*Printed in Germany*

Mit der monatlich erscheinenden Veröffentlichung *Eurostatistik - Daten zur Konjunkturanalyse* werden innerhalb kürzester Frist die neuesten statistischen Daten über die Europäische Gemeinschaft als Ganzes (EUR12), über jedes Mitgliedsland sowie über die Vereinigten Staaten und Japan bekanntgegeben.

*Eurostatistik* enthält nicht die Gesamtheit des bei Eurostat verfügbaren statistischen Materials, sondern eine Auswahl der relevantesten Reihen über die konjunkturelle Entwicklung.

Schnelligkeit und Pünktlichkeit sind die wichtigsten Vorzüge dieser Veröffentlichung.

Aus diesem Grunde wurde sie im Umfang bewußt klein gehalten und enthält keine Anmerkungen zur Methodik, die im übrigen in den spezialisierten Veröffentlichungen von Eurostat zu finden sind.

Die in *Eurostatistik* veröffentlichten Daten stammen aus dem ICG -Bereich der On-line-Datenbank Cronos von Eurostat.

Wer Zugang zu Cronos besitzt, kann jederzeit die Tabellen dieser Veröffentlichung abfragen, wobei die Daten täglich auf den neuesten Stand gebracht werden (Hinweise zur On-line -Benutzung finden sich auf der letzten Seite). Darüber hinaus sind die Daten in der Datenbank Eurocron verfügbar, die vom Host Eurobases der Kommission angeboten wird.

**WECHSELKURSE: Weitere Annäherung der europäischen und amerikanischen kurzfristigen Zinssätze**

Als Folge sinkender europäischer Zinssätze und der Erhöhung des Tagesgeldsatzes der US-Notenbank für Ausleihungen an die US-Banken war Ende März/Anfang April eine weitere Annäherung der europäischen und amerikanischen kurzfristigen Zinssätze zu beobachten.

Am 15. April beschloß die Bundesbank, den Diskont- und den Lombardsatz jeweils um 0,25 % auf 5 % beziehungsweise 6,5 % zurückzunehmen. Daneben senkte sie Ende März und im April wiederholt den Zinssatz für Wertpapierpensionsgeschäfte, der am 28. April 5,47 % betrug und somit 0,5 % unter seinem Wert von Anfang März lag.

Diesen Zinssenkungen schlossen sich in ähnlicher Weise die Zentralbanken Belgiens, Dänemarks, Spaniens, Frankreichs, Irlands und der Niederlande an. Die niedrigeren Zinsen wirkten sich in den meisten Fällen nur geringfügig auf die betreffenden Währungen aus: So blieb zum Beispiel der Kurs des belgischen Franc gegenüber der D-Mark seit Ende Januar relativ stabil. Der französische Franc verlor gegenüber der D-Mark leicht an Wert, und sein Kurs lag am 27. April knapp außerhalb seines früheren engen Wechselkursbandes.

Ende März war Portugal gezwungen, zur Stützung des Escudo die Zinssätze heraufzusetzen. Die portugiesische Währung war auf den Devisenmärkten unter Druck geraten und wurde in der Vorwoche zu 104,6 Esc für 1 DM gehandelt. Am 31. März erhöhte die Banco de Portugal ihren Zinssatz für kurzfristige Ausleihungen von 11 % auf 13 %. Als Folge zog der Kurs des Escudo an und ermöglichte somit eine Rücknahme des gleichen Zinssatzes am 19. April auf 12 %. Am 27. April wurde die portugiesische Währung zu 102,7 Esc für 1 DM gehandelt.

Ausgehend von einem Kurs von rund 990 LIT für 1 DM Ende März gewann die italienische Währung nach den italienischen Parlamentswahlen um mehr als 4 % an Wert und erreichte am 11. April mit 950 LIT ihre höchste Notierung.

In der Zwischenzeit überraschte die US-Notenbank am 18. April die Finanzmärkte mit der Ankündigung, den Tagesgeldsatz für Ausleihungen an die US-Banken erneut zu erhöhen, und zwar um 0,25 % auf 3,75 %. Dies war bereits die dritte Erhöhung in weniger als drei Monaten. Die Differenz zwischen dem Tagesgeldsatz der US-Notenbank für Ausleihungen an die US-Banken und dem Diskontsatz der Deutschen Bundesbank beträgt derzeit nur noch 1,25 Prozentpunkte. Nach Bekanntmachung dieses Beschlusses zog der Kurs des Dollar leicht an, ging in den darauffolgenden Tagen jedoch wieder zurück, und am 26. April schloß die amerikanische Währung in London bei 1,6801 DM für 1 USD, gegenüber 1,7124 DM vor der Erhöhung des Zinssatzes.

**RENDITEN VON STAATSANLEIHEN: Weitere Steigerung der Renditen**

Die im Februar nach der ersten Erhöhung der kurzfristigen Zinssätze in den Vereinigten Staaten zu beobachtende Entwicklung setzte sich im März in einem allgemeinen Anstieg der Renditen von Staatsanleihen fort. Die Renditen nahmen besonders nach der erneuten Erhöhung der US-Zinssätze im März und trotz weiterhin sinkender kurzfristiger Zinssätze in Europa zu.

Alle EG-Länder, mit Ausnahme Portugals, sowie die Vereinigten Staaten verzeichneten eine Steigerung der Renditen, wobei in Spanien und dem Vereinigten Königreich die stärksten Zunahmen (jeweils um 0,7 %) zu beobachten waren. In sechs EG-Ländern liegen die Renditen derzeit bei über 7 %. In Deutschland betrugen sie im März zum ersten Mal seit September 1993 mehr als 6 %.

Im Gegensatz hierzu gingen im März die Renditen von Staatsanleihen in Japan zurück: Mit 4,3 % waren sie jedoch immer noch höher als im letzten Quartal 1993. Diese Renditen mögen zwar gegenüber den in den Vereinigten Staaten und Europa erreichten Werten niedrig erscheinen, doch ist zu berücksichtigen, daß der japanische amtliche Diskontsatz 1,75 % beträgt und die kurzfristigen Zinssätze in etwa auf diesem Niveau liegen, so daß die Steigung der Zinsstragskurve positiv bleibt.

**GELDVOLUMEN: Rückgang der Geldmenge M3 in Frankreich**

Die Geldmenge M3 in Frankreich nahm weiter ab und verringerte sich im Januar 1994, auf Jahresbasis umgerechnet, um über 3 %. Ursache hierfür ist die Umwandlung bestimmter liquider Mittel in Spareinlagen, die nicht in den Geldmengenaggregaten erfaßt werden. Nach Schätzungen der Banque de France würde die jährliche Wachstumsrate der Geldmenge M3 ohne diese „besonderen Faktoren“ ungefähr 1,5 % betragen.

In den Vereinigten Staaten nimmt die Geldmenge weiterhin langsam zu: 1993 stieg M2, ähnlich wie bereits 1992, um 1,6 %.

Das ALP-Wachstum in Spanien hat sich im Januar verlangsamt: In den vergangenen 12 Monaten stieg das Geldmengenaggregat um 8,8 % im Vergleich zu 10,3 % von Dezember 1992 bis Dezember 1993. Ein gebremstes Wachstum war ebenfalls in den Niederlanden zu beobachten: Die Geldmenge M2 nahm im Februar, auf Jahresbasis umgerechnet, um rund 6 % zu, im Vergleich zu 8,4 % im Jahre 1993.

**AMTLICHE WÄHRUNGSRESERVEN: Anstieg der italienischen Reserven in den ersten beiden Monaten 1994**

Die amtlichen Währungsreserven Italiens nahmen in den ersten zwei Monaten 1994 um rund 17 % zu und beliefen sich damit auf fast 29 Mrd. ECU. Die Reserven der

Vereinigten Staaten, Japans, Belgiens, der Niederlande und des Vereinigten Königreichs vergrößerten sich ebenfalls, allerdings in geringerem Umfang.

Ende 1993 hielt Deutschland mit annähernd 70 Mrd. ECU weiterhin die größten amtlichen Währungsreserven. Obwohl dies gegenüber Ende 1992 einen leichten Rückgang bedeutete, liegt der Wert immer noch um rund 45 % über dem vom Juni 1992 und beträgt fast das Doppelte der Reserven Spaniens, das mit fast 37 Mrd. ECU den zweiten Platz einnimmt. Nach einem Anstieg um über 50 % verfügten die Niederlande Ende 1993 über die drittgrößten Währungsreserven in der EG, nachdem sie Ende 1992 noch auf dem sechsten Platz lagen. Dies ist auf die das ganze Jahr hindurch starke Verfassung des holländischen Gulden und die Intervention der niederländischen Zentralbank auf den Devisenmärkten zurückzuführen.

Die französischen Reserven beliefen sich Ende 1993 nach ihrem Höchststand im Juni 1993 von 27 Mrd. ECU nur noch auf etwas mehr als 20 Mrd. ECU. Im Spätsommer 1993 hatte die Banque de France zur Stützung des französischen Franc massiv auf den Devisenmärkten interveniert, was einen Rückgang der Währungsreserven zur Folge hatte.

**VIERTELJÄHRLICHE GESAMTRECHNUNGEN: Drittes Quartal 1993: Weiterhin Stagnation des Wirtschaftswachstums (BIP +0,4 %); Inflation rückläufig (+0,4 %)**

Im dritten Quartal 1993 war die Wirtschaft der Europäischen Union (EU) insgesamt durch eine schwache Zunahme der Produktion (BIP +0,4 %) gekennzeichnet. Somit ist für die ersten neun Monate des Jahres gegenüber dem entsprechenden Vorjahreszeitraum ein Wachstumsrückgang festzustellen (BIP -0,4 %). Diese Ergebnisse dürften darauf hinweisen, daß für die Wirtschaft der EU vor 1994 nicht mit einer Tendenzumkehr zu rechnen ist. Auf dem letzten G-7-Treffen trat ein verhaltener Optimismus hinsichtlich der wirtschaftlichen Entwicklung im Jahr 1994 zutage, der allerdings teilweise durch die zunehmende Besorgnis über den Anstieg der Arbeitslosigkeit kompensiert wurde. Zur Lösung dieses Problems haben die Wirtschaftsminister und Zentralbankpräsidenten der sieben führenden Industrienationen die Möglichkeiten der Einflußnahme auf die Arbeitsmarktmechanismen in Erwägung gezogen. Das von der Kommission vorgelegte Weißbuch zur Beschäftigung dürfte ein wichtiger Faktor im Kampf gegen die Arbeitslosigkeit sein und kann eine der Grundlagen für den Wirtschaftsaufschwung in der EU darstellen.

Was die anhand des impliziten BIP-Deflators gemessene Preisentwicklung betrifft, so ist ein kräftiger Rückgang sowohl der vierteljährlichen als auch der jährlichen Inflationsrate festzustellen (+0,5 % bzw. +2,8 %). Diese Situation scheint sich günstig auf den allgemeinen Trend zu Zinssenkungen auszuwirken.

Über die Situation in den einzelnen Mitgliedstaaten liegen bislang die Zahlen für das vierte Quartal aus Deutschland, Frankreich und Spanien vor; für die Niederlande hingegen nur das BIP. Sie deuten auf einen erneuten Rückgang des Wirtschaftswachstums in Deutschland und den Niederlanden hin (beide: -0,2 %). Ein sehr verhaltenes Wachstum verzeichneten dagegen Frankreich (mit +0,2 %) und Spanien (mit +0,1 %). Diese Daten bestätigen die ausgeprägte Unsicherheit, die für die wirtschaftliche Lage noch immer kennzeichnend ist.

In den Vereinigten Staaten hat sich das Wirtschaftswachstum im dritten Quartal 1993 leicht beschleunigt (BIP +0,7 %). Gleichzeitig ging die vierteljährliche Inflationsrate erneut zurück (+0,4 %), während die jährliche Inflationsrate leicht anstieg (+2,7 %). Bei den Komponenten des BIP ist auf die positive Entwicklung des privaten Verbrauchs (+1,0 %) und der Investitionen (+1,8 %) hinzuweisen; der Staatsverbrauch dagegen war erneut rückläufig (-0,3 %).

In Japan lassen die Zahlen für das dritte Quartal 1993 eine Wiederbelebung der Wirtschaftstätigkeit (BIP +0,5 %) und einen Anstieg der vierteljährlichen wie auch der jährlichen Inflationsrate (+0,5 % bzw. +1,0 %) erkennen. Bei den Komponenten der Inlandsnachfrage ist eine relativ deutliche Zunahme sowohl der Investitionstätigkeit (+0,7 %) als auch des privaten Verbrauchs (+0,5 %) festzustellen.

**PREISE: Die Jahresinflation der EU ging im März leicht zurück auf 3,2 %**

Die Jahresinflationsrate für die Europäische Union – gemessen mit dem Verbraucherpreisindex – geht weiterhin mit kleinen Schritten zurück und fiel von 3,3 % im Februar auf 3,2 % im März; vor Jahresfrist lag die Rate bei 3,5 %.

Für die einzelnen Mitgliedstaaten sind die Jahresinflationsraten – in aufsteigender Reihenfolge nach der derzeitigen Inflation geordnet – für die angegebenen Zeiträume wie folgt:

	März '94	März '93	März '94	März '93	
	März '93	März '92	März '93	März '92	
Frankreich	1,5 %p	2,2 %	Niederlande	2,9 %p	2,6 %
Irland**	1,7 %	1,9 %	Deutschl.*	3,2 %	4,2 %
Dänemark	1,7 %	1,1 %	Italien	4,3 %p	4,3 %
Belgien	2,3 %	2,9 %	Spanien	5,0 %	4,1 %
Luxemburg	2,3 %	3,7 %	Portugal	6,0 %	7,3 %
Ver. Königreich	2,3 %	1,9 %	Griechen	10,2 %	16,4 %

\* Der Verbraucherpreisindex der Bundesrepublik Deutschland bezieht sich weiterhin auf den Gebietsstand vor dem 3.10.90

\*\* Februar '94/Februar '93 und Februar '93/Februar '92

p = vorläufig

Die Raten für die Beitrittskandidaten sind : Finnland 0,4 % (2,7 %), Norwegen 1,0 % (2,5 %), Schweden 1,8 % (4,9 %) und Österreich 3,1 % (3,9 %) und die für wichtige

Nicht-EU-Länder: USA 2,5 % (3,1 %), Japan 1,1 % (1,2 %), Kanada 0,2 % (1,9 %) und Schweiz 1,3 % (3,7 %).

Der Monatsindex für EUR-12 stieg im März um 0,3 %.

Die meisten Mitgliedstaaten trugen zu diesem guten Ergebnis bei mit niedrigen bis gemäßigten Preissteigerungen: 0,0 % in Belgien und Luxemburg, 0,1 % in Dänemark, 0,2 % in Deutschland, Frankreich, Italien und Portugal, 0,3 % in Spanien und im Vereinigten Königreich.

Dagegen wurde in den Niederlanden ein bedeutender Anstieg von 0,6 % festgestellt, während der griechische Index um 2,9 % emporschnellte, hauptsächlich wegen der im März üblichen Einfuhr neuer Modelle für Bekleidung und dauerhafte Gebrauchsgüter nach dem Winterschlußverkauf.

### ARBEITSLOSIGKEIT IN DER EUROPÄISCHEN UNION

Eurostat schätzt die saisonbereinigte Arbeitslosenquote in der Europäischen Union für März 1994 auf 10,9 %, was einem Zuwachs von 0,1 Prozentpunkten im Vergleich zum Vormonat entspricht. Trotz dieser leichten Zunahme scheint sich die Arbeitslosenquote in der Europäischen Union zu stabilisieren. Bezogen auf die letzten zwölf Monate ist der deutlichste Anstieg in Spanien, Portugal und den Niederlanden zu verzeichnen.

Der Anstieg der Arbeitslosigkeit bei den unter 25jährigen setzt sich dagegen insbesondere in Italien, den Niederlanden und in Portugal fort. Betrachtet man die Union insgesamt, so zeigt sich ein stärkerer Zuwachs der Arbeitslosigkeit bei den Männern unter 25 (+0,4 Prozentpunkte innerhalb eines Monats, +1,1 Prozentpunkte innerhalb des letzten Jahres) als bei den jungen Frauen (seit drei Monaten unverändert, +0,6 Prozentpunkte im Vorjahresvergleich).

Diese Schätzung der Arbeitslosenquoten und der Zahl der Arbeitslosen schaltet Unterschiede in den nationalen Methoden zur Erfassung der Arbeitslosigkeit weitgehend aus. Die Arbeitslosenquoten werden geschätzt durch Extrapolation der 1991er Ergebnisse der EU-Arbeitskräfteerhebung in allen Mitgliedstaaten. Die Einbeziehung der 1992er Ergebnisse, sobald verfügbar, kann zu Revisionen der Schätzungen führen.

### AUSSENHANDEL Ergebnisse für Oktober 1993

In den ersten zehn Monaten des Jahres 1993 betrug das Handelsbilanzdefizit der Vereinigten Staaten 99 Mrd. ECU und das der Europäischen Union 11 Mrd. ECU; der Handelsbilanzüberschuß Japans belief sich auf mehr als 84 Mrd. ECU.

Für die ersten zehn Monate des Jahres 1993 verzeichnete die Europäische Union ein Außenhandelsbilanzdefizit von annähernd 11 Mrd. ECU gegenüber 47,5 Mrd. ECU für den gleichen Zeitraum des Vorjahres. Die Ausfuhren der Europäischen Union legten zwischen Januar und Oktober 1993 im Vergleich zum entsprechenden Zeitraum 1992 kräftig zu (8,6 %), die Einfuhren waren leicht rückläufig (-1,3 %).

Das Handelsbilanzdefizit der Vereinigten Staaten für den Zeitraum zwischen Januar und Oktober 1993 betrug fast 100 Mrd. ECU und vergrößerte sich damit gegenüber dem Vergleichszeitraum 1992 um ungefähr 34 Mrd. ECU. Die Einfuhren in die Vereinigten Staaten stiegen in Ecu ausgedrückt um 21 %, in US-Dollar um 9 %. Die Ausfuhren aus den Vereinigten Staaten verzeichneten eine verhaltenere Zunahme: 13,8 % in Ecu bzw. um 3 % in US-Dollar.

Der japanische Außenhandelsbilanzüberschuß erhöhte sich im Beobachtungszeitraum gegenüber den ersten zehn Monaten 1992 um 17 Mrd. ECU und belief sich somit auf 84,4 Mrd. ECU. Die japanischen Ausfuhren nahmen in Ecu ausgedrückt um 17,7 %, in US-Dollar um 6 % zu, während sie in Yen ausgedrückt um 4 % zurückgingen. Die Einfuhren dieses Landes stiegen um 14,3 % in Ecu, um 3 % in US-Dollar, fielen in Yen ausgedrückt jedoch um 9 %.

Italien, Deutschland, Spanien, die Niederlande und die BLWU verzeichneten in den ersten zehn Monaten 1993 im Vergleich zum entsprechenden Vorjahreszeitraum eine deutliche Verbesserung ihrer Salden im EU-Außenhandel.

Deutschland und Italien erzielten von Januar bis Oktober 1993 mit 14 Mrd. ECU bzw. 7,5 Mrd. ECU die höchsten Außenhandelsbilanzüberschüsse, was einer Zunahme um fast 8 Mrd. ECU bzw. 10 Mrd. ECU entsprach. Die Extra-EU-Ausfuhren Italiens weiteten sich im Beobachtungszeitraum gegenüber dem Vergleichszeitraum 1992 um 14,2 % aus, während die Einfuhren um 6,4 % abnahmen. In Deutschland stiegen die Ausfuhren um 5,5 %, die Einfuhren waren leicht rückläufig (-0,7 %).

Spanien, die Niederlande und die BLWU konnten ihre Defizite im Handel mit Drittländern zwischen Januar und Oktober 1993 gegenüber dem entsprechenden Vorjahreszeitraum deutlich verringern: um 6 Mrd. ECU, 5,2 Mrd. ECU bzw. 4,4 Mrd. ECU. Die Ausfuhren dieser Länder verzeichneten hohe Zuwachsraten: 12 % für Spanien, 15 % für die Niederlande und 19 % für die BLWU. Die spanischen Einfuhren fielen um 17,4 %, die Importe der Niederlande und der BLWU nahmen um 5,2 % bzw. 3,6 % ab.

Frankreich, das Vereinigte Königreich und Dänemark verbesserten ihre Handelsbilanz gegenüber dem Zeitraum Januar bis Oktober 1992 jeweils um nahezu 1 Mrd. ECU. Die Einfuhren Frankreichs sind um 2,4 % gesunken, die Ausfuhren waren leicht rückläufig (-0,2 %). Die Ein- und Ausfuhren des Vereinigten Königreichs stiegen um 8,4 % bzw. um 13,1 %. Die dänischen Ausfuhren weiteten sich gegenüber den ersten zehn Monaten 1992 um 4 % aus, während die Einfuhren um 2,2 % zurückgingen.

Die Außenhandelsbilanz Portugals, Irlands und Griechenlands für die ersten zehn Monate 1993 hat sich im Vergleich zum entsprechenden Vorjahreszeitraum kaum verändert. Der Handel Portugals mit Drittländern ging zurück: -14,8 % bei den Ausfuhren, -13,1 % bei den Einfuhren. Irland und Griechenland verzeichneten eine lebhaftere Handelstätigkeit. Die irischen Einfuhren nahmen um 37 %, die Ausfuhren um 33 % zu. Griechenlands Exporte stiegen um 21 %, die Einfuhren um 15 %.

## Foreword

EN

*Eurostatistics - data for short-term economic analysis* is a monthly publication aimed at providing, as rapidly as possible, the latest statistical data on the European Community as a whole (EUR 12), each Member State, the United States and Japan.

*Eurostatistics* does not present all the statistics held by Eurostat, but a selection of the most relevant series on the economic situation.

Speed of publication and punctuality are the main features of this publication; that is why it is deliberately streamlined and does not contain any methodological notes, which are given in Eurostat's specialized publications.

The data published in *Eurostatistics* are taken from the ICG domain of Eurostat's on-line database, Cronos (instructions regarding on-line consultation may be found at the end of this publication). They are also available via the Commission host Eurobases in the Eurocron database.

Further information on Eurostat and its products can be obtained from the following addresses:

**EXCHANGE RATES: continuing convergence in European and US short-term interest rates**

There was continued convergence in European and American short-term interest rates in late March and early April, when falls in European rates were combined with an increase in the Federal Reserve's target for the level of Federal Funds rate. The Bundesbank reduced both its discount and lombard rate by 0.25% on April 15 to 5 and 6.5% respectively, and in addition reduced its repo rate several times in late March and April so that on 28 April it stood at 5.47%, 0.5% lower than at the beginning of March. These reductions were followed by similar moves by the central banks of Belgium, Denmark, Spain, France, Ireland and the Netherlands. The reductions in rates in most cases had little effect on the currencies concerned; for example, the Belgian franc-Deutschemark exchange rate has been more or less constant since the end of January. The French franc has however weakened slightly against the DM, and on April 27 was just outside its former narrow ERM bands. Portugal was forced to raise interest rates at the end of March to defend the escudo, which had been under pressure in the foreign exchange markets, having touched Es104.6 against the Deutschemark the previous week. The Banco de Portugal increased its standing facility rate from 11 to 13% on March 31, which had the effect of strengthening the escudo, enabling it to reduce the same rate to 12% on April 19. On April 27 the escudo stood at 102.7 against the DM. From a level of around LIT 990 against the Deutschemark at the end of March, the Italian lire appreciated by over 4% in the period after the Italian governmental elections, to a peak of just over LIT 950 on April 11. Meanwhile, on April 18 the US Federal Reserve surprised the financial markets by announcing a further increase to 3.75% (up 0.25%) in its target for the level of the rate on Federal Funds, the third increase in less than three months. There is now only 1.25% between the target level for Fed funds and the German discount rate. The dollar rose slightly after the announcement, but then fell back in the following days, and on April 26 closed in London at DM 1.6801, as compared to DM 1.7124 before the rate increase.

**GOVERNMENT BOND YIELDS: continuation of rising yields**

There was a generalised increase in government bond yields in March, continuing the movement which commenced in February after the first increase in US short-term interest rates. These increases in yields were accentuated after the further increase in US rates in March, and occurred despite a climate of a continuing falls in short-term European interest rates. The largest increases in yields occurred in Spain and the United Kingdom (both up 0.7%), whilst all other EC countries with the exception of Portugal, plus the US, all experienced increases in yields. Yields now stand at over 7% in six EC countries, and in Germany yields were above 6% in March for the first time since September 1993. In contrast to the experience elsewhere, government bond yields fell in Japan in March: at 4.3% they remain however higher than in the last quarter of 1993. Although these levels of yields appear low when compared to the US and European situation, the Japanese official discount rate stands at 1.75% with short-term rates at around this level, and so the yield curve remains positively sloped.

**MONEY SUPPLY: France's M3 contracts**

France's M3 continues to contract, falling by over 3% in the 12 months to January 1994. This is as a result of the movement of certain liquid balances to savings instruments which are not included in the monetary aggregates. The Banque de France estimates that without these 'special factors' the year-on-year growth rate of M3 would be around 1.5%. Monetary growth remains slow in the United States, where in 1993 M2 grew by 1.6%, a similar growth rate to that achieved in 1992. ALP growth slowed in January in Spain: in the previous 12 months it grew by 8.8%, compared to 10.3% in the year to December 1993. Growth slowed too in the Netherlands, where M2 grew by around 6% in the year to February, compared to an outturn of 8.4% in 1993.

**FOREIGN OFFICIAL RESERVES: Italy's reserves increase in the first two months of 1994**

Italy's foreign official reserves increased by around 17% in the first two months of 1994, taking them to almost 29 billion ecu. The reserves of the US, Japan, Belgium, the Netherlands and the UK also increased by smaller amounts. Germany continued to hold the largest foreign official reserves at the end of 1993, at almost 70 billion ecu. Although slightly lower than at the end of 1992, this figure is around 45% higher than in June 1992, and is almost twice as large as the reserves of Spain, which at almost 37 billion ecu holds the second largest in the EC. The Netherlands has risen from having the sixth largest reserves at the end of 1992 to

the third at the end of 1993, a rise of over 50%. This reflects the strength of the Dutch guilder during the year and the currency intervention carried out by the Dutch central bank. France's reserves stood at just over 20 billion ecu at the end of 1993, down from their 1993 peak of 27 billion ecu in June 1993. The Banque de France carried out heavy intervention to support the franc in the late summer of 1993, and thus its foreign reserves were depleted.

**QUARTERLY ACCOUNTS: Economic growth remains stagnant in the third quarter of 1993 (GDP +0.4%); lower inflation (+0.4%)**

The third quarter of 1993 saw a slight increase in production in the economy of the European Union as a whole (GDP +0.4%). This meant that during the first nine months of the year there was a -0.4% fall in GDP compared to the corresponding period for the previous year. On the basis of these results, a reversal of the trend for the EU economy seems unlikely before 1994. The mood at the last G7 meeting was one of guarded optimism about the economic prospects for 1994, although this was tempered by increasing concern about the rise in unemployment. In order to solve this problem, the Ministers for Economic Affairs and the Governors of the Central Banks in the seven most industrialised countries considered the possibility of changing the rules governing the labour market. The White Paper on employment produced by the Commission looks to be an important element in the fight against unemployment and could constitute one of the bases for economic recovery in the Union. With regard to inflation, measured by the implicit deflator of GDP, there was a significant drop in the quarterly and annual growth rates (+0.4% and +2.8% respectively). This situation seems to favour the trend towards a general reduction in interest rates. Data for the fourth quarter are available for Germany, France and Spain and data on GDP only for the Netherlands. These results seem to show a further decline in economic growth in Germany and the Netherlands (-0.2% in both countries), while the figures for France and Spain suggest tentative growth (+0.2% and +0.1% respectively). These data confirm the very uncertain nature of the economy. In the United States the third quarter of 1993 produced a slight upswing in economic growth (GDP +0.7%) accompanied by a renewed fall in quarterly inflation (+0.4%), although there was a slight increase on an annual basis (+2.7%). Among the components of GDP there was a positive trend in private consumption (+1.0%) and investment (+1.8%), while there was a renewed fall in public consumption (-0.3%). In Japan the third quarter showed an increase in economic growth (GDP +0.5%) and an increase in inflation on both a quarterly and an annual basis (+0.5% and +1.0% respectively). Of the components of domestic demand, there was a more marked overall increase in private consumption than in investment (+0.7% and +0.5% respectively).

**PRICES: EU annual inflation slightly down to 3.2% in March**

The annual inflation rate for the EU as measured by the CPI continues its slowing down at a low pace and fell from 3.3% in February to 3.2% in March; a year ago this rate was 3.5%. In ascending order of current inflation the annual rates of the individual EU Member States for March 1994—and those for the corresponding period a year ago—are as follows:

	March '94	March '93		March '94	March '93
	March '93	March '92		March '93	March '92
France	1.5%p	2.2%	Netherlands	2.9%p	2.6%
Ireland**	1.7%	1.9%	Germany*	3.2%	4.2%
Denmark	1.7%	1.1%	Italy	4.3%p	4.3%
Belgique	2.3%	2.9%	Spain	5.0%	4.1%
Luxembourg	2.3%	3.7%	Portugal	6.0%	7.3%
United Kingdom	2.3%	1.9%	Greece	10.2%	16.4%

\* The CPI for the Federal Republic of Germany continues to reflect borders prior to 3 October 1990.  
 \*\* February '94/February '93 and February '93/February '92  
 p Provisional

Inflation rates for the applicant Member States are : Finland 0.4% (2.7%), Norway 1.0% (2.5%), Sweden 1.8% (4.9%) and Austria 3.1% (3.9%); corresponding rates for major non-EU countries are: USA 2.5% (3.1%), Japan 1.1% (1.2%), Canada 0.2% (1.9%) and Switzerland 1.3% (3.7%). The monthly EUR-12 index rose by 0.3% between February and March. Most of the Member States contributed to this good result with low to moderate increases : zero in Belgium and Luxembourg, 0.1% in Denmark, 0.2% in Germany, France, Italy and Portugal, 0.3% in Spain and the UK. However, there was a marked increase in the index of the Netherlands (0.6%) and a sharp rise in the Greek index, which surged by 2.9%, mainly caused by the usual introduction in March of new models after the winter sales for clothing and durable goods.

### UNEMPLOYMENT IN THE EUROPEAN UNION

Eurostat estimates that the seasonally-adjusted unemployment rate in the European Union for the month of March 1994 was 10.9%, which means that there has been a rise of +0.1% in comparison with February 1994. Despite this slight increase, it seems therefore clear that unemployment in the European Union is levelling out. The largest rises over the last year have taken place in Spain, Portugal and the Netherlands.

However as far as young persons under 25 are concerned, the unemployment rate seems still not quite to have steadied in particular in Italy, the Netherlands and Portugal. At the European level the unemployment rate for men under 25 is rising faster (+0.4 points in the last month, +1.1 points over the last year) than that for young women (unchanged in the last three months, +0.6 points over the year).

The unemployment rate and the number of unemployed persons are estimated after taking account of the differences between national methods of recording unemployment.

The rate of unemployment is estimated by extrapolating the 1991 results of the labour force surveys for all the Member States. The introduction of the 1992 results, when available, will probably lead to a revision of the estimates.

### EXTERNAL TRADE

For the first ten months of 1993, the United States recorded a trade deficit of ECU 99 billion and the European Union a deficit of ECU 11 billion, while Japan achieved an external trade surplus of over ECU 84 billion.

The European Union's external trade deficit of nearly ECU 11 billion for the first ten months of 1993 compares favourably with the figure of ECU 47.5 billion for the corresponding period in 1992. The European Union's exports grew considerably between the period January-October 1992 and the corresponding period in 1993 (8.6%). Imports were down a little (-1.3%).

The trade deficit of the United States increased by about ECU 34 billion between the first ten months of 1992 and the corresponding period in 1993 and came close to ECU 100 billion. United States imports increased by 21% in terms of ecus and by 9% in dollars. United States exports rose more slowly, by 13.8% in terms of ecus and 3% in terms of dollars.

Japan's trade surplus of ECU 84.4 billion for the period January-October 1993 showed an improvement of ECU 17 billion over the January-to-October figures for 1992. The value of Japanese exports increased by 17.7% in terms of ecus and by 6% in terms of dollars, but their value in yen declined by 4%. Imports increased by 14.3% in terms of ecus and by 3% in terms of dollars, but fell by 9% in yen.

The external trade balances of Italy, Germany, Spain, the Netherlands and the BLEU for the first ten months of 1993 all showed a marked improvement on the figures for January-October 1992.

In the first ten months of 1993, the most substantial trade surpluses were generated by Germany, with a surplus of ECU 14 billion, which was close to ECU 8 billion higher than the figure for the corresponding months of 1992, and by Italy which generated a surplus of ECU 7.5 billion, representing an improvement of 10 billion. Italy saw its extra-Union exports rise by 14.2% in the first ten months of 1993 compared with the same period in 1992, while its imports showed a fall of 6.4%. German exports were 5.5% higher, while imports were slightly lower (-0.7%).

Spain, the Netherlands and the BLEU saw a considerable reduction in their trade deficits with non-Community countries between the first ten months of 1992 and the corresponding period in 1993 (ECU 6, 5.2 and 4.4 billion respectively). Their exports showed a substantial improvement: Spain + 12%, Netherlands +15% and BLEU 19%. There was a sharp cutback in imports to Spain (-17.4%) and the flows of imports to the Netherlands and the BLEU were reduced by 5.2% and 3.6% respectively.

France, the United Kingdom and Denmark each improved their trade balance by approximately ECU 1 billion in comparison with January-October 1992. France reduced her imports (-2.4%) and the volume of exports was also marginally lower (-0.2%). United Kingdom imports and exports rose by 8.4% and 13.1% respectively. Danish exports were 4% higher than for the first ten months of 1992, while the figure for imports was slightly lower (-2.2%).

For Portugal, Ireland and Greece, external trade balances with non-Community countries in the first ten months of 1993 were much the same as for the same period in 1992. Portugal saw its trade flows reduced: -14.8% for exports, -13.1% for imports. In the case of Ireland and Greece, the first ten months of 1993 showed a very considerable increase in external trade flows compared with the same period in 1992. Ireland's imports were up by 37% and exports were 33% higher. Greek exports rose by 21% and imports by 15%.

*Eurostatistiques - Données pour l'analyse de la conjoncture* est une publication mensuelle qui a pour but de fournir dans les meilleurs délais les données statistiques les plus récentes pour la Communauté européenne en tant qu'ensemble (EUR12), pour les pays membres ainsi que pour leurs principaux partenaires extra-communautaires (États-Unis d'Amérique et Japon).

*Eurostatistiques* ne publie pas d'une manière exhaustive toutes les statistiques disponibles auprès d'Eurostat, mais les plus importantes parmi celles-ci.

Cette publication se veut rapide et facilement maniable. Pour cette raison, elle ne comporte pas de notes méthodologiques, qui sont par ailleurs disponibles dans les publications spécialisées d'Eurostat.

Les données publiées dans *Eurostatistiques* proviennent du domaine ICG de la base de données Cronos (les instructions pour le mode de consultation on-line se trouvent à la fin de cette publication). Ces données sont aussi disponibles dans la base de données Eurocron, accessible par l'intermédiaire du serveur Eurobases de la Commission.

**TAUX DE CHANGE: les taux d'intérêt européens et américains à court terme continuent à se rapprocher**

Fin mars et début avril, les taux d'intérêt européens et américains à court terme ont continué à se rapprocher, les taux européens ayant à nouveau baissé alors que, dans le même temps, la Réserve fédérale revoyait à la hausse son objectif pour le niveau des taux des fonds fédéraux.

Le 15 avril, la Bundesbank a abaissé son taux d'escompte et son taux Lombard de 0,25 % à 5 % et 6,5 % respectivement. De plus, elle a abaissé son taux de réméré à plusieurs reprises à la fin du mois de mars et en avril de telle sorte que, le 28 avril, ce taux était de 5,47 %, soit 0,5 % de moins que début mars.

Les banques centrales de Belgique, du Danemark, de l'Espagne, de la France, de l'Irlande et des Pays-Bas ont suivi le mouvement. Dans la plupart des cas, la baisse des taux a eu peu d'effet sur les monnaies concernées; par exemple, le taux de change franc belge/mark allemand est resté plus ou moins constant depuis fin janvier. Le franc français s'est toutefois légèrement déprécié par rapport au DM et se trouvait, le 27 avril, légèrement en dehors de ses anciennes marges de fluctuation étroites dans le MTC.

Fin mars, le Portugal a été contraint de relever ses taux d'intérêt afin de défendre l'escudo, qui avait été attaqué sur les marchés étrangers et se négociait à 104,6 ESC pour un DM la semaine précédente. Le 31 mars, la banque du Portugal a augmenté de 11 à 13 % le taux de ses avances, ce qui a eu pour effet de renforcer l'escudo et permis de ramener le même taux à 12 %, le 19 avril. Le 27 avril, l'escudo s'échangeait à 102,7 ESC pour un DM.

D'environ 990 LIT pour un DM à la fin du mois de mars, la lire italienne s'est appréciée de plus de 4 % au cours de la période qui a suivi les élections nationales italiennes pour atteindre, le 11 avril, un sommet légèrement supérieur à 950 LIT.

Entre-temps, le 18 avril, la Réserve fédérale américaine a surpris les marchés financiers en annonçant une nouvelle augmentation — la troisième en moins de trois mois — de son taux cible pour les fonds fédéraux, qui est ainsi passé à 3,75 % (+0,25 %). La différence entre le taux cible pour les fonds fédéraux et le taux d'escompte allemand n'est plus que de 1,25 %. Le dollar s'est légèrement apprécié après cette annonce, mais il est ensuite retombé au cours des jours suivants et, le 26 avril, clôturait à Londres à 1,6801 DM contre 1,7124 DM avant le changement de taux.

**RENDEMENT DES OBLIGATIONS D'ÉTAT: la hausse des rendements se poursuit**

En mars, la hausse des rendements des obligations d'État s'est généralisée. Le mouvement amorcé en février après la première augmentation des taux d'intérêt à court terme aux États-Unis s'est donc poursuivi. Cette progression des rendements s'est accentuée à la suite de la nouvelle augmentation des taux américains en mars et ce malgré la tendance à la baisse des taux d'intérêt européens à court terme.

Les plus fortes augmentations ont concerné l'Espagne et le Royaume-Uni (l'une et l'autre + 0,7 %), mais les rendements ont également progressé dans tous les autres pays de la Communauté (à l'exception du Portugal) et aux États-Unis. Actuellement, les rendements dépassent les 7 % dans six pays de la Communauté tandis qu'en Allemagne, la barre des 6 % a été franchie en mars, pour la première fois depuis septembre 1993.

Au Japon, les rendements des obligations d'État ont baissé en mars, contrairement à la tendance générale observée ailleurs. 4,3 %, ils restent toutefois supérieurs à ceux du dernier trimestre 1993. Même si ces niveaux de rendement paraissent faibles au regard des rendements américains et européens, le taux d'escompte officiel japonais est de 1,75 % et les taux à court terme se situent à peu près au même niveau, de telle sorte que la courbe des rendements conserve une pente positive.

**MASSE MONÉTAIRE: contraction de M3 en France**

En France, M3 continue à se contracter, la baisse ayant été supérieure à 3 % pour les douze mois allant de janvier 1993 à janvier 1994. Ce phénomène est le résultat du mouvement de certaines encaisses liquides vers des instruments d'épargne qui ne font pas partie des agrégats monétaires. La Banque de France estime que sans ces «facteurs spéciaux», le taux de croissance d'une année sur l'autre de M3 serait d'environ 1,5 %.

La croissance monétaire reste lente aux États-Unis, où M2 a progressé de 1,6 % en 1993, à un taux comparable à celui observé en 1992.

En Espagne, la croissance des ALP s'est ralentie en janvier: ceux-ci ont progressé de 8,8 % au cours des douze mois précédents contre 10,3 % entre décembre 1992 et décembre 1993. La croissance s'est également ralentie aux Pays-Bas, où M2 a progressé d'environ 6 % de février 1993 à février 1994 contre 8,4 % en 1993.

**RÉSERVES DE CHANGE: les réserves de change de l'Italie ont augmenté au cours des deux premiers mois de 1994**

Les réserves en devises de l'Italie ont augmenté d'environ 17 % au cours des deux premiers mois de 1994, atteignant ainsi près de 29 milliards d'écus. Les réserves de change des États-Unis, du Japon, de la Belgique, des Pays-Bas et du Royaume-Uni ont également progressé, mais dans une moindre mesure.

L'Allemagne continue à détenir les réserves de change les plus importantes avec près de 70 milliards d'écus à la fin de 1993. Bien qu'en légère baisse par rapport à fin 1992, ce montant représente un accroissement d'environ 45 % par rapport à juin 1992 et près du double des réserves de l'Espagne, deuxième pays de la Communauté pour ce qui concerne les réserves de change avec près de 37 milliards d'écus. Les Pays-Bas, qui occupaient la sixième place européenne à la fin de 1992, ont augmenté leurs réserves de plus de 50 % et se sont retrouvés ainsi à la troisième place à la fin de 1993. Ceci reflète la force du florin néerlandais et l'ampleur de l'intervention de la banque centrale néerlandaise sur le marché monétaire.

Les réserves de la France étaient légèrement supérieures à 20 milliards d'écus à la fin de 1993, en déclin par rapport aux 27 milliards d'écus atteints en juin 1993. La Banque de France a dû intervenir massivement pour défendre le franc à la fin de l'été 1993, ce qui a réduit ses réserves en devises.

**COMPTES TRIMESTRIELS: Au cours du troisième trimestre 1993: poursuite de la phase de stagnation de la croissance économique (PIB +0,4 %); baisse de l'inflation (+0,4 %)**

Le troisième trimestre 1993 a été caractérisé, par l'économie de l'Union européenne dans son ensemble, par une légère croissance de la production (PIB +0,4 %). De ce fait, au cours des neuf premiers mois de l'année, on a constaté, par rapport à la période correspondante de l'année précédente, un fléchissement de la croissance économique (PIB -0,4 %). Ces résultats semblent indiquer qu'une inversion de tendance, pour l'économie de l'Union, ne semble pas être envisageable avant 1994.

La dernière réunion du G7 a mis en évidence un certain optimisme modéré pour la situation économique au cours de 1994. D'ailleurs cet optimisme est en partie compensé par des préoccupations de plus en plus fortes pour la croissance du chômage. Pour résoudre ce problème les Ministres des économies ainsi que les Gouverneurs des banques centrales des sept pays les plus développés ont envisagé la possibilité de changer les règles du marché du travail. Le livre blanc sur l'occupation, présenté par la Commission, semble être un élément important pour combattre le chômage et peut constituer une des bases pour la reprise de l'économie de l'Union.

En ce qui concerne l'inflation, mesurée par le déflateur implicite du PIB on constate une importante tant en rythme trimestriel qu'annuel (+0,4 % et 2,8 % respectivement). Cette situation semble favoriser la tendance à une baisse généralisée des taux d'intérêt.

En ce qui concerne la situation dans les États membres, on dispose des résultats du quatrième trimestre pour l'Allemagne, la France et l'Espagne; et uniquement le BIP pour les Pays-Bas. Ces résultats semblent indiquer un nouveau fléchissement de la croissance économique en Allemagne et aux Pays-Bas (-0,2 % et -0,2 % respectivement). Par contre, en France et en Espagne, on observe une croissance très faible (+0,2 % et +0,1 % respectivement). Ces données confirment que la situation économique est encore caractérisée par une incertitude prononcée.

Aux États-Unis, au cours du troisième trimestre 1993, on constate une légère accélération de la croissance économique (PIB +0,7 %) accompagnée par une nouvelle baisse de l'inflation trimestrielle (+0,4 %), tandis qu'en rythme annuel on constate une légère reprise (+2,7 %). Parmi les composantes du PIB, il faut mettre en évidence l'évolution positive de la consommation privée (+1,0 %) et des investissements (+1,8 %), tandis que la consommation publique présente un nouveau fléchissement (-0,3 %).

Pour le Japon, au cours du troisième trimestre 1993, on constate une reprise de la croissance économique (PIB +0,5 %) accompagnée par une reprise de l'inflation tant trimestrielle qu'annuelle (+0,5 % et +1,0 % respectivement). Parmi les composantes de la demande interne, on observe une reprise généralisée plus prononcée pour la consommation privée et pour les investissements (+0,7 % et +0,5 % respectivement).

**PRIX: L'inflation annuelle de l'UE recule légèrement en mars à 3,2 %**

Le taux d'inflation de l'UE — mesuré par l'IPC — a continué sa décléation à petits pas et est tombé de 3,3 % en février à 3,2 % en mars; il y a un an ce taux était de 3,5 %.

Dans l'ordre croissant de l'inflation actuelle les taux d'inflation annuelle des différents États Membres pour le mois de mars et ceux d'il y a un an sont les suivants:

	Mars '94	Mars '93		Mars '94	Mars '93
	Mars '93	Mars '92		Mars '93	Mars '92
France	1,5 %p	2,2 %	Pays-Bas	2,9 %p	2,6 %
Irlande**	1,7 %	1,9 %	Allemagne*	3,2 %	4,2 %
Danemark	1,7 %	1,1 %	Italie	4,3 %p	4,3 %
Belgique	2,3 %	2,9 %	Espagne	5,0 %	4,1 %
Luxembourg	2,3 %	3,7 %	Portugal	6,0 %	7,3 %
Royaume-Uni	2,3 %	1,9 %	Grèce	10,2 %	16,4 %

\* L'IPC pour la R.F. d'Allemagne continue à se rapporter à la situation territoriale d'avant le 3 octobre 1990.

\*\* Février '94/février '93 et février '93/février '92

p Provisoire

Les taux pour les Etats candidats à l'adhésion sont: Finlande 0,4 % (2,7 %), Norvège 1,0 % (2,5 %), Suède 1,8 % (4,9 %) et Autriche 3,1 % (3,9 %); les taux correspondants de quelques pays hors de l'UE sont: Etats-Unis 2,5 % (3,1 %), Japon 1,1 % (1,2 %), Canada 0,2 % (1,9 %) et Suisse 1,3 % (3,7 %).

L'indice mensuel EUR-12 a progressé de 0,3 % en mars (voir tableaux I et II, pages 4 et 5).

Un des critères de convergence économique prévu dans le Traité sur l'Union Européenne, est que le taux d'inflation annuelle des Etats Membres ne doit pas dépasser de plus de 1,5 % celui des trois Etats les plus performants. En mars 1994 la moyenne des trois taux les plus bas était de 1,6 %; les pays qui se situent à l'intérieur de cette limite sont: la France, l'Irlande, le Danemark, la Belgique, le Luxembourg, le Royaume-Uni et les Pays-Bas (voir graphique ci-dessous).

## LE CHÔMAGE DANS L'UNION EUROPÉENNE

Dans l'Union Européenne, le taux de chômage corrigé des variations saisonnières atteint 10,9 % au mois de mars 1994 selon Eurostat, en hausse de +0,1 % par rapport au mois de février 1994. Malgré cette légère augmentation, la stabilisation du chômage semble donc se confirmer dans l'Union européenne. En un an, les hausses les plus importantes se sont produites en Espagne, au Portugal et aux Pays-Bas.

Par contre le taux de chômage des jeunes de moins de 25 ans ne semble pas encore stabilisé notamment en Italie, aux Pays-Bas et au Portugal. Au niveau communautaire le taux de chômage des hommes de moins de 25 ans augmente plus rapidement (+0,4 point en un mois, +1,1 point en un an) que celui des jeunes femmes (inchangé depuis 3 mois, +0,6 point en un an).

Le taux de chômage et le nombre de chômeurs sont estimés après élimination des différences dans les méthodes nationales de recensement du chômage.

Le taux de chômage est estimé en extrapolant les résultats 1991 des enquêtes sur les forces de travail pour tous les États membres. L'introduction des résultats de l'année 1992, dès qu'ils seront disponibles, entraînera probablement une révision des estimations.

## COMMERCE EXTERIEUR Résultats d'octobre 1993

Pour les dix premiers mois de 1993 le déficit commercial des Etats-Unis est de 99 Mrds d'écus, celui de l'Union Européenne de 11 Mrds; l'excédent japonais dépasse 84 Mrds d'écus.

Le déficit commercial extra de l'Union Européenne est proche de 11 Mrds d'écus pour les dix premiers mois de 1993, alors qu'il atteint 47,5 Mrds pour la période correspondante de 1992. Les exportations de l'Union Européenne croissent vivement entre janvier-octobre 1992 et 1993 (8,6 %). Les importations sont en légère baisse (-1,3 %).

Entre les dix premiers mois de 1992 et de 1993 le déficit des Etats-Unis s'alourdit de quelque 34 Mrds d'écus pour approcher 100 Mrds d'écus. Les importations destinées aux Etats-Unis progressent de 21 % en termes d'écus, de 9 % en dollars. Les exportations en provenance des Etats-Unis croissent plus lentement: 13,8 % en écus et 3 % en dollars.

L'excédent des échanges du Japon est de 84,4 Mrds d'écus de janvier à octobre 1993, en progrès de 17 Mrds par rapport aux mois correspondants de 1992. Les exportations japonaises augmentent de 17,7 % en écus, de 6 % en dollars, mais régressent de 4 % en yens. Les importations du Japon observent une hausse de 14,3 % en écus, de 3 % en dollars, mais chutent de 9 % en yens.

L'Italie, l'Allemagne, l'Espagne, les Pays-Bas et l'UEBL voient leurs bilans extra-UE s'améliorer sensiblement entre les dix premiers mois de 1992 et de 1993.

L'Allemagne et l'Italie dégagent aux dix premiers mois de 1993 les excédents commerciaux extra les plus forts: respectivement 14 Mrds d'écus et 7,5 Mrds d'écus, en progrès de près de 8 et 10 Mrds d'écus. Les exportations extra de l'Italie croissent de 14,2 % entre janvier-octobre 1992 et 1993, les importations italiennes se replient de 6,4 %. Les exportations allemandes progressent de 5,5 %, les importations sont en léger retrait (-0,7 %).

L'Espagne, les Pays-Bas et l'UEBL voient leurs déficits extra-UE se réduire notablement entre les dix premiers mois de 1992 et de 1993 (de 6, 5,2 et 4,4 Mrds d'écus respectivement). Les exportations de ces pays sont en progrès net: 12 % pour l'Espagne, 15 % pour les Pays-Bas et 19 % pour l'UEBL. Les importations de l'Espagne chutent (-17,4 %), les flux importés par les Pays-Bas et l'UEBL baissent de 5,2 % et 3,6 %.

La France, le Royaume-Uni et le Danemark améliorent leur bilan de près d'un milliard d'écus chacun par rapport à janvier-octobre 1992. Les importations françaises marquent -2,4 %, les flux exportés de France baissent faiblement (-0,2 %). Les flux importés et exportés par le Royaume-Uni sont en progrès respectifs de 8,4 % et 13,1 %. Les exportations danoises sont supérieures de 4 % à leur niveau des dix premiers mois de 1992, tandis que les importations s'infléchissent de -2,2 %.

Les bilans commerciaux extra-UE du Portugal, de l'Irlande et de la Grèce sont proches en janvier-octobre 1993 de ceux de la période correspondante de 1992. Les flux échangés par le Portugal se rétractent: -14,8 % pour les exportations, -13,1 % pour les importations. Les échanges de l'Irlande et de la Grèce sont marqués par de vives progressions. Les importations irlandaises croissent de 37 %, les exportations de 33 %. Les flux exportés de Grèce croissent de 21 %, les importations de 15 %.

## „On line“-Abfrage

Jede Zeitreihe ist durch einen neunstelligen numerischen Kode gekennzeichnet, der seinerseits in Unterkodes gegliedert ist, welche – im Falle von „Eurostatistik“ – das Land, den Sektor, die Tabelle, die Einheit und die Periodizität bezeichnen.

Die Bedeutung der einzelnen Unterkodes ist der nachstehend aufgeführten Tabelle zu entnehmen.

Land XX	Sektor XX	Tabelle XXXX	Periodizität und Einheit X
06 EUR 12* 03 EUR 10 11 D* 14 F 16 I 18 NL 21 UEBL 22 B 24 L 26 UK 28 IRL 30 DK 32 E 34 GR 36 P 42 USA 46 JAP	93	Variablen tabellen  XXXX vierstelliger Wert, der im Titel jeder Tabelle erscheint	0 jährlich, Angaben in Prozent 1 vierteljährlich, Angaben in Prozent 2 monatlich, Angaben in Prozent 3 jährlich, Indexangaben (1985 = 100) 4 vierteljährlich, Indexangaben (1985 = 100) 5 monatlich, Indexangaben (1985 = 100) 6 jährlich, Angaben in absoluten Werten 7 vierteljährlich, Angaben in absoluten Werten 8 monatlich, Angaben in absoluten Werten 9 Gewicht, EUR 10 = 100 bzw. EUR 12 = 100

\* Territoriale Aufteilung vor dem 3. 10. 90: 02 für EUR 12, 12 für D.

Beispiele: Will man die monatliche Arbeitslosigkeit (in absoluten Zahlen) von Frankreich gemäß Tabelle 0304 dieser Veröffentlichung erfahren, so braucht man nur den Kode 14 93 0304 8 einzugeben.

## 'On-line' consultation

Each time series is identified by a nine-digit code broken down into subcodes, which in the case of Eurostatistics, represent the country, sector, table unit and periodicity. The significance of the different subcodes may be found in the table below.

Country XX	Sector XX	Table XXXX	Periodicity and unit X
06 EUR 12* 03 EUR 10 11 D* 14 F 16 I 18 NL 21 UEBL 22 B 24 L 26 UK 28 IRL 30 DK 32 E 34 GR 36 P 42 USA 46 JAP	93	Table by indicator  XXXX 4-digit value quoted in the title of each table	0 annual in % 1 quarterly in % 2 monthly in % 3 annual index 1985 = 100 4 quarterly index 1985 = 100 5 monthly index 1985 = 100 6 annual absolute value 7 quarterly absolute value 8 monthly absolute value 9 weighting EUR 10 = 100 or EUR 12 = 100

\* data for the territorial situation before 3. 10. 90: 02 for EUR 12, 12 for D.

Consultation example: to know the monthly unemployment (absolute figures) of France as is shown in Table 0304 of this publication, the code 14 93 0304 8 should be formed.

## Mode de consultation «on-line»

Chaque série chronologique est identifiée par un code à neuf chiffres structuré en sous-codes représentant, dans le cas d'Eurostatistiques, le pays, le secteur, le tableau, l'unité et la périodicité. On trouvera dans le tableau ci-dessous la signification des différents sous-codes.

Pays XX	Secteur XX	Tableau XXXX	Périodicité et unité X
06 EUR 12* 03 EUR 10 11 D* 14 F 16 I 18 NL 21 UEBL 22 B 24 L 26 UK 28 IRL 30 DK 32 E 34 GR 36 P 42 USA 46 JAP	93	Tableaux par variable  XXXX valeur à 4 chiffres figurant dans le titre de chaque tableau	0 annuelle exprimée en pourcentage 1 trimestrielle exprimée en pourcentage 2 mensuelle exprimée en pourcentage 3 annuelle exprimée en indice 1985 = 100 4 trimestrielle exprimée en indice 1985 = 100 5 mensuelle exprimée en indice 1985 = 100 6 annuelle exprimée en valeur absolue 7 trimestrielle exprimée en valeur absolue 8 mensuelle exprimée en valeur absolue 9 pondération EUR 10 = 100 ou EUR 12 = 100

\* données pour la situation territoriale avant le 3. 10. 90: 02 pour EUR 12, 12 pour D.

Exemple de consultation: pour connaître le chômage mensuel (chiffres absolus) de la France, tel qu'il figure au tableau 0304 de cette publication, il suffit d'appeler le code 14 93 0304 8;
