIT IN DER EUROPÄISCHEN UNION

Eurostat schätzt die saisonbereinigte Arbeitslosenquote in der Europäischen Union für Dezember 1993 auf 10,9 %. Im Vergleich zum selben Monat des Vorjahres ergibt sich somit ein Anstieg um 1 Prozentpunkt, im Vergleich zum Dezember 1991 sogar um 2 Prozentpunkte.

Die jahresdurchschnittliche Arbeitslosenquote in der Europäischen Union insgesamt beträgt für 1993 10,5 %, eine Zunahme um 1,2 Prozentpunkte im Vergleich zu 1992 (9,4 %). In den Vereinigten Staaten liegt die jahresdurchschnittliche Quote 1993 mit 7,0 % um 0,4 Prozentpunkte unter dem Wert des Vorjahres (7,4 %). In Japan (Jahresdurchschnitt 1992: 2,2 %) dürfte die Quote 1993 nicht mehr als 2,4 % betragen.

Für 1993 wird die Zahl der Arbeitslosen laut ILO-Definition in der Europäischen Union im Jahresdurchschnitt auf 15,8 Millionen geschätzt. Das sind 1,8 Millionen Personen mehr als im Vorjahr. Von 1992 auf 1993 ist die Zahl der Arbeitslosen am stärksten in Spanien (+659 000, +23,5%), in Deutschland (+355 000, +25,8%), in Italien (+235 000, +9,5%) und in Frankreich (+210 000, +8,5%) gestiegen. In keinem der Mitgliedsländer der Union ist die Arbeitslosigkeit in diesem Zeitraum zurückgegangen. Die geringsten Zuwächse sind im Vereinigten Königreich und in Irland zu verzeichnen (+3%).

Diese Schätzung der Arbeitslosenquoten und der Zahl der Arbeitslosen schaltet Unterschiede in den nationalen Methoden zur Erfassung der Arbeitslosigkeit weitgehend aus.

Die Arbeitslosenquoten werden geschätzt durch Extrapolation der 1991er Ergebnisse der EU-Arbeitskräfteerhebung in allen Mitgliedstaaten. Die Einbeziehung der 1992er Ergebnisse, sobald verfügbar, kann zu Revisionen der Schätzungen führen.

INDUSTRIEPRODUKTION: Talsohle erreicht

Die Industrieproduktion in der Europäischen Union (EU) stagniert zur Zeit, d.h. die deutliche Schrumpfung des industriellen Output, die in den ersten sieben Monaten des Jahres 1993 zu beobachten war, ist zum Stillstand gekommen. Allerdings kann noch nicht von einer wirklichen Wiederbelebung gesprochen werden, wenn auch einige Anzeichen dafür zu beobachten sind.

In der EU betrug die Veränderungsrate des arbeitstäglich bereinigten Produktionsindex der Industrie gegenüber dem Wert des gleichen Monats ein Jahr zuvor im Oktober 1993 -3,1 %, von Januar bis Juli 1993 waren es immer mehr als -4 %, der Negativtrend schwächt sich also ab.

Betrachtet man die letzten drei Monate August bis Oktober 1993, so beläuft sich für die EU die Veränderungsrate des saisonbereinigten Produktionsindex gegenüber der Periode Mai bis Juli auf +0,3 %, für die Investitionsgüterindustrie beträgt der entsprechende Wert allerdings -0,3 %.

In Japan beträgt die entsprechende Veränderungsrate für die Industrieproduktion -1,1 %, in den USA ist mit +0,9 eine Festigung der Aufwärtsbewegung zu beobachten.

Für die einzelnen Mitgliedstaaten der Europäischen Union ergeben sich - soweit vorhanden - für die saisonbereinigte Industrieproduktion folgende Veränderungsrate August bis Oktober gegenüber den drei Vormonaten [in Klammern: entsprechende Veränderungsrate drei Monate zuvor]: Dänemark +4,7 % [-2,4 %], Spanien +1,2 % [0,6 %], Portugal

+1,8 % (geschätzt) [-2,6 %], Vereinigtes Königreich +0,6 % [1,4 %], Niederlande +0,9 % [-0,6 %], Griechenland +0,7 % [1,1 %], Belgien -0,3 % (geschätzt) [-0,6 %], West-Deutschland +0,1 % [-0,8 %], Italien -0,6 % [0,2 %], Frankreich -1,0 % [-0,8 %]. Das Konjunkturmodell ist also eher heterogen: Einige Länder zeigen Anzeichen eines Aufschwungs, in Deutschland scheint die Talsohle der Rezession erreicht, während in Frankreich und Italien noch deutliche Abwärtsbewegungen zu beobachten sind.

In den einzelnen Industriezweigen der EU zeigen die Elektroindustrie, die Nahrungsmittelindustrie und die Textilindustrie eher Zeichen eines Aufschwungs, während in der Metallerzeugung, der Automobilindustrie, der Feinmechanik und der chemischen Industrie eher Abschwunganzeichen zu verzeichnen sind.

AUSSENHANDEL: Ergebnisse für Juli 1993

Das kumulierte Defizit des Handels der Gemeinschaft mit Drittländern belief sich in den ersten sieben Monaten des Jahres 1993 auf 10,5 Mrd. ECU und war damit um knapp 28 Mrd. ECU niedriger als im gleichen Vorjahreszeitraum. Die Ausfuhren der Gemeinschaft in Drittländer stiegen dabei um 5,8 %, während die Einfuhren der EG um 4,4 % zurückgingen.

Das Handelsbilanzdefizit der Vereinigten Staaten stieg zwischen den ersten sieben Monaten des Jahres 1992 und dem gleichen Zeitraum des Jahres 1993 um rund 22 Mrd. ECU auf 62 Mrd. ECU. Die Einfuhren in die USA weiteten sich in Ecu um fast 18 % aus (+9,5 % in US-Dollar), und damit stärker als die Ausfuhren (+10,4 % in Ecu und +2,7 % in Dollar).

Der Überschuss des japanischen Außenhandels betrug im Zeitraum Januar-Juli 1993 knapp 60 Mrd. ECU, gegenüber 47 Mrd. ECU im gleichen Zeitraum des Vorjahres. Während sich die Ausfuhren Japans zwischen den ersten sieben Monaten des Jahres 1992 und dem gleichen Zeitraum des Jahres 1993 in Ecu um 15,3 % und in Dollar um 7,1 % erhöhten, weiteten sich die japanischen Einfuhren in Ecu um 10,3 % und in Dollar um 2,4 % aus. In Yen gingen die Ausfuhren um 1,4 % und die Einfuhren um 8,1 % zurück.

Was den Extra-EG-Handel der einzelnen Mitgliedstaaten betrifft, so schloß er im Zeitraum Januar-Juli 1993 in den meisten Fällen mit einem besseren Ergebnis ab als im gleichen Vorjahreszeitraum. Deutschland und Italien erzielten einen Überschuss von 9,6 Mrd. ECU bzw. 4,5 Mrd. ECU, was in beiden Fällen einer Verbesserung um 7 Mrd. ECU entsprach. Die dänische und die französische Handelsbilanz wiesen einen Positivsaldo von 1,7 Mrd. ECU bzw. 1,3 Mrd. ECU und damit ein um 1 Mrd. ECU bzw. 0,6 Mrd. ECU besseres Ergebnis als im Zeitraum Januar-Juli 1992 auf. Irland erzielte im Extra-EG-Handel einen Überschuss von 0,3 Mrd. ECU. Das Handelsbilanzergebnis der BLWU verbesserte sich gegenüber den ersten sieben Monaten des Jahres 1992 um 3,5 Mrd. ECU, war jedoch weiterhin negativ (-0,5 Mrd. ECU). Die Bilanz des Extra-EG-Handels Portugals und Griechenlands schloß mit einem Defizit von 1,4 Mrd. ECU bzw. 2,4 Mrd. ECU ab, das damit in der gleichen Größenordnung lag wie im Zeitraum Januar-Juli 1992. Der spanische und der niederländische Negativsaldo verringerten sich um 4,4 Mrd. ECU bzw. 3,2 Mrd. ECU auf 3,2 Mrd. ECU bzw. 8 Mrd. ECU. Das höchste Defizit im Extra-EG-Handel verzeichnete trotz einer Verbesserung um 0,8 Mrd. ECU das Vereinigte Königreich (-12,3 Mrd. ECU).

Eurostatistics - data for short-term economic analysis is a monthly publication aimed at providing, as rapidly as possible, the latest statistical data on the European Community as a whole (EUR12), each Member State, the United States and Japan.

Eurostatistics does not present all the statistics held by Eurostat, but a selection of the most relevant series on the economic situation.

Speed of publication and punctuality are the main features of this publication; that is why it is deliberately streamlined and does not contain any methodological notes, which are given in Eurostat's specialized publications.

The data published in *Eurostatistics* are taken from the ICG domain of Eurostat's on-line database, Cronos (instructions regarding on-line consultation may be found at the end of this publication). They are also available via the Commission host Eurobases in the Eurocron database.

Further information on Eurostat and its products can be obtained from the following addresses:

Unless otherwise stated, data for the Federal Republic of Germany, including West Berlin, as constituted prior to 3 October 1990.

EXCHANGE RATES: Danish krone returns to its former narrow band

The Danish krone appreciated past its former lower limit against the Deutschemark in the first days of January. In the six weeks following the imposition of wider (15%) bands within the exchange rate mechanism (ERM) of the EMS in August 1993, the krone depreciated by around 8% before starting to regain its position from the middle of September onwards. By January 24 it stood at 3.871 against the DM, slightly above its former narrow band limit of 3.9016.

This means that all former narrow band ERM currencies (Deutschemark, Dutch guilder, French and Belgian franc, Danish krone and Irish punt) are now trading within their pre-August 1993 bands. In late January, the punt was the strongest ERM currency, followed by the guilder and the mark.

The trend for lower European interest rates continued in January, with several central banks continuing their policy of decreasing rates frequently but by small amounts. Central bank headline rates fell, in some cases several times, in Belgium, Denmark, Spain, Ireland, the Netherlands and Portugal. In most cases these reductions had little effect on exchange rates.

Rates were reduced too in other European economic area (EEA) states: in mid-January the central bank of Finland announced that it was to reduce its base rate by 0.25% to 5.25% as of February 1, the lowest level since 1954. In Sweden the discount rate was reduced by 0.5% to 4.5% on January 4 and the marginal rate by 0.25% to 7.5% on January 24.

Following the resignation of Yegor Gaidar as first deputy Prime Minister, the Russian rouble touched several all-time lows against the dollar in mid-January. Gaidar had been widely regarded as the architect of Russia's economic reforms and thus his resignation made the reform process uncertain. At the beginning of January the rouble stood at around 1200 to the US\$, but had fallen as low as 1607 by January 19.

The Turkish central bank was forced to increase interest rates on January 20 to halt a run on the Turkish lira, which lost around 12% of its value the previous day. Interest rates were increased from 105 to 135%, which had the effect of strengthening the currency to 17000 against the US\$, compared to around 18500 the previous day. However, several days later it had slipped again to around 17900.

GOVERNMENT BOND YIELDS: Yields continue to fall

Government bond yields fell in most EC countries in December, and in many cases yields remain at or near all-time lows. The largest falls occurred in the UK (0.6%) and in Italy (0.5%). At 5.86%, the monthly average of government bond yields in France was below 6% in December for the first time for at least 20 years.

Now that data are in most cases available for December, it is interesting to compare the average level on bond yields in 1993 with those in 1992 and earlier. Given the pattern of European interest rates over the last 12 months, it is not surprising to find that the average level of government bond yields was lower in all EC countries in 1993 than in 1992. The largest falls have occurred in Spain, where yields averaged 12.2% in 1992 and 10.2% in 1993, and France, where the averages were 9.0% and 7.0% respectively.

Real (inflation adjusted) yields remain rather high in many EC countries, especially given their position in the economic cycle. Real yields stand at between 4 and 5% in Belgium, Denmark, France, Ireland, Italy and the United Kingdom. In most of these countries inflation is relatively low (it was around 1.5% in November in Denmark, Ireland and the UK), and although nominal yields have fallen, they remain high in relation to inflation.

MONEY SUPPLY: Faster growth in Greece, Spain and the UK

Monetary growth quickened in the last months of the year in Greece, Spain and the UK. In Greece, the annualised growth rate of M3 has accelerated for the five last months, to stand at 7.6% for the year to November, as compared to a rate of less than 4% in the summer.

In Spain, the annualised growth rate of ALP, an aggregate which is made up of the components of M3 plus the public's holdings of various other financial assets, has been accelerating since April of this year. Data for October indicate a growth rate of almost 10.5%, as compared with the target range of 4.5-7.5%.

In the United Kingdom growth in the aggregate M4 continues to edge upwards: in November the annualised growth rate was almost 5%, towards the middle of the Bank of England's monitoring range of 3-9%.

In Ireland however the period of high monetary growth rates seems to be coming to an end: the annualised growth rate of M3 fell from 31.5% in September to 26.7% in October and again to 23.6% in November.

FOREIGN OFFICIAL RESERVES: EUR 12's reserves stand at 264 thousand million ecu in September 1993

The total foreign official reserves of the EC countries stood at 265 thousand million ecus in September 1993, some 6% lower than at the end of 1992 but slightly higher than the level 12 months previously.

Germany holds the largest proportion of the EC's reserves (27%), followed by Spain (13%). Ireland's reserves doubled in the first nine months of 1993, to stand at just below 6 thousand million ecus, although they are the second smallest in the EC. In the same period, those of the Netherlands increased by over 50%.

QUARTERLY ACCOUNTS: Slight growth of the Community economy in the second quarter of 1993 (GDP +0.3%); inflation unchanged (+0.8%).

The second quarter of 1993 saw a growth – albeit slight – in the economy of the Union as a whole (GDP +0.3%). After two quarters of decline this result must be treated with great caution, as the slight increase in quarterly terms appears to be more a consolidation of the previous situation than a genuine indication of an upturn. This becomes clear after an analysis of the development of the economy in terms of trends, which shows a drop in economic growth (GDP -0.5%). On the basis of these results there would appear to be no indication of a reversal of the trend for the Community economy in the short term. In any case, the main economic indicators and the forecasts of DG II confirm that an economic upswing in 1993 appears unlikely. What is more, the signs of an upturn in the American economy are still confused and give no indication that the economy of this major country can act as a motor for a recovery in the world economy. Such a recovery remains dependent mainly on two strictly interlinked factors: an increase in domestic demand, particularly for

consumer goods, and a reduction in the primary public deficit in all countries. To this must be added, for the Community, a reduction in the continuing monetary tensions within the EMS. It must also be stressed that the adjustments to interest rates made by most Member States during the year, which have already led to a drop in rates, have not yet had any noticeable effect on the real economy. The recent positive outcome of the GATT negotiations and the employment promotion programme put forward by the Commission might well play an important role in reversing the economic trend in the Union.

Prices, measured by the implicit deflator of GDP, showed unchanged quarterly inflation (+0.8%), while there was a slight fall on an annual basis (+3.1%).

As regards the components of GDP, there was a fifth drop in succession in investment (-1.6%). On the other hand, consumption – both private and public – increased slightly (+0.5% and +0.1% respectively).

Data for the third quarter are available for Germany, Spain, France, Italy, the Netherlands and the United Kingdom. Both the United Kingdom and the Netherlands show an increase in economic growth (GDP +1.0% and +0.7% respectively). In Germany and France, however, growth is still weak (GDP +0.3% and +0.3% respectively), while in Spain there is tentative growth (GDP +0.1%) after four quarters of decline. In Italy, on the other hand, the promising growth of the second quarter was followed by a renewed decline (GDP -0.5%).

In the United States the third quarter of 1993 produced a slight upswing in economic growth (GDP +0.7%) accompanied by a renewed fall in quarterly inflation (+0.4%), although there was a slight increase on an annual basis (+2.7%). Among the components of GDP there was a positive trend in private consumption (+1.0%) and investment (+1.8%), while there was a renewed fall in public consumption (-0.3%).

In Japan the third quarter showed an increase in economic growth (GDP +0.5%) and an increase in inflation on both a quarterly and an annual basis (+0.5% and +1.0% respectively). Of the components of domestic demand, there was a more marked overall increase in private consumption than in investment (+0.7% and +0.5% respectively).

PRICES: Annual inflation for the EU at 3.3% in 1993

The inflation rate for the European Union as measured by the CPI rose by 3.3% between December 1992 and December 1993, which is the lowest rate for a calendar year since 1987 (3.4%).

Between November and December 1993 the monthly index for EUR 12 rose modestly by 0.1%, thanks to declines in the indices of the Netherlands (-0.3), Denmark (-0.2%) and France (-0.1%) and to the fact that there was no change in the Italian index.

Moreover price increases were low in most of the other Member States: Luxembourg 0.1%, Belgium, Germany and United Kingdom + 0.2%, Portugal + 0.3%; only Spain (+0.5%) and Greece (1.0%) recorded higher increases mainly due to substantial rises of food prices in both countries.

In ascending order of current inflation the rates by country for December 1993 and those for the corresponding period a year earlier are as follows:

	DEC. '93	DEC. '92		DEC. '93	DEC. '92
	DEC. '92	DEC. '91		DEC. '92	DEC. '91
Ireland **	1.5%	2.4%	Luxembourg	3.6%	2.9%
Denmark	1.5%	1.5%	Germany*	3.7%	3.7%
Netherlands	1.7%	2.9%	Italy	4.4%p	4.6%
United Kingdom	1.9%	2.6%	Spain	4.9%	5.3%
France	2.1%p	1.9%	Portugal	6.4%	8.5%
Belgium	2.7%	2.4%	Greece	12.1%	14.3%

* The CPI for the Federal Republic of Germany continues to reflect borders price to 3 October 1990.
** November/November
p = provisional

At present Ireland, Denmark, the Netherlands, the United Kingdom, France and Belgium fulfil the convergence criterion in the Treaty on European Union, that annual inflation rates of the Member States should not exceed by more than 1.5 percentage points the average of the three countries with the lowest rates.

On this basis the applicant Member States Finland (1.5%) and Norway (1.8%) meet also the criterion, whereas inflation rates in Austria (3.5%) and Sweden (4.0%) are above this limit.

The annual inflation rates of some other non-EC countries were: United States 2.7%, Japan 1.1%, Canada 1.9%, Switzerland 2.5%.

UNEMPLOYMENT IN THE EUROPEAN UNION

Eurostat estimates that the seasonally-adjusted unemployment rate in the European Union for the month of December 1993 was 10.9%, which represents an increase of +1.0% by comparison with the month of December 1992 and +2.0% by comparison with the month of December 1991.

The average unemployment rate for the whole of the European Union in 1993 is estimated at 10.5%, which is 1.1% higher than the 1992 figure of 9.4%. The 1993 average in the United States is estimated at 7.0%, a decrease of -0.4% in relation to 1992 (7.4%). The average unemployment rate for Japan was 2.2% in 1992 and will not exceed 2.4% in 1993.

The annual average for the number of persons unemployed in the European Union according to the ILO definition is estimated at 15.8 million, which is 1.9 million more than the figure for the preceding year (13.9 million).

The largest increases between 1992 and 1993 were recorded in Spain (+659 000, +23.5%), the Federal Republic of Germany (+355 000, +25.8%), Italy (+235 000, +9.5%) and France (+210 000, +8.5%). Unemployment did not decrease in any of the European Union Member States. The smallest increases took place in the United Kingdom and Ireland, at 3% in each case.

The unemployment rate and the number of unemployed persons are estimated after taking account of the differences between national methods of recording unemployment.

The rate of unemployment is estimated by extrapolating the 1991 results of the labour force surveys for all the Member States. The introduction of the 1992 results, when available, will probably lead to a revision of the estimates.

INDUSTRIAL PRODUCTION: Recession bottoms out

Industrial production in the European Union (EU) is currently stagnating, in other words, the steep downturn in industrial output seen in the first seven months of 1993 has come to a halt. However, there can be no talk of a real revival so far, although there are a few indications of one.

The rate of change in the industrial production index, adjusted for working days, was -3,1% down for the EU in October 1994 over the corresponding month of the previous year. From January to July 1993 it had fallen by more than -4%, the downturn is therefore losing momentum.

If one takes the figures for the last three available months, August to October 1993, the rate of change in the seasonally-adjusted production index for the EU was +0,3% compared with that of the period May to July; for the capital goods industry, however, the figure is -0,3%.

In Japan, the corresponding rate of change for industrial production is -1,1%; the figure of +0,9% for the USA indicates a stabilisation of the upward trend.

At Member State level, the rates of change, where available, for August to October compared with the previous three months are as follows for the seasonally-adjusted industrial production index (figures in brackets: rates of change three months previously): Denmark +4,7% (-2,4%), Spain +1,2% (0,6%), Portugal +1,8% (estimate) (-2,6%), United Kingdom +0,6% (1,4%), Netherlands +0,9% (0,6%), Greece +0,7% (1,1%), Belgium -0,3% (estimate) (-0,6%), Germany +0,1% (-0,8%), Italy -0,6% (0,2%), France -1,0% (-0,8%). The economic picture is thus a mixed one with some countries showing signs of an upturn: in Germany the recession appears to have bottomed out, whilst in France and Italy the trend is still clearly downward.

In the EU's individual industrial sectors, the electrical, foodstuffs and textile industries show signs of an upturn whereas in metal production, the automobile industry, light engineering and the chemical industry there are signs of a downturn.

EXTERNAL TRADE

The Community's external trade recorded a cumulative deficit of ECU 10.5 billion from January to July 1993, an improvement of nearly ECU 28 billion on the same period in 1992. Exports to non-Community countries in the period under review were 5.8% higher than in the first seven months of 1993, while imports were 4.4% lower.

The United States' cumulative trade deficit from January to July 1993 totalled ECU 62 billion, some ECU 22 billion higher than in the corresponding period of 1992. Imports were nearly 18% up in ecu terms (9.5% in US\$), while exports grew more slowly (10.4% in ecu, 2.7% in US\$).

The Japanese trade surplus came close to ECU 60 billion for the first seven months of 1993, as against ECU 47 billion for the same period of 1992. Japanese exports were significantly higher: up 15.3% in ecus or 7.1% in US\$, while imports fell by 10.3% in ecus or 2.4% in US\$. In yen terms exports were 1.4% lower, while the decrease in imports was 8.1%.

Most of the individual Member States' trade balances with non-Community countries showed an improvement in the first seven months of 1993 when compared with the figures for the same period in 1992. Germany's trade with non-Community countries generated a cumulative surplus of ECU 9.6 billion, while Italy's surplus was ECU 4.5 billion, both countries showing an ECU 7 billion improvement on the January to July figures for 1992. Denmark and France generated surpluses of ECU 1.7 billion and ECU 1.3 billion, an improvement of ECU 1.0 billion and ECU 0.6 billion respectively. Ireland's cumulative surplus totalled ECU 0.3 billion. The BLEU balance improved by 3.5 billion in comparison with the same period in 1992, but continued to show a deficit of ECU 0.5 billion. Portugal and Greece generated deficits similar to those recorded in the first seven months of 1992, i.e. ECU 1.4 billion and ECU 2.4 billion respectively. Spain and the Netherlands saw their deficits reduced by ECU 4.4 billion and ECU 3.2 billion to total ECU 3.2 billion and ECU 8.0 billion respectively for the first seven months of 1993. The United Kingdom is the country with the largest deficit: ECU 12.3 billion, despite an improvement of ECU 0.8 billion.

Eurostatistiques - Données pour l'analyse de la conjoncture est une publication mensuelle qui a pour but de fournir dans les meilleurs délais les données statistiques les plus récentes pour la Communauté européenne en tant qu'ensemble (EUR12), pour les pays membres ainsi que pour leurs principaux partenaires extra-communautaires (États-Unis d'Amérique et Japon).

Eurostatistiques ne publie pas d'une manière exhaustive toutes les statistiques disponibles auprès d'Eurostat, mais les plus importantes parmi celles-ci.

Cette publication se veut rapide et facilement maniable. Pour cette raison, elle ne comporte pas de notes méthodologiques, qui sont par ailleurs disponibles dans les publications spécialisées d'Eurostat.

Les données publiées dans *Eurostatistiques* proviennent du domaine ICG de la base de données Cronos (les instructions pour le mode de consultation on-line se trouvent à la fin de cette publication). Ces données sont aussi disponibles dans la base de données Eurocron, accessible par l'intermédiaire du serveur Eurobases de la Commission.

TAUX DE CHANGE: Retour de la couronne danoise aux marges de fluctuation étroites antérieures

Les premiers jours de janvier, la couronne danoise s'est appréciée par rapport au mark, repassant le seuil de l'ancienne bande étroite. Au cours des six semaines ayant suivi l'imposition en août 1993 de marges de fluctuation plus larges (15 %) au sein du mécanisme des taux de change (MTC) du SME, la couronne s'est dépréciée de 8 % environ, avant de regagner du terrain à partir de la mi-septembre. Le 24 janvier, elle était à 3,871 par rapport au DM, c'est-à-dire légèrement au-dessus du cours plancher de l'ancienne bande étroite de 3,9016.

Toutes les monnaies de l'ancienne bande étroite du MTC (mark, florin, franc français, franc belge, couronne danoise et livre irlandaise) ont donc actuellement retrouvé leurs marges de fluctuation d'avant août 1993. Fin janvier, la livre irlandaise était la monnaie la plus forte du MTC, suivie par le florin et le mark.

La tendance à la baisse des taux d'intérêts européens s'est maintenue en janvier, plusieurs banques centrales poursuivant leur politique de baisse fréquente mais très faible des taux. Les banques centrales ont diminué leurs taux directeurs, dans certains cas à plusieurs reprises, en Belgique, au Danemark, en Espagne, en Irlande, aux Pays-Bas et au Portugal. Le plus souvent, ces réductions ont eu peu d'effet sur les taux de change.

Les taux ont été également réduits dans d'autres Etats de l'Espace économique européen (EEE): mi-janvier, la banque centrale de Finlande a annoncé qu'à partir du 1^{er} février, elle ramènerait son taux de base à 5,25 %, soit une réduction de 0,25 %, niveau le plus bas depuis 1954. En Suède, le taux d'escompte a été réduit de 0,5 % à 4,5 % le 4 janvier, et le taux marginal de 0,25 % à 7,5 %, le 24 janvier.

A la suite de la démission de Egor Ga?dar de son poste de vice-Premier ministre, le rouble est tombé à son niveau absolu le plus bas par rapport au dollar à la mi-janvier. Ga?dar avait été considéré par beaucoup comme l'architecte de la réforme économique en Russie et sa démission a rendu le processus de réforme incertain. Au début de janvier, le rouble s'échangeait à environ 1200 par rapport au dollar américain mais il est tombé à 1607 le 19 janvier.

La banque centrale de Turquie a été contrainte d'augmenter ses taux d'intérêts le 20 janvier afin de stopper un mouvement spéculatif contre la lire turque qui avait perdu 12 % environ de sa valeur le jour précédent. Les taux d'intérêts ont été portés de 105 à 135 %, ce qui a eu pour effet de consolider la devise à 17 000 par rapport au dollar américain contre 18 500 environ le jour précédent. Toutefois, quelques jours plus tard, elle s'échangeait à nouveau à 17900 environ.

RENDEMENT DES OBLIGATIONS D'ETAT: la baisse des rendements se poursuit

En décembre, les rendements des obligations d'Etat ont diminué dans presque tous les pays CE et, dans de nombreux cas, ils sont à leur minimum absolu, ou proches de ce minimum. Les baisses les plus importantes sont intervenues au Royaume-Uni (0,6 %) et en Italie (0,5 %). En France, la moyenne mensuelle des rendements des obligations d'Etat a été, pour la première fois depuis 20 ans au moins, inférieure à 6 % en décembre (5,86 %).

Presque toutes les données pour décembre étant maintenant disponibles, il est intéressant de comparer le niveau moyen des rendements d'Etat en 1993 par rapport à ceux de 1992 et années antérieures. Compte tenu de l'évolution des taux d'intérêt européens au cours des 12 derniers mois, il n'est pas surprenant de constater que le niveau moyen des rendements a été, dans tous les pays CE, plus faible en 1993 qu'en 1992. Les plus fortes diminutions ont été enregistrées en Espagne, où les rendements ont été de 12,2 % en moyenne en 1992 et de 10,2 % en 1993 et, en France, où les moyennes étaient de 9,0 % et 7,0 % respectivement.

Les rendements réels (corrégés des effets de l'inflation) restent plutôt élevés dans de nombreux pays CE, notamment compte tenu de leur position dans le cycle économique. Les rendements réels se situaient entre 4 et 5 % en Belgique, au Danemark, en France, en Irlande, en Italie et au Royaume-Uni. Dans la plupart de ces pays, l'inflation est relativement faible (en novembre, elle était de 1,5 % environ au Danemark, en Irlande et au Royaume-Uni) et bien que les rendements nominaux aient fléchi, ils restent élevés par rapport à l'inflation.

MASSE MONETAIRE: croissance plus forte en Grèce, en Espagne et au Royaume-Uni

La croissance monétaire s'est accélérée les derniers mois de l'année en Grèce, en Espagne et au Royaume-Uni. En Grèce, le taux de croissance annualisé de M3 s'est accéléré les cinq derniers mois, pour atteindre 7,6 % pour l'année (de novembre à novembre) comparé à un taux de moins de 4 % en été.

En Espagne, le taux de croissance annualisé des ALP, agrégat constitué des composantes de M3 auxquelles s'ajoutent différents autres avoirs financiers détenus par le public, s'est accéléré depuis avril de cette année. Les données pour octobre indiquent un taux de croissance de près de 10,5 %, comparé à l'objectif de 4,5-7,5 %.

Au Royaume-Uni, l'agrégat M4 continue de suivre une courbe ascendante: en novembre, avec près de 5 %, le taux de croissance annualisé se situait vers le milieu de la fourchette de 3-9 % fixée par la Banque d'Angleterre.

En Irlande, toutefois, la période des taux de croissance monétaires élevés semble toucher à sa fin: le taux de croissance annualisé de M3 est tombé de 31,5 % en septembre à 26,7 % en octobre et à 23,6 % en novembre.

RESERVES DE CHANGE: en septembre 1993, les réserves de change d'EUR 12 se situaient à 264 000 millions d'écus

Les réserves de change totales des pays CE atteignaient 265 000 millions d'écus en septembre 1993, quelque 6 % de moins qu'à la fin de 1992 mais légèrement plus qu'en septembre 1992.

L'Allemagne détient la part la plus importante des réserves CE (27 %), suivie par l'Espagne (13 %). Les réserves de l'Irlande ont doublé durant les neuf premiers mois de 1993 et sont de peu inférieures à 6000 millions d'écus, bien que venant à l'avant-dernier rang dans la CE. Au cours de la même période, les réserves des Pays-Bas ont progressé de plus de 50 %.

COMPTES TRIMESTRIELS: Au cours du deuxième trimestre 1993: faible croissance de l'économie communautaire (PIB +0,3 %); inflation inchangée (+0,8 %).

Le deuxième trimestre 1993 a été caractérisé, pour l'économie de l'Union dans son ensemble, par une croissance, même si faible de la production (PIB +0,3 %). Ce résultat, après deux trimestres négatifs, doit être considéré avec beaucoup de prudence. En effet, la légère croissance constatée en terme trimestriel semble plutôt être la conséquence d'une consolidation de la situation précédente plutôt qu'un véritable signal de reprise. Ceci devient clair si on analyse l'évolution de l'économie en termes tendanciels où on peut constater un nouveau fléchissement de la croissance économique (PIB -0,5 %). Ces résultats semblent indiquer qu'une inversion de tendance pour l'économie communautaire ne semble pas être envisageable à court terme. D'ailleurs les indicateurs économiques les plus importants, ainsi que les prévisions de la DG II confirment qu'une reprise économique au cours de 1993 semble non réaliste. D'autre part, les signaux de reprise de l'économie américaine sont toujours contradictoires et ne permettent pas d'identifier dans l'économie de ce grand pays une capacité de guide dans la reprise de l'économie mondiale. Cette reprise reste surtout liée à deux facteurs strictement interdépendants: la reprise de la demande interne, surtout des biens de consommation finale, la réduction du déficit primaire public dans tous les pays. A ces conditions, il faut rajouter, pour la Communauté, une réduction des tensions monétaires qui continuent à caractériser le SME. De plus il faudra souligner que la manœuvre sur les taux d'intérêt, entreprise par la plupart des Etats membres au cours de l'année et qui a déjà déterminé une baisse importante de ceux-ci, n'a pas encore eu des répercussions remarquables sur l'économie réelle. Les récents développements positifs pour les accords du GATT ainsi que le programme de développement de l'occupation présentée par la Commission pourraient représenter deux éléments importants pour déterminer une inversion de tendance pour l'économie de l'Union.

En ce qui concerne l'évolution des prix, mesurée par le déflateur implicite du PIB, on enregistre une stabilité de l'inflation trimestrielle (+0,8 %) tandis qu'en rythme annuel on constate une légère baisse (+3,1 %).

En ce qui concerne les composantes du PIB, il faut souligner le cinquième fléchissement consécutif des investissements (-1,6 %). Par contre, la consommation, tant privée que publique, présente une légère reprise (+0,5 % et +0,1 % respectivement).

En ce qui concerne la situation dans les Etats membres, on dispose de données du troisième trimestre pour l'Allemagne, l'Espagne, la France, l'Italie, les Pays-Bas et le Royaume-Uni. Au Royaume-Uni ainsi qu'aux Pays-Bas on observe une accélération de la croissance économique (PIB +1,0 % et 0,7 % respectivement). Par contre en Allemagne et en France on observe une croissance toujours faible (PIB +0,3 % et +0,3 % respectivement) lorsqu'en Espagne, après quatre trimestres de fléchissement, on observe une reprise timide (PIB +0,1 %). Par contre en Italie, après la bonne reprise enregistrée au cours du deuxième trimestre, on doit enregistrer un nouveau fléchissement (PIB -0,5 %).

Aux Etats-Unis, au cours du troisième trimestre 1993, on constate une légère accélération de la croissance économique (PIB +0,7 %) accompagnée par une nouvelle baisse de l'inflation trimestrielle (+0,4 %), tandis qu'en rythme annuel on constate une légère reprise (+2,7 %). Parmi les composantes du PIB, il faut mettre en évidence l'évolution positive de la consommation privée (+1,0 %) et des investissements (+1,8 %), tandis que la consommation publique présente un nouveau fléchissement (-0,3 %).

Pour le Japon, au cours du troisième trimestre 1993, on constate une reprise de la croissance économique (PIB +0,5 %) accompagnée par une reprise de l'inflation tant trimestrielle qu'annuelle (+0,5 % et +1,0 % respectivement). Parmi les composantes de la demande interne on observe une reprise généralisée plus prononcée pour la consommation privée pour les investissements (+0,7 % et +0,5 % respectivement).

PRIX: Inflation annuelle de l'UE à 3,3 % en 1993

Le taux d'inflation de l'Union Européenne mesuré par l'IPC a augmenté de 3,3 % entre décembre 1992 et décembre 1993; ce qui est le taux le plus bas pour une année civile depuis 1987 (3,4 %).

Entre novembre et décembre 1993, l'indice mensuel de l'EUR 12 a augmenté légèrement de 0,1 % grâce à des reculs des indices des Pays-Bas (-0,3 %), du Danemark (-0,2 %) et de la France (-0,1 %) et au fait que l'indice italien n'a pas changé pendant cette période.

En outre les accroissements ont été faibles dans la plupart des autres Etats Membres: Luxembourg +0,1 %, Belgique, Allemagne et Royaume-Uni + 0,2 %, Portugal + 0,3 %, seulement l'Espagne (+0,5 %) et la Grèce ont enregistré des accroissements plus forts, principalement dus à des hausses substantielles des produits alimentaires dans ces deux pays.

Dans l'ordre croissant de l'inflation actuelle les taux par pays pour décembre 1993 et ceux pour la période correspondante d'il y a un an sont les suivants :

	DEC. '93 DEC. '92	DEC. '92 DEC. '91		DEC. '93 DEC. '92	DEC. '92 DEC. '91
Irlande**	1,5 %	2,4 %	Luxembourg	3,6 %	2,9 %
Danemark	1,5 %	1,5 %	Allemagne *	3,7 %	3,7 %
Pays-Bas	1,7 %	2,9 %	Italie	4,4 %p	4,6 %
Royaume-Uni	1,9 %	2,6 %	Espagne	4,9 %	5,3 %
France	2,1 %p	1,9 %	Portugal	6,4 %	8,5 %
Belgique	2,7 %	2,4 %	Grèce	12,1 %	14,3 %

* l'IPC pour la République Fédérale d'Allemagne continue à se rapporter à la situation territoriale avant le 3 octobre 1990.

** novembre/novembre

p = provisoire

Actuellement l'Irlande, le Danemark, les Pays-Bas, le Royaume-Uni, la France et la Belgique remplissent le critère de convergence prévu dans le Traité sur l'Union Européenne, selon lequel les taux d'inflation annuelle ne doivent pas dépasser de plus de 1,5 % la moyenne des trois pays avec les taux les plus bas.

Sur cette base, parmi les candidats à l'adhésion, la Finlande (1,5 %) et la Norvège (1,8 %) remplissent ces conditions, tandis que les taux d'inflation en Autriche (3,5 %) et en Suède (4,0 %) sont au-dessus de cette limite.

Les taux d'inflation annuelle de quelques autres pays hors UE sont : Etats-Unis 2,7 %, Japon 1,1 %, Canada 1,9 %, Suisse 2,5 %.

LE CHOMAGE DANS L'UNION EUROPEENNE

Eurostat estime que, dans l'Union Européenne, le taux de chômage corrigé des variations saisonnières atteint 10,9 % au mois de décembre 1993, en hausse de +1,0 % par rapport au mois de décembre 1992 et de +2,0 % par rapport au mois de décembre 1991.

La moyenne annuelle du taux de chômage dans l'ensemble de l'Union européenne est estimée à 10,5 % en 1993, en augmentation de +1,1 % par rapport à celle de l'année 1992 (9,4 %). Aux Etats-Unis, la moyenne 1993 est estimée à 7,0 % en diminution de -0,4 % par rapport à 1992 (7,4 %). Au Japon (2,2 % en moyenne 1992), le taux de chômage moyen pour 1993 ne dépassera pas 2,4 %.

Pour 1993 (moyenne annuelle), le nombre des chômeurs selon la définition du BIT pour l'ensemble de l'Union européenne est estimé à 15,8 millions de personnes, en hausse de plus de 1,9 million par rapport à l'année précédente (13,9 millions).

Entre 1992 et 1993, c'est en Espagne (+659 000, +23,5 %), en République fédérale d'Allemagne (+355 000, +25,8 %), en Italie (+235 000, +9,5 %), et en France (+210 000, +8,5 %) que les augmentations les plus importantes ont eu lieu. Le chômage n'a baissé dans aucun des Etats membres de l'Union. Les hausses les moins importantes se sont produites au Royaume-Uni et en Irlande (+3 %).

Le taux de chômage et le nombre de chômeurs sont estimés après correction des différences dans les méthodes nationales de recensement du chômage.

Le taux de chômage est estimé en extrapolant les résultats 1991 des enquêtes sur les forces de travail pour tous les Etats membres. L'introduction des résultats de l'année 1992, dès qu'ils seront disponibles, entraînera probablement une révision des estimations.

PRODUCTION INDUSTRIELLE: Au creux de la récession

La production industrielle de l'Union européenne (UE) est aujourd'hui arrivée à une stagnation qui se traduit par l'arrêt du net recul de la production industrielle observé au cours des sept premiers mois de l'année 1993. Néanmoins, il ne saurait être question d'une relance réelle en dépit de certains signes positifs.

Pour l'UE, le taux de variation de l'indice de la production industrielle corrigé du nombre de jours ouvrables par rapport à la valeur du mois correspondant de l'année précédente a été de -3,1 % en octobre 1993, alors que ce taux a dépassé -4 % de janvier à juillet 1993, ce qui témoigne de l'affaiblissement de la tendance défavorable.

Si l'on considère les chiffres des trois derniers mois disponibles (août à octobre 1993), on constate que pour l'UE, le taux de variation de l'indice de production corrigé des variations saisonnières est de +0,3 % par rapport aux trois mois précédents (mai à juillet 1993), alors que le taux de variation correspondant est de -0,3 % pour l'industrie des biens d'investissement.

Au Japon, le taux de variation correspondant de la production industrielle est de -1,1 % et aux Etats-Unis, le taux de variation de +9 % confirme la tendance à la relance.

Dans les différents Etats membres de l'Union européenne, les taux de variation - disponibles - corrigés des variations saisonnières de la production industrielle observés

d'août à octobre 1993 par rapport aux trois mois précédents sont les suivants [entre parenthèses: les taux de variation correspondants des trois mois précédents]: Danemark +4,7 % [-2,4 %], Espagne +1,2 % [0,6 %], Portugal +1,8 % (estimation) [-2,6 %], Royaume-Uni +0,6 % [1,4 %], Pays-Bas +0,9 % [-0,6 %], Grèce +0,7 % [1,1 %], Belgique -0,3 % (estimation) [-0,6 %], Allemagne de l'Ouest +0,1 % [-0,8 %], Italie -0,6 % [0,2 %], France -1,0 % [-0,8 %]. On constate donc que la situation économique est hétérogène: si certains pays manifestent des signes de reprise, l'Allemagne semble avoir atteint le creux de la récession, tandis que la France et l'Italie continuent de manifester de nets signes de récession.

Dans les différentes branches économiques de l'UE, l'industrie électrique, l'industrie alimentaire et l'industrie textile manifestent davantage de signes de redressement, alors que dans la métallurgie, la construction automobile, la mécanique de précision et l'industrie chimique, les indicateurs confirment la poursuite de la récession.

COMMERCE EXTERIEUR

Le commerce extérieur de la Communauté affiche un déficit cumulé de 10,5 Mrds d'écus de janvier à juillet 1993, allégé de près de 28 Mrds d'écus par rapport à la même période de 1992. Les exportations extra-communautaires progressent de 5,8 % entre les sept premiers mois de 1992 et de 1993, tandis que les importations sont en retrait de 4,4 %.

Le déficit cumulé des échanges des Etats-Unis se creuse de quelque 22 Mrds d'écus par rapport à janvier-juillet 1992: il atteint 62 Mrds d'écus pour les sept premiers mois de 1993. Les importations croissent de près de 18 % en écus (de 9,5 % en dollars), plus vite que les exportations (10,4 % en écus et 2,7 % en dollars).

L'excédent commercial du Japon approche 60 Mrds d'écus pour les sept premiers mois de 1993, contre 47 Mrds d'écus pour la même période de 1992. Les exportations japonaises sont en progression nette de janvier-juillet 1992 à 1993: 15,3 % en écus, 7,1 % en dollars, alors que les importations marquent 10,3 % en écus, 2,4 % en dollars. Les exportations en termes de yens s'infléchissent à la baisse de 1,4 %, contre 8,1 % pour les importations en yens.

La plupart des soldes extra-communautaires des Pays Membres est en amélioration entre les sept premiers mois de 1992 et de 1993. L'excédent cumulé dégagé par les échanges extra de l'Allemagne atteint 9,6 Mrds d'écus, celui de l'Italie est de 4,5 Mrds d'écus. Les soldes extra de ces deux pays progressent de 7 Mrds d'écus chacun comparés à leurs niveaux de janvier-juillet 1992. Le Danemark et la France sont excédentaires de 1,7 et 1,3 Mrd d'écus, en progrès respectifs d'un milliard d'écus et 0,6 Mrd d'écus. Le solde cumulé des échanges extra de l'Irlande est de 0,3 Mrd d'écus. La balance de l'UEBL s'améliore de 3,5 Mrds d'écus par rapport à janvier-juillet 1992, mais reste déficitaire d'un demi-milliard d'écus. Les échanges du Portugal et de la Grèce se soldent par des déficits proches de ceux des sept premiers mois de 1992, soit 1,4 et 2,4 Mrds d'écus. L'Espagne et les Pays-Bas voient leurs déficits extra s'alléger de 4,4 Mrds d'écus et 3,2 Mrds d'écus; ils atteignent respectivement 3,2 et 8 Mrds d'écus pour les sept premiers mois de 1993. Le Royaume-Uni est le plus fortement déficitaire: -12,3 Mrds d'écus, malgré une amélioration de 0,8 Mrd d'écus.

„On line“-Abfrage

Jede Zeitreihe ist durch einen neunstelligen numerischen Kode gekennzeichnet, der seinerseits in Unterkodes gegliedert ist, welche – im Falle von „Eurostatistik“ – das Land, den Sektor, die Tabelle, die Einheit und die Periodizität bezeichnen.
Die Bedeutung der einzelnen Unterkodes ist der nachstehend aufgeführten Tabelle zu entnehmen.

Land XX	Sektor XX	Tabelle XXXX	Periodizität und Einheit X
06 EUR 12* 03 EUR 10 11 D* 14 F 16 I 18 NL 21 UEBL 22 B 24 L 26 UK 28 IRL 30 DK 32 E 34 GR 36 P 42 USA 46 JAP	93	Variablen Tabellen XXXX vierstelliger Wert, der im Titel jeder Tabelle erscheint	0 jährlich, Angaben in Prozent 1 vierteljährlich, Angaben in Prozent 2 monatlich, Angaben in Prozent 3 jährlich, Indexangaben (1985 = 100) 4 vierteljährlich, Indexangaben (1985 = 100) 5 monatlich, Indexangaben (1985 = 100) 6 jährlich, Angaben in absoluten Werten 7 vierteljährlich, Angaben in absoluten Werten 8 monatlich, Angaben in absoluten Werten 9 Gewicht, EUR 10 = 100 bzw. EUR 12 = 100

* Territoriale Aufteilung vor dem 3. 10. 90: 02 für EUR 12, 12 für D.

Beispiele: Will man die monatliche Arbeitslosigkeit (in absoluten Zahlen) von Frankreich gemäß Tabelle 0304 dieser Veröffentlichung erfahren, so braucht man nur den Kode 14 93 0304 8 einzugeben.

‘On-line’ consultation

Each time series is identified by a nine-digit code broken down into subcodes, which in the case of Eurostatistics, represent the country, sector, table unit and periodicity. The significance of the different subcodes may be found in the table below.

Country XX	Sector XX	Table XXXX	Periodicity and unit X
06 EUR 12* 03 EUR 10 11 D* 14 F 16 I 18 NL 21 UEBL 22 B 24 L 26 UK 28 IRL 30 DK 32 E 34 GR 36 P 42 USA 46 JAP	93	Table by indicator XXXX 4-digit value quoted in the title of each table	0 annual in % 1 quarterly in % 2 monthly in % 3 annual index 1985 = 100 4 quarterly index 1985 = 100 5 monthly index 1985 = 100 6 annual absolute value 7 quarterly absolute value 8 monthly absolute value 9 weighting EUR 10 = 100 or EUR 12 = 100

* data for the territorial situation before 3. 10. 90: 02 for EUR 12, 12 for D.

Consultation example: to know the monthly unemployment (absolute figures) of France as is shown in Table 0304 of this publication, the code 14 93 0304 8 should be formed.

Mode de consultation «on-line»

Chaque série chronologique est identifiée par un code à neuf chiffres structuré en sous-codes représentant, dans le cas d'Eurostatistiques, le pays, le secteur, le tableau, l'unité et la périodicité. On trouvera dans le tableau ci-dessous la signification des différents sous-codes.

Pays XX	Secteur XX	Tableau XXXX	Périodicité et unité X
06 EUR 12* 03 EUR 10 11 D* 14 F 16 I 18 NL 21 UEBL 22 B 24 L 26 UK 28 IRL 30 DK 32 E 34 GR 36 P 42 USA 46 JAP	93	Tableaux par variable XXXX valeur à 4 chiffres figurant dans le titre de chaque tableau	0 annuelle exprimée en pourcentage 1 trimestrielle exprimée en pourcentage 2 mensuelle exprimée en pourcentage 3 annuelle exprimée en indice 1985 = 100 4 trimestrielle exprimée en indice 1985 = 100 5 mensuelle exprimée en indice 1985 = 100 6 annuelle exprimée en valeur absolue 7 trimestrielle exprimée en valeur absolue 8 mensuelle exprimée en valeur absolue 9 pondération EUR 10 = 100 ou EUR 12 = 100

* données pour la situation territoriale avant le 3. 10. 90: 02 pour EUR 12, 12 pour D.

Exemple de consultation: pour connaître le chômage mensuel (chiffres absolus) de la France, tel qu'il figure au tableau 0304 de cette publication, il suffit d'appeler le code 14 93 0304 8;
