Las publicaciones de Eurostat están clasificadas por temas y por series. La clasificación se encuentra al final de la obra. Para mayor información sobre las publicaciones, rogamos se pongan en contacto con Eurostat. Para los pedidos, diríjase a las oficinas de venta cuyas direcciones figuran en la página interior de la contracubierta.

Eurostats publikationer er klassificeret efter emne og serie. En oversigt herover findes bag i hæftet. Yderligere oplysninger om publikationerne kan fås ved henvendelse til Eurostat. Bestilling kan afgives til de salgssteder, der er anført på omslagets side 3.

Die Veröffentlichungen von Eurostat sind nach Themenkreisen und Reihen gegliedert. Die Gliederung ist hinten in jedem Band aufgeführt. Genauere Auskünfte über die Veröffentlichungen erteilt Eurostat. Ihre Bestellungen richten Sie bitte an die Verkaufsbüros, deren Anschriften jeweils auf der dritten Umschlagseite der Veröffentlichungen zu finden sind.

Οι εκδόσεις της Eurostat ταξινομούνται κατά θέμα και κατά σειρά. Η ακριβής ταξινόμηση αναφέρεται στο τέλος κάθε έκδοσης. Για λεπτομερέστερες πληροφορίες σχετικά με τις εκδόσεις, μπορείτε να απευθύνεσθε στην Eurostat.

Για τις παραγγελίες μπορείτε να απευθύνεσθε στα γραφεία πώλησης, των οποίων οι διευθύνσεις αναγράφονται στη σελίδα 3 του εξωφύλλου.

Eurostat's publications are classified according to themes and series. This classification is indicated at the end of the publication. For more detailed information on publications, contact Eurostat. Orders are obtainable from the sales offices mentioned on the inside back cover.

Les publications d'Eurostat sont classées par thème et par série. Cette classification est précisée à la fin de l'ouvrage. Pour des informations plus détaillées sur les publications, contactez Eurostat. Pour les commandes, adressez-vous aux bureaux de vente dont les adresses sont indiquées à la page 3 de la couverture.

Le pubblicazioni dell'Eurostat sono classificate per tema e per serie. Tale classificazione è precisata alla fine dell'opera. Per informazioni più dettagliate sulle pubblicazioni rivolgersi all'Eurostat.

Per eventuali ordinazioni rivolgersi a uno degli uffici di vendita i cui indirizzi figurano nella 3^a pagina della copertina.

De publikaties van Eurostat zijn ingedeeld naar onderwerp en serie. Deze indeling is achter in het boek opgenomen. Voor nadere informatie over de publikaties kunt u zich wenden tot Eurostat.

Gelieve bestellingen op te geven bij de verkoopbureaus, waarvan de adressen op bladzijde 3 van de omslag zijn vermeld.

Vorwort

Mit der monatlich erscheinenden Veröffentlichung *Eurostatistik - Daten zur Konjunkturanalyse* werden innerhalb kürzester Frist die neuesten statistischen Daten über die Europäische Gemeinschaft als Ganzes (EUR12), über jedes Mitgliedsland sowie über die Vereinigten Staaten und Japan bekanntgegeben.

Eurostatistik enthält nicht die Gesamtheit des bei Eurostat verfügbaren statistischen Materials, sondern eine Auswahl der relevantesten Reihen über die konjunkturelle Entwicklung.

Schnelligkeit und Pünktlichkeit sind die wichtigsten Vorzüge dieser Veröffentlichung.

Aus diesem Grunde wurde sie im Umfang bewußt klein gehalten und enthält keine Anmerkungen zur Methodik, die im übrigen in den spezialisierten Veröffentlichungen von Eurostat zu finden sind.

Die in *Eurostatistik* veröffentlichten Daten stammen aus dem ICG -Bereich der On-line-Datenbank Cronos von Eurostat.

Wer Zugang zu Cronos besitzt, kann jederzeit die Tabellen dieser Veröffentlichung abfragen, wobei die Daten täglich auf den neuesten Stand gebracht werden (Hinweise zur On-line -Benutzung finden sich auf der letzten Seite). Darüber hinaus sind die Daten in der Datenbank Eurocron verfügbar, die vom Host Eurobases der Kommission angeboten wird.

WECHSELKURSE: Erneuter Anstieg der US-Zinssätze

Am 15. November gab die amerikanische Notenbank eine Anhebung sowohl des Diskontsatzes als auch der Zielvorgabe für den Tagesgeldsatz um 0,75 % auf 4,75 % bzw. 5,5 % bekannt. Eine so massive Erhöhung der US-Zinssätze hatte es seit 1980 nicht mehr gegeben; in diesem Jahr war es der sechste Anstieg der kurzfristigen Zinssätze in den USA. Der US-Diskontsatz liegt nunmehr erstmals seit Februar 1991 über dem deutschen Diskontsatz.

Die deutschen Zinssätze wurden auf der Sitzung des Zentralbankrates am 24. November nicht verändert. Der Zinssatz der Bundesbank für Wertpapierpensionsgeschäfte liegt seit dem 27. Juli bei 4,85 %, Diskontsatz und Lombardsatz liegen seit dem 13. Mai bei 4,5 % bzw. bei 6 %.

Der Dollar konnte nach der Anhebung der US-Zinssätze einen leichten Wertzuwachs gegenüber der DM verbuchen, und die Renditen von US-Staatsanleihen fielen unter die 8 %-Marke. Am 29. November schloß der Dollar in London mit 1,5612 DM und 98,695 Yen, also etwa 3,6 % bzw. 1,8 % höher als Ende Oktober.

Die italienische Lira fiel im November auf einen historischen Tiefststand. Sie hat in den vergangenen acht Monaten insgesamt nahezu 10 % ihres Wertes eingebüßt und wurde am 25. November mit 1 039 LIT für 1 DM gehandelt, wenngleich sie sich in den folgenden Tagen wieder leicht erholte und am 29. November bei 1 031 LIT lag. Seit der Anhebung des Diskont- und des Lombardsatzes Mitte August, als die Lira mit rund 1 025 LIT für 1 DM gehandelt wurde, gab es keine weiteren Veränderungen bei den Leitzinssätzen der italienischen Zentralbank.

Die schwedischen Kapitalmärkte zeigten unmittelbar nach dem Volkstentscheid zugunsten des Beitritts zur Europäischen Union eine positive Reaktion mit einem Wertzuwachs der Krone, einem Anziehen der Aktienkurse und einem Rückgang der Renditen von Staatsanleihen. Später gab die Krone dann allerdings wieder nach. Der Kurs der norwegischen Krone zog Ende November leicht an, nachdem sich die Norweger gegen den Beitritt zur EU ausgesprochen hatten.

Ende November war der holländische Gulden die stärkste Währung innerhalb des Wechselkursmechanismus, gefolgt vom belgischen Franken, der D-Mark, dem irischen Pfund, dem französischen Franc, der dänischen Krone, dem Escudo und der Peseta. Die Senkung der portugiesischen Zinssätze Ende Oktober hatte keine Auswirkungen auf die Position des Escudo im Wechselkursmechanismus in den darauffolgenden Wochen.

Die griechische Drachme hat 1994 gegenüber der DM bislang rund 8 % an Wert verloren. Obgleich die Drachme nicht am Wechselkursmechanismus teilnimmt, verfolgt die griechische Zentralbank eine Politik der „harten Drachme“, mit der der Wertverlust dieser Währung gegenüber anderen EU-Währungen im Jahre 1994 auf 7 % begrenzt werden soll. Die griechische Zentralbank senkte ihren Diskontsatz und ihren Lombardsatz am 21. November um 1 % auf 20,5 % bzw. 24 %, ohne daß dies indessen erkennbare Auswirkungen auf die Drachme gehabt hätte.

RENDITEN VON STAATSANLEIHEN: Leicht nachgebende Anleiherenditen

Nach mehreren Monaten der Aufwärtsentwicklung gaben die Renditen von Staatsanleihen im Oktober in mehreren EU-Mitgliedstaaten leicht nach. In Belgien, Dänemark, Spanien, Luxemburg und dem Vereinigten Königreich gingen sie um rund 0,1 % zurück, in den Niederlanden lag die Durchschnittsrendite im Oktober auf gleicher Höhe wie im September. In Frankreich und Deutschland hingegen erhöhten sich die Renditen im Oktober geringfügig auf durchschnittlich 8,5 % bzw. 7,4 %, in Italien etwas stärker auf 11,2 %.

Auch in zwei der drei Länder, die im Januar 1995 der Europäischen Union beitreten werden, waren die Renditen von Staatsanleihen im Oktober rückläufig. In Finnland gingen sie von 10,5 % auf 10,1 % zurück, in Schweden von 11,2 % auf 10,95 %. In den Renditen der österreichischen Staatsanleihen hingegen spiegelte sich der Anstieg der deutschen Renditen wider, sie erhöhten sich von 7,2 % auf 7,3 %.

In den ersten neun Monaten 1994 wurden in Österreich, Finnland und Schweden Durchschnittsrenditen von 6,5 %, 8,7 % bzw. 9,0 % erzielt. Die österreichische Zahl war dabei die drittniedrigste aller derzeitigen und künftigen EU-Mitgliedsländer, die Renditen Finnlands und Schwedens lagen auf ungefähr der gleichen Höhe wie die Italiens.

GELDVOLUMEN: Weitere Verlangsamung des Geldmengenwachstums in Deutschland

Das Wachstum der deutschen Geldmenge M3 verlangsamte sich in den zwölf Monaten bis September 1994 erneut: Nach einer auf das Jahr umgerechneten Wachstumsrate von mehr als 11 % in den ersten Monaten des Jahres beläuft sich das Wachstum nur noch auf 7,5 %. Damit liegt das M3-Wachstum zwar noch nicht innerhalb des von der Bundesbank für 1994 anvisierten Zielkorridors von 4-6 %, es kommt diesem jedoch eindeutig erheblich näher als in der ersten Hälfte des Jahres.

Ansonsten hielt das in letzter Zeit beobachtete schwache Geldmengenwachstum weiter an. Das M3-Wachstum in Frankreich war 1994 in den zwölf Monaten bis August im elften aufeinanderfolgenden Monat negativ, wenngleich die Geldverknappung im August geringer ausfiel als in den Vormonaten.

Erstmals in diesem Jahr lag die ALP-Wachstumsrate in Spanien in den zwölf Monaten bis August knapp innerhalb des von der spanischen Zentralbank für 1994 vorgegebenen Zielkorridors von 4,5-7,5 %.

AMTLICHE WÄHRUNGSRESERVEN: Devisenzuflüsse nach Deutschland und Griechenland

Deutschland verzeichnete im Oktober einen Zufluß von Währungsreserven in Höhe von rund 6 Mrd. ECU, dies entspricht rund 9 % seiner gesamten Währungsreserven (ohne Gold). Die deutschen Reserven haben nunmehr mit mehr als 75 Mrd. ECU einen Umfang erreicht, der nur zweimal in den Jahren 1992 und 1993 übertroffen wurde, als der Wechselkursmechanismus unter Druck geriet.

Auch die griechischen Währungsreserven sind im September beträchtlich angewachsen, nachdem bereits früher im Jahr Zuflüsse zu verzeichnen waren, und liegen nun um nahezu 40 % über ihrem Stand von Ende 1993.

Was die drei neuen EU-Beitrittsländer betrifft, so hielt Finnland 1993 1,7 % der gesamten amtlichen Währungsreserven ohne Gold von EUR15 (dies ist der gleiche Prozentsatz wie Irland), während die österreichischen Reserven 4,4 % betragen und damit ähnlich hoch lagen wie die Portugals. Schweden, das dritte Beitrittsland, besaß Ende 1993 rund 6 % der gesamten Währungsreserven von EUR15.

PREISE : Jahresinflation der EU unverändert bei 3,0 % in Oktober.

Die Jahresinflation der EU-gemessen mit dem VPI blieb zwischen September und Oktober unverändert bei 3,0 %. Vor Jahresfrist, im Oktober 1993, betrug sie 3,3 %.

Der Monatsindex für EUR 12 stieg von September auf Oktober um 0,2 % an.

Leichte Steigerungen wurden verzeichnet in Deutschland, in den Niederlanden und im Vereinigten Königreich (0,1 %), sowie in Frankreich, Spanien und Luxemburg (0,2 %). Höhere Anstiege wurden gemeldet aus Portugal (0,4 %) und Italien (0,6 %). Der griechische Index verzeichnet eine scharfe Steigerung von 1,2 % als Folge bedeutender Preiserhöhungen für viele Waren und Dienstleistungen.

Im zweiten aufeinanderfolgenden Monat ging der belgische Index um 0,2 % zurück, dank niedriger Preise für Nahrung, Getränke und privaten Transport.

In aufsteigender Reihenfolge nach der derzeitigen Inflation geordnet sind die Raten wie folgt :

	Okt. 1994	Okt. 1993	Okt. 1994	Okt. 1993	
	Okt. 1993	Okt. 1992	Okt. 1993	Okt. 1992	
Frankreich	1,6 % ^p	2,2 %	Niederlande	2,8 %	2,8 %
Dänemark	2,0 % ^E	1,6 %	Deutschland	2,8 %	3,9 %
Luxemburg	2,1 %	3,5 %	Italien	3,9 % ^p	4,6 %
Belgien	2,1 %	2,7 %	Spanien	4,4 %	4,7 %
Ver. Königreich	2,4 %	1,4 %	Portugal	4,5 %	6,1 %
Irland	2,5 %	1,3 %	Griechenland	11,1 %	12,3 %

* Der Verbraucherpreisindex der Bundesrepublik Deutschland bezieht sich weiterhin auf den Gebietsstand vor dem 3.10.90

** August 1994/August 1993 und August 1993/August 1992

^p Vorläufig

^E Eurostat Schätzung

In 11 der 12 Mitgliedstaaten liegen die Inflationsraten innerhalb von 1,5 Prozentpunkten des EUR 12 Durchschnitts.

Die Raten der Beitrittskandidaten sind : Norwegen 1,7 % (2,0 %), Finnland 1,8 % (1,7 %), Schweden 2,4 % (4,3 %) und Oesterreich (Sept.) 3,1 % (3,4 %).

Die entsprechenden Zahlen für einige weitere Länder : Vereinigte Staaten 2,6 % (2,8 %), Japan 0,8 % (1,3 %), Kanada (Sept.) 0,2 % (1,9 %) und Schweiz 0,5 % (3,4 %).

INDUSTRIEPRODUKTION Aufschwung in allen Bereichen der Industrie

Die Industrieproduktion in der Europäischen Gemeinschaft (EU) steigt im Sommer 1994 weitherhin an.

Die Veränderungsrate des arbeitstäglich bereinigten Produktionsindex der Industrie betrug im August 1994 gegenüber dem Wert des gleichen Monats ein Jahr zuvor +6,5 %. Betrachtet man für die EU die Veränderungsrate des saisonbereinigten Produktionsindex der letzten drei verfügbaren Monate Juni bis August gegenüber den drei Monaten zuvor, so beläuft sie sich auf +2,0 %.

In den USA beträgt die Veränderungsrate Mai bis Juli 1994 gegenüber den Vormonaten für die Industrieproduktion +1,0. Auch Japan zeigt mit +0,4 % eher einer verhaltene Entwicklung.

Für die Hauptgütergruppen ist in der Europäischen Union folgendes Bild zu verzeichnen (Veränderungsrate Juni bis August gegenüber den drei Vormonaten):

- Vorleistungsgüterindustrie: +2,2 %
- Investitionsgüterindustrie: +2,5 %
- dauerhafte Konsumgüterindustrie: +2,1 %
- nicht-dauerhafte Konsumgüterindustrie: +1,4 %

Demnach steigt zur Zeit die Industrieproduktion in allen Bereichen.

Für die einzelnen Mitgliedstaaten der Europäischen Union ergeben sich, soweit vorhanden, für die saisonbereinigte Industrieproduktion folgende Veränderungsrate Juni-August, gegenüber den drei Vormonaten: Italien +4,4 %, Griechenland +3,1 %, Spanien +2,7 %, Dänemark +2,6 %, Frankreich +1,7 %, Vereinigtes Königreich +1,5 %, Deutschland +1,0 %, Niederlande +0,7 %, Luxemburg -0,0 % (geschätzt), Portugal -0,1 % (geschätzt).

Die entsprechende Wachstumsrate ist in Finnland +2,7 %, in Norwegen +2,2 % (geschätzt), in Österreich +1,5 % (geschätzt) und in Schweden +1,5 %.

AUSSENHANDEL

Das Außenhandelsdefizit der Europäischen Union (EU) verringerte sich zwischen Januar-April 1993 und Januar-April 1994 von 14,4 Mrd. ECU auf 6,8 Mrd. ECU. Diese Verbesserung der Extra-EU-Handelsbilanz ist im wesentlichen auf den Anstieg der Ausfuhren (15,9 %) zurückzuführen. Die Einfuhren der EU stiegen in dieser Zeit um 9,7 %.

Das Außenhandelsdefizit der Vereinigten Staaten erhöhte sich von 30,3 Mrd. ECU in den ersten vier Monaten 1993 auf 40,0 Mrd. ECU im gleichen Zeitraum 1994. Die Einfuhren der USA erhöhten sich in dieser Zeit bei Zugrundelegung der Zahlen in ECU um 16 %, während die Ausfuhren um 12,2 % zunahm. Gerechnet in US-Dollar lagen diese Steigerungsraten bei 9,3 % bzw. 5,7 %.

Der japanische Außenhandelsüberschuß stieg von Januar-April 1993 bis Januar-April 1994 um 5 Mrd. ECU auf 38,1 Mrd. ECU. Ausgehend von ECU-Werten nahmen die Einfuhren und die Ausfuhren nahezu gleich stark zu (13,2 % bzw. 13,8 %). Gerechnet in US-Dollar ergab sich eine Differenz von 0,5 % zugunsten der Ausfuhren, während in Yen gerechnet die japanischen Einfuhren um 5,1 % und die Ausfuhren um 5,4 % zurückgingen.

Die signifikantesten Verbesserungen ihrer Außenhandelsergebnisse zwischen den ersten vier Monaten 1993 und 1994 verzeichneten Frankreich (Entwicklung von einem Defizit von 2,6 Mrd. ECU zu einem Überschuß von 2,1 Mrd. ECU) und Italien (wo in den ersten vier Monaten 1994 ein Überschuß von 3,4 Mrd. ECU erzielt wurde). Die Extra-EU-Ausfuhren dieser beiden Länder nahmen signifikant zu (um 25,8 % für Frankreich und um 16,4 % für Italien), während die Steigerung ihrer Extra-EU-Einfuhren gemäßiger ausfiel (2,6 % bzw. 3,1 %).

Deutschland erzielte in den ersten vier Monaten 1994 den höchsten Überschuß (5,5 Mrd. ECU, das ist 1 Mrd. ECU mehr als 1993). Die prozentuale Steigerung der Extra-EU-Importe und -Exporte zwischen diesen beiden Zeiträumen wies ziemlich ähnliche Werte aus (7,0 % und 8,2 %).

Irland und Dänemark erzielten in der Zeit von Januar bis April 1994 kleine Überschüsse (0,1 Mrd. ECU bzw. 0,6 Mrd. ECU, wobei gegenüber den Zahlen von 1993 geringfügige Veränderungen festzustellen waren). Während für Dänemark die Differenz zwischen den Steigerungsraten der Extra-EU-Ausfuhren und -Einfuhren zwischen den ersten vier Monaten 1993 und 1994 +5,0 % betrug, belief sie sich im Falle Irlands auf -3,7 Prozentpunkte.

Die BLWU verzeichnete in der Zeit von Januar bis April 1994 ein Handelsbilanzdefizit von 0,3 Mrd. ECU, was eine Verbesserung um 0,8 Mrd. ECU gegenüber 1993 bedeutet. Zwischen diesen beiden Zeiträumen stiegen sowohl die Extra-EU-Einfuhren (19,9 %) als auch die -Ausfuhren (31,4 %) stark an. Portugal meldete für die Zeit zwischen den ersten vier Monaten 1993 und 1994 keine signifikante Änderung seines Defizits (Erhöhung von 0,8 Mrd. ECU auf 0,9 Mrd. ECU). Die Extra-EU-Einfuhren und -Ausfuhren nahmen um einen ähnlichen Wert zu (15,6 % bzw. 16,1 %).

Griechenland (1,1 Mrd. ECU) und Spanien (1,3 Mrd. ECU) verzeichneten in der Zeit von Januar bis April 1994 ähnliche Defizite, die eine Verbesserung um 0,2 Mrd. ECU bzw. 0,6 Mrd. ECU gegenüber demselben Zeitraum 1993 darstellten. Während in beiden Ländern die Extra-EU-Ausfuhren zwischen den beiden Zeiträumen stark zunahm (um 22,5 % bzw. 19,3 %), erhöhten sich die Extra-EU-Einfuhren im Falle Spaniens zwischen den ersten vier Monaten 1993 und 1994 um 7,7 %, während sie in Griechenland um 1,7 % sanken.

Die Niederlande und das Vereinigte Königreich hatten während des Zeitraums Januar-April 1994 mit 6,8 Mrd. ECU bzw. 8,0 Mrd. ECU die größten Defizite innerhalb der EU zu verzeichnen. Beide Länder mußten eine Verschlechterung ihrer Handelsbilanzen gegenüber demselben Zeitraum 1993 hinnehmen (um 1,7 Mrd. ECU für die Niederlande und um 0,4 Mrd. ECU für das Vereinigte Königreich). Ausgedrückt in Prozent veränderten sich die Extra-EU-Einfuhren und -Ausfuhren zwischen den ersten vier Monaten 1993 und 1994 in den Niederlanden um 20,6 % und 13,6 %, während die Veränderungen im Vereinigten Königreich 14,3 % und 17,3 % betragen.

Foreword

Eurostatistics - data for short-term economic analysis is a monthly publication aimed at providing, as rapidly as possible, the latest statistical data on the European Community as a whole (EUR 12), each Member State, the United States and Japan.

Eurostatistics does not present all the statistics held by Eurostat, but a selection of the most relevant series on the economic situation.

Speed of publication and punctuality are the main features of this publication; that is why it is deliberately streamlined and does not contain any methodological notes, which are given in Eurostat's specialized publications.

The data published in *Eurostatistics* are taken from the ICG domain of Eurostat's on-line database, Cronos (instructions regarding on-line consultation may be found at the end of this publication). They are also available via the Commission host Eurobases in the Eurocron database.

Further information on Eurostat and its products can be obtained from the following addresses:

Unless otherwise stated, data for the Federal Republic of Germany, including West Berlin, as constituted prior to 3 October 1990.

EXCHANGE RATES: further increase in US interest rates

On November 15 the US Federal Reserve announced an $\frac{1}{2}$ % increase in both its discount rate and in its target for the rate charged on Federal Funds, to 4.75 and 5.5% respectively. This was the largest one-step increase in US interest rates since 1980, and was the sixth time this year that US short-term interest rates have risen. The US discount rate now stands at a higher level than its German counterpart, for the first time since February 1991.

German interest rates were left unchanged on November 24 at the meeting of the Bundesbank's Council. The Bundesbank's repo rate has stood at 4.85% since July 27, the discount and lombard rates at 4.5 and 6% respectively since May 13.

The dollar appreciated slightly against the mark following the increase in US rates, and US government bond yields fell below the 8% level. On November 29 the dollar closed in London at DM1.5612 and —98.695, some 3.6 and 1.8% respectively higher than its levels at the end of October.

The Italian lire reached all-time lows in November. It has now depreciated by almost 10% in the last eight months, and was trading at LIT1039 against the Deutschemark on November 25, although it strengthened slightly in the following days, to stand at LIT1031 on November 29. There have been no changes in Italian central bank headline interest rates since the increase in the discount and Lombard rates in mid-August, at which point the lire stood at around LIT1025.

Swedish financial markets reacted positively in the immediate aftermath of the vote to join the European Union, with an appreciation in the krone, a rising stock market and falling government bond yields. However, the krone later weakened. The Norwegian krone strengthened slightly following Norway's vote at the end of November against joining the EU.

At the end of November the Dutch guilder remained at the top of the ERM grid, followed by the Belgian franc, the mark, the punt, the French franc, the Danish krone, the escudo and the peseta. The reduction in Portuguese interest rates at the end of October did not effect the escudo's position in the ERM grid in the following weeks.

The Greek drachma has depreciated by around 8% against the Deutschemark so far in 1994. Although the drachma is not a member of the ERM, the Bank of Greece's „hard drachma“ policy is aimed at limiting the currency's depreciation against other EU currencies to 7% in 1994. The Central Bank of Greece reduced its discount and Lombard rates by 1% to 20.5 and 24% respectively on November 21, without any discernable effect on the drachma.

GOVERNMENT BOND YIELDS: slight easing in bond yields

Government bond yields eased slightly in several EU Member States in October, following several months of rising yields. Yields fell by around 0.1% in Belgium, Denmark, Spain, Luxembourg and the United Kingdom, and in the Netherlands the average yield in October was the same as in September.

However, in France and Germany yields rose slightly in October, to stand at an average of 8.5 and 7.4% respectively, and also rose by rather more in Italy, to 11.2%.

Government bond yields in two of the three countries which will become members of the European Union in January 1995 also fell in October. Yields in Finland fell from 10.5 to 10.1%, and in Sweden from 11.2 to 10.95%. Austrian government bond yields mirrored the rise in German yields however, rising from 7.2 to 7.3%.

In the first nine months of 1994, yields in Austria, Finland and Sweden averaged 6.5%, 8.7% and 9.0% respectively. The figure for Austria was the third lowest of EU current and prospective members, whilst those for Finland and Sweden were around the same level as Italy.

MONEY SUPPLY: Germany's monetary growth continues to slow

The growth of Germany's M3 continued to slow in the year to September 1994, growing by 7.5%, down from an annualised growth rate of over 11% in the first few months of the year. M3 growth is still not within the Bundesbank's 1994 target of 4-6% growth, but is clearly far closer to it than in the first half of the year.

Elsewhere, the sluggish behaviour of monetary growth remarked on recently continues. M3 growth in France was negative in the year to August for the 11th consecutive month, although August's contraction was smaller than previously.

For the first time this year, ALP growth in Spain in the year to August was just inside the Banco de España's target range for 1994 of 4.5-7.5%.

FOREIGN OFFICIAL RESERVES: inflows into Germany and Greece

Germany experienced an inflow of foreign reserves of some 6 billion ecu in October, a figure amounting to around 9% of its total reserves excluding gold. Germany's reserves now stand at over 75 billion ecu, a level only exceeded during the two periods of ERM pressure in 1992 and 1993.

Greece's reserves also increased significantly in September, in addition to inflows earlier in the year, to stand at a level almost 40% higher than at the end of 1993.

Concerning the three new EU entrants, at the end of 1993 Finland held 1.7% of the EUR15 total of foreign official reserves excluding gold, about the same percentage as Ireland, and Austria 4.4%, a similar proportion to that of Portugal. Sweden, the third new entrant, held approximately 6% of the EUR15 total at the end of 1993.

INDUSTRIAL PRODUCTION Upswing in all parts of industry

During the summer of 1994 Industrial production in the European Union (EU) continued to grow.

The rate of change in August 1994 in the industrial production index, adjusted for working days, was up 6.5% on the figure for the corresponding month of the previous year. The rate of change in the EU's seasonally adjusted production index for the last three available months (June to August) was 2.0% up on the preceding three-month period.

In the USA, the rate of change in industrial production for May to July 1994 was 1.0% up on the preceding months, thus the upswing is rather weak. Japan, with an increase of 0.4%, also showed rather restrained development.

The following picture emerges for the main end-use groups in the European Union (rate of change for June to August over the preceding three months):

- intermediate goods industry: +2.2%
- capital goods industry: +2.5%
- consumer durables industry: +2.1%
- non-durable consumer goods industry: +1.4%

Industrial production is currently rising in all sectors of industry.

For the individual Member States of the European Union, figures (where available) for the seasonally-adjusted change in industrial production for June to August over the previous three months are as follows: Italy +4.4%, Greece +3.1%, Spain +2.7%, Denmark +2.6%, France +1.7%, the United Kingdom +1.5%, Germany +1.0%, Netherlands +0.7%, Luxembourg 0.0% (estimated), Portugal -0.1% (estimated).

The corresponding growth rate is in Finland +2.7%, in Norway +2.2% (estimated), in Austria +1.5% (estimated) and in Sweden +1.5%.

EXTERNAL TRADE April 1994

The external trade deficit of the European Union (EU) between the periods January-April of 1993 and 1994 went down from ECU 14.4 billion to ECU 6.8 billion. This improvement of the extra-EU's trade balance is mainly due to the increase of the exports (15.9%). EU imports grew by 9.7% between these two periods.

The United States increased its trade deficit from ECU 30.3 billion in the first four months of 1993 to ECU 40.0 billion in the same period of 1994. US imports increased by 16% between these two periods, while exports rose 12.2%, both figures in ECU terms. In US dollars, these figures were 9.3% and 5.7% respectively.

The Japanese external surplus went up ECU 5 billion to ECU 38.1 billion between the periods January-April of 1993 and 1994. Both imports and exports, when considered in ECU, increased by nearly the same amount

(13.2% and 13.8% respectively). In terms of US dollars, there was a difference of 0.5% for the exports, while in terms of Yen both Japanese imports and exports decreased by 5.1% and 5.4% respectively.

The two EU countries which showed the most significant improvements in their trade position between the first four months of 1993 and 1994 were France (which went up from a deficit of ECU 2.6 billion to a surplus of ECU 2.1 billion) and Italy (which recorded a surplus of ECU 3.4 billion in the first four months of 1994). Extra-EU exports of these two countries increased significantly (by 25.8% in the case of France and by 16.4% for Italy), while the increase of their extra-EU imports was more contained (2.6% and 3.1% respectively).

Germany registered the largest surplus during the first four months of 1994 (ECU 5.5 billion, ECU 1 billion up from the same figure of 1993). The percentage of increase of both extra-EU imports and exports between these two periods was rather similar (7.0% and 8.2% respectively).

Ireland and Denmark experienced small surpluses during the period January-April of 1994 (ECU 0.1 billion and ECU 0.6 billion respectively, with minor variations from the same figures of 1993). While for Denmark the difference between the rates of increase of extra-EU imports and exports between the first four months of 1993 and 1994 was +5.0%, it was -3.7 percentage points in the case of Ireland.

The BLEU registered a trade deficit of ECU 0.3 billion during the period January-April of 1994, an improvement of ECU 0.8 billion from the same

figure of 1993. Both extra-EU imports (19.9%) and exports (31.4%) increased strongly between these two periods. Portugal did not experience a significant change in its deficit between the first four months of 1993 and 1994 (from ECU 0.8 billion to ECU 0.9 billion). Both extra-EU imports and exports increased by a similar amount (15.6% and 16.1% respectively).

Greece (with ECU 1.1 billion) and Spain (ECU 1.3 billion) recorded similar deficits during the period January-April of 1994. It represented an improvement of ECU 0.2 billion and ECU 0.6 billion respectively from the same figures of 1993. While in both countries the extra-EU exports increased sharply during these two periods (by 22.5% and 19.3% respectively), the percentage change of extra-EU imports between the first four months of 1993 and 1994 was positive in the case of Spain (7.7%) and negative for Greece (-1.7%).

The Netherlands and the United Kingdom were the two EU countries which experienced the largest deficits during the period January-April 1994, with ECU 6.8 billion and ECU 8.0 billion respectively. These two countries experienced a deterioration of their trade positions from the same period of 1993 (of ECU 1.7 billion in the case of the Netherlands and ECU 0.4 billion for the United Kingdom). The percentage changes of extra-EU imports and exports between the first four months of 1993 and 1994 were 20.6% and 13.6% respectively for the Netherlands, while these figures were 14.3% and 17.3% respectively for the United Kingdom.

Eurostatistiques - Données pour l'analyse de la conjoncture est une publication mensuelle qui a pour but de fournir dans les meilleurs délais les données statistiques les plus récentes pour la Communauté européenne en tant qu'ensemble (EUR12), pour les pays membres ainsi que pour leurs principaux partenaires extra-communautaires (États-Unis d'Amérique et Japon).

Eurostatistiques ne publie pas d'une manière exhaustive toutes les statistiques disponibles auprès d'Eurostat, mais les plus importantes parmi celles-ci.

Cette publication se veut rapide et facilement maniable. Pour cette raison, elle ne comporte pas de notes méthodologiques, qui sont par ailleurs disponibles dans les publications spécialisées d'Eurostat.

Les données publiées dans *Eurostatistiques* proviennent du domaine ICG de la base de données Cronos (les instructions pour le mode de consultation on-line se trouvent à la fin de cette publication). Ces données sont aussi disponibles dans la base de données Eurocron, accessible par l'intermédiaire du serveur Eurobases de la Commission.

TAUX DE CHANGE: Nouvelle hausse des taux d'intérêt US

Le 15 novembre, la Réserve fédérale US a annoncé un relèvement de 0,75% du taux d'escompte et de l'objectif des fonds fédéraux qui passent ainsi de 4,75 à 5,5% respectivement. C'est la plus forte hausse en une fois des taux d'intérêt US depuis 1980, et c'était la sixième fois cette année que les taux d'intérêt à court terme US ont été relevés. Désormais, pour la première fois depuis février 1991, le taux d'escompte US est supérieur au taux allemand correspondant.

Les taux d'intérêt allemands n'ont pas été modifiés le 24 novembre lors de la réunion du conseil de la Bundesbank. Le taux repo de la Bundesbank n'a pas varié à 4,85% depuis le 27 juillet, les taux d'escompte et lombard à 4,5 et 6% respectivement depuis le 13 mai non plus.

Le dollar s'est légèrement apprécié contre le mark dans la foulée de la hausse des taux US, et les rendements des obligations d'État US ont baissé au-dessous du niveau 8%. Le 29 novembre, le dollar a clôturé à Londres à DM 1.5612 et Yen 98.695, soit des gains de 3,6 et 1,8% respectivement par rapport à leur niveau de la fin octobre.

La lire italienne est tombée à ses plus bas niveaux historiques en novembre. Elle s'est désormais dépréciée de quasiment 10% au cours des huit derniers mois, et se traitait à LIT 1039 contre le DM le 25 novembre, bien qu'elle se soit légèrement redressée les jours suivants pour terminer à LIT 1031 le 29 novembre. La Banque centrale italienne n'a pas modifié ses taux d'intérêt directeurs depuis la hausse des taux d'escompte et lombard de la mi-août au moment où la lire se tenait aux alentours de LIT 1025 toujours contre le DM.

Les marchés financiers suédois ont réagi positivement dès l'annonce du résultat du vote favorable à l'Union européenne avec une appréciation de la couronne, une hausse de la bourse et une chute des rendements des obligations d'État. Cependant, la couronne s'est ensuite affaiblie. La couronne norvégienne s'est légèrement raffermie après le vote de la Norvège fin novembre contre l'adhésion à l'UE.

À la fin novembre, le florin néerlandais est resté accroché au sommet de la grille du mécanisme de change suivi par le franc belge, le mark, la livre irlandaise, le franc français, la couronne danoise, l'escudo et la peseta. La réduction des taux d'intérêt portugais à la fin d'octobre n'a pas affecté la position de l'escudo dans la grille du mécanisme de change au cours des semaines suivantes.

En 1994, la drachme grecque s'est à ce jour dépréciée d'environ 8% contre le deutsche mark. Bien que la drachme ne fasse pas partie du mécanisme de change, la politique de la „drachme forte“ de la Banque de Grèce a pour objectif de limiter la dépréciation de sa monnaie contre les autres devises UE à 7% en 1994. La Banque centrale de Grèce a réduit ses taux d'escompte et lombard de 1% à 20,5 et 24% respectivement le 21 novembre sans aucun effet notable sur la drachme.

RENDEMENT DES OBLIGATIONS D'ÉTAT: légère détente sur les rendements

Après plusieurs mois de hausse, les rendements des obligations d'État se sont légèrement détendus dans plusieurs États membres de l'UE en octobre. Ils ont baissé d'environ 0,1% en Belgique, Danemark, Espagne, Luxembourg et Royaume-Uni, et aux Pays-Bas, le rendement moyen en octobre était le même qu'en septembre.

Cependant, en France et en Allemagne, les rendements ont légèrement augmenté en octobre pour se situer à une moyenne de 8,5 et 7,4% respectivement, et ont même monté davantage en Italie à 11,2%.

Les rendements des obligations d'État dans deux des trois pays qui deviendront membres de l'Union européenne en janvier 1995, ont également baissé en octobre. Les rendements en Finlande ont baissé de 10,5 à 10,1%, et en Suède de 11,2 à 10,95%. Les rendements des obligations d'État autrichiennes ont cependant reflété la hausse des rendements allemands, passant de 7,2 à 7,3%.

Au cours des neuf premiers mois de 1994, les rendements en Autriche, Finlande et Suède étaient en moyenne de 6,5%, 8,7% et 9,0% respectivement. Le chiffre de l'Autriche était le troisième plus bas des membres actuels et futurs de l'UE, tandis que ceux de la Finlande et de la Suède se situaient environ au même niveau que celui de l'Italie.

MASSE MONÉTAIRE: la croissance monétaire de l'Allemagne continue de se ralentir

La croissance de M3 en Allemagne, sur douze mois en septembre 1994, a continué à se ralentir avec une croissance de 7,5%, en baisse par rapport

au taux de croissance annualisé de plus de 11% au cours des premiers mois de l'année. La croissance de M3 ne se situe toujours pas à l'intérieur de la fourchette de 4 à 6% que s'est fixée la Bundesbank pour 1994, mais il est clair qu'elle s'en rapproche beaucoup plus qu'au cours de la première moitié de l'année.

Ailleurs, la timide croissance monétaire récemment observée se poursuit. La croissance de M3 en France sur douze mois en août a été négative pour le 11e mois consécutif bien que la contraction d'août ait été plus faible que précédemment.

Pour la première fois cette année, la croissance de ALP en Espagne sur douze mois en août s'est inscrite juste à l'intérieur de la fourchette de 4,5-7,5% fixée comme objectif par la Banque d'Espagne en 1994.

RÉSERVES OFFICIELLES SUR L'ÉTRANGER: rentrées en Allemagne et en Grèce

L'Allemagne a engrangé des réserves sur l'étranger pour quelque 6 millions d'écus en octobre, un chiffre qui représente environ 9% de ses réserves totales, or exclu. Les réserves de l'Allemagne dépassent désormais 75 milliards d'écus, un niveau qui n'a été dépassé qu'au cours des deux périodes de pression sur le mécanisme de change en 1992 et 1993.

Les réserves de la Grèce se sont aussi considérablement accrues en septembre, à la suite de rentrées au début de l'année, et se situent à un niveau près de 40% supérieur à celui de la fin de 1993.

Concernant les trois nouveaux adhérents à l'UE, la Finlande détenait à la fin de 1993 1,7% du total des réserves officielles sur l'étranger EUR15, or exclu, environ le même pourcentage que l'Irlande, et l'Autriche 4,4%, une part similaire à celle du Portugal. La Suède, le troisième nouvel adhérent détenait approximativement 6% du total EUR15 à la fin de 1993.

PRIX: Taux d'inflation annuelle de l'UE inchangé à 3.0% en octobre

Le taux d'inflation annuelle de l'UE – mesuré par l'IPC – est resté inchangé entre septembre et octobre à 3,0%. Il y a un an, en octobre 1993, ce taux était de 3,3%. L'indice mensuel pour EUR 12 a augmenté de 0,2% entre septembre et octobre.

Des faibles hausses ont été enregistrées en Allemagne, aux Pays-Bas et au Royaume-Uni (0,1%), ainsi qu'en France, en Espagne et au Luxembourg (0,2%). Des hausses plus élevées ont été signalées au Portugal (0,4%) et en Italie (0,6%). L'indice grec a enregistré une hausse sensible de 1,2% suite à des accroissements substantiels des prix de plusieurs biens et services. Pour le deuxième mois consécutif l'indice belge affiche un recul de 0,2%, grâce à des baisses de prix de l'alimentation, des boissons et du transport privé.

Dans l'ordre croissant de l'inflation actuelle, les taux annuels des États Membres pour le mois d'octobre et ceux d'il y a un an, sont :

	Oct. 1994	Oct. 1993		Oct. 1994	Oct. 1993
	Oct. 1993	Oct. 1992		Oct. 1993	Oct. 1992
France	1,6%p	2,2%	Pays-Bas	2,8%	2,8%
Danemark	2,0%E	1,6%	Allemagne *	2,8%	3,9%
Luxembourg	2,1%	3,5%	Italie	3,9%p	4,6%
Belgique	2,1%	2,7%	Espagne	4,4%	4,7%
Royaume-Uni	2,4%	1,4%	Portugal	4,5%	6,1%
Irlande **	2,5%	1,3%	Grèce	11,1%	12,3%

* L'IPC pour la R.F. d'Allemagne continue à se rapporter à la situation territoriale d'avant le 3 octobre 1990.

** Août 94 / Août 93 et Août 93 / Août 92

p Provisoire

E Estimation Eurostat

Les taux d'inflation de 11 des 12 États Membres se trouvent dans une fourchette de 1,5% de la moyenne de l'UE.

Les taux des États candidats à l'adhésion à l'UE sont : Norvège 1,7% (2,0%), Finlande 1,8% (1,6%), Suède 2,4% (4,3%) et Autriche (Sept.) 3,1% (3,4%).

Les taux correspondants de quelques autres pays sont : États-Unis 2,6% (2,8%), Japon 0,8% (1,3%), Canada (Sept.) 0,2% (1,9%) et Suisse 0,5% (3,4%).

PRODUCTION INDUSTRIELLE Essor dans tous les secteurs de l'industrie

La production industrielle dans la Communauté européenne (UE) a continué à augmenter pendant l'été 1994.

Le taux de variation de l'indice de la production industrielle corrigé des jours ouvrables s'est élevé en août 1994 par rapport à la valeur du même mois un an auparavant à +6,5%. Si l'on considère le taux de variation de l'indice de la production désaisonnalisée de l'UE des trois derniers mois disponibles de juin à août par rapport aux trois mois précédents, il s'élève à +2,0%.

Aux Etats-Unis, le taux de variation de mai à juillet 1994 par rapport aux mois précédents pour la production industrielle s'est élevé à +1,0%, c'est-à-dire une hausse plutôt faible. Le Japon avec +0,4%, marque aussi un développement assez restreint.

Pour les principaux groupes de biens, on observe dans l'Union européenne le tableau suivant (taux de variation de juin à août par rapport aux trois mois précédents):

- industrie des biens intermédiaires: +2,2%
- industrie des biens d'investissement: +2,5%
- industrie des biens de consommation durables: +2,1%
- industrie des biens de consommation non durables: +1,4%

Ces chiffres montrent que la hausse de la production se fait maintenant sentir dans tous les secteurs de l'industrie

importations et les exportations ont progressé pratiquement au même rythme en écus (13,2% et 13,8% respectivement). En dollars des Etats-Unis, il y a une différence de 0,5% pour les exportations, alors qu'en yens, les importations ont baissé de 5,1% et les exportations de 5,4%.

Les deux pays de l'UE qui ont le plus amélioré leur balance commerciale entre les quatre premiers mois de 1993 et la même période de 1994 sont la France (qui est passée d'un déficit de 2,6 Mrd d'écus à un excédent de 2,1 Mrd) et l'Italie (qui a réalisé un excédent de 3,4 Mrd d'écus au cours des quatre premiers mois de 1994). Ces deux pays ont fortement développé leurs exportations extra-UE (+25,8% dans le cas de la France et +16,4% pour l'Italie), tandis que leurs importations extra-UE ont augmenté de manière plus modérée (+2,6% et +3,1% respectivement).

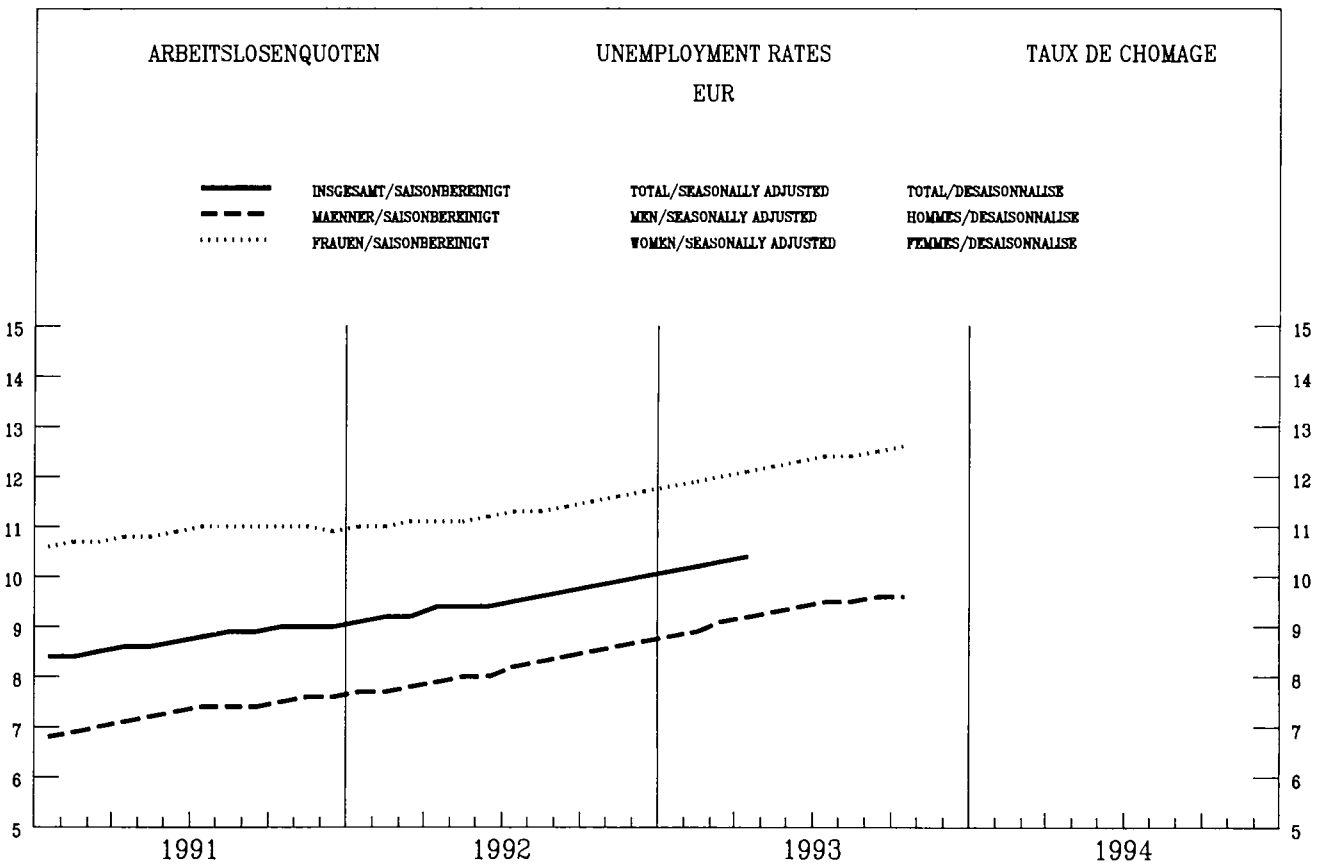

L'Allemagne a dégagé l'excédent le plus élevé au cours des quatre premiers mois de 1994 (5,5 Mrd d'écus, c'est-à-dire un milliard de plus que durant la même période de 1993). Entre ces deux périodes, ses importations et ses exportations extra-UE ont progressé à des rythmes assez proches (+7,0% et +8,2% respectivement).

L'Irlande et le Danemark ont réalisé un léger excédent au cours de la période janvier-avril 1994 (0,1 Mrd et 0,6 Mrd d'écus respectivement, résultats assez proches de ceux de la même période de 1993). La différence entre les taux d'accroissement des importations et des exportations extra-UE des quatre premiers mois de 1993 et de 1994 était de +5,0 points pour le Danemark et de -3,7 points pour l'Irlande.

„On line“-Abfrage

Jede Zeitreihe ist durch einen neunstelligen numerischen Kode gekennzeichnet, der seinerseits in Unterkodes gegliedert ist, welche – im Falle von „Eurostatistik“ – das Land, den Sektor, die Tabelle, die Einheit und die Periodizität bezeichnen.

Die Bedeutung der einzelnen Unterkodes ist der nachstehend aufgeführten Tabelle zu entnehmen.

Land XX	Sektor XX	Tabelle XXXX	Periodizität und Einheit X
06 EUR 12* 03 EUR 10 11 D* 14 F 16 I 18 NL 21 UEBL 22 B 24 L 26 UK 28 IRL 30 DK 32 E 34 GR 36 P 42 USA 46 JAP	93	Variablen Tabelle XXXX vierstelliger Wert, der im Titel jeder Tabelle erscheint	0 jährlich, Angaben in Prozent 1 vierteljährlich, Angaben in Prozent 2 monatlich, Angaben in Prozent 3 jährlich, Indexangaben (1985 = 100) 4 vierteljährlich, Indexangaben (1985 = 100) 5 monatlich, Indexangaben (1985 = 100) 6 jährlich, Angaben in absoluten Werten 7 vierteljährlich, Angaben in absoluten Werten 8 monatlich, Angaben in absoluten Werten 9 Gewicht, EUR 10 = 100 bzw. EUR 12 = 100

* Territoriale Aufteilung vor dem 3. 10. 90: 02 für EUR 12, 12 für D.

Beispiele: Will man die monatliche Arbeitslosigkeit (in absoluten Zahlen) von Frankreich gemäß Tabelle 0304 dieser Veröffentlichung erfahren, so braucht man nur den Kode 14 93 0304 8 einzugeben.

'On-line' consultation

Each time series is identified by a nine-digit code broken down into subcodes, which in the case of Eurostatistics, represent the country, sector, table unit and periodicity. The significance of the different subcodes may be found in the table below.

Country XX	Sector XX	Table XXXX	Periodicity and unit X
06 EUR 12* 03 EUR 10 11 D* 14 F 16 I 18 NL 21 UEBL 22 B 24 L 26 UK 28 IRL 30 DK 32 E 34 GR 36 P 42 USA 46 JAP	93	Table by indicator XXXX 4-digit value quoted in the title of each table	0 annual in % 1 quarterly in % 2 monthly in % 3 annual index 1985 = 100 4 quarterly index 1985 = 100 5 monthly index 1985 = 100 6 annual absolute value 7 quarterly absolute value 8 monthly absolute value 9 weighting EUR 10 = 100 or EUR 12 = 100

* data for the territorial situation before 3. 10. 90: 02 for EUR 12, 12 for D.

Consultation example: to know the monthly unemployment (absolute figures) of France as is shown in Table 0304 of this publication, the code 14 93 0304 8 should be formed.

Mode de consultation «on-line»

Chaque série chronologique est identifiée par un code à neuf chiffres structuré en sous-codes représentant, dans le cas d'Eurostatistiques, le pays, le secteur, le tableau, l'unité et la périodicité. On trouvera dans le tableau ci-dessous la signification des différents sous-codes.

Pays XX	Secteur XX	Tableau XXXX	Périodicité et unité X
06 EUR 12* 03 EUR 10 11 D* 14 F 16 I 18 NL 21 UEBL 22 B 24 L 26 UK 28 IRL 30 DK 32 E 34 GR 36 P 42 USA 46 JAP	93	Tableaux par variable XXXX valeur à 4 chiffres figurant dans le titre de chaque tableau	0 annuelle exprimée en pourcentage 1 trimestrielle exprimée en pourcentage 2 mensuelle exprimée en pourcentage 3 annuelle exprimée en indice 1985 = 100 4 trimestrielle exprimée en indice 1985 = 100 5 mensuelle exprimée en indice 1985 = 100 6 annuelle exprimée en valeur absolue 7 trimestrielle exprimée en valeur absolue 8 mensuelle exprimée en valeur absolue 9 pondération EUR 10 = 100 ou EUR 12 = 100

* données pour la situation territoriale avant le 3. 10. 90: 02 pour EUR 12, 12 pour D.

Exemple de consultation: pour connaître le chômage mensuel (chiffres absolus) de la France, tel qu'il figure au tableau 0304 de cette publication, il suffit d'appeler le code 14 93 0304 8;
