Las publicaciones de Eurostat están clasificadas por temas y por series. La clasificación se encuentra al final de la obra. Para mayor información sobre las publicaciones, rogamos se pongan en contacto con Eurostat. Para los pedidos, diríjense a las oficinas de venta cuyas direcciones figuran en la página interior de la contracubierta.

Eurostats publikationer er klassificeret efter emne og serie. En oversigt herover findes bag i hæftet. Yderligere oplysninger om publikationerne kan fås ved henvendelse til Eurostat. Bestilling kan afgives til de salgssteder, der er anført på omslagets side 3.

Die Veröffentlichungen von Eurostat sind nach Themenkreisen und Reihen gegliedert. Die Gliederung ist hinten in jedem Band aufgeführt. Genauere Auskünfte über die Veröffentlichungen erteilt Eurostat. Ihre Bestellungen richten Sie bitte an die Verkaufsbüros, deren Anschriften jeweils auf der dritten Umschlagseite der Veröffentlichungen zu finden sind.

Οι εκδόσεις της Eurostat ταξινομούνται κατά θέμα και κατά σειρά. Η ακριβής ταξινόμηση αναφέρεται στο τέλος κάθε έκδοσης. Για λεπτομερέστερες πληροφορίες σχετικά με τις εκδόσεις, μπορείτε να απευθύνεσθε στην Eurostat.

Για τις παραγγελίες μπορείτε να απευθύνεσθε στα γραφεία πώλησης, των οποίων οι διευθύνσεις αναγράφονται στη σελίδα 3 του εξωφύλλου.

Eurostat's publications are classified according to themes and series. This classification is indicated at the end of the publication. For more detailed information on publications, contact Eurostat. Orders are obtainable from the sales offices mentioned on the inside back cover.

Les publications d'Eurostat sont classées par thème et par série. Cette classification est précisée à la fin de l'ouvrage. Pour des informations plus détaillées sur les publications, contactez Eurostat. Pour les commandes, adressez-vous aux bureaux de vente dont les adresses sont indiquées à la page 3 de la couverture.

Le pubblicazioni dell'Eurostat sono classificate per tema e per serie. Tale classificazione è precisata alla fine dell'opera. Per informazioni più dettagliate sulle pubblicazioni rivolgersi all'Eurostat. Per eventuali ordinazioni rivolgersi a uno degli uffici di vendita i cui indirizzi figurano nella 3^a pagina della copertina.

De publikaties van Eurostat zijn ingedeeld naar onderwerp en serie. Deze indeling is achter in het boek opgenomen. Voor nadere informatie over de publikaties kunt u zich wenden tot Eurostat. Gelieve bestellingen op te geven bij de verkoopbureaus, waarvan de adressen op bladzijde 3 van de omslag zijn vermeld.

Printed in Germany

Mit der monatlich erscheinenden Veröffentlichung *Eurostatistik - Daten zur Konjunkturanalyse* werden innerhalb kürzester Frist die neuesten statistischen Daten über die Europäische Gemeinschaft als Ganzes (EUR 12), über jedes Mitgliedsland sowie über die Vereinigten Staaten und Japan bekanntgegeben.

Eurostatistik enthält nicht die Gesamtheit des bei Eurostat verfügbaren statistischen Materials, sondern eine Auswahl der relevantesten Reihen über die konjunkturelle Entwicklung.

Schnelligkeit und Pünktlichkeit sind die wichtigsten Vorzüge dieser Veröffentlichung.

Aus diesem Grunde wurde sie im Umfang bewußt klein gehalten und enthält keine Anmerkungen zur Methodik, die im übrigen in den spezialisierten Veröffentlichungen von Eurostat zu finden sind.

Die in Eurostatistik veröffentlichten Daten stammen aus der Datenbank New Cronos (Hinweise zur On-line -Benutzung finden sich am Ende dieser Veröffentlichung). New Cronos setzt sich zusammen aus dem alten Cronos sowie REGIO und ist nicht mehr in Form von Zeitreihen, sondern in Form von multidimensionalen Tabellen dargestellt. New Cronos ist somit eines der Produkte zur Verbreitung statistischer Daten, das direkt aus der Eurostat - Referenzdatenbank gespeist wird. Darüber hinaus sind die Daten in der Datenbank Eurocron verfügbar, die vom Host Eurobases der Kommission angeboten wird.

Wechselkurse: Weiterer Zinsanstieg im Vereinigten Königreich

Am 7. Dezember kam es zu einem weiteren Zinsanstieg im Vereinigten Königreich, als die Bank of England einen Anstieg der Basisausleihesätze um 0,5 Prozentpunkte auf 6,25 % bekanntgab. Obwohl die Inflation im Vereinigten Königreich ihren tiefsten Stand seit 27 Jahren erreicht hat, wurde dieser Schritt als Präventivmaßnahme gegen die Inflation unternommen, da die britische Wirtschaft derzeit relativ hohe Wachstumsraten zu verzeichnen hat. Dies war der zweite Zinsanstieg im Vereinigten Königreich in den letzten drei Monaten. Das Pfund Sterling, das am 20. Dezember bei 2,4527 DM stand, reagierte kaum auf die Bekanntgabe. Zwei Tage später kam es auch in Finnland zu einem Zinsanstieg, dem ersten seit zwei Jahren. Auch in diesem Fall sollte diese Maßnahme dazu dienen, die Inflationserwartungen und den Kostendruck zu dämpfen. Angesichts der ungewissen politischen Lage fiel die italienische Lira im Dezember auf einen historischen Tiefststand und wurde am 20. Dezember mit 1 050 LIT für 1 DM gehandelt. Damit hat sie seit Mitte April 1994 über 10 % ihres Wertes eingebüßt. Am 21. Dezember erholte sie sich jedoch leicht und schloß in London mit 1 045 LIT ab. Mitte Dezember war der holländische Gulden die stärkste Währung innerhalb des Wechselkursmechanismus, gefolgt vom belgischen Franken, dem irischen Pfund, der D-Mark, dem französischen Franken, der dänischen Krone, dem Escudo und der Peseta. Im Dezember gab der französische Franken leicht nach und fiel unter die Marke von 3,45 FF für 1 DM, womit er seinen tiefsten Stand seit Dezember 1993 erreichte. Der Dollar konnte nach der Mitte November erfolgten Anhebung der US-Leitzinsen einen leichten Wertzuwachs verbuchen. Vom 15. November bis zum 20. Dezember stieg sein Wert gegenüber dem Yen um 2,1 % und gegenüber der D-Mark um 1,7 %; Anfang Dezember lag er zum ersten Mal seit Anfang Oktober wieder über 100 Yen.

Renditen von Staatsanleihen: Weiter leicht nachgebende Anleiherenditen

Im November gaben die Renditen von Staatsanleihen in mehreren Ländern weiterhin leicht nach. In Dänemark fielen die Renditen von 8,9 auf 8,6 %; in Spanien, Belgien, Deutschland, Luxemburg und dem Vereinigten Königreich gingen sie um rund 10 Basispunkte (0,1 %) zurück. Trotz dieses Rückgangs sind die Renditen allerdings erheblich höher als vor 12 Monaten. Demgegenüber war in Italien ein Anstieg der Renditen auf ihren höchsten Stand seit Mai 1993 zu verzeichnen.

Geldvolumen: Banque de France legt Geldmengenziele für 1995 fest

Am 16. Dezember gab die Banque de France ihre Geldmengenziele für 1995 bekannt. Für das M3-Wachstum wurde mittelfristig eine Obergrenze von 5 % jährlich festgelegt, was mit dem inflationsfreien Wirtschaftswachstum von 2,5 %—3 % vereinbar sein sollte. In den 12 Monaten bis September 1994 war das M3-Wachstum in Frankreich weiterhin negativ; dies wurde allerdings auf außergewöhnliche Umstände und eine Neufestlegung der Definition von M3 zurückgeführt, wodurch die negative Wachstumsrate höher ausfiel, als dies ansonsten der Fall gewesen wäre. Das Wachstum der deutschen Geldmenge M3 verlangsamte sich in den 12 Monaten bis September 1994 erneut: Nach einer auf das Jahr umgerechneten Wachstumsrate von mehr als 11 % in den ersten Monaten des Jahres beläuft sich das Wachstum nur noch auf 7,5 %. Ferner deuten vorläufige Daten auf eine Wachstumsrate von etwa 7 % in den 12 Monaten bis Oktober hin, was dem von der Bundesbank für 1994 anvisierten Zielkorridor von 4—6 % näherkommt.

Amtliche Währungsreserven: Devisenabfluß aus Italien

Italien verzeichnete im Oktober einen Abfluß von Währungsreserven in Höhe von rund 3,5 Mrd. ECU; dies entspricht fast 14 % seiner gesamten Währungsreserven (ohne Gold). Der Rückgang der Währungsreserven ging mit einer Schwäche der italienischen Lira einher. Von dem Devisenabfluß aus Italien abgesehen kam es im Oktober nur zu wenigen wesentlichen Änderungen beim Stand der amtlichen Währungsreserven; allerdings wuchsen die griechischen Währungsreserven weiterhin an und lagen Ende Oktober um über 40 % über ihrem Stand von Ende 1993.

PREISE: EU-Teuerungsrate — im November bei 3%

Die Jahresinflation in der EU, gemessen am Index der Verbraucherpreise, betrug im November 3 %. Sie blieb damit im dritten aufeinanderfolgenden Monat unverändert. Das aktuelle Niveau ist der niedrigste Wert seit siebeneinhalb Jahren. Im Juli und August lag die Inflationsrate bei 3,1 %, nachdem sie von März bis Juni auf dem Stand von 3,2 % verharrt war. Der gegenwärtige Wert wurde zum letzten Mal im März 1987 verzeichnet. Im Oktober 1990, während der Golfkrise, erreichte die Inflationsrate den Höchststand von 6,3 %. Im November des Vorjahres betrug sie 3,2 %, und stieg im Dezember/Januar noch einmal auf 3,4 % an, bevor sie auf das jetzige Niveau fiel. Nach den heute von EUROSTAT, dem Statistischen Amt der EG in Luxemburg, veröffentlichten Zahlen fiel in FRANKREICH die Teuerung wiederum am geringsten aus, sie lag bei vorläufig 1,6 %. Über dem EU-Durchschnitt liegen lediglich ITALIEN, PORTUGAL, SPANIEN, und GRIECHENLAND. Für die neuesten Inflationsraten der Mitgliedstaaten — mit entsprechenden Vorjahreszahlen — ergibt sich folgende ansteigende Reihenfolge:

	Nov. 94 Nov. 93	Nov. 93 Nov. 92		Nov. 94 Nov. 93	Nov. 93 Nov. 92
FRANKREICH	1,6 % p	2,2 %	VER. KÖNIGREICH	2,6 %	1,4 %
BELGIEN	2,0 %	2,5 %	DEUTSCHLAND*	2,7 %	3,6 %
LUXEMBURG	2,0 %	3,5 %	ITALIEN	4,0 % p	4,3 %
DÄNEMARK	2,1 %	1,5 %	PORTUGAL	4,0 %	6,5 %
IRLAND	2,4 %	1,4 %	SPANIEN	4,4 %	4,8 %
NIEDERLANDE	2,5 %	2,8 %	GRIECHENLAND	10,6 %	12,3 %
EU	3,0 % p				

* Der Verbraucherpreisindex für die Bundesrepublik Deutschland bezieht sich weiterhin auf den Gebietsstand vor dem 3.10.90
p Vorläufig

Die zukünftigen neuen Mitgliedstaaten hatten folgende Raten: FINNLAND 1,6 % (1,4 %), SCHWEDEN 2,2 % (4,8 %) und ÖSTERREICH (Oktober) 2,9 % (3,5 %). Die Inflationsrate in einigen anderen Staaten: VEREINIGTE STAATEN 2,7 % (2,7 %), JAPAN 0,8 % (1,0 %), KANADA (Oktober) -0,2 % (1,9 %), SCHWEIZ 0,5 % (2,3 %) und NORWEGEN 1,8 % (1,9 %).

Arbeitslosigkeit in der Europäischen Union: im November bei 10,7 %

EUROSTAT, das Statistische Amt der EG in Luxemburg, schätzt die saisonbereinigte Arbeitslosenquote der EU im November auf 10,7 %, wie schon im Vormonat Oktober. Im November 1993 hatte die Rate 10,8 % betragen. EUROSTAT beziffert die Zahl der Arbeitslosen in der EU im November auf etwa 17 Millionen. Dabei handelt es sich um eine saisonbereinigte Zahl, die sich an den Kriterien der Internationalen Arbeitsorganisation (ILO) orientiert. Seit November 1993...
- wurden die deutlichsten Rückgänge im VEREINIGTEN KÖNIGREICH (von 10,2 % auf 8,8 %), in DÄNEMARK (von 10,7 % auf 9,5 %, Zahlen vom Oktober), in IRLAND (von 18,3 % auf 17,5 %) und in SPANIEN (von 22,7 % auf 22,1 %) verzeichnet.
— gab es den größten Anstieg in ITALIEN (von 11,2 % auf 12,0 %), in den NIEDERLANDEN (von 9,5 % auf 10,1 %, Zahlen vom Oktober), in PORTUGAL (von 5,6 % auf 6,2 %) und in LUXEMBURG (von 2,9 % auf 3,5 %), das aber trotzdem die bei weitem niedrigste Arbeitslosigkeit innerhalb der „Zwölf“ hat.
— ist die Quote bei den Männern gesunken (von 9,6 % auf 9,2 %), bei den Frauen aber geringfügig gestiegen (von 12,7 % auf 12,8 %).
— hat die Arbeitslosigkeit bei den unter 25jährigen abgenommen (von 20,4 % auf 19,5 %). Am ausgeprägtesten war dies in SPANIEN (von 38,4 % auf 36,3 %), dem VEREINIGTEN KÖNIGREICH (von 15,6 % auf 13,5 %), in DÄNEMARK (von 11,4 % auf 10 %, Zahlen vom Oktober) und in BELGIEN (von 20,3 % auf 19,4 %).
Anmerkungen
1. Die Pressemitteilung ist eine Zusammenfassung des in Kürze erscheinenden EUROSTAT Monatsbulletins Nr. 1/1995 (Themenkreis 3 Reihe B).

2. Die Arbeitslosenquote und die Zahl der Arbeitslosen werden nach den Empfehlungen der ILO geschätzt, wobei die unterschiedlichen nationalen Methoden zur Erfassung der Arbeitslosigkeit weitgehend ausgeschaltet werden.

3. Die Arbeitslosenquote wird geschätzt durch Extrapolation der 1991er Ergebnisse der EU-Arbeitskräfteerhebung in allen Mitgliedstaaten. Die Einbeziehung der 1992er Ergebnisse kann, sobald verfügbar, zu Revisionen der Schätzungen führen.

EU: Aufschwung in der Industrieproduktion hält an

Im September stieg die Industrieproduktion in der EU erneut an — nunmehr schon im achten aufeinanderfolgenden Monat. Der Anstieg wird hauptsächlich aus der Zunahme der Produktion bei Vorleistungs- und Investitionsgütern genährt.

Nach den Daten, die heute von EUROSTAT, dem Statistischen Amt der EG in Luxemburg, veröffentlicht wurden, ist der Produktionsindex (arbeitstäglich bereinigt) im September gegenüber dem gleichen Monat des Vorjahres um 5,8 % gestiegen.

Die saisonbereinigte Produktion war im Zeitraum Juli bis September um 1,7 % höher als im vorhergehenden Quartal. In JAPAN lag der entsprechende Wert bei geschätzt +0,9 %, in den Vereinigten Staaten bei 1,5 %.

Für die Hauptsektoren sind im dritten Quartal folgende Veränderungen gegenüber dem zweiten Vierteljahr ausgewiesen:

- Vorleistungsgüter + 2,3 %
- Investitionsgüter + 1,7 %
- dauerhafte Konsumgüter + 1,4 %
- nicht-dauerhafte Konsumgüter + 1,4 %

In den elf Mitgliedsländern und den EFTA-Staaten, für die Zahlen vorliegen, ergeben sich für den Dreimonatszeitraum folgende saisonbereinigte Veränderungsrate der Industrieproduktion (* = geschätzt):

ITALIEN	4,4 %	DEUTSCHLAND	1,5 %
IRLAND *	3,4 %	VER. KÖNIGREICH	1,0 %
LUXEMBURG *	3,2 %	PORTUGAL *	1,0 %
SPANIEN	2,6 %	NIEDERLANDE	0,8 %
GRIECHENLAND	2,1 %	DÄNEMARK	0,6 %
FRANKREICH	1,6 %		
FINNLAND	4,1 %	SCHWEDEN	0,7 %
ÖSTERREICH *	0,9 %		

AUSSENHANDEL

Das Außenhandelsbilanzdefizit der Europäischen Union lag in den ersten fünf Monaten 1994 um 4,6 Mrd. ECU niedriger als im gleichen Zeitraum 1993.

Dieses Ergebnis ist darauf zurückzuführen, daß die Extra-EU-Ausfuhren zwischen den beiden Zeiträumen stark gestiegen sind, nämlich um +14,1 %, während in der gleichen Zeit die Einfuhren um nur 11,1 % zunahmen.

Italien meldete von allen EU-Ländern in den ersten fünf Monaten 1994 die bemerkenswerteste Verbesserung der Handelsbilanz. Sein Extra-EU-Handelsbilanzüberschuß schnellte von 1,4 Mrd. ECU im gleichen Zeitraum 1993 auf 4,3 Mrd. ECU hoch. Dieses Ergebnis ist hauptsächlich auf die schnelle Zunahme der italienischen Ausfuhren (+15,4 % gegenüber dem Vorjahr) bei einer Steigerung der Einfuhren um nur 4,4 % zurückzuführen.

Im Mai 1994 verzeichnete Deutschland einen beachtlichen Handelsbilanzüberschuß (3,1 Mrd. ECU), wodurch sein extra-EU-Ergebnis für die ersten fünf Monate 1994 auf 8,5 Mrd. ECU (den höchsten Überschuß unter den EU-Ländern) anstieg. Die Einfuhren und Ausfuhren nahmen gegenüber dem entsprechenden Zeitraum des Vorjahres um 9,4 % bzw. 12,3 % zu.

Der Extra-EU-Handelsbilanzüberschuß Frankreichs verbesserte sich in dem obengenannten Zeitraum gegenüber demselben Zeitraum des Vorjahres leicht (von 2,1 Mrd. ECU 1993 auf 2,6 Mrd. ECU 1994). Die Veränderungsrate der Einfuhren und der Ausfuhren lagen weit unter dem EU-Durchschnitt (6,6 % bzw. 7,9 %).

Irland und Dänemark verzeichneten jeweils leichte Handelsbilanzüberschüsse (0,3 Mrd. ECU bzw. 0,8 Mrd. ECU), womit gegenüber 1993

geringfügige Veränderungen eintraten. Während des Zeitraums Januar bis Mai 1994 gab es bei den irischen Ausfuhren verglichen mit dem gleichen Zeitraum des Vorjahres eine beachtliche Wachstumsrate (22,4 %), während sie in Dänemark niedriger ausfiel (12,2 %). Auf der Einfuhrseite betrug die Wachstumsrate 21,9 % bzw. 14,4 %.

Das Vereinigte Königreich war das EU-Land mit dem höchsten Handelsbilanzdefizit in der Zeit von Januar bis Mai 1994, nämlich 9,7 Mrd. ECU. Gegenüber 1993 verschlechterte sich die Position des VK damit leicht (um 0,2 Mrd. ECU), wengleich sich der Abstand zwischen der Wachstumsrate der Ausfuhren und der der Einfuhren in positiver Richtung entwickelte (+3,8 Punkte).

Im gleichen Zeitraum stieg das Defizit der Niederlande auf 8,1 Mrd. ECU verglichen mit 5,9 Mrd. ECU 1993. In den Niederlanden lagen die Veränderungsrate von Einfuhren und Ausfuhren in den ersten fünf Monaten 1994 bei 23,9 % bzw. 17,1 %.

Von Januar-Mai 1993 bis Januar-Mai 1994 verbesserten Spanien und die BLWU ihre Handelsbilanzdefizite um beinahe denselben Betrag (0,4 Mrd. ECU bzw. 0,6 Mrd. ECU).

Beide Länder wiesen für ihre Extra-EU-Ausfuhren eine hohe Wachstumsrate aus (12,1 % bzw. 30,8 %), die weit über den Veränderungsrate der Einfuhren (5,6 % bzw. 23,5 %) lag.

In Portugal und Griechenland lag das Außenhandelsdefizit für die ersten fünf Monate 1994 jeweils bei insgesamt 1,3 Mrd. ECU. Für Portugal bedeutet dieses Ergebnis eine Talfahrt um 0,1 Mrd. ECU gegenüber dem Vorjahr, während sich das griechische Defizit gegenüber dem Vorjahr um 0,3 Mrd. ECU verringerte. In der Zeit von Januar bis Mai 1994 stiegen die Extra-EU-Einfuhren Portugals schneller (8,8 % Wachstumsrate) als die Ausfuhren (5,6 %). Im gleichen Zeitraum gingen die griechischen Einfuhren um 2,4 % zurück, während die Extra-EU-Ausfuhren dieses Landes eine Zunahme von 19,7 % auswiesen.

1994: Weit geringerer Rückgang der Agrarpreise als in früheren Jahren

Der starke Rückgang der Agrarpreise früherer Jahre in der EU hat sich im letzten Jahr stark abgeschwächt. Gleichzeitig war bei den Terms of Trade der Landwirtschaft eine leichte Verbesserung festzustellen.

Nach einer Vorausschätzung von EUROSTAT sind die realen Erzeugerpreise landwirtschaftlicher Produkte (Output) im Jahr 1994 um 1,3% gegenüber 1993 gesunken.

Dieser Index fällt nunmehr seit 1989. Der Rückgang des Jahres '94 ist seitdem aber bei weitem der niedrigste. Insgesamt ist der Index seit Mitte der Achtziger um 26,1% zurückgegangen.

In PORTUGAL (+4,9%), GRIECHENLAND (+4%), BELGIEN (+2%) und den NIEDERLANDEN (+1,2%) hat sich der Trend der letzten Jahre gewendet, und die realen Erzeugerpreise sind gestiegen. In SPANIEN verzeichnete man 1994 ebenfalls einen Anstieg (um 5,6%) wie schon im Jahr zuvor (um 1,3%). In anderen Ländern wurden Rückgänge beobachtet, besonders ausgeprägt in ITALIEN (-4,7%) und LUXEMBURG (-4,8%).

Die realen Erzeugerpreise für pflanzliche Produkte sind leicht angestiegen (+1,4%). Bei Getreide und Reis wird 1994 mit einem Rückgang um 12,3% gerechnet. Im Jahr zuvor waren die Erzeugerpreise für diese Produkte um 4,2% gefallen. Diese Entwicklung dürfte eine Folge der Reform der Gemeinsame Agrarpolitik sein.

Die realen Erzeugerpreise für Tiere und tierische Produkte sanken um 3,7%. Der überaus starke Rückgang der Preise für Schweine im Jahr 1993 (-24%) hat sich 1994 abgemildert und betrug nur noch 2,2%.

Der reale Index der Einkaufspreise landwirtschaftlicher Betriebsmittel (Input) ist um 2,1% zurückgegangen. Die Entwicklung der letzten Jahre hat damit weiter angehalten. Am stärksten war der Rückgang in Dänemark (-4,4%) und in Portugal (-4,9%).

Insgesamt ergab sich somit 1994 in der EU eine leichte Verbesserung der realen Terms of Trade um 0,7% gegenüber 1993. Besonders ausgeprägt war diese Verbesserung in Portugal (+10,2%) und Spanien (+8%). In LUXEMBURG (-2,5%), ITALIEN (-3,5%) und FRANKREICH (-4,1%) haben sich dagegen die Terms of Trade verschlechtert.

Anmerkung:

Die Daten für Deutschland beziehen sich weiterhin auf den Gebietsstand vor dem 3.10.90.

Eurostatistics - data for short-term economic analysis is a monthly publication aimed at providing, as rapidly as possible, the latest statistical data on the European Community as a whole (EUR12), each Member State, the United States and Japan.

Eurostatistics does not present all the statistics held by Eurostat, but a selection of the most relevant series on the economic situation.

Speed of publication and punctuality are the main features of this publication; that is why it is deliberately streamlined and does not contain any methodological notes, which are given in Eurostat's specialized publications.

The data published in *Eurostatistics* are taken from Eurostat's on-line database, New Cronos (instructions regarding on-line consultation may be found at the end of this publication). New Cronos includes old Cronos and Regio, both represented not by chronological series but through multi-dimensional tables. New Cronos is a dissemination product directly from Eurostat's Reference Environment. The data are also available via the Commission host Eurobases in the Eurocron database.

Further information on Eurostat and its products can be obtained from the following addresses:

Unless otherwise stated, data for the Federal Republic of Germany, including West Berlin, as constituted prior to 3 October 1990.

EXCHANGE RATES: further increase in UK interest rates

There was a further increase in UK interest rates on December 7, when the Bank of England signalled that bank base rates should be increased by 1/2% to 6.25%. This move occurred despite the fact that UK inflation is at its lowest level for 27 years, but was intended as a pre-emptive strike against inflation, since the British economy is currently growing at a fairly fast rate. It was the second increase in UK interest rates in the last three months. Sterling was hardly affected by the announcement and stood at DM 2.4527 on December 20.

Two days later, Finnish interest rates were also increased, in this case for the first time for two years. Again, the intention of the Finnish authorities was to dampen inflation expectations and cost pressures.

Amid political uncertainties the Italian lire reached further all-time lows in December, touching LIT 1050 against the mark on December 20. It has now depreciated by over 10% since mid-April 1994. However, on December 21 it appreciated slightly, closing in London at LIT 1045.

In mid-December the Dutch guilder remained at the top of the ERM grid, followed by the Belgian franc, the punt, the mark the French franc, the Danish krone, the escudo and the peseta. The French franc weakened slightly in December, falling below the FF 3.45 level against the mark, its lowest level since December 1993.

The dollar strengthened slightly following the increase in US official interest in mid-November. Between November 15 and December 20, it appreciated by 2.1% against the yen and by 1.7% against the mark; it rose above Y 100 in early December for the first time since early October.

GOVERNMENT BOND YIELDS: further slight easing in bond yields

There was a further slight easing in the yield on government bonds in several countries in November. In Denmark yields fell from 8.9 to 8.6%, and in Spain, Belgium, Germany, Luxembourg and the UK yields fell by around 10 basis points (0.1%). Despite these falls, yields are significantly higher than they were 12 months ago.

However, yields rose in Italy, to stand at their highest level since May 1993.

MONEY SUPPLY: Banque de France sets monetary targets for 1995

On December 16 the Banque de France announced its monetary targets for 1995. It set a growth ceiling for M3 of 5% per year over the medium term, which was said to be consistent with non-inflationary economic growth of 2.5-3%. In the 12 months to September 1994, the growth rate of France's M3 continued to be negative, but this was felt to be due to extraordinary factors together with a redefinition of the definition of M3 which led to a greater than otherwise negative growth rate.

The growth of Germany's M3 continued to slow in the year to September 1994, growing by 7.5%, down from an annualised growth rate of over 11% in the first few months of the year. Furthermore, provisional data indicate a growth rate of around 7% in the year to October, closer to the Bundesbank's 1994 target of 4-6% growth.

FOREIGN OFFICIAL RESERVES: outflow from Italy

Italy experienced an outflow of reserves in October of some 3.5 billion ecu, which equates to almost 14% of its total foreign official reserves excluding gold. This fall in reserves coincided with a period of weakness in the Italian lire.

Aside from the outflow from Italy, there were few substantial changes in the level of foreign official reserves in October, although Greece's reserves continued to increase, at the end of October standing at over 40% higher than at the end of 1993.

PRICES: EU annual inflation — 3% in November

EU annual inflation — as measured by the Consumer Price Index (CPI) — was 3% in November, unchanged for the third consecutive month.

The current level is the lowest for seven-and-a-half years. It was 3.1% in August and July after remaining at 3.2% from March to June.

The rate was last at this level in March 1987. In between it peaked at 6.3% in October 1990 during the Gulf crisis. Last November inflation stood at 3.2%. It touched 3.4% in December/January before falling to the present level.

Today's figures from EUROSTAT — the EC Statistical Office in Luxembourg — show FRANCE still with the lowest rate, a provisional 1.6%. Only ITALY, PORTUGAL, SPAIN and GREECE are above the EU average.

Latest rates in Member States, in ascending order of inflation, with corresponding figures for a year earlier, are:

	Nov 94	Nov 93		Nov 94	Nov 93
	Nov 93	Nov 92		Nov 93	Nov 92
FRANCE	1.6% p	2.2%	UNITED KINGDOM	2.6%	1.4%
BELGIUM	2.0%	2.5%	GERMANY *	2.7%	3.6%
LUXEMBOURG	2.0%	3.5%	ITALY	4.0% p	4.3%
DENMARK	2.1%	1.5%	PORTUGAL	4.0%	6.5%
IRELAND	2.4%	1.4%	SPAIN	4.4%	4.8%
NETHERLANDS	2.5%	2.8%	GREECE	10.6%	12.3%
EU	3.0% p				

* The CPI for Germany continues to reflect the geographical borders prior to 3 October 1990
p Provisional

Corresponding rates for forthcoming new Member States are: FINLAND 1.6% (1.4%), SWEDEN 2.2% (4.8%) and AUSTRIA (October) 2.9% (3.5%).

Annual rates in some other countries were: UNITED STATES 2.7% (2.7%), JAPAN 0.8% (1.0%), CANADA (October) -0.2% (1.9%), SWITZERLAND 0.5% (2.3%) and NORWAY 1.8% (1.9%).

UNEMPLOYMENT IN THE EUROPEAN UNION: 10.7% in november

Today's figures from EUROSTAT — the EC statistical office in Luxembourg — estimate EU seasonally-adjusted unemployment in November 1994 at 10.7%, same as October. In November '93 it was 10.8%.

EUROSTAT estimates that around 17 million people were unemployed in the EU in November — a seasonally-adjusted figure in line with International Labour Organisation (ILO) criteria.

Since November 1993...

- Most significant falls are in the UNITED KINGDOM (10.2% to 8.8%), DENMARK (10.7% to 9.5% — October figures), IRELAND (18.3% to 17.5%) and SPAIN (22.7% to 22.1%).

- Biggest rises are in ITALY (11.2% to 12.0%), the NETHERLANDS (9.5% to 10.1% — October figures), PORTUGAL (5.6% to 6.2%) and LUXEMBOURG (2.9% to 3.5%), which, nevertheless, still has the Twelve's lowest rate by far.

- Male unemployment is down (9.6% to 9.2%) but female unemployment up slightly (12.7% to 12.8%).

- The under-25 rate is down (20.4% to 19.5%). Biggest falls are in SPAIN (38.4% to 36.3%), the UNITED KINGDOM (15.6% to 13.5%), DENMARK (11.4% to 10% — October figures) and BELGIUM (20.3% to 19.4%).

Notes

1. This news release summarises EUROSTAT Monthly Bulletin Theme 3 Series B No 1/1995, out shortly.

2. The unemployment rate and numbers of unemployed are estimated according to ILO recommendations after taking account of the differences between national methods of recording unemployment.

3. The unemployment rate is estimated by extrapolating the 1991 results of the labour force surveys for all Member States. Introduction of 1992 results, when available, will probably lead to revisions.

EU INDUSTRIAL PRODUCTION-STILL RISING

EU industrial production was up again in September — for the eighth consecutive month. The rise is being fuelled by capital and intermediate goods.

Today's data from EUROSTAT — the EC statistical office in Luxembourg — show that the production index, adjusted for working days, rose by 5.8% in September compared to the same month last year.

And seasonally-adjusted production from July to September was 1.7% up on the previous three months. In JAPAN the corresponding rise was an estimated 0.9%; in the UNITED STATES 1.5%.

Rises in the main sectors July-September compared with April-June were:

- intermediate goods 2.3%
- capital goods 1.7%
- consumer durables 1.4%
- consumer non-durables 1.4%

Seasonally-adjusted change in industrial production over the same period in the 11 Member States for which data are available, and for EFTA countries where available, is as follows (* = estimate):

ITALY	4.4%	GERMANY	1.5%
IRELAND*	3.4%	UNITED KINGDOM	1.0%
LUXEMBOURG *	3.2%	PORTUGAL *	1.0%
SPAIN	2.6%	NETHERLANDS	0.8%
GREECE	2.1%	DENMARK	0.6%
FRANCE	1.6%		
FINLAND	4.1%	SWEDEN	0.7%
AUSTRIA*	0.9%		

EXTERNAL TRADE

The European Union external trade deficit recorded an ECU 4.6 billion decrease in the first five months of 1994 compared to the same period in 1993.

This result is due to the extra-EU exports' rapid increase (+14.1% between the two periods) while, at the same time, imports went up by 11.1%.

As far as the trade balance is concerned Italy was the EU country that showed the most important improvement in the first five months of 1994: its extra-EU surplus soared to ECU 4.3 billion from ECU 1.4 billion recorded in the same period of 1993. This result is mainly due to the rapid increase of Italian exports (+15.4% compared to a year earlier) while the imports went up by 4.4% only.

In May 1994 Germany registered a considerable trade surplus (ECU 3.1 billion) which enhanced its extra-EU position for the first five months of 1994 to ECU 8.5 billion (the largest surplus among the EU countries). Imports and exports showed respectively a 9.4% and 12.3% increase compared to the corresponding period of the previous year.

France's extra-EU trade surplus slightly improved in the above mentioned period this year and a year earlier (from ECU 2.1 billion in 1993 to ECU 2.6 billion in 1994). Both imports and exports recorded rates of change well under the EU average (6.6% and 7.9% respectively).

Ireland and Denmark both experienced small trade surpluses (ECU 0.3 billion and ECU 0.8 billion respectively) showing marginal changes compared to 1993.

During the period January-May 1994 Irish exports recorded an important rate of growth compared to the same period a year earlier (22.4%), while Denmark recorded a lower one (12.2%). On the imports side these rates were respectively 21.9% and 14.4%.

The United Kingdom was the EU country that experienced the largest trade deficit in the period January-May 1994 which reached ECU 9.7 billion.

The UK's trade position showed a slight deterioration (ECU 0.2 billion) with reference to 1993 even if it recorded a positive gap between the exports and imports growth rates (+3.8 points).

In the same period the Dutch deficit increased to ECU 8.1 billion compared to the 1993's ECU 5.9 billion. The Netherlands experienced in the first five months of 1994 import and export rates of change of 23.9% and 17.1% respectively.

Between the periods January-May 1993-1994 Spain and the BLEU improved their trade deficits by nearly the same amount (ECU 0.4 and ECU 0.6 billion respectively). Both countries showed a fast growth rate of their extra-EU exports (12.1% and 30.8%) well over the imports' rate of change (5.6% and 23.5% respectively).

Portugal and Greece registered the same external trade deficit for the first five months of 1994 which totaled ECU 1.3 billion. As for Portugal this result represents an ECU 0.1 billion erosion compared to the previous year, while the Greek deficit improved by ECU 0.3 billion. During the period January-May 1994 Portuguese extra-EU imports increased more rapidly (8.8% growth rate) than exports (5.6%). In the same period Greek imports dropped by 2.4% while extra-EU exports showed a 19.7% increase.

1994: MUCH SMALLER DECLINE IN EU FARM PRICES THAN IN PREVIOUS YEARS

It appears that EU agricultural prices fell much less steeply last year than in previous years with a modest increase in the terms of trade.

A forecast for 1994 from EUROSTAT suggests a drop of 1.3% in producer prices of agricultural products (output) in real terms between 1993 and 1994.

This indicator has fallen since 1989 but this latest annual fall is the lowest by far since then. Overall the index is down 26.1% on the mid-80s.

Real prices are expected to have risen in PORTUGAL (by 4.9%), GREECE (4%), BELGIUM (2%) and the NETHERLANDS (1.2%), reversing the downward trend of previous years. They should also rise in SPAIN (by 5.6%), continuing the rise (of 1.3%) recorded in 1993. Elsewhere there are falls - particularly marked in ITALY (down 4.7%) and LUXEMBOURG (4.8%).

Real prices for crop products are expected to rise slightly by 1.4%. Cereals and rice are predicted to decline by 12.3% following a 4.2% fall in 1993. This might be due to the consequences of Common Agricultural Policy reform.

Real prices for animals and animal products are expected to fall by 3.7%. The fall in pig prices, a steep 24% in 1993, is expected to have moderated to only 2.2%.

Purchase prices for agricultural production (input) in real terms are expected to have fallen by 2.1%, continuing the trend of recent years. Steepest falls were in DENMARK (4.4%) and PORTUGAL (4.9%).

As a result, real agricultural terms of trade in the EU are expected to have improved slightly in 1994 - up 0.7%. A marked improvement is foreseen for PORTUGAL (up 10.2%) and SPAIN (8%) They are expected to have fallen in LUXEMBOURG (by 2.5%), ITALY (3.5%) and FRANCE (4.1%).

Note

Data for the Federal Republic of Germany correspond to the area within the frontiers prior to 3 October 1990.

Eurostatistiques - Données pour l'analyse de la conjoncture est une publication mensuelle qui a pour but de fournir dans les meilleurs délais les données statistiques les plus récentes pour la Communauté européenne en tant qu'ensemble (EUR12), pour les pays membres ainsi que pour leurs principaux partenaires extra-communautaires (États-Unis d'Amérique et Japon).

Eurostatistiques ne publie pas d'une manière exhaustive toutes les statistiques disponibles auprès d'Eurostat, mais les plus importantes parmi celles-ci.

Cette publication se veut rapide et facilement maniable. Pour cette raison, elle ne comporte pas de notes méthodologiques, qui sont par ailleurs disponibles dans les publications spécialisées d'Eurostat.

Les données publiées dans *Eurostatistiques* proviennent de la base de données New Cronos (les instructions pour le mode de consultation on-line se trouvent à la fin de cette publication). New Cronos se compose de l'ancien Cronos et de Regio, représentés non plus sous forme de séries chronologiques mais de tableaux multidimensionnels. New Cronos constitue en fait un des produits de diffusion émanant directement de l'environnement de Référence. Ces données sont aussi disponibles dans la base de données Eurocron, accessible par l'intermédiaire du serveur Eurobases de la Commission.

TAUX D'INTÉRÊTS: nouveau relèvement des taux d'intérêts au RU

Les taux d'intérêts ont de nouveau repris le chemin de la hausse au RU le 7 décembre lorsque la banque d'Angleterre a annoncé qu'elle relevait ses taux de base d'un demi point à 6,25 %. Bien que l'inflation au RU est à son niveau le plus bas depuis vingt-sept ans, cette mesure a été prise à titre préventif contre l'inflation étant donné que le taux de croissance actuel de l'économie britannique est très rapide. C'est la seconde hausse des taux d'intérêts au RU intervenant au cours des trois derniers mois. La livre sterling a été sérieusement affectée par l'annonce et se traitait à DM 2,4527 le 20 décembre.

Deux jours plus tard, les taux d'intérêts finnois étaient à leur tour relevés, dans ce dernier cas, pour la première fois depuis deux ans. A nouveau, l'intention des autorités finnoises était de contenir les anticipations inflationnistes et les pressions sur les coûts.

Dans un climat politique incertain, la lire italienne a touché de nouveaux plus bas historiques en décembre à Lit 1050 contre le mark le 20 décembre. Depuis la mi-avril 1994, la dépréciation dépasse désormais les 10 %. Cependant, le 21 décembre, elle s'est légèrement raffermie clôturant à Londres à Lit 1045.

A la mi-décembre, le florin néerlandais est resté au sommet de la grille du mécanisme de change suivi par le franc belge, la livre irlandaise, le mark, le franc français, la couronne danoise, l'escudo et la peseta. Le franc français a légèrement fléchi en décembre, tombant au-dessous du niveau FF 3,45 contre le mark, son plus bas niveau depuis décembre 1993.

Le dollar s'est légèrement raffermi après la hausse officielle des taux d'intérêts US à la mi-novembre. Entre le 15 novembre et le 20 décembre, il s'est apprécié de 2,1 % contre le yen et de 1,7 % contre le mark; pour la première fois depuis le début d'octobre, il a repassé la barre des 100 yens au début de décembre.

RENDEMENTS DES OBLIGATIONS D'ÉTAT: nouveau et léger tassement des rendements obligataires

Le rendement des obligations d'État s'est de nouveau légèrement tassé dans plusieurs pays en novembre. Au Danemark, les rendements ont baissé de 8,9 à 8,6 %, et en Espagne, Belgique, Allemagne, Luxembourg et RU, les rendements ont perdu environ 10 points de base (0,1 %). Malgré ces baisses, les rendements sont nettement supérieurs à ce qu'ils étaient il y a 12 mois.

Toutefois, les rendements ont progressé en Italie pour atteindre leur niveau le plus élevé depuis mai 1993.

MASSE MONÉTAIRE: la banque de France fixe ses objectifs monétaires pour 1995

Le 16 décembre, la banque de France a annoncé ses objectifs monétaires pour 1995. Elle a fixé pour M3 un plafond de croissance de 5 % par an sur le moyen terme ce qui a été considéré comme compatible avec un taux de croissance économique non inflationniste de 2,5 à 3 %. Sur une période de 12 mois se terminant en septembre 1994, le taux de croissance de M3 pour la France a continué d'être négatif, ce qui est probablement dû à des facteurs exceptionnels liés à une redéfinition de M3, avec pour résultat un taux de croissance plus négatif qu'ailleurs.

La croissance de M3 en Allemagne a continué à se ralentir au cours de l'année se terminant en septembre 1994 avec 7,5 % de croissance contre un taux annualisé de plus de 11 % au cours des tous premiers mois de l'année. En outre, les données provisoires indiquent un taux de croissance d'environ 7 % pour l'année se clôturant en octobre, un taux qui se rapproche de la fourchette de 4-6 % de croissance fixée, comme objectif par la Bundesbank pour 1994.

RÉSERVES OFFICIELLES SUR L'ÉTRANGER: sorties de fonds en Italie

En octobre, quelque 3,5 milliards d'écus de réserves ont quitté l'Italie, ce qui représente près de 14 % du total des réserves officielles sur l'étranger de ce pays à l'exclusion de l'or. Cette chute du niveau des réserves a coïncidé avec un accès de faiblesse de la lire italienne.

A part ces sorties de réserves en Italie, le niveau des réserves officielles sur l'étranger s'est peu modifié en octobre, bien qu'en Grèce, celles-ci aient continué de s'accroître pour atteindre à la fin octobre un niveau supérieur à 40 % par rapport à celui de la fin de 1993.

PRIX: L'inflation annuelle de l'UE: 3 % en novembre

L'inflation annuelle dans l'UE, mesurée par l'Indice des Prix à la Consommation (IPC) est de 3 % en novembre. Elle reste donc inchangée pour le troisième mois consécutif.

Ce taux est le plus faible depuis sept ans et demi. Il était de 3,1 % en août et juillet après s'être maintenu à 3,2 % de mars à juin.

Le taux a atteint 3 % en mars 1987. Entre-temps, il a culminé à 6,3 % en octobre 1990 pendant la crise du Golfe. En novembre 1993, le taux était de 3,2 %. Il est passé à 3,4 % en décembre et janvier avant de redescendre au niveau actuel.

Les chiffres publiés aujourd'hui par EUROSTAT, l'Office statistique des CE à Luxembourg, montrent que la FRANCE enregistre encore le taux le plus faible avec 1,6 % (chiffre provisoire). L'ITALIE, le PORTUGAL, l'ESPAGNE et la GRECE sont les seuls pays se situant au-dessus de la moyenne de l'UE.

Voici les derniers taux disponibles, classés par ordre croissant, pour chaque État membre ainsi que les chiffres correspondants pour l'année précédente:

	Nov 94	Nov 93		Nov 94	Nov 93
	Nov 93	Nov 92		Nov 93	Nov 92
FRANCE	1,6 % p	2,2 %	ROYAUME-UNI	2,6 %	1,4 %
BELGIQUE	2,0 %	2,5 %	ALLEMAGNE *	2,7 %	3,6 %
LUXEMBOURG	2,0 %	3,5 %	ITALIE	4,0 % p	4,3 %
DANEMARK	2,1 %	1,5 %	PORTUGAL	4,0 %	6,5 %
IRLANDE	2,4 %	1,4 %	ESPAGNE	4,4 %	4,8 %
PAYS-BAS	2,5 %	2,8 %	GRECE	10,6 %	12,3 %
UE	3,0 % p				

* L'IPC pour l'Allemagne continue de refléter les frontières d'avant le 3 octobre 1990

p Provisoire

Les taux correspondants pour les futurs nouveaux États membres sont les suivants: FINLANDE 1,6 % (1,4 %), SUEDE 2,2 % (4,8 %) et AUTRICHE (octobre) 2,9 % (3,5 %).

Voici les taux annuels dans quelques autres pays: ETATS-UNIS 2,7 % (2,7 %), JAPON 0,8 % (1,0 %), CANADA (octobre) -0,2 % (1,9 %), SUISSE 0,5 % (2,3 %) et NORVEGE 1,8 % (1,9 %).

LE CHÔMAGE DANS L'UNION EUROPÉENNE: 10,7 % en novembre

D'après les chiffres publiés aujourd'hui par EUROSTAT, l'Office statistique des CE à Luxembourg, le chômage dans l'UE, corrigé des variations saisonnières, est estimé à 10,7 % en novembre 1994, le même taux que celui d'octobre. En novembre 1993, il s'élevait à 10,8 %.

EUROSTAT estime qu'environ 17 millions de personnes étaient au chômage dans l'UE au mois de novembre. Ce chiffre, corrigé des variations saisonnières, est établi selon les critères du Bureau International du Travail (BIT).

Depuis novembre 1993...

- les baisses les plus importantes se sont produites au ROYAUME-UNI (où le taux est passé de 10,2 % à 8,8 %), au DANEMARK (de 10,7 % à 9,5 % - chiffres d'octobre), en IRLANDE (de 18,3 % à 17,5 %) et en ESPAGNE (de 22,7 % à 22,1 %).

- les hausses les plus importantes ont eu lieu en ITALIE (de 11,2 % à 12 %), aux PAYS-BAS (de 9,5 % à 10,1 % - chiffres d'octobre), au PORTUGAL (de 5,6 % à 6,2 %) et au LUXEMBOURG (de 2,9 % à 3,5 %), qui, pourtant, enregistre encore le taux le plus bas des Douze, et de loin.

- le chômage des hommes a baissé (passant de 9,6 % à 9,2 %) alors que celui des femmes a légèrement augmenté (de 12,7 % à 12,8 %).

- le chômage des moins de 25 ans a baissé (passant de 20,4 % à 19,5 %). Les baisses les plus importantes se sont produites en ESPAGNE (de 38,4 % à 36,3 %), au ROYAUME-UNI (de 15,6 % à 13,5 %), au DANEMARK (de 11,4 % à 10 % - chiffres d'octobre) et en BELGIQUE (de 20,3 % à 19,4 %).

Remarques:

1. Ce communiqué de presse résume le Bulletin Mensuel N°1/1995 Thème 3 Série B publié par EUROSTAT à paraître très prochainement.

2. Le taux de chômage et le nombre de chômeurs sont estimés selon les recommandations du BIT après correction des différences entre les méthodes nationales de recensement du chômage.

3. Le taux de chômage est estimé en extrapolant les résultats 1991 des enquêtes sur les forces de travail pour tous les Etats membres. L'introduction des résultats de l'année 1992, dès qu'ils seront disponibles, entraînera probablement des révisions.

LA PRODUCTION INDUSTRIELLE DANS L'UE ENCORE EN HAUSSE

La production industrielle dans l'UE est encore en hausse en septembre et ceci pour le huitième mois consécutif.

Les chiffres publiés aujourd'hui par EUROSTAT – l'Office statistique des CE à Luxembourg – montrent que l'indice de production, corrigé du nombre de jours ouvrables, a augmenté de 5,8 % en septembre 1994 par rapport à septembre 1993.

Au cours de la période allant de juillet à septembre, la production industrielle, corrigée des variations saisonnières, a augmenté de 1,7 % par rapport aux trois mois précédents. Au JAPON, l'augmentation a été de 0,9 % (estimation); aux ETATS-UNIS de 1,5 %.

Voici les hausses enregistrées dans les principaux secteurs de juillet à septembre par rapport aux trois mois précédents:

- Biens intermédiaires 2,3 %
- Biens d'investissement 1,7 %
- Biens de consommation durables 1,4 %
- Biens de consommation non durables 1,4 %

Voici les variations enregistrées durant la même période pour la production industrielle, corrigée des variations saisonnières, dans les onze Etats membres pour lesquels les données sont disponibles ainsi que dans les pays AELE (* estimation):

ITALIE	4,4 %	ALLEMAGNE	1,5 %
IRLANDE *	3,4 %	ROYAUME-UNI	1,0 %
LUXEMBOURG *	3,2 %	PORTUGAL *	1,0 %
ESPAGNE	2,6 %	PAYS-BAS	0,8 %
GRECE	2,1 %	DANEMARK	0,6 %
FRANCE	1,6 %		
FINLANDE	4,1 %	SUEDE	0,7 %
AUTRICHE * *	0,9 %		

COMMERCE EXTERIEUR

Le déficit du commerce extérieur de l'Union européenne s'est réduit de 4,6 milliards d'écus au cours des cinq premiers mois de 1994 par rapport à la même période de 1993. Ce résultat est dû au rapide accroissement des exportations extra-UE (+14,1 % entre les deux périodes), tandis qu'au cours de la même période, les importations ont augmenté de 11,1 %.

L'Italie a été le pays de l'UE qui a enregistré la plus forte amélioration de sa balance commerciale au cours des cinq premiers mois de 1994: son excédent extra-UE a atteint 4,3 milliards d'écus contre 1,4 milliards d'écus enregistrés au cours de la même période de 1993. Ce résultat est principalement dû à l'accroissement rapide des exportations italiennes (+15,4 % par rapport à l'année précédente), tandis que les importations n'ont augmenté que de 4,4 % seulement.

En mai 1994, l'Allemagne a enregistré un excédent commercial considérable (3,1 milliards d'écus), ce qui porte sa position extra-UE pour les cinq premiers mois de 1994 à 8,5 milliards d'écus (le plus élevé des pays de l'UE). Les importations et les exportations ont affiché respectivement une hausse de 9,4 % et de 12,3 % par rapport à la même période de l'année précédente.

L'excédent commercial extra-UE de la France s'est légèrement amélioré au cours de la période mentionnée ci-dessus cette année et au cours de l'année précédente (de 2,1 milliards d'écus en 1993 à 2,6 milliards d'écus en 1994). Tant les importations que les exportations ont enregistré des taux de variation bien inférieurs à la moyenne de l'UE (6,6 % et 7,9 % respectivement).

L'Irlande et le Danemark ont réalisé de faibles excédents commerciaux (0,3 milliard d'écus et 0,8 milliard d'écus respectivement) représentant des variations peu importantes par rapport à 1993.

Au cours de la période janvier-mai 1994, les exportations irlandaises ont enregistré un fort taux de croissance par rapport à la même période de

l'année précédente (22,4 %), tandis que le Danemark a réalisé un chiffre inférieur (12,2 %). Du côté des importations, ces taux étaient respectivement de 21,9 % et de 14,4 %.

Le Royaume-Uni est le pays de l'UE qui a accusé le plus fort déficit commercial au cours de la période janvier-mai 1994, atteignant 9,7 milliards d'écus.

La position commerciale du RU s'est légèrement détériorée (0,2 milliard d'écus) par rapport à 1993, même si elle a enregistré un écart positif entre les taux de croissance des exportations et des importations (+3,8 points).

Au cours de la même période, le déficit néerlandais s'est creusé à 8,1 milliards d'écus par rapport aux 5,9 milliards d'écus de 1993. Les Pays-Bas ont enregistré au cours des cinq premiers mois de 1994 des taux de variation des importations et des exportations de 23,9 % et de 17,1 % respectivement.

Entre les périodes janvier-mai 1993/1994, l'Espagne et l'UEBL ont réduit leur déficit commercial dans pratiquement la même proportion (0,4 et 0,6 milliard d'écus respectivement). Ces deux pays ont affiché un taux de croissance rapide de leurs exportations extra-UE (12,1 % et 30,8 %) bien supérieur au taux de variation des importations (5,6 % et 23,5 % respectivement).

Le Portugal et la Grèce ont accusé le même déficit du commerce extérieur pour les cinq premiers mois de 1994 qui totalise 1,3 milliard d'écus. Pour le Portugal, ce résultat représente une érosion de 0,1 milliard d'écus par rapport à l'année précédente, tandis que pour la Grèce, le déficit s'est réduit de 0,3 milliard d'écus. Au cours de la période janvier-mai 1994, les importations portugaises extra-UE se sont accrues plus rapidement (8,8 % de taux croissance) que les exportations (5,6 %). Au cours de la même période, les importations grecques ont chuté de 2,4 %, tandis que les exportations extra-UE ont présenté une hausse de 19,7 %.

1994: BAISSA DES PRIX AGRICOLES EN TERMES RÉELS BIEN MOINS FORTE QUE LES ANNÉES PRÉCÉDENTES DANS L'UE

Il semble que les prix agricoles dans l'UE ont baissé moins fortement en 1994 par rapport aux années précédentes et que les termes de l'échange ont enregistré une légère augmentation.

Des prévisions pour 1994 publiées par EUROSTAT laissent entrevoir une baisse de 1,3 % des prix à la production des produits agricoles (output) en termes réels entre 1993 et 1994.

Cet indicateur est en baisse depuis 1989 mais cette dernière baisse annuelle est la plus faible enregistrée depuis lors, et de loin. D'une manière générale, l'indice a régressé de 26,1 % par rapport à 1985.

Les prix réels devraient avoir augmenté au PORTUGAL (de 4,9 %), en GRECE (4 %), en BELGIQUE (2 %) et aux PAYS-BAS (1,2 %), inversant ainsi la tendance à la baisse observée au cours des années précédentes. Ils devraient également augmenter en ESPAGNE (de 5,6 %) et continuer ainsi la progression (de 1,3 %) enregistrée en 1993. Partout ailleurs on observe des baisses qui sont particulièrement fortes en ITALIE (-4,7 %) et au LUXEMBOURG (-4,8 %).

Les prix réels des produits végétaux devraient augmenter légèrement de 1,4 %. On s'attend à ce que les céréales et le riz baissent de 12,3 % après le recul de 4,2 % observé en 1993. Cette tendance à la baisse serait due aux conséquences de la réforme de la Politique Agricole Commune.

Les prix réels des animaux et produits animaux devraient régresser de 3,7 %. La forte chute des prix des porcs enregistrée en 1993 (-24 %) devrait s'atténuer pour ne plus atteindre que 2,2 %.

Les prix d'achat des moyens de production agricole (input) en termes réels devraient diminuer de 2,1 % poursuivant ainsi la tendance observée ces dernières années. Les baisses les plus fortes se sont produites au DANEMARK (4,4 %) et au PORTUGAL (4,9 %).

Il en résulte que les termes de l'échange réels de l'agriculture dans l'UE devraient s'être légèrement améliorés en 1994 (+0,7 %). Une forte amélioration est prévue au PORTUGAL (+10,2 %) et en ESPAGNE (8 %). Par contre, les termes de l'échange réels devraient avoir baissé au LUXEMBOURG (de 2,5 %), en ITALIE (3,5 %) et en FRANCE (4,1 %).

Remarque

Les données pour la République fédérale d'Allemagne se réfèrent à sa situation territoriale d'avant le 3 octobre 1990.
