Las publicaciones de Eurostat están clasificadas por temas y por series. La clasificación se encuentra al final de la obra. Para mayor información sobre las publicaciones, rogamos se pongan en contacto con Eurostat. Para los pedidos, diríjense a las oficinas de venta cuyas direcciones figuran en la página interior de la contracubierta.

Eurostats publikationer er klassificeret efter emne og serie. En oversigt herover findes bag i hæftet. Yderligere oplysninger om publikationerne kan fås ved henvendelse til Eurostat. Bestilling kan afgives til de salgssteder, der er anført på omslagets side 3.

Die Veröffentlichungen von Eurostat sind nach Themenkreisen und Reihen gegliedert. Die Gliederung ist hinten in jedem Band aufgeführt. Genauere Auskünfte über die Veröffentlichungen erteilt Eurostat. Ihre Bestellungen richten Sie bitte an die Verkaufsbüros, deren Anschriften jeweils auf der dritten Umschlagseite der Veröffentlichungen zu finden sind.

Οι εκδόσεις της Eurostat ταξινομούνται κατά θέμα και κατά σειρά. Η ακριβής ταξινόμηση αναφέρεται στο τέλος κάθε έκδοσης. Για λεπτομερέστερες πληροφορίες σχετικά με τις εκδόσεις, μπορείτε να απευθύνεσθε στην Eurostat.

Για τις παραγγελίες μπορείτε να απευθύνεσθε στα γραφεία πώλησης, των οποίων οι διευθύνσεις αναγράφονται στη σελίδα 3 του εξωφύλλου.

Eurostat's publications are classified according to themes and series. This classification is indicated at the end of the publication. For more detailed information on publications, contact Eurostat. Orders are obtainable from the sales offices mentioned on the inside back cover.

Les publications d'Eurostat sont classées par thème et par série. Cette classification est précisée à la fin de l'ouvrage. Pour des informations plus détaillées sur les publications, contactez Eurostat. Pour les commandes, adressez-vous aux bureaux de vente dont les adresses sont indiquées à la page 3 de la couverture.

Le pubblicazioni dell'Eurostat sono classificate per tema e per serie. Tale classificazione è precisata alla fine dell'opera. Per informazioni più dettagliate sulle pubblicazioni rivolgersi all'Eurostat.

Per eventuali ordinazioni rivolgersi a uno degli uffici di vendita i cui indirizzi figurano nella 3^a pagina della copertina.

De publikaties van Eurostat zijn ingedeeld naar onderwerp en serie. Deze indeling is achter in het boek opgenomen. Voor nadere informatie over de publikaties kunt u zich wenden tot Eurostat.

Gelieve bestellingen op te geven bij de verkoopbureaus, waarvan de adressen op bladzijde 3 van de omslag zijn vermeld.

As publicações do Eurostat estão classificadas por tema e por série. Esta classificação está indicada no fim da obra. Para mais informações sobre as publicações é favor contactar Eurostat.

Mit der monatlich erscheinenden Veröffentlichung *Eurostatistik - Daten zur Konjunkturanalyse* werden innerhalb kürzester Frist die neuesten statistischen Daten über die Europäische Gemeinschaft als Ganzes (EUR12), über jedes Mitgliedsland sowie über die Vereinigten Staaten und Japan bekanntgegeben.

Eurostatistik enthält nicht die Gesamtheit des bei Eurostat verfügbaren statistischen Materials, sondern eine Auswahl der relevantesten Reihen über die konjunkturelle Entwicklung.

Schnelligkeit und Pünktlichkeit sind die wichtigsten Vorzüge dieser Veröffentlichung.

Aus diesem Grunde wurde sie im Umfang bewußt klein gehalten und enthält keine Anmerkungen zur Methodik, die im übrigen in den spezialisierten Veröffentlichungen von Eurostat zu finden sind.

Die in *Eurostatistik* veröffentlichten Daten stammen aus dem ICG -Bereich der On-line-Datenbank Cronos von Eurostat.

Wer Zugang zu Cronos besitzt, kann jederzeit die Tabellen dieser Veröffentlichung abfragen, wobei die Daten täglich auf den neuesten Stand gebracht werden (Hinweise zur On-line -Benutzung finden sich auf der letzten Seite). Darüber hinaus sind die Daten in der Datenbank Eurocron verfügbar, die vom Host Eurobases der Kommission angeboten wird.

WECHSELKURSE: Weiterhin leichte Annäherung der Zinssätze in Europa und den USA

Im März führten erneute Rückgänge einiger Zinssätze in Europa zusammen mit einer Erhöhung des Tagesgeldsatzes der amerikanischen Notenbank dazu, daß sich das Zinsgefälle zwischen den USA und Europa weiter abflacht. Obwohl die Zentralbanken ihre Leitzinssätze in den ersten drei März-Wochen nur in wenigen Fällen änderten, gab die Bundesbank viermal eine geringfügige Senkung des Zinssatzes für Wertpapier-Pensionsgeschäfte bekannt. Damit bewegte er sich 1994 zum ersten Mal nach unten, und zwar am 1. März von 6 % auf 5,97 %, danach am 9. März auf 5,94 %, am 16. März auf 5,88 % und am 23. März auf 5,80 %. Währenddessen gab die US-Notenbank eine Erhöhung ihres Tagesgeldsatzes für Ausleihungen an US-Banken um 0,25 % auf 3,5 % bekannt. Die vorangegangene Erhöhung am 4. Februar hatte zu einem Kursverfall am Renten- und Aktienmarkt geführt; dieses Mal hingegen hatten die Finanzmärkte die Änderung bereits weitgehend vorweggenommen, so daß die Auswirkungen auf die Wertpapierkurse gering blieben. Obwohl infolge der Annäherung der Zinssätze in den USA und Deutschland mit einer Stärkung des Dollars zu rechnen gewesen wäre, schloß dieser in London tatsächlich etwas schwächer als am Vortag. Drei Zentralbanken in der EU senkten ihre Leitzinssätze während der ersten drei März-Wochen: in Belgien wurden die Leitzinsen zweimal geringfügig bis auf 6,15 % am 14. März gesenkt; die Banque de France senkte am 24. März ihren Zinssatz für Pensionsgeschäfte im Ausschreibungsverfahren um 0,1 % auf 6 % und am 3. März der Banco de España den Zinssatz für Wertpapier-Pensionsgeschäfte um 0,5 % auf 8 %. Sowohl vor als auch nach der Senkung der französischen Zinssätze zeigte sich der französische Franc gegenüber der D-Mark geringfügig schwächer. Am 25. März behauptete der niederländische Gulden noch vor der D-Mark und dem belgischen Franc seine Stellung als stärkste Währung im Wechselkursmechanismus.

RENDITEN VON STAATSANLEIHEN: Renditeanstieg in den meisten Ländern

Die Erhöhung der kurzfristigen Zinssätze Anfang Februar in den USA war einer der Gründe dafür, daß im Februar in den meisten Ländern eine Zunahme der Rendite von Staatsanleihen zu verzeichnen war. Der Anstieg war am größten in Dänemark (+ 0,6 %) sowie in Frankreich und dem Vereinigten Königreich (beide: + 0,4 %) obwohl die Renditen dort weniger stiegen als in den USA, Japan, Belgien, Deutschland, Spanien, Italien und den Niederlanden. Zu diesem Anstieg der Renditen kam es trotz der fortgesetzten, wenn auch geringfügigen, Senkungen der oben erwähnten amtlichen Zinssätze in Europa.

GELDVOLUMEN: Geldmengenwachstum in einigen Ländern beschleunigt

Im Dezember und im Januar beschleunigte sich das Geldmengenwachstum in mehreren Ländern. In Deutschland expandierte M3 in den zwölf Monaten bis Januar 1994 um beinahe 12 % und lag damit über dem Zielkorridor der Bundesbank von 4-6 %. Der Grund für diese erhebliche Zunahme dürften verschiedene Sonderfaktoren sein, darunter bestimmte Änderungen der Steuergesetze. Auch in Dänemark, Griechenland, Spanien, den Niederlanden, Portugal und im Vereinigten Königreich nahm das Geldvolumen zu. Sowohl das spanische Geldmengenaggregat ALP als auch das italienische Geldvolumen M2 wachsen derzeit schneller, als es die Zielkorridore der amtlichen Stellen vorsehen. Dagegen blieb im Vereinigten Königreich M4 während der zwölf Monate bis Januar 1994 mit einer Zunahme von 5,9 % in der Mitte des Zielkorridors von 3-9 % der Bank of England, der sogenannten „monitoring range“. Nachdem M3 in Irland zwölf Monate lang erheblich zugelegt hatte, verminderte sich ihre Zuwachsrate erheblich und betrug für die zwölf Monate bis Januar 1994 17 %. Darin schlägt sich das Nachlassen der Auswirkungen wider, die bestimmte strukturelle Änderungen auf das Geldmengenwachstum gehabt hatten. Eine davon war die Einführung der Besteuerung von Spareinlagen, die zu einer Verlagerung der (nicht in M3 enthaltenen) Spareinlagen zu Anlageformen geführt hatte, die in M3 enthalten sind. Überdies brachten die hohen kurzfristigen Zinssätze in Irland zu Beginn des Jahres 1993, als das Punt unter Druck stand, eine Abwanderung in bestimmte Geldmarktpapiere mit sich, die in M3 enthalten sind.

AMTLICHE WÄHRUNGSRESERVEN:

(keine neuen Daten)

VIERTELJÄHRLICHE GESAMTRECHNUNGEN: Drittes Quartal 1993: Weiterhin Stagnation des Wirtschaftswachstums (BIP +0,4 %); Inflation rückläufig (+0,4 %)

Im dritten Quartal 1993 war die Wirtschaft der Europäischen Union (EU) insgesamt durch eine schwache Zunahme der Produktion (BIP +0,4 %) gekennzeichnet. Somit ist für die ersten neun Monate des Jahres gegenüber dem entsprechenden Vorjahreszeitraum ein Wachstumsrückgang festzustellen (BIP -0,4 %). Diese Ergebnisse dürften darauf hinweisen, daß für die Wirtschaft der EU vor 1994 nicht mit einer Tendenzumkehr zu rechnen ist. Auf dem letzten G-7-Treffen trat ein verhaltener Optimismus hinsichtlich der wirtschaftlichen Entwicklung im Jahr 1994 zutage, der allerdings teilweise durch die zunehmende Besorgnis über den Anstieg der Arbeitslosigkeit kompensiert wurde. Zur Lösung dieses Problems haben die Wirtschaftsminister und Zentralbankpräsidenten der sieben führenden Industrienationen die Möglichkeiten der Einflußnahme auf die Arbeitsmarktmechanismen in Erwägung gezogen. Das von der Kommission vorgelegte Weißbuch zur Beschäftigung dürfte ein wichtiger Faktor im Kampf gegen die Arbeitslosigkeit sein und kann eine der Grundlagen für den Wirtschaftsaufschwung in der EU darstellen. Was die anhand des impliziten BIP-Deflators gemessene Preisentwicklung betrifft, so ist ein kräftiger Rückgang sowohl der vierteljährlichen als auch der jährlichen

Inflationsrate festzustellen (+0,5 % bzw. +2,8 %). Diese Situation scheint sich günstig auf den allgemeinen Trend zu Zinssenkungen auszuwirken. Über die Situation in den einzelnen Mitgliedstaaten liegen bislang die Zahlen für das vierte Quartal aus Deutschland, Frankreich und Spanien vor; für die Niederlande hingegen nur das BIP. Sie deuten auf einen erneuten Rückgang des Wirtschaftswachstums in Deutschland und den Niederlanden hin (beide: -0,2 %). Ein sehr verhaltenes Wachstum verzeichneten dagegen Frankreich (mit +0,2 %) und Spanien (mit +0,1 %). Diese Daten bestätigen die ausgeprägte Unsicherheit, die für die wirtschaftliche Lage noch immer kennzeichnend ist. In den Vereinigten Staaten hat sich das Wirtschaftswachstum im dritten Quartal 1993 leicht beschleunigt (BIP +0,7 %). Gleichzeitig ging die vierteljährliche Inflationsrate erneut zurück (+0,4 %), während die jährliche Inflationsrate leicht anstieg (+2,7 %). Bei den Komponenten des BIP ist auf die positive Entwicklung des privaten Verbrauchs (+1,0 %) und der Investitionen (+1,8 %) hinzuweisen; der Staatsverbrauch dagegen war erneut rückläufig (-0,3 %). In Japan lassen die Zahlen für das dritte Quartal 1993 eine Wiederbelebung der Wirtschaftstätigkeit (BIP +0,5 %) und einen Anstieg der vierteljährlichen wie auch der jährlichen Inflationsrate (+0,5 % bzw. +1,0 %) erkennen. Bei den Komponenten der Inlandsnachfrage ist eine relativ deutliche Zunahme sowohl der Investitionstätigkeit (+0,7 %) als auch des privaten Verbrauchs (+0,5 %) festzustellen.

PREISE: Die Jahresinflation der EU ging im Februar leicht zurück (3,3%)

Die Jahresinflation für die Europäische Union-gemessen mit dem Verbraucherpreisindex-ging von 3,4 % im Januar auf 3,3 % im Februar zurück. Vor Jahresfrist betrug diese Rate 3,5 %, und seitdem hat sie sich kaum geändert. Zur Zeit sind die Jahresinflationen der einzelnen Mitgliedstaaten wie folgt: (Februar 1994 im Vergleich zu Februar 1993 und Februar 1993 im Vergleich zu Februar 1992);

| | Febr. '94 Febr. '93 | Febr. '93 Febr. '92 | | Febr. '94 Febr. '93 | Febr. '93 Febr. '92 |
|-----------------|------------------------|------------------------|---------------|------------------------|------------------------|
| Irland | 1,7 % | 1,9 % | Niederlande** | 3,0 %p | 2,6 % |
| Frankreich | 1,7 %p | 2,1 % | Deutschland* | 3,4 % | 4,2 % |
| Dänemark | 1,8 % | 1,3 % | Italien | 4,4 %p | 4,5 % |
| Ver. Königreich | 2,4 % | 1,8 % | Spanien | 5,0 % | 4,1 % |
| Belgien | 2,5 % | 2,8 % | Portugal | 6,1 % | 8,0 % |
| Luxemburg | 2,6 % | 3,8 % | Griechenland | 11,0 % | 14,5 % |

* Der Verbraucherpreisindex der Bundesrepublik Deutschland bezieht sich weiterhin auf den Gebietsstand vor dem 3. Oktober 1990.
** Neue Reihen für die Niederlande ab Februar 1994.
p = Vorläufig

In den meisten Mitgliedstaaten sind die Inflationsraten jetzt niedriger als im Vorjahr. Ausnahmen bilden das Vereinigte Königreich, Spanien, die Niederlande und Dänemark. Die Raten für die Beitrittskandidaten sind: Finnland 0,3 % (2,9 %), Norwegen 1,4 % (2,6 %), Schweden 1,9 % (4,9 %) und Österreich 3,1 % (3,7 %). Die entsprechenden Raten für wichtige Nicht-EU-Länder sind: USA 2,5 % (3,2 %), Japan 1,1 % (1,4 %), Kanada 0,2 % (2,3 %) und Schweiz 1,8 % (3,4 %). Zwischen Januar und Februar stieg der Monatsindex für die EU um 0,4 % und zwar als Folge von schwachen bis gemäßigten Preissteigerungen in sämtlichen Mitgliedstaaten, mit Werten von 0,1 % in Spanien, 0,2 % in Frankreich und Griechenland, 0,3 % in Belgien, Deutschland und Luxemburg, 0,4 % in Dänemark und Italien, 0,5 % in den Niederlanden bis 0,6 % im Vereinigten Königreich und Portugal. Der Vierteljahresindex für Irland stieg zwischen November 1993 und Februar 1994 um 0,6 %, was einer durchschnittlichen Steigerung von 0,2 % pro Monat entspricht. Eines der Kriterien wirtschaftlicher Konvergenz im Vertrag über die Europäische Union sieht vor, daß die Jahresinflationen der Mitgliedstaaten nicht mehr als 1,5 Prozentpunkte über denen der drei Länder mit der niedrigsten Inflation liegen dürfen. Im Februar 1994 betrug der Durchschnitt der drei niedrigsten Raten 1,7 %. Folgende Länder lagen innerhalb dieser Grenze: Irland, Frankreich, Dänemark, Vereinigtes Königreich, Belgien, Luxemburg und Niederlande.

INDUSTRIEPRODUKTION Grundstoffgüterindustrie als Vorreiter des Aufschwungs

Die Industrieproduktion in der Europäischen Union (EU) zeigt Zeichen eines Umschwungs, d.h. die deutliche Schrumpfung des industriellen Output ist zum Stillstand gekommen. Dabei zeigt die Grundstoffgüterindustrie schon klare Wachstumsraten, während die Investitionsgüterindustrie (noch) stagniert. In der EU betrug die Veränderungsrate des arbeitstäglich bereinigten Produktionsindex der Industrie gegenüber dem Wert des gleichen Monats ein Jahr zuvor im Dezember 1993 +0,8 %, für die Grundstoffindustrie +3,2 %. Betrachtet man das vierte Quartal 1993, so beläuft sich für die EU die Veränderungsrate des saisonbereinigten Produktionsindex gegenüber dem Herbstquartal auf +0,4 %, für die Grundstoffgüterindustrie beträgt der entsprechende Wert +2,0 %. In Japan beträgt die entsprechende Veränderungsrate für die Industrieproduktion -3,2 %, die Rezession wird also tiefer; während in den USA mit +1,6 eine Festigung der Aufwärtsbewegung zu beobachten ist. Für die einzelnen Mitgliedstaaten der Europäischen Union ergeben sich, soweit vorhanden - für die saisonbereinigte Industrieproduktion folgende Veränderungsrate Oktober bis Dezember gegenüber den drei Vormonaten (in Klammern: entsprechende Veränderungsrate für die Grundstoffgüterindustrie): Vereinigtes Königreich +1,3 % (+2,3 %), Italien +0,5 % (+1,2 %), Frankreich +0,4 % (+2,0 %), Spanien -1,1 % (geschätzt) (+0,3 %), West-Deutschland -0,4 % (+0,8 %), Belgien -0,9 % (-1,2 %) (geschätzt), Dänemark -0,8 % (+1,6 %), Griechenland -1,9 % (+0,1 %), Niederlande -1,8 % (4,4 %). Das Konjunkturbild ist also eher heterogen, in der Regel zeigt die Grundstoffgüterindustrie ermutigende Zeichen eines Aufschwungs.

Die Preisentwicklung der Industrieproduktion war 1993 der Rezession angepaßt: in der Europäischen Union stiegen die Preise noch um 1,5 % gegenüber 1992 (1992 gegenüber 1991: 1,5 %), in den Mitgliedstaaten war in der Regel die Inflationsrate niedriger als im Vorjahr, in 6 Mitgliedstaaten sogar negativ: Belgien -1,0 % (0,2 %), Dänemark -0,9 % (-1,2 %), Deutschland -0,1 % (1,3 %), Griechenland +11,5 % (11,9 %); Spanien +2,4 % (1,4 %), Frankreich -0,2 % (1,0 %), Irland +2,3 % (2,1 %), Italien +3,8 % (1,9 %), Luxemburg -1,3 % (-2,6 %), Niederlande -1,2 % (0,5 %), Vereinigtes Königreich +3,3 % (2,0 %), USA +1,5 % (0,6 %); Japan -1,6 % (-1,0 %).

AUSSENHANDEL Ergebnisse für September 1993

Zwischen den ersten drei Quartalen 1992 und dem Vergleichszeitraum 1993 betrug die Differenz zwischen der Veränderungsrate der Ausfuhren und der der Einfuhren für die Europäische Union 10 Prozentpunkte, für Japan 4 Prozentpunkte und für die Vereinigten Staaten -7 Prozentpunkte.

Für die ersten neun Monate 1993 verzeichnete die Europäische Union ein Außenhandelsbilanzdefizit von 14,2 Mrd. ECU gegenüber fast dem Dreifachen (45,4 Mrd. ECU) für den Zeitraum zwischen Januar und September 1992. Die Einfuhren der Europäischen Union gingen in den ersten neun Monaten 1993 gegenüber dem Vergleichszeitraum des Vorjahres leicht zurück: -1,2 %. Die Warenausfuhren sind im Vergleich zum kumulierten Wert der ersten drei Quartale 1992 stark angestiegen: 8,5 %.

Das Handelsbilanzdefizit der Vereinigten Staaten für den Zeitraum zwischen Januar und September 1993 betrug fast 86 Mrd. ECU, und hat sich damit gegenüber dem Vergleichszeitraum 1992 um ca. 30 Mrd. vergrößert. Die Einfuhren der Vereinigten Staaten nahmen in Ecu ausgedrückt um 20,7 %, in US-Dollar um 9,2 % zu. Die Ausfuhren stiegen um 13,4 % in Ecu beziehungsweise 3 % in Dollar.

Der Außenhandelsbilanzüberschuß Japans erhöhte sich im Beobachtungszeitraum gegenüber den ersten neun Monaten 1992 um fast 16 Mrd. ECU und belief sich somit auf 75,4 Mrd. ECU. Die japanischen Ausfuhren stiegen in Ecu ausgedrückt um 18 %, in Dollar um 6,8 %, während sie in Yen ausgedrückt um 3,6 % zurückgingen. Die Einfuhren dieses Landes verzeichneten einen Anstieg um 14,2 % in Ecu, um 3,4 % in Dollar, in Yen ausgedrückt jedoch einen Rückgang um 8,5 %.

Deutschland und Italien erzielten zwischen Januar und September 1993 mit 12 Mrd. ECU beziehungsweise 6 Mrd. ECU die höchsten kumulierten Überschüsse.

Der Außenhandelsbilanzsaldo Italiens verbesserte sich im Zeitraum Januar bis September 1993 gegenüber der entsprechenden Vorjahresperiode um 6 Mrd. ECU. Die italienischen Ausfuhren nahmen, begünstigt durch die Abwertung der Lira, um 13,3 % zu. Die Einfuhren Italiens aus Drittländern gingen um 6,4 % zurück.

Deutschland verzeichnete zwischen Januar und September 1993 einen gegenüber dem Vergleichszeitraum 1992 um ca. 7 Mrd. ECU höheren Außenhandelsbilanzüberschuß. Die Einfuhren verringerten sich um 0,7 %, während die Ausfuhren um 5,8 % wuchsen.

Spanien, die BLWU und die Niederlande verbesserten ihre Außenhandelsbilanzdefizite jeweils um nahezu 4 Mrd. ECU. Da sich die importierten Waren aufgrund der Abwertung der Peseta verteuerten, gingen die spanischen Einfuhren aus Drittländern stark zurück (-16,8 %). Auf der anderen Seite begünstigte die Abwertung der Peseta die Ausfuhren, die um 13,6 % zunahmen. Die BLWU und die Niederlande verzeichneten für die ersten drei Quartale 1993 gegenüber dem entsprechenden Vorjahreszeitraum hohe Zuwachsraten bei den Extra-EU-Ausfuhren (18,6 % beziehungsweise 16,4 %), die Einfuhren aus Drittländern nahmen dagegen um 5,2 % beziehungsweise 2,5 % ab.

Dänemark und Frankreich erhöhten ihren Außenhandelsbilanzüberschuß gegenüber dem Zeitraum Januar bis September 1992 um jeweils 0,6 Mrd. ECU. Die dänischen Ausfuhren nahmen um 4,8 % zu, während bei den Einfuhren ein Rückgang um 2,4 % zu beobachten war. Frankreich verzeichnete einen leichten Abwärtstrend sowohl bei den Einfuhren (-1,5 %) als auch bei den Ausfuhren (-0,5 %).

Das Außenhandelsbilanzdefizit des Vereinigten Königreichs betrug in den ersten drei Quartalen 1993 annähernd 16 Mrd. ECU, was einer Verbesserung um 0,5 Mrd. ECU gegenüber dem Vergleichszeitraum 1992 entspricht. Die Ausfuhren stiegen ebenso wie die Einfuhren: 11,4 % beziehungsweise 7,7 %.

Portugal schloß seine Außenhandelsbilanz für den Beobachtungszeitraum mit einem geringen Defizit in Höhe von 0,2 Mrd. ECU ab. Der Handel Portugals mit Drittländern ist ausgedrückt in Ecu erheblich zurückgegangen: -12,8 % bei den Einfuhren, -14,2 % bei den Ausfuhren. Der Außenhandelsbilanzsaldo Irlands hat sich gegenüber den ersten neun Monaten 1992 kaum verändert. Die irischen Einfuhren und Ausfuhren verzeichneten beträchtliche Zuwachsraten: 35 % beziehungsweise 32 %.

Das kumulierte Außenhandelsbilanzdefizit Griechenlands für den Zeitraum Januar bis September 1993 hat sich um 0,2 Mrd. ECU leicht verschlechtert. Die griechischen Einfuhren aus Drittländern nahmen zwischen Januar und September 1993 gegenüber dem Vergleichszeitraum 1992 um 11,8 % zu; die Ausfuhren stiegen um 23,5 %.

Eurostatistics - data for short-term economic analysis is a monthly publication aimed at providing, as rapidly as possible, the latest statistical data on the European Community as a whole (EUR 12), each Member State, the United States and Japan.

Eurostatistics does not present all the statistics held by Eurostat, but a selection of the most relevant series on the economic situation.

Speed of publication and punctuality are the main features of this publication; that is why it is deliberately streamlined and does not contain any methodological notes, which are given in Eurostat's specialized publications.

The data published in *Eurostatistics* are taken from the ICG domain of Eurostat's on-line database, Cronos (instructions regarding on-line consultation may be found at the end of this publication). They are also available via the Commission host Eurobases in the Eurocron database.

EXCHANGE RATES: further slight convergence of European and US interest rates

There were further falls in some European interest rates in March, which, together with an upwards movement in the Federal Reserve's target for the level of Federal Funds rate, meant that the interest rate differential between the US and Europe continues to narrow.

Although there were few changes in central bank headline interest rates in the first three weeks of March, the Bundesbank announced four small reductions in its rate on repurchase agreements (repo rate), the first changes in 1994. The first reduction was from 6% to 5.97% on March 1, then to 5.94% on March 9, 5.88% on March 16 and 5.80% on March 23.

Meanwhile, on March 22 the US Federal Reserve announced an increase of 0.25% in its target for the Federal Funds rate to 3.5%. The previous increase, on February 4, had led to large falls in bond and share prices, but on this occasion the change had already been largely discounted by the financial markets and thus there was little effect on the prices of financial assets.

The dollar, which might have been expected to have gained from the narrowing of US and German interest rates, in fact closed in London slightly down on its previous close.

Three EC central banks reduced their headline interest rates in the first three weeks of March: the central rate in Belgium was reduced twice by small amounts, to stand at 6.15% on March 14; the Banque de France reduces its auction rate by 0.1% to 6% on March 24 and the Bank of Spain its repo rate by 0.5% to 8% on March 3. The French franc weakened slightly against the Deutschemerk both before and after the reduction in French interest rates. On March 25, the Dutch guilder remained the strongest ERM currency, followed by the Deutschemerk and the Belgian franc.

GOVERNMENT BOND YIELDS: rising yields in most countries

The increase in American short-term interest rates at the beginning of February was one cause of the increase in government bond yields which occurred in February in most countries surveyed.

The largest increases occurred in Denmark (up 0.6%), France and the United Kingdom (both up 0.4%), although yields also increased by lesser amounts in the US, Japan, Belgium, Germany, Spain, Italy and the Netherlands.

These increases in yields occurred despite the continued, albeit small, cuts in short-term official European interest rates referred to earlier.

MONEY SUPPLY: monetary growth accelerates in some countries

Monetary growth accelerated in several countries in December and January. In Germany, the growth rate of M3 in the 12 months to January 1994 was almost 12%, as compared to the Bundesbank's target range of 4-6% for the last quarter of 1994 as compared to the last quarter of 1993. This large increase can be ascribed to several extra-ordinary factors, including certain changes in taxation law.

Monetary growth also quickened in Denmark, Greece, Spain, the Netherlands, Portugal and the UK. In both Spain and Italy ALP and M2 respectively are currently growing rather faster than the authorities' target ranges. However, despite recent increasing growth rates, M4 in the UK remains well within the Bank of England's «monitoring range» of 3-9%, with a growth rate of 5.9% in the 12 months to January 1994.

After 12 months of high growth, the rate of growth of Ireland's M3 is slowing considerably, standing at 17% in the year to January 1994. This is a reflection of a slowdown in the effect certain structural changes have had on monetary growth. One of these concerned the implementation of a tax on savings deposits; there was thus a shift from savings deposits (not included in M3) to deposits which are included in M3. In addition, the high short-term interest rates which occurred in Ireland at the beginning of 1993 during the period of pressure on the punt meant that there was a move into certain money market instruments which are included in M3.

(no new data)

QUARTERLY ACCOUNTS: Economic growth remains stagnant in the third quarter of 1993 (GDP +0.4%); lower inflation (+0.4%)

The third quarter of 1993 saw a slight increase in production in the economy of the European Union as a whole (GDP +0.4%). This meant that during the first nine months of the year there was a -0.4% fall in GDP compared to the corresponding period for the previous year. On the basis of these results, a reversal of the trend for the EU economy seems unlikely before 1994. The mood at the last G7 meeting was one of guarded optimism about the economic prospects for 1994, although this was tempered by increasing concern about the rise in unemployment. In order to solve this problem, the Ministers for Economic Affairs and the Governors of the Central Banks in the seven most industrialised countries considered the possibility of changing the rules governing the labour market. The White Paper on employment produced by the Commission looks to be an important element in the fight against unemployment and could constitute one of the bases for economic recovery in the Union.

With regard to inflation, measured by the implicit delator of GDP, there was a significant drop in the quarterly and annual growth rates (+0.4% and +2.8% respectively). This situation seems to favour the trend towards a general reduction in interest rates.

Data for the fourth quarter are available for Germany, France and Spain and data on GDP only for the Netherlands. These results seem to show a further decline in economic growth in Germany and the Netherlands (-0.2% in both countries), while the figures for France and Spain suggest tentative growth (+0.2% and +0.1% respectively). These data confirm the very uncertain nature of the economy.

In the United States the third quarter of 1993 produced a slight upswing in economic growth (GDP +0.7%) accompanied by a renewed fall in quarterly inflation (+0.4%), although there was a slight increase on an annual basis (+2.7%). Among

the components of GDP there was a positive trend in private consumption (+1.0%) and investment (+1.8%), while there was a renewed fall in public consumption (-0.3%).

In Japan the third quarter showed an increase in economic growth (GDP +0.5%) and an increase in inflation on both a quarterly and an annual basis (+0.5% and +1.0% respectively). Of the components of domestic demand, there was a more marked overall increase in private consumption than in investment (+0.7% and +0.5% respectively).

PRICES: EU annual inflation slightly down in February (3.3%)

The annual inflation rate for the EU as measured by the CPI went down from 3.4% in January to 3.3% in February. A year ago this rate was 3.5% and it has remained little changed since.

At present annual inflation rates for the individual Member States are as follows: (February 1994 compared with February 1993 and February 1993 compared with February 1992):

| | Febr. '94 Febr. '93 | Febr. '93 Febr. '92 | | Febr. '94 Febr. '93 | Febr. '93 Febr. '92 |
|----------------|------------------------|------------------------|---------------|------------------------|------------------------|
| Ireland | 1.7% | 1.9% | Netherlands** | 3.0%p | 2.6% |
| France | 1.7%p | 2.1% | Germany* | 3.4% | 4.2% |
| Denmark | 1.8% | 1.3% | Italy | 4.4%p | 4.5% |
| United Kingdom | 2.4% | 1.8% | Spain | 5.0% | 4.1% |
| Belgium | 2.5% | 2.8% | Portugal | 6.1% | 8.0% |
| Luxembourg | 2.6% | 3.8% | Greece | 11.0% | 14.5% |

* The CPI for the Federal Republic of Germany continues to reflect borders price to 3 October 1990.

** New series for the Netherlands starting from February 1994.

p Provisional

Inflation rates are lower than a year ago in all Member States, except the United Kingdom, Spain, the Netherlands and Denmark.

The rates for the applicant Member States are: Finland 0.3% (2.9%), Norway 1.4% (2.6%), Sweden 1.9% (4.9%) and Austria 3.1% (3.7%).

The corresponding rates for major non-EU countries are: USA 2.5% (3.2%), Japan 1.1% (1.4%), Canada 0.2% (2.3%) and Switzerland 1.8% (3.4%).

The monthly index for the EU rose by 0.4% between January and February, as a result of low to moderate increases in all Member States, ranging from 0.1% in Spain, 0.2% in France and Greece, 0.3% in Belgium, Germany and Luxembourg, 0.4% in Denmark and Italy, 0.5% in the Netherlands to 0.6% in the United Kingdom and Portugal.

The quarterly index for Ireland rose by 0.6% from November 1993 to February 1994, which corresponds to an average increase of 0.2% per month.

One of the criteria on economic convergence required by the Treaty on European Union is that annual inflation in the Member States must not exceed by more than 1.5 percentage points that of the three best performing countries.

In February 1994 the average of the three lowest annual rates was 1.7%; the countries falling within 1.5 percentage points of this figure are: Ireland, France, Denmark, the United Kingdom, Belgium, Luxembourg, and the Netherlands.

INDUSTRIAL PRODUCTION Intermediate goods industry leads recovery

Industrial production in the European Union (EU) is showing signs of being at a turning point, i.e. the steep downturn in industrial output has come to a halt, with the raw materials industry already showing clear growth rates, while the capital goods industry is (still) stagnating.

The rate of change in the industrial production index, adjusted for the number of working days, was 0.8% up for the EU in December 1993 compared with the corresponding month of the previous year (+3.2% for the intermediate goods industry).

For the fourth quarter of 1993, the rate of change in the seasonally adjusted production index for the EU was 0.4% up on the previous quarter (+2.0% for the intermediate goods industry).

In Japan, the corresponding rate of change for industrial production was -3.2%, indicating a deepening of the recession, while the figure of +1.6% in the USA indicates a consolidation of the upward trend.

For the individual Member States of the European Union, the seasonally adjusted figures for industrial production, where available, show the following rates of change for October-December compared with the previous three months (the figures in brackets show the corresponding rates of change for the intermediate goods industry): United Kingdom +1.3% (+2.3%), Italy +0.5% (+1.2%), France +0.4% (+2.0%), Spain -1.1% (+0.3%) (estimate), West Germany -0.4% (+0.8%), Belgium -0.9% (-1.2%) (estimate), Denmark -0.8% (+1.6%), Greece -1.9% (+0.1%) and the Netherlands -1.8% (+4.4%). The economic picture is thus rather a mixed one, with the raw materials industry generally showing encouraging signs of an upturn.

Price trends of industrial production in 1993 were in line with the recession: in the European Union prices rose by 1.5% compared with 1992 (1992 compared with 1991: 1.5%). In the Member States the inflation rate was generally lower than in the previous year and in six Member States it was even negative:

Belgium -1.0% (+0.2%), Denmark -0.9% (-1.2%), Germany -0.1% (+1.3%), Greece +11.5% (+11.9%), Spain +2.4% (+1.4%), France -0.2% (+1.0%), Ireland +2.3% (+2.1%), Italy +3.8% (+1.9%), Luxembourg -1.3% (-2.6%), Netherlands -1.2% (+0.5%), United Kingdom +3.3% (+2.0%), USA +1.5% (+0.6%), and Japan -1.6% (-1.0%).

EXTRA-UNION TRADE September 1993

If the first nine months of 1992 are compared with the same period of 1993, exports rose faster than imports by 10 points in the European Union and 4 points in Japan, while in the United States the rate of increase for exports was 7 points lower than for imports.

The deficit in the external trade of the European Union for the first nine months of 1993 was ECU 14.2 billion, less than a third of the level for January-September 1992 (ECU -45.4 billion). Imports into the Union fell slightly, by 1.2%, between the two periods. Goods exported outside the Union were 8.5% up on their cumulative level in the first three quarters of 1992.

The United States recorded a cumulative deficit of almost ECU 86 billion for January-September 1993, 30 billion worse than in the same period of 1992. US imports were up by 20.7% in ecus and by 9.2% in dollars; exports were up by 13.4% in ecus and by 3% in dollars.

Japan showed a surplus of ECU 75.4 billion for January-September 1993, almost 16 billion more than in the equivalent period of 1992. Japan's exports were 18% up in ecus and 6.8% up in dollars, but down by 3.6% in yen. Imports were up by 14.2% in ecus and by 3.4% in dollars, but 8.5% down in yen.

Germany and Italy recorded the largest cumulative surpluses for January-September 1993, at ECU 12 and 6 billion respectively.

Italy's balance of trade improved by around ECU 6 billion between January-September 1992 and the same period in 1993. Its exports, bolstered by the devaluation of the lira, grew by 13.3%. Italy's imports from outside the European Union were 6.4% down.

Germany recorded an external trade surplus in January-September 1993 that was some ECU 7 billion higher than in the equivalent period of the previous year. Imports were down by 0.7% while exports were up by 5.8%.

Spain, the BLEU and the Netherlands each reduced their external-trade deficits by approximately ECU 4 billion. Spain's imports from outside the European Union were down by 16.8%, the prices of goods having been pushed up by the devaluation of the peseta, which also helped to boost exports by 13.6%. The BLEU and the Netherlands saw sharp increases, of 18.6% and 16.4% respectively, in their extra-EU exports between the first nine months of 1992 and 1993; their extra-EU imports were down by 5.2% and 2.5% respectively.

Denmark and France each registered an external-trade surplus more than ECU 0.6 billion higher than in the period January-September 1992. Denmark's exports were up by 4.8%, but imports were down by 2.4%. France's imports and exports were both slightly down (by 1.5% and 0.5%).

The United Kingdom's deficit was almost ECU 16 billion for the first nine months of 1993, half a billion less than in the corresponding period of 1992. Its exports were up by 11.4% and imports by 7.7%.

Portugal's external-trade deficit was ECU 0.2 billion down in January-September 1993. Its trade with countries outside the Union was well down in ecu terms: imports by 12.8% and exports by 14.2%. Ireland's balance was close to its level in the first nine months of 1992, but both imports and exports increased sharply, by 35% and 32% respectively.

Greece's cumulative deficit in January-September 1993 represented a slight improvement of ECU 0.2 billion. Greek imports from outside the European Union in the period concerned were up by 11.8% while its exports rose by 23.5%.

Eurostatistiques - Données pour l'analyse de la conjoncture est une publication mensuelle qui a pour but de fournir dans les meilleurs délais les données statistiques les plus récentes pour la Communauté européenne en tant qu'ensemble (EUR12), pour les pays membres ainsi que pour leurs principaux partenaires extra-communautaires (États-Unis d'Amérique et Japon).

Eurostatistiques ne publie pas d'une manière exhaustive toutes les statistiques disponibles auprès d'Eurostat, mais les plus importantes parmi celles-ci.

Cette publication se veut rapide et facilement maniable. Pour cette raison, elle ne comporte pas de notes méthodologiques, qui sont par ailleurs disponibles dans les publications spécialisées d'Eurostat.

Les données publiées dans *Eurostatistiques* proviennent du domaine ICG de la base de données Cronos (les instructions pour le mode de consultation on-line se trouvent à la fin de cette publication). Ces données sont aussi disponibles dans la base de données Eurocron, accessible par l'intermédiaire du serveur Eurobases de la Commission.

TAUX DE CHANGE: nouveau léger rapprochement entre taux d'intérêt européens et américains

En mars, certains taux d'intérêt européens ont à nouveau baissé et le système fédéral de réserve s'étant fixé un objectif à la hausse pour les taux des fonds fédéraux, la différence de taux d'intérêt entre les Etats-Unis et l'Europe continue de s'amenuiser.

Bien que très peu de changements soient intervenus dans les taux d'intérêt de référence des banques centrales au cours des trois premières semaines du mois de mars, la Bundesbank a annoncé quatre petites réductions de ses taux sur ses accords de réméré; ce sont les premières pour 1994. Les taux sont tout d'abord passés de 6 % à 5,97 % le 1^{er} mars, puis à 5,94 % le 9 mars, à 5,88 % le 16 mars et à 5,80 % le 23 mars.

Dans l'intervalle, le 22 mars, le système fédéral de réserve US a annoncé une augmentation de 0,25 % de son taux cible pour les fonds fédéraux, taux qui est ainsi passé à 3,5 %. L'augmentation précédente, le 4 février, avait entraîné des chutes importantes des prix des obligations et des actions mais, cette fois, les marchés financiers avaient largement anticipé le mouvement qui a donc eu peu d'effets sur les prix des avoirs financiers.

Le dollar, dont on avait pu penser qu'il allait profiter du rapprochement entre taux d'intérêt américains et allemands, clôturait en fait à Londres légèrement au-dessous de son cours précédent.

Trois banques centrales CE ont réduit leurs taux d'intérêt de référence au cours des trois premières semaines de mars: en Belgique, le taux central a été réduit deux fois de très peu pour atteindre 6,15 % le 14 mars; la Banque de France a réduit son taux de change libre de 0,1 %, ce qui l'a ramené à 6 % le 24 mars et la Banque d'Espagne a réduit son taux de réméré de 0,5 %, à 8 % le 3 mars. Le franc français s'est légèrement affaibli par rapport au DM à la fois avant et après la réduction des taux d'intérêt français. Le 25 mars, le florin restait la monnaie la plus forte du MTC suivie par le DM et par le franc belge.

RENDEMENT DES OBLIGATIONS D'ÉTAT: rendements en augmentation dans la plupart des pays

L'accroissement des taux d'intérêt à court terme des États-Unis au début de février a été l'une des causes de la progression des rendements des obligations d'État intervenu en février dans la plupart des pays étudiés.

Les plus fortes augmentations ont concerné le Danemark (jusqu'à 0,6 %), la France et le Royaume-Uni (l'une et l'autre jusqu'à 0,4 %), mais les rendements ont également progressé, dans une moindre mesure, aux États-Unis, au Japon, en Belgique, en Allemagne, en Espagne, en Italie et aux Pays-Bas.

Ces augmentations de rendements se sont produites en dépit des réductions, faibles mais rejetées, des taux d'intérêt officiels à court terme européens visées plus haut.

MASSE MONÉTAIRE: La croissance de la masse monétaire s'accélère dans certains pays

En décembre et en janvier, la croissance de la masse monétaire s'est accélérée dans plusieurs pays. En Allemagne, le taux d'accroissement de M3 a atteint près de 12 % sur un an (janvier 1993 à janvier 1994) alors que à l'objectif de la Bundesbank pour le dernier trimestre de 1994 par rapport au dernier trimestre de 1993 était de 4-6 %. Cette forte augmentation peut être attribuée à différents facteurs exceptionnels, y compris certaines modifications de la législation fiscale.

La croissance monétaire s'est également accélérée au Danemark, en Grèce, en Espagne, aux Pays-Bas, au Portugal et au Royaume-Uni. En Espagne, les ALP progressent actuellement plutôt plus rapidement que les objectifs fixés par les autorités et il en va de même pour M2 en Italie. Toutefois, en dépit de récentes augmentations des taux d'accroissement, M4 au Royaume-Uni reste à l'intérieur de la «fourchette» indicative de 3-9 % fixée par la Banque d'Angleterre, avec un taux de croissance de 5,9 % au cours des 12 mois finissant en janvier 1994.

Après 12 mois de forte augmentation, le taux de croissance de M3 en Irlande se ralentit considérablement et s'établit à 17 % pour les douze mois allant de janvier 1993 à janvier 1994. C'est le résultat de l'effet de ralentissement de certains changements structurels sur la croissance monétaire. Un de ces changements concerne l'instauration d'une taxe sur les comptes d'épargne, ce qui a entraîné un transfert de fonds des comptes d'épargne (non inclus dans M3) vers des dépôts inclus dans M3. En outre, les taux d'intérêt à court terme élevés enregistrés en Irlande au début de 1993, alors que la livre irlandaise était soumise à certaines pressions, ont entraîné un regain d'intérêt pour certains instruments du marché monétaire inclus dans M3.

RÉSERVES DE CHANGE

(pas de données nouvelles)

COMPTES TRIMESTRIELS: Au cours du troisième trimestre 1993: poursuite de la phase de stagnation de la croissance économique (PIB +0,4 %); baisse de l'inflation (+0,4 %).

Le troisième trimestre 1993 a été caractérisé, par l'économie de l'Union européenne dans son ensemble, par une légère croissance de la production (PIB +0,4 %). De ce fait, au cours des neuf premiers mois de l'année, on a constaté, par rapport à la période correspondante de l'année précédente, un fléchissement de la croissance économique (PIB -0,4 %). Ces résultats semblent indiquer qu'une inversion de tendance, pour l'économie de l'Union, ne semble pas être envisageable avant 1994. La dernière réunion du G7 a mis en évidence un certain optimisme modéré pour la situation économique au cours de 1994. D'ailleurs cet optimisme est en partie compensé par des préoccupations de plus en plus fortes pour la croissance du chômage. Pour résoudre ce problème les Ministres des économies ainsi que les Gouverneurs des banques centrales des sept pays les plus développés ont envisagé la possibilité de changer les règles du marché du travail. Le livre blanc sur

l'occupation, présenté par la Commission, semble être un élément important pour combattre le chômage et peut constituer une des bases pour la reprise de l'économie de l'Union.

En ce qui concerne l'inflation, mesurée par le déflateur implicite du PIB on constate une baisse importante tant en rythme trimestriel qu'annuel (+0,4 % et 2,8 % respectivement). Cette situation semble favoriser la tendance à une baisse généralisée des taux d'intérêt.

En ce qui concerne la situation dans les Etats membres, on dispose des résultats du quatrième trimestre pour l'Allemagne, la France et l'Espagne; et uniquement le BIP pour les Pays-Bas. Ces résultats semblent indiquer un nouveau fléchissement de la croissance économique en Allemagne et aux Pays-Bas (-0,2 % et -0,2 % respectivement). Par contre, en France et en Espagne, on observe une croissance très faible (+0,2 % et +0,1 % respectivement). Ces données confirment que la situation économique est encore caractérisée par une incertitude prononcée.

Aux Etats-Unis, au cours du troisième trimestre 1993, on constate une légère accélération de la croissance économique (PIB +0,7 %) accompagnée par une nouvelle baisse de l'inflation trimestrielle (+0,4 %), tandis qu'en rythme annuel on constate une légère reprise (+2,7 %). Parmi les composantes du PIB, il faut mettre en évidence l'évolution positive de la consommation privée (+1,0 %) et des investissements (+1,8 %), tandis que la consommation publique présente un nouveau fléchissement (-0,3 %).

Pour le Japon, au cours du troisième trimestre 1993, on constate une reprise de la croissance économique (PIB +0,5 %) accompagnée par une reprise de l'inflation tant trimestrielle qu'annuelle (+0,5 % et +1,0 % respectivement). Parmi les composantes de la demande interne, on observe une reprise généralisée plus prononcée pour la consommation privée et pour les investissements (+0,7 % et +0,5 % respectivement).

PRIX: L'inflation annuelle de l'UE reculé légèrement en février (3,3 %)

Le taux d'inflation annuel pour l'Union Européenne mesuré par l'IPC a reculé de 3,4 % en janvier à 3,3 % en février; il y a un an ce taux était de 3,5 % et il n'a guère changé depuis.

Actuellement les taux d'inflation annuels des différents Etats membres sont les suivants: (février 1994 par rapport à février 1993 et février 1993 par rapport à février 1992)

| | Févr. '94 | Févr. '93 | | Févr. '94 | Févr. '93 |
|-------------|-----------|-----------|------------------|-----------|-----------|
| | Févr. '94 | Févr. '93 | | Févr. '94 | Févr. '93 |
| Irlande | 1,7 % | 1,9 % | Pays-Bas** | 3,0 %p | 2,6 % |
| France | 1,7 %p | 2,1 % | R.F.d'Allemagne* | 3,4 % | 4,2 % |
| Danemark | 1,8 % | 1,3 % | Italie | 4,4 %p | 4,5 % |
| Royaume-Uni | 2,4 % | 1,8 % | Espagne | 5,0 % | 4,1 % |
| Belgique | 2,5 % | 2,8 % | Portugal | 6,1 % | 8,0 % |
| Luxembourg | 2,6 % | 3,8 % | Grèce | 11,0 % | 14,5 % |

* L'IPC pour la République Fédérale d'Allemagne continue à se rapporter à la situation territoriale avant le 3 octobre 1990

** Nouvelles séries pour les Pays-Bas à partir de février 1994.

p Provisoire

Les taux d'inflation sont inférieurs à ceux de l'année dernière dans tous les Etats membres, à l'exception du Royaume-Uni, de l'Espagne, des Pays-Bas et du Danemark.

Les taux des Etats candidats à l'adhésion sont: Finlande (0,3 %) (2,9 %), Norvège 1,4 % (2,6 %), Suède 1,9 % (4,9 %) et Autriche 3,1 % (3,7 %).

Les taux correspondants d'autres pays importants hors de l'UE sont: Etats-Unis 2,5 % (3,2 %), Japon 1,1 % (1,4 %), Canada 0,2 % (2,3 %) et Suisse 1,8 % (3,4 %).

Entre janvier et février, l'indice mensuel pour l'UE a augmenté de 0,4 %, suite à des hausses faibles à modérées dans tous les Etats membres, allant de 0,1 % en Espagne, 0,2 % en France et en Grèce, 0,3 % en Belgique, en Allemagne et au Luxembourg, 0,4 % au Danemark, 0,5 % aux Pays-Bas, à 0,6 % au Royaume-Uni et au Portugal.

L'indice trimestriel de l'Irlande a progressé de 0,6 % entre novembre 1993 et février 1994, ce qui correspond à un accroissement de 0,2 % en moyenne mensuelle.

Un des critères de convergence économique prévu dans le Traité sur l'Union Européenne, est que les taux d'inflation annuelle des Etats membres ne doivent pas dépasser de plus de 1,5 % celui des trois Etats les mieux performants.

En février 1994 la moyenne des trois taux les plus bas était de 1,7 %. Les pays qui se situent à l'intérieur de cette limite sont: l'Irlande, la France, le Danemark, le Royaume-Uni, la Belgique, le Luxembourg, et les Pays-Bas.

PRODUCTION INDUSTRIELLE: L'industrie des produits de base, secteur à la pointe de la relance

La production industrielle de l'Union européenne (UE) montre des indices de reprise dans la mesure où le net recul de la production industrielle est désormais stoppé. A cet égard, seule l'industrie des produits de base affiche déjà des signes manifestes de croissance tandis que celle des biens d'équipement stagne (encore).

Dans l'UE, le taux de variation de l'indice de production industrielle corrigé du nombre de jours ouvrables a progressé de + 0,8 % en décembre 1993 par rapport à la période correspondante de l'année précédente et de + 3,2 % pour l'industrie des produits de base.

Si l'on considère le quatrième trimestre de 1993, le taux de variation de l'indice de production industrielle corrigé des variations saisonnières de l'UE a progressé de + 0,4 % par rapport au trimestre automnal et de + 2,0 % pour l'industrie des produits de base.

Au Japon, le taux correspondant de variation de la production industrielle a reculé de -3,2 %, ce qui signifie que la récession s'amplifie, tandis qu'aux Etats-Unis on constate une consolidation de la tendance à la reprise avec +1,6 %.

En ce qui concerne les divers États membres de l'Union européenne et dans la mesure où les données sont disponibles, les taux de variation de l'indice de production industrielle corrigé des variations saisonnières des mois d'octobre à décembre ont évolué comme suit par rapport aux trois mois précédents (entre parenthèses taux de variation relatif à l'industrie des produits de base): Royaume-Uni +1,3 % (+2,3 %), Italie +0,5 % (+1,2 %), France +0,4 % (+2,0 %), Espagne -1,1 % (estimation) (+1,3 %), Allemagne de l'Ouest -0,4 % (+ 0,8 %), Belgique -0,9 % (-1,2 %) (estimation), Danemark -0,8 % (+1,6 %), Grèce -1,9 % (-0,1 %), Pays-Bas -1,8 % (4,4 %). Le panorama conjoncturel est donc assez hétérogène bien que, dans l'ensemble, l'industrie des produits de base affiche des signes encourageants de reprise.

La courbe des prix de la production industrielle a suivi en 1993 une allure calquée sur la récession dans la mesure où, dans l'Union européenne, les prix ont progressé de 1,5 % par rapport à 1992 (1992 par rapport à 1991: 1,5 %). En ce qui concerne le taux d'inflation, on a généralement observé dans les États membres un recul par rapport à l'année précédente, 6 pays réalisant même des taux négatifs:

Belgique -1,0 % (0,2 %), Danemark -0,9 % (-1,2 %), Allemagne -0,1 % (1,3 %), Grèce + 11,5 % (11,9 %), Espagne + 2,4 % (1,4 %), France -0,2 % (1,0 %), Irlande + 2,3 % (2,1 %), Italie + 3,8 % (1,9 %), Luxembourg -1,3 % (-2,6 %), Pays-Bas -1,2 % (0,5 %), Royaume-Uni + 3,3 % (2,0 %), États-Unis + 1,5 % (0,6 %), Japon -1,6 % (-1,0 %).

COMMERCE EXTERIEUR Résultats de septembre 1993

Entre les neuf premiers mois de 1992 et de 1993 la différence des taux d'évolution entre exportations et importations est de 10 points pour l'Union Européenne, de 4 points pour le Japon, et de -7 points pour les États-Unis.

Pour les neuf premiers mois de 1993 le déficit des échanges extra de l'Union Européenne atteint 14,2 Mrds d'écus, contre près du triple en janvier-septembre 1992 (-45,4 Mrds d'écus). Les importations extra de l'Union Européenne s'infléchissent faiblement à la baisse entre les neuf premiers mois de 1992 et de 1993: -1,2 %. Les marchandises exportées hors de l'Union connaissent une poussée de 8,5 % par rapport à leur niveau cumulé des trois premiers trimestres de 1992.

Le déficit commercial des États-Unis approche 86 Mrds d'écus en janvier-septembre 1993, il se creuse de quelque 30 Mrds par rapport à la période correspondante de 1992. Les importations des États-Unis progressent de 20,7 % en écus, de 9,2 % en dollars. Les flux exportés par les États-Unis sont en augmentation de 13,4 % en écus, de 3 % en dollars.

Le Japon dégage un excédent de 75,4 Mrds d'écus de janvier à septembre 1993, en progrès de près de 16 Mrds d'écus comparé au bilan des neuf premiers mois de

1992. Les exportations du Japon soutiennent une progression de 18 % en écus, soit 6,8 % en dollars. Elles se replient de 3,6 % en yens. Les importations de ce pays libellées en écus croissent de 14,2 %. En termes de dollars elles marquent + 3,4 %. Les importations japonaises en yen affichent une baisse de 8,5 %.

L'Allemagne et l'Italie dégagent les excédents cumulés les plus forts de janvier à septembre 1993: respectivement 12 et 6 Mrds d'écus.

Le solde des échanges extra de l'Italie progresse de près de 6 Mrds d'écus entre janvier-septembre 1992 et 1993. Les exportations de ce pays, soutenues par la dévaluation de la lire, croissent de 13,3 %. Les importations italiennes extérieures à l'Union Européenne se creusent de 6,4 %.

L'Allemagne dégage en janvier-septembre 1993 un excédent extra supérieur de quelque 7 Mrds d'écus au bilan de la période correspondante de 1992. Les flux importés d'Allemagne baissent de 0,7 %, tandis que les exportations croissent de 5,8 %.

L'Espagne, l'UEBL et les Pays-Bas réduisent leurs déficits extra de près de 4 Mrds d'écus chacun. Les flux importés par l'Espagne de l'extérieur de l'Union Européenne chutent de 16,8 %, les prix de ces marchandises sont renchériés par la dévaluation de la peseta. Cette dernière favorise les exportations d'Espagne, qui marquent +13,6 %. L'UEBL et les Pays-Bas voient leurs exportations extra progresser vivement entre les neuf premiers mois de 1992 et de 1993 (18,6 % et 16,4 %). Les importations de ces pays venant de l'extérieur de l'Union Européenne se replient respectivement de 5,2 % et 2,5 %.

Les excédents commerciaux extra du Danemark et de la France sont supérieurs de 0,6 Mrd d'écus chacun à leurs niveaux de janvier-septembre 1992. Les exportations du Danemark progressent de 4,8 %, tandis que les importations extra de ce pays connaissent une baisse de 2,4 %. Les flux importés et exportés de France s'infléchissent faiblement à la baisse (-1,5 % et -0,5 %).

Le déficit du Royaume-Uni approche 16 Mrds d'écus pour les neuf premiers mois de 1993, il se comble d'un demi-milliard par rapport à la période correspondante de 1992. Les exportations du Royaume-Uni progressent de 11,4 %. Les importations extra du Royaume-Uni sont aussi en augmentation: 7,7 %.

Le commerce extra du Portugal se solde par un déficit allégé de 0,2 Mrd d'écus en janvier-septembre 1993. Les flux échangés par le Portugal avec les pays extérieurs à l'Union sont fortement affectés à la baisse en termes d'écus: -12,8 % pour les importations, -14,2 % pour les exportations. Le solde extra de l'Irlande reste proche de celui des neuf premiers mois de 1992. Les importations et les exportations de ce pays connaissent de fortes progressions: 35 % et 32 %.

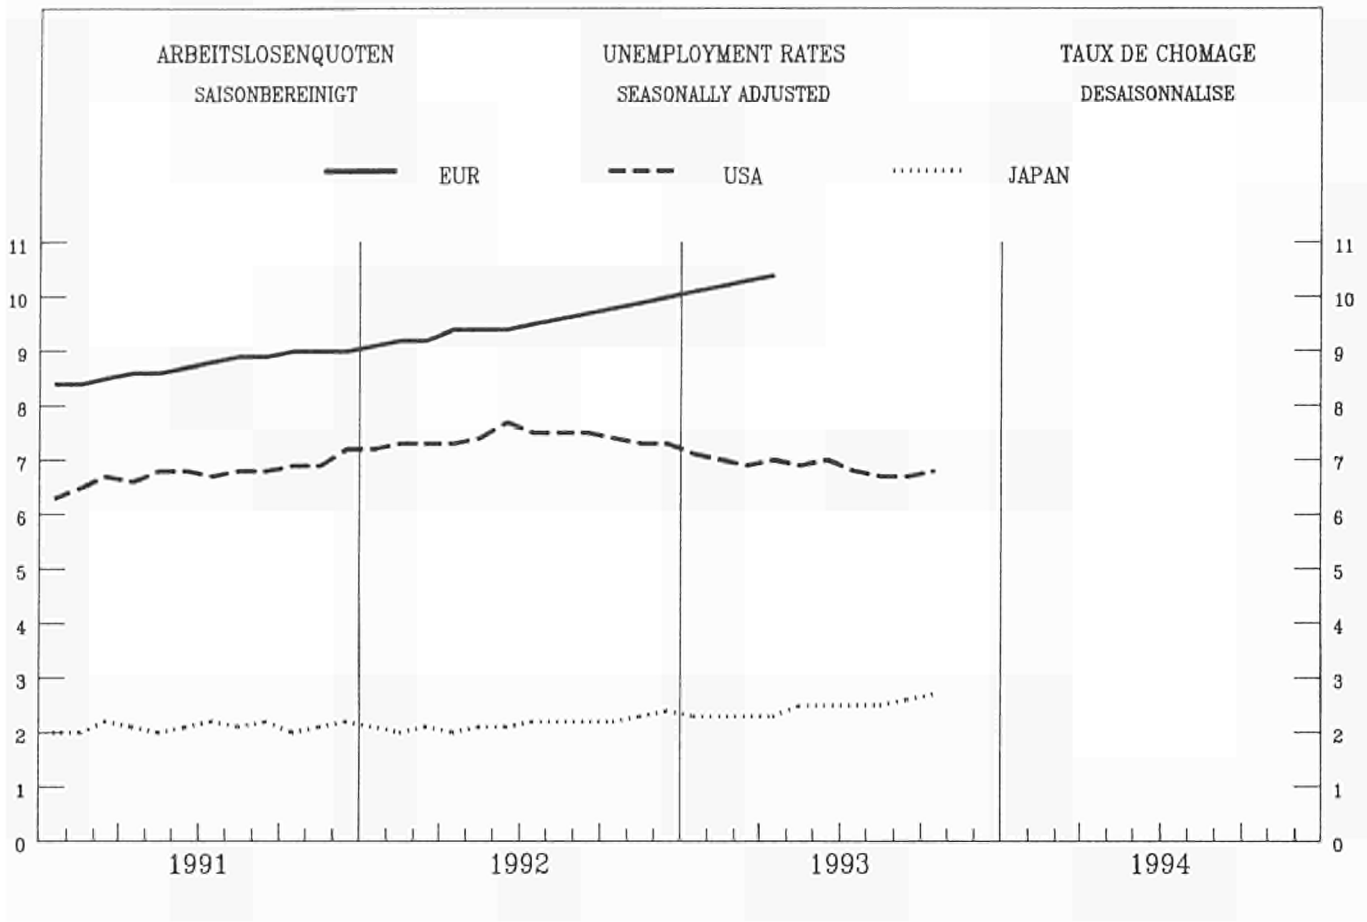

Le déficit de la Grèce cumulé de janvier à septembre 1993 se dégrade faiblement: de 0,2 Mrd d'écus. Les importations grecques de provenance extérieure à l'Union Européenne augmentent de 11,8 % entre les neuf premiers mois de 1992 et de 1993, contre 23,5 % pour les flux exportés de Grèce.

„On line“-Abfrage

Jede Zeitreihe ist durch einen neunstelligen numerischen Kode gekennzeichnet, der seinerseits in Unterkodes gegliedert ist, welche – im Falle von „Eurostatistik“ – das Land, den Sektor, die Tabelle, die Einheit und die Periodizität bezeichnen.

Die Bedeutung der einzelnen Unterkodes ist der nachstehend aufgeführten Tabelle zu entnehmen.

| Land XX | Sektor XX | Tabelle XXXX | Periodizität und Einheit X |
|---|--------------|--|---|
| 06 EUR 12* 03 EUR 10 11 D* 14 F 16 I 18 NL 21 UEBL 22 B 24 L 26 UK 28 IRL 30 DK 32 E 34 GR 36 P 42 USA 46 JAP | 93 | Variablen Tabelle XXXX vierstelliger Wert, der im Titel jeder Tabelle erscheint | 0 jährlich, Angaben in Prozent 1 vierteljährlich, Angaben in Prozent 2 monatlich, Angaben in Prozent 3 jährlich, Indexangaben (1985 = 100) 4 vierteljährlich, Indexangaben (1985 = 100) 5 monatlich, Indexangaben (1985 = 100) 6 jährlich, Angaben in absoluten Werten 7 vierteljährlich, Angaben in absoluten Werten 8 monatlich, Angaben in absoluten Werten 9 Gewicht, EUR 10 = 100 bzw. EUR 12 = 100 |

* Territoriale Aufteilung vor dem 3. 10. 90: 02 für EUR 12, 12 für D.

Beispiele: Will man die monatliche Arbeitslosigkeit (in absoluten Zahlen) von Frankreich gemäß Tabelle 0304 dieser Veröffentlichung erfahren, so braucht man nur den Kode 14 93 0304 8 einzugeben.

‘On-line’ consultation

Each time series is identified by a nine-digit code broken down into subcodes, which in the case of Eurostatistics, represent the country, sector, table unit and periodicity. The significance of the different subcodes may be found in the table below.

| Country XX | Sektor XX | Table XXXX | Periodicity and unit X |
|---|--------------|---|---|
| 06 EUR 12* 03 EUR 10 11 D* 14 F 16 I 18 NL 21 UEBL 22 B 24 L 26 UK 28 IRL 30 DK 32 E 34 GR 36 P 42 USA 46 JAP | 93 | Table by indicator XXXX 4-digit value quoted in the title of each table | 0 annual in % 1 quarterly in % 2 monthly in % 3 annual index 1985 = 100 4 quarterly index 1985 = 100 5 monthly index 1985 = 100 6 annual absolute value 7 quarterly absolute value 8 monthly absolute value 9 weighting EUR 10 = 100 or EUR 12 = 100 |

* data for the territorial situation before 3. 10. 90: 02 for EUR 12, 12 for D.

Consultation example: to know the monthly unemployment (absolute figures) of France as is shown in Table 0304 of this publication, the code 14 93 0304 8 should be formed.

Mode de consultation «on-line»

Chaque série chronologique est identifiée par un code à neuf chiffres structuré en sous-codes représentant, dans le cas d'Eurostatistiques, le pays, le secteur, le tableau, l'unité et la périodicité. On trouvera dans le tableau ci-dessous la signification des différents sous-codes.

| Pays XX | Secteur XX | Tableau XXXX | Périodicité et unité X |
|---|---------------|---|---|
| 06 EUR 12* 03 EUR 10 11 D* 14 F 16 I 18 NL 21 UEBL 22 B 24 L 26 UK 28 IRL 30 DK 32 E 34 GR 36 P 42 USA 46 JAP | 93 | Tableaux par variable XXXX valeur à 4 chiffres figurant dans le titre de chaque tableau | 0 annuelle exprimée en pourcentage 1 trimestrielle exprimée en pourcentage 2 mensuelle exprimée en pourcentage 3 annuelle exprimée en indice 1985 = 100 4 trimestrielle exprimée en indice 1985 = 100 5 mensuelle exprimée en indice 1985 = 100 6 annuelle exprimée en valeur absolue 7 trimestrielle exprimée en valeur absolue 8 mensuelle exprimée en valeur absolue 9 pondération EUR 10 = 100 ou EUR 12 = 100 |

* données pour la situation territoriale avant le 3. 10. 90: 02 pour EUR 12, 12 pour D.

Exemple de consultation: pour connaître le chômage mensuel (chiffres absolus) de la France, tel qu'il figure au tableau 0304 de cette publication, il suffit d'appeler le code 14 93 0304 8;
