Las publicaciones de Eurostat están clasificadas por temas y por series. La clasificación se encuentra al final de la obra. Para mayor información sobre las publicaciones, rogamos se pongan en contacto con Eurostat. Para los pedidos, diríjense a las oficinas de venta cuyas direcciones figuran en la página interior de la contracubierta.

Eurostats publikationer er klassificeret efter emne og serie. En oversigt herover findes bag i hæftet. Yderligere oplysninger om publikationerne kan fås ved henvendelse til Eurostat. Bestilling kan afgives til de salgssteder, der er anført på omslagets side 3.

Die Veröffentlichungen von Eurostat sind nach Themenkreisen und Reihen gegliedert. Die Gliederung ist hinten in jedem Band aufgeführt. Genauere Auskünfte über die Veröffentlichungen erteilt Eurostat. Ihre Bestellungen richten Sie bitte an die Verkaufsbüros, deren Anschriften jeweils auf der dritten Umschlagseite der Veröffentlichungen zu finden sind.

Οι εκδόσεις της Eurostat ταξινομούνται κατά θέμα και κατά σειρά. Η ακριβής ταξινόμηση αναφέρεται στο τέλος κάθε έκδοσης. Για λεπτομερέστερες πληροφορίες σχετικά με τις εκδόσεις, μπορείτε να απευθύνεσθε στην Eurostat.

Για τις παραγγελίες μπορείτε να απευθύνεσθε στα γραφεία πώλησης, των οποίων οι διευθύνσεις αναγράφονται στη σελίδα 3 του εξωφύλλου.

Eurostat's publications are classified according to themes and series. This classification is indicated at the end of the publication. For more detailed information on publications, contact Eurostat. Orders are obtainable from the sales offices mentioned on the inside back cover.

Les publications d'Eurostat sont classées par thème et par série. Cette classification est précisée à la fin de l'ouvrage. Pour des informations plus détaillées sur les publications, contactez Eurostat. Pour les commandes, adressez-vous aux bureaux de vente dont les adresses sont indiquées à la page 3 de la couverture.

Le pubblicazioni dell'Eurostat sono classificate per tema e per serie. Tale classificazione è precisata alla fine dell'opera. Per informazioni più dettagliate sulle pubblicazioni rivolgersi all'Eurostat. Per eventuali ordinazioni rivolgersi a uno degli uffici di vendita i cui indirizzi figurano nella 3^a pagina della copertina.

De publikaties van Eurostat zijn ingedeeld naar onderwerp en serie. Deze indeling is achter in het boek opgenomen. Voor nadere informatie over de publikaties kunt u zich wenden tot Eurostat. Gelieve bestellingen op te geven bij de verkoopbureaus, waarvan de adressen op bladzijde 3 van de omslag zijn vermeld.

Printed in the FR of Germany

Mit der monatlich erscheinenden Veröffentlichung *Eurostatistik - Daten zur Konjunkturanalyse* werden innerhalb kürzester Frist die neuesten statistischen Daten über die Europäische Gemeinschaft als Ganzes (EUR12), über jedes Mitgliedsland sowie über die Vereinigten Staaten und Japan bekanntgegeben.

Eurostatistik enthält nicht die Gesamtheit des bei Eurostat verfügbaren statistischen Materials, sondern eine Auswahl der relevantesten Reihen über die konjunkturelle Entwicklung.

Schnelligkeit und Pünktlichkeit sind die wichtigsten Vorzüge dieser Veröffentlichung.

Aus diesem Grunde wurde sie im Umfang bewußt klein gehalten und enthält keine Anmerkungen zur Methodik, die im übrigen in den spezialisierten Veröffentlichungen von Eurostat zu finden sind.

Die in *Eurostatistik* veröffentlichten Daten stammen aus dem ICG -Bereich der On-line-Datenbank Cronos von Eurostat.

Wer Zugang zu Cronos besitzt, kann jederzeit die Tabellen dieser Veröffentlichung abfragen, wobei die Daten täglich auf den neuesten Stand gebracht werden (Hinweise zur On-line -Benutzung finden sich auf der letzten Seite). Darüber hinaus sind die Daten in der Datenbank Eurocron verfügbar, die vom Host Eurobases der Kommission angeboten wird.

WECHSELKURSE: Weitere Zinssenkungen in Europa und Zinserhöhung in den USA

Als Folge steigender amerikanischer und sinkender europäischer Zinssätze verringerte sich das Zinsgefälle zwischen Europa und den Vereinigten Staaten.

Am 4. Februar gab der Präsident der US-Notenbank, Alan Greenspan, die Erhöhung des Tagesgeldsatzes für Ausleihungen an die US-Banken um 0,25 Prozentpunkte auf 3,25 % bekannt.

Die letzte Zinssenkungsrunde in Europa wurde am 18. Februar eingeläutet, als die Deutsche Bundesbank beschloß, den Diskontsatz um 0,5 Prozentpunkte auf 5,25 % zurückzunehmen.

Als unmittelbare Folge des leichten Anstiegs der amerikanischen Zinsen gewann der US-Dollar um mehr als 3 Pfennig an Wert und verzeichnete damit seinen höchsten Stand seit August 1981. Im weiteren Verlauf des Monats Februar verlor die amerikanische Währung gegenüber der D-Mark allerdings wieder an Wert und wurde am 22. Februar in London zu 1.727 DM gehandelt. Gegenüber dem Yen ging der Kurs der amerikanischen Währung nach dem Scheitern der amerikanisch-japanischen Handelsgespräche in der ersten Februarhälfte um mehr als 5 % zurück.

In den Tagen nach der deutschen Zinssenkung wurden auch in Belgien, Dänemark, Italien, den Niederlanden, Portugal und Österreich einige oder alle Leitzinssätze zurückgenommen, wobei das Ausmaß der Zinssenkungen vielfach geringer ausfiel als in Deutschland.

In Deutschland, Italien und Österreich war dies die erste Diskontsatzsenkung seit Oktober 1993.

Diese Zinssenkungen wirkten sich nur geringfügig auf den relativen Wert der Währungen aus. Das irische Pfund war Mitte Februar die stärkste der am Wechselkursmechanismus teilnehmenden Währungen, gefolgt vom holländischen Gulden und vom belgischen Franc. Alle Währungen des früheren engen Wechselkursbandes bewegten sich weiterhin innerhalb ihrer vorherigen Schwankungsbreite gegenüber der D-Mark, wobei die Kurse der drei stärksten Währungen über ihren jeweiligen Leitkursen im Wechselkursmechanismus lagen.

Im Vereinigten Königreich waren die Zinsen ebenfalls rückläufig. Am 7. Februar gab die Bank of England die Senkung der Basisausleihesätze der britischen Banken um 0,25 Prozentpunkte auf ihren Tiefstand seit 1972 bekannt. Als Folge dieser Zinssenkung gab der Kurs der britischen Währung leicht nach.

Ausgehend von ihrem recht hohen Niveau in den letzten Januarwochen wurden die Zinsen in der Türkei Anfang Februar weiter angehoben, um das türkische Pfund zu stützen. Die türkische Interbankrate lag am 1. Februar bei 600 %, während eine große Privatbank für Einlagen mit einer Laufzeit von einem Jahr einen Zinssatz von 90 % offerierte.

RENDITEN VON STAATSANLEIHEN: Weiterer Renditerückgang

In allen Ländern, für die Januarden vorliegen, waren die Renditen von Staatsanleihen rückläufig. Der stärkste Rückgang war in Italien und Spanien zu verzeichnen, wo die Renditen derzeit bei 6,5 % bzw. 7,5 % liegen.

In Belgien, Dänemark und im Vereinigten Königreich gingen die Renditen ebenfalls zurück, wenn auch nur geringfügig.

GELDVOLUMEN: Neues mittelfristiges Geldmengenziel der Banque de France

Die vor kurzem unabhängig gewordene Banque de France gab am 27. Januar ihr neues mittelfristiges Geldmengenziel bekannt, das für die Geldmenge M3 ein Wachstum von rund 5 % vorsieht, gegenüber 4 %-6,5 % im Jahr 1993. Bei einem fast das ganze Jahr hindurch negativen M3-Wachstum und einer absoluten Schrumpfung dieser Geldmenge wurde das Ziel für 1993 allerdings nicht erreicht. Ein Grund für das langsame Geldmengenwachstum im Jahr 1993 ist die Verlagerung privater Geldanlagen weg von offenen Investmentfonds, die zur Geldmenge M3 zählen, hin zu nicht-monetären Werten wie Anteilen an privatisierten Unternehmen und der „Balladur“-Anleihe, die nicht im Aggregat M3 erfaßt werden.

AMTLICHE WÄHRUNGSRESERVEN: 1993 Anstieg der irischen Reserven um mehr als 80 %

Die amtlichen Währungsreserven Irlands nahmen 1993 um 84 % zu und lagen im Dezember bei rund 5,3 Mrd. ECU, gegenüber 2,9 Mrd. ECU Ende 1992.

Auch in Belgien, den Vereinigten Staaten und Japan war eine Zunahme der Währungsreserven zu verzeichnen. Im Falle Japans ist dies auf die in der zweiten Jahreshälfte zur Stützung des Yen getätigten Devisenmarktinterventionen der Bank of Japan zurückzuführen ist, woraufhin sich die Währungsreserven auf das Jahr umgerechnet um insgesamt 47 % erhöhten.

In Dänemark dagegen waren die Währungsreserven im Dezember 1993 etwas niedriger als im Vorjahresvergleich, nachdem sie im Verlauf des Jahres beträchtlichen volumemäßigen Schwankungen unterlagen.

VIERTELJÄHRLICHE GESAMTRECHNUNGEN: Drittes Quartal 1993: Weiterhin Stagnation des Wirtschaftswachstums (BIP +0,3 %); Inflation rückläufig (+0,5 %)

Im dritten Quartal 1993 war die Wirtschaft der Europäischen Union (EU) insgesamt durch eine schwache Zunahme der Produktion (BIP +0,4 %) gekennzeichnet. Somit ist für die ersten neun Monate des Jahres gegenüber dem entsprechenden Vorjahreszeitraum ein Wachstumsrückgang festzustellen (BIP -0,4 %). Diese Ergebnisse dürften darauf hinweisen, daß für die Wirtschaft der EU vor 1994 nicht mit einer Tendenzumkehr zu rechnen ist. Auf dem letzten G-7-Treffen trat ein verhaltener Optimismus hinsichtlich der wirtschaftlichen Entwicklung im Jahr 1994 zutage, der allerdings teilweise durch die zunehmende Besorgnis über den Anstieg der Arbeitslosigkeit kompensiert wurde. Zur Lösung dieses Problems haben die Wirtschaftsminister und Zentralbankpräsidenten der sieben führenden Industriena-

tionen die Möglichkeiten der Einflußnahme auf die Arbeitsmarktmechanismen in Erwägung gezogen. Das von der Kommission vorgelegte Weißbuch zur Beschäftigung dürfte ein wichtiger Faktor im Kampf gegen die Arbeitslosigkeit sein und kann eine der Grundlagen für den Wirtschaftsaufschwung in der EU darstellen.

Was die anhand des impliziten BIP-Deflators gemessene Preisentwicklung betrifft, so ist ein kräftiger Rückgang sowohl der vierteljährlichen als auch der jährlichen Inflationsrate festzustellen (+0,5 % bzw. +2,8 %). Diese Situation scheint sich günstig auf den allgemeinen Trend zu Zinssenkungen auszuwirken.

Was die Situation in den einzelnen Mitgliedstaaten angeht, so ist in Deutschland und Frankreich eine eher schwach ausgeprägtes Wirtschaftswachstum festzustellen (+0,3 % bzw. +0,1 %). In den Niederlanden und im Vereinigten Königreich hat sich das Wirtschaftswachstum dagegen beschleunigt (+0,6 % bzw. 0,7 %). Auch in Dänemark ist nach zwei Quartalen negativer Wachstumsraten eine deutliche Wiederbelebung der Wirtschaftstätigkeit zu verzeichnen (+1,1 %). Lediglich Italien und Spanien weisen erneut ein negatives Wirtschaftswachstum aus (-0,5 % bzw. -0,1 %).

In den Vereinigten Staaten hat sich das Wirtschaftswachstum im dritten Quartal 1993 leicht beschleunigt (BIP +0,7 %). Gleichzeitig ging die vierteljährliche Inflationsrate erneut zurück (+0,4 %), während die jährliche Inflationsrate leicht anstieg (+2,7 %). Bei den Komponenten des BIP ist auf die positive Entwicklung des privaten Verbrauchs (+1,0 %) und der Investitionen (+1,8 %) hinzuweisen; der Staatsverbrauch dagegen war erneut rückläufig (-0,3 %).

In Japan lassen die Zahlen für das dritte Quartal 1993 eine Wiederbelebung der Wirtschaftstätigkeit (BIP +0,5 %) und einen Anstieg der vierteljährlichen wie auch der jährlichen Inflationsrate (+0,5 % bzw. +1,0 %) erkennen. Bei den Komponenten der Inlandsnachfrage ist eine relativ deutliche Zunahme sowohl der Investitionstätigkeit (+0,7 %) als auch des privaten Verbrauchs (+0,5 %) festzustellen.

PREISE : Die Jahresinflationsrate der EU lag bei 3,4 % im Januar

Die Inflationsrate für die Europäische Union, gemessen mit dem Verbraucherpreisindex, stieg leicht von 3,3 % im Dezember 1993 auf 3,4 % im Januar 1994 und blieb damit auf dem Niveau der durchschnittlichen Inflation der vorangegangenen 12 Monate. Vor Jahresfrist, im Januar 1993, lag diese Rate bei 3,6 %.

Für die einzelnen Mitgliedstaaten sind die Raten – in aufsteigender Reihenfolge nach der derzeitigen Inflation – für die angegebenen Zeiträume wie folgt :

	JAN. '94	JAN. '93		JAN. '94	JAN. '93
	JAN. '93	JAN. '92		JAN. '93	JAN. '92
Irland**	1,5 %	1,9 %	Ver. Königreich	2,5 %	1,7 %
Dänemark	1,8 %	1,5 %	Deutschland*	3,5 %	4,4 %
Frankreich	2,2 % ^e	2,1 %	Italien	4,4 % ^p	4,5 %
Niederlande	2,4 %	2,6 %	Spanien	5,0 %	4,7 %
Belgien	2,4 %	2,8 %	Portugal	6,4 %	8,5 %
Luxemburg	2,5 %	2,5 %	Griechenland	11,1 %	14,5 %

Gebietsstand vor dem 3. Oktober 1990.

** November 93/November 92

e = Schätzung Eurostat für Frankreich

p = Vorläufig

Die entsprechenden Raten für die Beitrittskandidaten sind : Finnland 0,2 % (2,8 %), Norwegen 1,4 % (2,5 %), Schweden 1,9 % (4,7 %) und Oesterreich 3,1 % (4,1 %). Die Inflation in Finnland ist die niedrigste seit 35 Jahren (1959).

Für einige sonstige Ländern waren die Jahresinflationsraten wie folgt : Vereinigte Staaten 2,5 % (3,3 %), Japan 1,2 % (1,2 %), Kanada 1,3 % (2,0 %) und Schweiz 2,1 % (3,5 %).

Zwischen Dezember und Januar stieg der Monatindex für EUR-12 um 0,4 %, hauptsächlich als Folge scharfer Steigerungen der Indizes Spaniens (1,0%), Deutschlands (+0,9 %) und Portugals (+0,8 %).

Bedeutende Steigerungen wurden ebenfalls festgestellt in Italien (+ 0,6%, Frankreich (+0,5 % e) und Belgien (+0,4 %), während die Niederlande (+0,2 %) und Dänemark (+0,1 %) nur geringe Anstiege verzeichneten.

Andererseits gab es Rückgänge bei den Indizes Griechenlands (-0,7 %), des Vereinigten Königreichs (-0,4 %) sowie Luxemburgs (-0,1 %), hauptsächlich wegen bedeutenden Preisreduzierungen für Bekleidung und Schuhe während des Winterschlussverkaufs.

Der Vertrag über die Europäische Union sieht als eines der Kriterien der wirtschaftlichen Konvergenz vor, dass die Jahresinflationsraten der Mitgliedstaaten nicht mehr als 1,5 Prozentpunkte über den Raten jener – höchstens drei – Länder mit der niedrigsten Inflation liegen dürfen. Der Durchschnitt der drei niedrigsten Raten für den Monat Januar wird auf 1,8 % geschätzt. Folgende Länder lagen innerhalb des Abstands von 1,5 Punkten von dieser Zahl: Irland, Dänemark, Frankreich, Niederlande, Belgien, Luxemburg, Vereinigtes Königreich, Oesterreich, Finnland, Norwegen und Schweden.

INDUSTRIEPRODUKTION: Positive Anzeichen verstärken sich

Die Industrieproduktion in der Europäischen Union (EU) zeigt Zeichen eines Umschwungs, d.h. die deutliche Schrumpfung des industriellen Output ist zum Stillstand gekommen. Allerdings ist in Deutschland (West), dem größten Mitgliedsstaat, die Rezession noch nicht überwunden.

In der EU betrug die Veränderungsrate des arbeitstäglich bereinigten Produktionsindex der Industrie gegenüber dem Wert des gleichen Monats ein Jahr zuvor im November 1993 -0,6 %, ohne Deutschland (West) wären es +1,3 %.

Betrachtet man die letzten drei Monate September bis November 1993, so beläuft sich für die EU die Veränderungsrate des saisonbereinigten Produktionsindex gegenüber der Periode Juni bis August auf +0,5 %, für die Investitionsgüterindustrie beträgt der entsprechende Wert +0,2 %.

In Japan beträgt die entsprechende Veränderungsrate für die Industrieproduktion -1,6 % in den USA ist mit +1,3 eine Festigung der Aufwärtsbewegung zu beobachten.

Für die einzelnen Mitgliedstaaten der Europäischen Union ergeben sich – soweit vorhanden – für die saisonbereinigte Industrieproduktion folgende Veränderungsrate(n) September bis November gegenüber den drei Vormonaten (in Klammern: entsprechende Veränderungsrate für die Investitionsgüterindustrie): Dänemark +2,1 % (0,3 %), Niederlande +1,5 % (1,4 %), Vereinigtes Königreich +1,3 % (0,2 %), Italien +1,3 % (+1,5 %), Spanien -0,1 % (0,9 %), Frankreich -0,4 % (-1,3 %), Griechenland -0,5 % (-11,0 %), Belgien -0,9 % (+4,7 %), West-Deutschland -1,3 % (-2,3 %). Das Konjunkturmodell ist also eher heterogen: Die meisten Länder zeigen Anzeichen einer Aufschwungsbewegung, vor allem Deutschland (West) zeigt aber deutliche Abwärtsbewegungen.

Mittlerweile können die Jahreswachstumsraten der Industrieproduktion 1993 gegenüber 1992 geschätzt werden. Demnach war 1993 das schlechteste Jahr seit langem: In der EU sank die Produktion insgesamt um 3,5 %, in den einzelnen Mitgliedsstaaten war folgendes Bild zu verzeichnen:

Irland Steigung um +5,5 %, Vereinigtes Königreich +2,3 %, in allen anderen Ländern sank die Produktion: Niederlande -1,9 %, Griechenland -2,6 %, Dänemark: -2,8 %, Italien -2,8 %, Luxemburg -2,8 %, Frankreich -3,5 %, Portugal -4,9 %, Spanien -5,1 %, Belgien -5,4 %, Deutschland -7,5 %. In Japan sind -4,1 % zu verzeichnen, die USA zeigen einen deutlichen Aufschwung mit +4,2 %.

AUSSENHANDEL: Ergebnisse für August 1993

Die kumulierte Bilanz des außergemeinschaftlichen Handels der Europäischen Union belief sich in den ersten acht Monaten des Jahres 1993 auf -13,1 Mrd. ECU gegenüber -41,3 Mrd. ECU im entsprechenden Vorjahreszeitraum. Die Einfuhren gingen um 2,6 % zurück, während die Ausfuhren mit +7 % deutlich anstiegen.

Die Handelsbilanz der Vereinigten Staaten für den Zeitraum Januar bis August 1993 schloß mit einem Defizit in Höhe von -74,1 Mrd. ECU, der Fehlbetrag hat sich damit gegenüber den ersten acht Monaten des Jahres 1992 um 26,1 Mrd. ECU erhöht. Die Einfuhren in die USA weiteten sich in Ecu um 20 % aus, in Dollar um 9 %. Die Ausfuhren der Vereinigten Staaten erhöhten sich in Ecu um 12,5 %, in Dollar um 3 %.

Der Überschuß der japanischen Außenhandelsbilanz betrug im Zeitraum Januar bis August 1993 67 Mrd. ECU, das sind 14,5 Mrd. ECU mehr als im entsprechenden

Vorjahreszeitraum. Die Ausfuhren Japans sind zwischen den ersten acht Monaten des Jahres 1992 und dem gleichen Zeitraum des Jahres 1993 in Ecu um 17,2 %, in Dollar um 7 % gestiegen. In Yen ausgedrückt gingen die Ausfuhren um 2,5 % zurück. Die Einfuhren Japans erhöhten sich in Ecu um 12,8 %, in Dollar um 3 %, nahmen in Yen jedoch um 8,2 % ab.

Der Außenhandelsbilanzsaldo Italiens hat sich zwischen den ersten acht Monaten des Jahres 1992 und dem gleichen Zeitraum von 1993 um 7,4 Mrd. ECU verbessert. Die Einfuhren gingen um 7 % zurück, während die Ausfuhren – begünstigt durch die Abwertung der Lira – um nahezu 12 % gestiegen sind.

Der Außenhandelsbilanzüberschuß Deutschlands ist um 7 Mrd. ECU gestiegen. Im Zeitraum Januar bis August 1993 gingen die Einfuhren um 1,6 % zurück, während die Ausfuhren um 5,6 % anstiegen.

Aufgrund der um nahezu 20 % gesunkenen Einfuhren, die sich durch die Peseta-Parität verteuert hatten, verbesserte sich das Außenhandelsbilanzdefizit Spaniens zwischen Januar und August 1992 und dem entsprechenden Zeitraum von 1993 um etwa 5 Mrd. ECU. Die außergemeinschaftlichen Ausfuhren Spaniens nahmen um 9,4 % zu.

In der BLWU und in den Niederlanden haben sich die außergemeinschaftlichen Handelsbilanzdefizite um 3,8 Mrd. ECU bzw. um 3,3 Mrd. ECU gegenüber den ersten acht Monaten des Jahres 1992 verringert. Die Einfuhren dieser Länder gingen um 5,4 % bzw. um 3 % zurück, während die Ausfuhren stark anstiegen (um 18 % bzw. um 15 %).

Der Außenhandelsbilanzüberschuß Dänemarks ist um 1,1 Mrd. ECU gestiegen; die Einfuhren sanken um 6,2 %, die Ausfuhren nahmen um 6,8 % zu.

Im Vereinigten Königreich hat sich das Außenhandelsbilanzdefizit leicht verbessert (um 0,8 Mrd. ECU): die Einfuhren lagen um 3,2 % über dem Niveau der ersten acht Monate des Jahres 1992, die Ausfuhren sind um 6,4 % gestiegen.

In Portugal ist das Defizit um 0,2 Mrd. ECU zurückgegangen. Die Einfuhren und die Ausfuhren waren stark rückläufig, sie nahmen jeweils um fast 12 % ab.

In Griechenland, Frankreich und Irland haben sich die Außenhandelsbilanzsalden gegenüber den ersten acht Monaten des Jahres 1992 leicht verschlechtert. Die Ausfuhren Griechenlands und Irlands sind um 21 % gestiegen, die Einfuhren Griechenlands nahmen um 9 %, die Einfuhren Irlands um 31 % zu. In Frankreich sind die Einfuhren verglichen mit dem Zeitraum Januar bis August 1992 um 0,8 % und die Ausfuhren um 1,1 % gesunken.

Foreword

Eurostatistics - data for short-term economic analysis is a monthly publication aimed at providing, as rapidly as possible, the latest statistical data on the European Community as a whole (EUR 12), each Member State, the United States and Japan.

Eurostatistics does not present all the statistics held by Eurostat, but a selection of the most relevant series on the economic situation.

Speed of publication and punctuality are the main features of this publication; that is why it is deliberately streamlined and does not contain any methodological notes, which are given in Eurostat's specialized publications.

The data published in *Eurostatistics* are taken from the ICG domain of Eurostat's on-line database, Cronos (instructions regarding on-line consultation may be found at the end of this publication). They are also available via the Commission host Eurobases in the Eurocron database.

Further information on Eurostat and its products can be obtained from the following addresses:

EUROSTATISTICS: in brief

Unless otherwise stated, data for the Federal Republic of Germany, including West Berlin, as constituted prior to 3 October 1990.

EXCHANGE RATES: further falls in European interest rates and an increase in US rates

There was a narrowing of the interest rate differential between Europe and the United States in February, with rates rising in the US and falling in Europe.

The US rise occurred on February 4, when Alan Greenspan, the Chairman of the Federal Reserve, announced that there was to be a quarter point increase to 3.25% in the Federal Reserve's target for the rate at which overnight funds are lent to the US banking system, the so-called "Federal Funds" rate.

The latest round of European rate cuts was initiated on February 18 by a decision by the Bundesbank to cut the German discount rate by half a percentage point, to 5.25%.

The initial effect of the slight increase in US interest rates was an appreciation of the dollar, which gained over 3 pfennigs to stand at its highest levels since August 1981. However, later in February it lost ground against the mark, closing at DM 1.727 in London on February 22. Against the yen the dollar lost over 5% of its value in the first half of February following the failure of the US-Japan trade talks.

The German rate cut was followed in subsequent days by reductions in some or all the headline central bank interest rates in Belgium, Denmark, Italy, Netherlands, Portugal and Austria, although in many cases the reductions were of a lesser magnitude than the German reduction of 0.5%.

For Germany, Italy and Austria this was the first reduction in the discount rate since October 1993.

These reductions in European interest rates had little effect on the relative strength of currencies: in mid-February the Irish punt was the strongest currency in the ERM, followed by the Dutch guilder and the Belgian franc. All former narrow band ERM currencies remain within their previous fluctuation bands against the Deutschemark, with the three strongest currencies trading around or above their ERM central rates.

Interest rates have also fallen in the UK where the Bank of England signalled a quarter point reduction in bank base rates on February 7. UK short-term interest rates are now at their lowest level since 1972. Sterling weakened slightly following the cut.

Turkish interest rates were further increased at the start of February in order to support the Turkish lire, following the already high levels reached in the last weeks of January. On February 1 the Turkish interbank rate stood at 600%, with one large privately owned bank offering a rate of 90% on one year deposits.

GOVERNMENT BOND YIELDS: Yields continue to fall

Government bond yields fell in all countries for which January data are available. The largest falls were in Italy, where yields now stand at 8.3%, and in Spain, where they stand at 7.8%.

Belgium, Denmark and the UK also experienced slight falls.

MONEY SUPPLY: Banque de France announces a new medium-term monetary target

The newly independent Banque de France announced its medium-term monetary target on January 27. They will be aiming for M3 growth of around 5%, as compared with the target range for 1993 of 4-6.5% M3 growth. The 1993 target was not met however, in that M3 growth was actually negative for much of 1993: the absolute size of M3 fell.

One reason for this slow growth in 1993 was that personal sector funds shifted away from mutual funds which are included in M3 into non-monetary assets such as privatisation shares and the 'Balladur' bond issue, which are excluded from M3.

FOREIGN OFFICIAL RESERVES: Ireland's reserves increase by over 80% in 1993

The foreign official reserves of Ireland increased by 84% in 1993, to stand at around 5300 million ecu in December, up from 2900 million ecu at the end of 1992.

Reserves also increased in 1993 in Belgium, the United States and Japan, where Bank of Japan intervention to stem the strength of the yen in the latter part of 1993 contributed to an overall 47% increase in reserves over the year as a whole.

In Denmark however the level of reserves in December 1993 was slightly lower than the end 1992 figure, although there had been a great deal of fluctuation in their size throughout the year.

QUARTERLY ACCOUNTS: During the third quarter of 1993: continued stagnation of economic growth (GDP +0.4%), fall in inflation (+0.5%)

During the third quarter of 1993, the economy of the European Union as a whole saw a slight increase in production (GDP +0.4%). Thus, over the first nine months of the year, there was a fall in economic growth compared with the same period in the previous year (GDP -0.4%). These results suggest that the trend for the economy of the EU is unlikely to reverse before 1994. The last G7 summit showed there to be guarded optimism for the economic situation in 1994, though this was somewhat attenuated by increasing concern about the rise in unemployment. In a bid to solve this problem, the Finance Ministers, together with the Governors of the central banks of the seven most industrialized countries, discussed the possibility of changing the labour market regulations. The Commission's White Paper on Employment appears to be an important step in the fight against unemployment, and may provide a basis for the EU's economic recovery.

Inflation, as measured by the implicit GDP deflator, showed a marked fall in both quarterly and annual terms (+0.5% and 2.8% respectively). The scene thus appears to be set for a general fall in interest rates.

As regards the situation in the Member States, slight growth was recorded in Germany and France (0.3% and 0.1% respectively). By contrast, growth appeared to be more marked in the Netherlands and the United Kingdom (0.6% and 0.7% respectively). Denmark recorded a sound recovery (1.1%) after two negative

quarters. Italy and Spain were alone in recording fresh falls (-0.5% and 0.1% respectively).

In the United States, there was a slight acceleration in economic growth (GDP +0.7%), accompanied by a fresh fall in quarterly inflation (+0.4%), though there was a slight rise in the annual rate (+2.7%). Of the components of GDP, mention should be made of the upward trend in private consumption (+0.1%) and investment (+1.8%), whilst public consumption showed a fresh fall (-0.3%).

During the last quarter of 1993, Japan recorded a recovery in economic growth (GDP +0.5%), accompanied by a rise in both quarterly and annual inflation (+0.5% and +1.0% respectively). There was a general increase in the components of domestic demand, with more marked rises for private consumption and investment (+0.7% and +0.5% respectively).

PRICES: Annual inflation for the EU at 3.4% in January

The inflation rate for the European Union as measured by the CPI rose slightly from 3.3% in December 1993 to 3.4% in January 1994, thus remaining at the same level shown throughout the last 12 months. A year ago, in January 1993, this rate was 3.6%.

For the individual Member States these rates for January 1994 and those for the corresponding period a year earlier are—in ascending order of current inflation—as follows:

	JAN. '94 JAN. '93	JAN. '93 JAN. '92	JAN. '94 JAN. '93	JAN. '93 JAN. '92
Ireland**	1.5%	1.9%	United Kingdom	2.5%
Denmark	1.8%	1.5%	Germany*	3.5%
France	2.2% e	2.1%	Italy	4.4% p
Netherlands	2.4%	2.6%	Spain	5.0%
Belgium	2.4%	2.8%	Portugal	6.4%
Luxembourg	2.5%	3.5%	Greece	11.1%
				14.5%

* The CPI for the Federal Republic of Germany continues to reflect borders price to 3 October 1990.

** November 93/November 92

e = Eurostat estimate for France

p = provisional

The corresponding rates for the applicant Member States are: Finland 0.2% (2.8%), Norway 1.4% (2.5%), Sweden 1.9% (4.7%) and Austria 3.1% (4.1%). The Finnish inflation is the lowest for 35 years (1959).

The rates for some other non-EU countries are USA 2.5% (3.3%), Japan 1.2% (1.2%), Canada 1.3% (2.0%) and Switzerland 2.1% (3.5%).

On a monthly basis the EUR-12 index rose by 0.4% between December and January, mainly as a result of sharp increases in the indices of Spain (+1.0%), Germany (+0.9%), Portugal (+0.8%).

Marked increases were also recorded in Italy (+0.6%), France (+0.5% e) and Belgium (+0.4%), whereas modest increases were reported from the Netherlands (+0.2%) and Denmark (+0.1%).

On the other hand there were declines in the indices of Greece (-0.7%), the United Kingdom (-0.4%) and Luxembourg (-0.1%), mainly due to significant reductions for clothing and footwear during the winter sales.

The Treaty on European Union requires that, as one of the criteria of economic convergence, annual inflation (CPI) rates of the Member States must not exceed by more than 1.5 percentage points that of, at most, the three lowest rates. The average of the three lowest rates for the month of January is estimated to be 1.8%. Countries falling within 1.5 points of this figure are: Ireland, Denmark, France, Netherlands, Belgium, Luxembourg, United Kingdom, Austria, Finland, Norway and Sweden.

INDUSTRIAL PRODUCTION: Signs of further recovery

Industrial production in the European Union (EU) shows signs of an upturn, i.e. the downward trend in industrial output has bottomed out. In (West) Germany, the largest Member State, the recession still persists, however.

In the EU, the industrial production index (adjusted to allow for the number of days worked) was 0.6% lower in November 1993 than for the same month in the preceding year: without (West) Germany the figure would have been +1.3%.

For the last three months, i.e. September-November 1993, the change in the seasonally adjusted production index compared with June-August worked out at +0.5% for the EU as a whole; the figure for the capital goods industry was 0.2%. The corresponding rate of change in industrial production in Japan was -1.6% compared with a further rise of +1.3% in the USA.

For the individual Member States of the EU, the seasonally adjusted figures for industrial production, where available, show the following rates of change for September-November compared with the three preceding months (the figures in brackets show the corresponding rates of change for the investment goods industry): Denmark +2.1% (0.3%), Netherlands +1.5% (-1.4%), United Kingdom +1.3% (+0.2%), Italy +1.3% (+1.5%), Spain -0.1% (-0.9%), France -0.4% (-1.3%), Greece -0.5% (-11.0%), Belgium -0.9% (+4.7%), West Germany -1.3% (2.3%). These statistics reveal a rather varied picture in which there are signs of an upturn in the majority of Member States in contrast, above all, with (West) Germany, where the trends are clearly negative.

It has now become possible to estimate the annual rates of growth of industrial production in 1993 compared with 1992. The figures for 1993 were the worst for many years. In the EU as a whole, industrial production declined by 3.5%, and the figures for the individual Member States worked out as follows:

Ireland +5.5%, United Kingdom +2.3%—in contrast with falling production in every other Member State, i.e. Netherlands -1.9%, Greece -2.6%, Denmark -2.8%, Italy -2.8%, Luxembourg -2.8%, France -3.5%, Portugal -4.9%, Spain -5.1%, Belgium -5.4%, Germany -7.5%. The figure for Japan was -4.1%, whereas the USA recorded a clear upswing of +4.2%.

EXTERNAL TRADE: Results for August 1993

The cumulative deficit in the European Union's external trade was ECU -13.1 billion for the first eight months of 1993, compared with ECU -41.3 billion for the corresponding period in the previous year. Imports fell by 2.6% between January-August 1992 and the same period in 1993, while there was a substantial increase in exports (7%).

The United States' cumulative trade deficit for January-August 1993 was ECU -74.1 billion, 26.1 billion up on the first eight months of 1992. Imports were up by 20% in ecus and 9% in dollars and exports by 12.5% and 3% respectively.

Japan showed a positive trade balance of ECU 67 billion over the same period—ECU 14.5 billion up on January-August 1992. Japan's exports increased by 17.2% in ecus and 7% in dollars between the two periods. In yen, they dropped by 2.5%. Imports increased by 12.8% in ecus and 3% in dollars and dropped by 8.2% in yen.

Italy's trade balance picked up by ECU 7.4 billion between the first eight months of 1992 and the corresponding period in 1993: imports fell by 7%, while exports rose by almost 12%, partly thanks to the devaluation of the lira.

Germany's trade surplus increased by ECU 7 billion, with a 1.6% drop in imports and a 5.6% increase in exports over the period January-August 1993.

Spain's trade balance picked up by some ECU 5 billion between January-August 1992 and the same period in 1993, following the drop of almost 20% in imports, which were made more expensive by the parity of the peseta. Exports increased by 9.4%.

The deficits of the BLEU and the Netherlands were ECU 3.8 billion and ECU 3.3 billion respectively down on the first eight months of 1992. Imports fell by 5.4% and 3% respectively, while exports rose substantially by 18% and 15%, respectively. Denmark's trade surplus increased by ECU 1.1 billion, with a drop of 6.2% in imports and an increase of 6.8% in exports.

The United Kingdom's deficit decreased slightly by ECU 0.8 billion, with imports 3.2% up on the level for the first eight months of 1992 and exports 6.4% up. Portugal's deficit was slightly down by ECU 0.2 billion, with exports and imports both showing a reduction of almost 12%.

The trade balances of Greece, France and Ireland deteriorated slightly compared with the first eight months of 1992. Exports by Greece and Ireland were up by 21%, while imports were 9% up for Greece and 31% up for Ireland. France's imports and exports were respectively 0.8% and 1.1% down compared with the first eight months of 1992.

Eurostatistiques - Données pour l'analyse de la conjoncture est une publication mensuelle qui a pour but de fournir dans les meilleurs délais les données statistiques les plus récentes pour la Communauté européenne en tant qu'ensemble (EUR12), pour les pays membres ainsi que pour leurs principaux partenaires extra-communautaires (États-Unis d'Amérique et Japon).

Eurostatistiques ne publie pas d'une manière exhaustive toutes les statistiques disponibles auprès d'Eurostat, mais les plus importantes parmi celles-ci.

Cette publication se veut rapide et facilement maniable. Pour cette raison, elle ne comporte pas de notes méthodologiques, qui sont par ailleurs disponibles dans les publications spécialisées d'Eurostat.

Les données publiées dans *Eurostatistiques* proviennent du domaine ICG de la base de données Cronos (les instructions pour le mode de consultation on-line se trouvent à la fin de cette publication). Ces données sont aussi disponibles dans la base de données Eurocron, accessible par l'intermédiaire du serveur Eurobases de la Commission.

TAUX DE CHANGE: poursuite de la baisse des taux d'intérêt en Europe et de la hausse aux Etats-Unis

En février, le différentiel des taux d'intérêt entre l'Europe et les Etats-Unis s'est réduit sous l'effet de la hausse des taux aux Etats-Unis et de leur baisse en Europe. Aux Etats-Unis, la hausse est intervenue le 4 février lorsque M. Alan Greenspan, président de la Réserve fédérale, annonçait le relèvement d'un quart de point du taux directeur interbancaire au jour de la Réserve fédérale, le taux federal funds, qui passait ainsi à 3,25%.

La dernière série des baisses de taux en Europe a été inaugurée le 18 février par la décision de la Bundesbank consistant à baisser le taux d'escompte allemand d'un demi point à 5,25%.

Le léger relèvement des taux d'intérêt américains s'est immédiatement traduit par la hausse du dollar qui gagnait plus de 3pfennigs, soit son plus haut niveau depuis août 1981. Cependant, plus tard en février, le dollar a baissé par rapport au mark, clôturant à 1,727 DEM à Londres le 22 février. Par rapport au yen, le dollar a perdu plus de 5% au cours de la première quinzaine de février par suite de l'échec des négociations commerciales entre les Etats-Unis et le Japon.

La baisse du taux allemand a entraîné dès les jours suivants des réductions de plusieurs voire de tous les taux directeurs des banques centrales de Belgique, du Danemark, d'Italie, des Pays-Bas, du Portugal et d'Autriche, même si ces réductions étaient souvent moins marquées que la baisse de 0,5% observée en Allemagne.

En ce qui concerne l'Allemagne, l'Italie et l'Autriche, il s'agissait de la première réduction du taux d'escompte depuis octobre 1993.

Ces réductions des taux d'intérêt européens n'ont guère eu d'effet sur la bonne tenue des monnaies: à la mi-février, la livre irlandaise était la monnaie la plus forte du MTC, suivie du florin néerlandais et du franc belge. Toutes les monnaies antérieurement à marge étroite du MTC ont maintenu leurs marges de fluctuation par rapport au mark allemand, les trois monnaies les plus fortes s'étant échangées autour ou au-dessus de leurs taux centraux du MTC.

Les taux d'intérêt ont également baissé au Royaume-Uni où la Banque d'Angleterre a réduit d'un quart de point les taux de base bancaires le 7 février. Les taux d'intérêt à court terme au Royaume-Uni se situent à présent à leur niveau le plus faible depuis 1972. La livre s'est légèrement affaiblie à la suite de la baisse.

Les taux d'intérêt turcs ont encore augmenté au début de mois de février afin de défendre la lire turque, après les niveaux déjà très élevés atteints à la fin janvier. Le 1er février, le taux interbancaire turc s'est monté à 600%, tandis qu'une seule grande banque privée offrait un taux de 90% pour les dépôts à un an.

RENDEMENTS DES EMPRUNTS D'ETAT: poursuite de la baisse

Le rendement des emprunts d'Etat a baissé dans tous les pays pour lesquels les données de janvier sont disponibles. Les baisses les plus sensibles ont été observées en Italie où les rendements se situent actuellement à 8,3% et en Espagne où le taux est de 7,8%.

La Belgique, le Danemark et le Royaume-Uni ont également enregistré de faibles baisses.

MASSE MONETAIRE: la Banque de France annonce un nouvel objectif monétaire à moyen terme

Le 27 janvier, la Banque de France nouvellement indépendante a annoncé son objectif monétaire à moyen terme le 27 janvier. La croissance de M3 est d'environ 5% par rapport à la fourchette retenue d'une croissance de M3 de 4-6,5% pour 1993. L'objectif de 1993 n'a toutefois pas été atteint puisque la croissance de M3 a en fait été négative la plus grande partie de 1993: la valeur absolue de M3 a baissé.

L'une des raisons qui explique cette faible croissance en 1993 est que l'épargne des particuliers s'est portée des fonds de placement compris dans M3 vers les actifs non monétaires tels que les actions de privatisation et l'emprunt «Balladur», non compris dans M3.

RESERVES DE CHANGE: augmentation de plus de 80% des réserves de l'Irlande en 1993

Les réserves de change de l'Irlande ont augmenté de 84% en 1993 pour atteindre quelque 5300 millions d'écus en décembre contre 2900 millions d'écus fin 1992.

En 1993, les réserves ont également augmenté en Belgique, aux Etats-Unis et au Japon où l'intervention de la Banque du Japon en vue de défendre le yen à la fin de 1993 a contribué à une croissance globale de 47% des réserves sur l'ensemble de l'année.

En revanche, au Danemark, le niveau de réserves de décembre 1993 a été légèrement inférieur à celui observé fin 1992, en dépit d'une forte fluctuation observée tout au long de l'année.

COMPTES TRIMESTRIELS: Au cours du troisième trimestre 1993: poursuite de la phase de stagnation de la croissance économique (PIB +0,4%); baisse de l'inflation (+0,5%)

Le troisième trimestre 1993 a été caractérisé, par l'économie de l'Union européenne dans son ensemble, par une légère croissance de la production (PIB +0,4%). De ce fait, au cours des neuf premiers mois de l'année, on a constaté, par rapport à la période correspondante de l'année précédente, un fléchissement de la croissance économique (PIB -0,4%). Ces résultats semblent indiquer qu'une inversion de tendance, pour l'économie de l'Union, ne semble pas être envisageable avant 1994. La dernière réunion du G7 a mis en évidence un certain optimisme modéré pour la situation économique au cours de 1994. D'ailleurs cet optimisme est en partie compensé par des préoccupations de plus en plus fortes pour la croissance du chômage. Pour résoudre ce problème les Ministres des économies ainsi que les Gouverneurs des banques centrales des sept pays les plus développés ont envisagé la possibilité de changer les règles du marché du travail. Le livre blanc sur l'occupation, présenté par la Commission, semble être un élément important pour

combattre le chômage et peut constituer une des bases pour la reprise de l'économie de l'Union.

En ce qui concerne l'inflation, mesurée par le déflateur implicite du PIB on constate une baisse importante tant en rythme trimestriel qu'annuel (+0,5% et 2,8% respectivement). Cette situation semble favoriser la tendance à une baisse généralisée des taux d'intérêt.

En ce qui concerne la situation dans les Etats membres, on constate une croissance accélérée de la croissance économique (PIB +0,7%) accompagnée par une nouvelle baisse de l'inflation trimestrielle (+0,4%), tandis qu'en rythme annuel on constate une légère reprise (+2,7%). Parmi les composantes du PIB, il faut mettre en évidence l'évolution positive de la consommation privée (+1,0%) et des investissements (+1,8%), tandis que la consommation publique présente un nouveau fléchissement (-0,3%).

Aux Etats-Unis, au cours du troisième trimestre 1993, on constate une légère accélération de la croissance économique (PIB +0,7%) accompagnée par une nouvelle baisse de l'inflation trimestrielle (+0,4%), tandis qu'en rythme annuel on constate une légère reprise (+2,7%). Parmi les composantes du PIB, il faut mettre en évidence l'évolution positive de la consommation privée (+1,0%) et des investissements (+1,8%), tandis que la consommation publique présente un nouveau fléchissement (-0,3%).

Pour le Japon, au cours du troisième trimestre 1993, on constate une reprise de la croissance économique (PIB +0,5%) accompagnée par une reprise de l'inflation tant trimestrielle qu'annuelle (+0,5% et +1,0% respectivement). Parmi les composantes de la demande interne, on observe une reprise généralisée plus prononcée pour la consommation privée et pour les investissements (+0,7% et +0,5% respectivement).

PRIX: L'inflation annuelle de l'UE est de 3,4% en janvier

Le taux d'inflation de l'Union Européenne mesuré par l'IPC a augmenté légèrement de 3,3% en décembre 1993 à 3,4% en janvier 1994, en restant ainsi au même niveau que celui constaté en moyenne pendant les derniers 12 mois. Il y a un an, en janvier 1993, ce taux était de 3,6%.

Pour les Etats membres, ces taux pour janvier 1994 et ceux pour la période correspondante d'il y a un an sont – dans l'ordre croissant de l'inflation actuelle – les suivants :

	JANV. '94	JANV. '93	JANV. '94	JANV. '93
Irlande**	1,5%	1,9%	Royaume-Uni	2,5%
Danemark	1,8%	1,5%	Allemagne*	3,5%
France	2,2% e	2,1%	Italie	4,4% p
Pays-Bas	2,4%	2,6%	Espagne	5,0%
Belgique	2,4%	2,8%	Portugal	6,4%
Luxembourg	2,5%	3,5%	Grèce	11,1%
				14,5%

* l'IPC pour la République Fédérale d'Allemagne continue à se rapporter à la situation territoriale avant le 3 octobre 1990.

** novembre 93/novembre 92

e = estimation d'Eurostat pour la France

p = provisoire

Les taux correspondants pour les Etats candidats à l'adhésion sont : Finlande 0,2% (2,8%), Norvège 1,4% (2,5%), Suède 1,9% (4,7%) et Autriche 3,1% (4,1%). Le taux d'inflation de la Finlande est le taux observé le plus bas depuis 35 ans (1959). Les taux pour quelques autres pays hors UE sont : Etats-Unis 2,5% (3,3%), Japon 1,2% (1,2%), Canada 1,3% (2,0%) et Suisse 2,1% (3%).

Entre décembre 1993 et janvier 1994, l'indice mensuel pour EUR-12 a augmenté de 0,4%, principalement à cause des fortes hausses des indices de l'Espagne (+1,0%), de l'Allemagne (+0,9%) et du Portugal (+0,8%).

Des hausses sensibles ont été également enregistrées en Italie (+0,6%), en France (+0,5% e) et en Belgique (+0,4%), tandis que des accroissements modérés étaient signalés aux Pays-Bas (+0,2%) et au Danemark (+0,1%).

Par contre, il y a eu des reculs des indices de la Grèce (-0,7%), du Royaume-Uni (-0,4%) et du Luxembourg (-0,1%), surtout grâce à des réductions importantes des prix de l'habillement et des chaussures pendant les soldes d'hiver.

Le Traité sur l'Union Européenne prévoit – comme un des critères de convergence économique – que les taux d'inflation annuelle (IPC) des Etats membres, ne doivent pas dépasser de plus de 1,5% celui des trois Etats membres, au plus, avec les taux les plus bas. La moyenne des trois taux les plus bas pour le mois de janvier est estimée à 1,8%. Les pays qui se situent à l'intérieur de cette limite sont: l'Irlande, le Danemark, la France, les Pays-Bas, la Belgique, le Luxembourg, le Royaume-Uni, l'Autriche, la Finlande, la Norvège et la Suède.

PRODUCTION INDUSTRIELLE: Signes de reprise de plus en plus tangibles

La forte tendance à la baisse de la production industrielle dans l'Union européenne (UE) semble s'être interrompue, sauf en Allemagne (de l'Ouest), le plus grand Etat membre, où la récession n'est toujours pas vaincue.

Dans l'UE, l'indice de la production industrielle – corrigé pour tenir compte des différences dans le nombre de jours ouvrables – a baissé de 0,6% en novembre 1993 par rapport au mois correspondant de 1992. Sans l'Allemagne (de l'Ouest), cet indice aurait enregistré une hausse de 1,3%.

Si on considère la période septembre-novembre 1993, l'indice de la production corrigé des variations saisonnières a augmenté dans l'UE de 0,5% par rapport à la période juin-août; l'industrie des biens d'investissement a elle enregistré une hausse de 0,2%.

Au Japon, l'indice de la production industrielle correspondant a baissé de 1,6%, tandis qu'aux Etats-Unis, la tendance à la reprise se confirme avec une augmentation de 1,3%.

En ce qui concerne les Etats membres de l'UE pris séparément, la comparaison des données actuellement disponibles sur l'indice de la production industrielle corrigé

des variations saisonnières pour la période septembre-novembre avec celles sur la période juin-août fournit les résultats suivants (entre parenthèses, évolution de l'indice de l'industrie des biens d'équipement): Danemark: +2,1% (+0,3%), Pays-Bas: +1,5% (-1,4%), Royaume-Uni: +1,3% (+0,2%), Italie: +1,3% (+1,5%), Espagne: -0,1% (-0,9%), France: -0,4% (-1,3%), Grèce -0,5% (11,0%), Belgique: -0,9% (+4,7%), Allemagne de l'Ouest: -1,3% (-2,3%). On note donc une évolution plutôt hétérogène de la conjoncture: si la plupart des pays donnent des signes de reprise, d'autres, et surtout l'Allemagne (de l'Ouest), sont en recul.

Il est à présent possible d'estimer l'évolution de l'indice de croissance de la production industrielle pour l'année 1993 par rapport à 1992. Selon ces estimations, 1993 a été l'année la plus sombre depuis longtemps: au sein de l'UE, la production a diminué dans l'ensemble de 3,5%, tandis que dans les différents États membres, la situation a évolué de la manière suivante:

si la production a augmenté de 5,5% en Irlande et de 2,3% au Royaume-Uni, elle a en revanche baissé partout ailleurs: Pays-Bas: -1,9%; Grèce: -2,6%; Danemark: -2,8%; Italie: -2,8%; Luxembourg: -2,8%; France: -3,5%; Portugal: -4,9%; Espagne: -5,1%; Belgique: -5,4%; Allemagne: -7,5%. Au Japon, on note un recul de 4,1%, tandis qu'aux États-Unis, une forte hausse (+4,2%) est observée.

COMMERCE EXTERIEUR

Le déficit cumulé des échanges extra de l'Union Européenne est de -13,1 Mrds d'écus pour les huit premiers mois de 1993, contre -41,3 Mrds d'écus pour la période correspondante de 1992. Les importations affichent une baisse de 2,6% entre janvier-août 1992 et 1993, tandis que les exportations progressent nettement (7%).

Le déficit commercial des États-Unis cumulé de janvier à août 1993 atteint -74,1 Mrds d'écus: il se creuse de 26,1 Mrds d'écus par rapport aux huit premiers mois de 1992. Les flux importés par les États-Unis croissent de 20% en écus, de 9% en dollars. Les exportations des États-Unis augmentent de 12,5% en écus, de 3% en dollars.

Le bilan des échanges du Japon est excédentaire de 67 Mrds d'écus en janvier-août 1993, soit 14,5 Mrds de plus qu'en janvier-août 1992. Les exportations japonaises progressent de 17,2% en écus, de 7% en dollars entre les huit premiers mois de 1992 et de 1993. Libellées en yens, elles sont en repli de 2,5%. Les importations du Japon croissent de 12,8% en écus, de 3% en dollars, et s'infléchissent de -8,2% en yens.

Le solde extra de l'Italie se redresse de 7,4 Mrds d'écus entre les huit premiers mois de 1992 et de 1993: les importations se replient de 7%, tandis que les exportations progressent de près de 12%: elles sont favorisées par la dévaluation de la lire. L'excédent commercial extra de l'Allemagne progresse de 7 Mrds d'écus: les importations baissent de 1,6%, les flux exportés croissent de 5,6% en janvier-août 1993.

Le déficit extra de l'Espagne se comble de quelque 5 Mrds d'écus entre janvier-août 1992 et 1993, suite à la baisse de près de 20% des importations extra renchéries par la parité de la peseta. Les exportations extra de l'Espagne affichent un progrès de 9,4%.

L'UEBL et les Pays-Bas voient leurs déficits extra se réduire de 3,8 Mrds d'écus et 3,3 Mrds d'écus par rapport aux huit premiers mois de 1992. Les importations de ces pays baissent respectivement de 5,4% et 3%, alors que les flux exportés de ces pays connaissent de fortes progressions (18% et 15%).

L'excédent extra du Danemark augmente de 1,1 Mrd d'écus: les flux importés marquent -6,2%, les exportations: 6,8%.

Le déficit extra du Royaume-Uni s'amenuise faiblement (de 0,8 Mrd d'écus): les importations sont supérieures de 3,2% à leur niveau des huit premiers mois de 1992, les exportations progressent de 6,4%.

Le déficit du Portugal s'allège de 0,2 Mrd d'écus: les flux importés et exportés s'infléchissent fortement à la baisse de près de 12% chacun.

Les bilans extra de la Grèce de la France et de l'Irlande sont faiblement détériorés par rapport aux huit premiers mois de 1992. Les exportations de la Grèce et de l'Irlande sont en augmentation de 21%, les importations de la Grèce croissent de 9%, celles de l'Irlande de 31%. Les flux importés en France et exportés de France sont en retrait de 0,8% et de 1,1% par rapport à leur niveau de janvier-août 1992.

„On line“-Abfrage

Jede Zeitreihe ist durch einen neunstelligen numerischen Kode gekennzeichnet, der seinerseits in Unterkodes gegliedert ist, welche – im Falle von „Eurostatistik“ – das Land, den Sektor, die Tabelle, die Einheit und die Periodizität bezeichnen.

Die Bedeutung der einzelnen Unterkodes ist der nachstehend aufgeführten Tabelle zu entnehmen.

Land XX	Sektor XX	Tabelle XXXX	Periodizität und Einheit X
06 EUR 12* 03 EUR 10 11 D* 14 F 18 I 18 NL 21 UEBL 22 B 24 L 26 UK 28 IRL 30 DK 32 E 34 GR 36 P 42 USA 46 JAP	93	Variablen tabellen XXXX vierstelliger Wert, der im Titel jeder Tabelle erscheint	0 jährlich, Angaben in Prozent 1 vierteljährlich, Angaben in Prozent 2 monatlich, Angaben in Prozent 3 jährlich, Indexangaben (1985 = 100) 4 vierteljährlich, Indexangaben (1985 = 100) 5 monatlich, Indexangaben (1985 = 100) 6 jährlich, Angaben in absoluten Werten 7 vierteljährlich, Angaben in absoluten Werten 8 monatlich, Angaben in absoluten Werten 9 Gewicht, EUR 10 = 100 bzw. EUR 12 = 100

* Territoriale Aufteilung vor dem 3. 10. 90: 02 für EUR 12, 12 für D.

Beispiele: Will man die monatliche Arbeitslosigkeit (in absoluten Zahlen) von Frankreich gemäß Tabelle 0304 dieser Veröffentlichung erfahren, so braucht man nur den Kode 14 93 0304 8 einzugeben.

‘On-line’ consultation

Each time series is identified by a nine-digit code broken down into subcodes, which in the case of Eurostatistics, represent the country, sector, table unit and periodicity. The significance of the different subcodes may be found in the table below.

Country XX	Sector XX	Table XXXX	Periodicity and unit X
06 EUR 12* 03 EUR 10 11 D* 14 F 18 I 18 NL 21 UEBL 22 B 24 L 26 UK 28 IRL 30 DK 32 E 34 GR 36 P 42 USA 46 JAP	93	Table by indicator XXXX 4-digit value quoted in the title of each table	0 annual in % 1 quarterly in % 2 monthly in % 3 annual index 1985 = 100 4 quarterly index 1985 = 100 5 monthly index 1985 = 100 6 annual absolute value 7 quarterly absolute value 8 monthly absolute value 9 weighting EUR 10 = 100 or EUR 12 = 100

* data for the territorial situation before 3. 10. 90: 02 for EUR 12, 12 for D.

Consultation example: to know the monthly unemployment (absolute figures) of France as is shown in Table 0304 of this publication, the code 14 93 0304 8 should be formed.

Mode de consultation «on-line»

Chaque série chronologique est identifiée par un code à neuf chiffres structuré en sous-codes représentant, dans le cas d'Eurostatistiques, le pays, le secteur, le tableau, l'unité et la périodicité. On trouvera dans le tableau ci-dessous la signification des différents sous-codes.

Pays XX	Secteur XX	Tableau XXXX	Périodicité et unité X
06 EUR 12* 03 EUR 10 11 D* 14 F 18 I 18 NL 21 UEBL 22 B 24 L 26 UK 28 IRL 30 DK 32 E 34 GR 36 P 42 USA 46 JAP	93	Tableaux par variable XXXX valeur à 4 chiffres figurant dans le titre de chaque tableau	0 annuelle exprimée en pourcentage 1 trimestrielle exprimée en pourcentage 2 mensuelle exprimée en pourcentage 3 annuelle exprimée en indice 1985 = 100 4 trimestrielle exprimée en indice 1985 = 100 5 mensuelle exprimée en indice 1985 = 100 6 annuelle exprimée en valeur absolue 7 trimestrielle exprimée en valeur absolue 8 mensuelle exprimée en valeur absolue 9 pondération EUR 10 = 100 ou EUR 12 = 100

* données pour la situation territoriale avant le 3. 10. 90: 02 pour EUR 12, 12 pour D.

Exemple de consultation: pour connaître le chômage mensuel (chiffres absolus) de la France, tel qu'il figure au tableau 0304 de cette publication, il suffit d'appeler le code 14 93 0304 8;
