*Printed in Germany*

Mit der monatlich erscheinenden Veröffentlichung *Eurostatistik - Daten zur Konjunkturanalyse* werden innerhalb kürzester Frist die neuesten statistischen Daten über die Europäische Gemeinschaft als Ganzes (EUR12), über jedes Mitgliedsland sowie über die Vereinigten Staaten und Japan bekanntgegeben.

*Eurostatistik* enthält nicht die Gesamtheit des bei Eurostat verfügbaren statistischen Materials, sondern eine Auswahl der relevantesten Reihen über die konjunkturelle Entwicklung.

Schnelligkeit und Pünktlichkeit sind die wichtigsten Vorzüge dieser Veröffentlichung.

Aus diesem Grunde wurde sie im Umfang bewußt klein gehalten und enthält keine Anmerkungen zur Methodik, die im übrigen in den spezialisierten Veröffentlichungen von Eurostat zu finden sind.

Die in Eurostatistik veröffentlichten Daten stammen aus der Datenbank New Cronos. New Cronos setzt sich zusammen aus dem alten Cronos sowie REGIO und ist nicht mehr in Form von Zeitreihen, sondern in Form von multidimensionalen Tabellen dargestellt. New Cronos ist somit eines der Produkte zur Verbreitung statistischer Daten, das direkt aus der Eurostat - Referenzdatenbank gespeist wird. Darüber hinaus sind die Daten in der Datenbank Eurocron verfügbar, die vom Host Eurobases der Kommission angeboten wird.

**WECHSELKURSE: Größere Stabilität im Juni 1995**

An den Devisenmärkten herrschte im Juni 1995 wieder relative Ruhe, und der US-Dollar wurde ohne größere Kursschwankungen sowohl gegenüber der D-Mark (mit rund 1,40 DM) als auch gegenüber dem japanischen Yen (mit rund 84,5 Yen) gehandelt. Im Mai hatte sich der Dollar wieder etwas erholt, nachdem er im vorangegangenen Monat gegenüber beiden Währungen auf ein Rekordtief von 1,35 DM bzw. 81,1 Yen gefallen war.

Das Ausmaß des Kursverlustes des Dollars in diesem Jahr bleibt dennoch beachtlich: Seit Ende 1994 hat er gegenüber der DM 10 % und gegenüber dem Yen 15 % seines Wertes eingebüßt. Auf dem G7-Wirtschaftsgipfel in Halifax (Kanada) Mitte Juni wurden keine nennenswerten Maßnahmen zur Koordinierung der Wechselkurspolitik beschlossen.

Die Spannungen innerhalb des EWS, die in den Monaten April und Mai bereits nachgelassen hatten, waren auch im Juni weiterhin gering. Die spanische Peseta und der portugiesische Escudo blieben gegenüber der D-Mark nahezu unverändert, das irische Pfund verlor dagegen beständig an Wert und fiel im Wechselkursmechanismus noch unter den französischen Franken an die letzte Stelle. Der französische Franken war, nach einer Periode größerer Unbeständigkeit während der Präsidentschaftswahlen im April und Mai, gegenüber der D-Mark stabil und wurde zwischen 3,50 und 3,52 FF gehandelt.

Die Währungen zeigten nur wenig Reaktion auf die Zinssatzänderungen im Juni: Die spanischen kurzfristigen Zinssätze wurden am 2. Juni um 0,75 % angehoben, und die schwedische Zentralbank erhöhte am 6. Juni ihren Zinssatz für Wertpapierpensionsgeschäfte um 0,25 %. Die belgischen und die niederländischen kurzfristigen Zinssätze wurden am 8. Juni gesenkt.

Außerhalb des Wechselkursmechanismus des EWS waren die italienische Lira, die schwedische Krone und die Finnmark im Juni stabil, das Pfund Sterling hingegen gab Ende des Monats, bedingt durch die politische Ungewißheit im Vorfeld der Wahl des neuen Vorsizes der Konservativen Partei, nach und wurde am 26. Juni bei Börsenschluß in London mit 2,2084 DM gehandelt.

**RENDITEN VON STAATSANLEIHEN: Ende der Erholung auf dem europäischen Markt**

Auf den Rentenmärkten trat Anfang Juni eine Tendenzwende ein, mit der eine mehrere Monate andauernde Erholungsphase ein abruptes Ende fand. Der Trend setzte dann allerdings erneut ein, hauptsächlich, weil mit einem verlangsamten Wirtschaftswachstum und einer niedrigen Inflation gerechnet wurde. Die Renditen für 10jährige Staatsanleihen blieben im Juni (bis zum 26.) in mehreren Ländern, darunter Deutschland, Frankreich und die Niederlande, nahezu unverändert. Bei den höherverzinslichen Staatsanleihen, einschließlich denen Italiens, Portugals, Spaniens und Schwedens, tendierten die Renditen nach oben, zum Teil bedingt durch Inflationsängste.

Als Folge der erhöhten politischen Unsicherheit im Vereinigten Königreich stieg die Rendite der 10jährigen Staatspapiere am 26. Juni bis auf 8,4 %, wenngleich diese Verzinsung nur um 0,2 Prozentpunkte höher lag als im Vormonat. Die Reaktion des Anleihemarktes auf den Nachtragshaushalt der neuen französischen Regierung am 22. Juni blieb gedämpft.

Trotz der Tendenzwende auf dem Rentenmarkt Anfang Juni hielt der Abwärtstrend bei den US-amerikanischen und den japanischen Renditen an. In der Erwartung, daß die kurzfristigen US-Zinssätze möglicherweise steigen würden, fiel die Rendite für 10jährige Staatsanleihen im Juni (bis zum 26.) um 0,4 Prozentpunkte auf 6,1 %. Befürchtungen, daß die japanische Volkswirtschaft wieder in eine Rezession eintreten könnte, waren unter anderem der Grund dafür, daß die entsprechende japanische Rendite in diesem Monat um 0,6 Prozentpunkte auf 2,7 % sank.

**GELDVOLUMEN: Sehr uneinheitliches Verhalten**

Was das Geldvolumen anbelangt, ist das Verhalten von Land zu Land weiterhin sehr unterschiedlich. Bei den weitgefaßten Geldmengen ist in Spanien, Portugal, Irland und Griechenland ein anhaltend starker Zuwachs festzustellen, während in Dänemark, Deutschland, Italien, den Niederlanden und Finnland die Zuwachsraten in den drei Monaten bis März 1995 negativ waren.

Im Vereinigten Königreich hat sich die Geldmenge M4 langsam zur Mitte ihres Zielkorridors von 3-9 % hinentwickelt: Im April lag die jährliche Zuwachsrate bei 5,3 %. Das M2-Wachstum in Frankreich zeigt eine ähnliche Tendenz, es liegt jedoch noch immer unter seinem Ziel von 5 % für 1995, nämlich bei 3,4 % im Monat März. Das Wachstum von M3 in Österreich verlief relativ gleichmäßig: In den drei Monaten bis März 1995 betrug die Zuwachsrate 4,7 %.

Der Trend beim Wachstum der enggefaßten Geldmengen ist nicht immer der gleiche wie bei den weitgefaßten Geldmengen. Das M1-Wachstum in Finnland beispielsweise lag in den drei Monaten bis März bei 7,4 %, während bei M3 eine Verringerung um 0,3 % zu verzeichnen war.

**AMTLICHE WÄHRUNGSRESERVEN:**

Bei den amtlichen Währungsreserven war, gemessen in Ecu, in den vergangenen Monaten ein Abwärtstrend zu beobachten, bedingt durch den schwächeren Dollar, da dieser nach wie vor die führende Reservewährung darstellt.

Die ausgeprägtesten Rückgänge im Volumen der Währungsreserven (ohne Gold) wurden im ersten Quartal 1995 in Spanien (um 7,7 Mrd. ECU auf 26,1 Mrd. ECU) und in Italien (um 5,2 Mrd. ECU auf 21,1 Mrd. ECU) verzeichnet. Im Falle Spaniens ist dies das geringste Reservevolumen seit Juni 1989, dem Beginn der spanischen Beteiligung am Wechselkursmechanismus des EWS. Für Italien ist es das geringste Volumen, seit die Lira im September 1992 aus dem Wechselkursmechanismus ausgetreten ist. Ein Land, dessen amtliche Währungsreserven im ersten Quartal 1995 anstiegen, war Österreich, das seit 1. Januar Mitglied der EU ist. Seine Reserven (ohne Gold) erhöhten sich von 13,7 Mrd. ECU Ende 1994 auf nunmehr 15,5 Mrd. ECU.

**TEUERUNGSRATE der Europäischen Union der 15 im Mai 1995 unverändert bei 3,3 %**

Die jährliche Inflationsrate der Europäischen Union der 15 lag im Mai wie schon in den Vormonaten März und April bei vorläufig 3,3 %. Im gleichen Monat des Vorjahres waren die Preise um 3,2 % gestiegen.

Mit 1,4 % hatte Belgien die geringste Teuerung. Danach folgten Frankreich (vorläufig 1,6 %) und Finnland (1,6 %). Über dem EU-Durchschnitt lagen lediglich das Vereinigte Königreich (3,4 %), Portugal (4,3 %), Spanien (5,1 %), Italien (vorläufig 5,4 %) und Griechenland (9,8 %).

Für die Inflationsraten der Mitgliedsländer im Mai – mit entsprechenden Vorjahreszahlen – ergibt sich folgende ansteigende Reihenfolge:

	Mai 95	Mai 94		Mai 95	Mai 94
	Mai 94	Mai 93		Mai 94	Mai 93
Belgien	1,4 %	2,6 %	Irland	2,8 %	2,7 %
Finnland	1,6 %	0,2 %	Schweden	3,2 %	2,3 %
Frankreich	1,6 % p	1,7 %	Ver. Königreich	3,4 %	2,6 %
Niederlande	2,1 %	2,9 %	Portugal	4,3 %	5,7 %
Deutschland*	2,2 %	3,0 %	Spanien	5,1 %	4,9 %
Luxemburg	2,2 %	2,1 %	Italien	5,4 % p	4,0 %
Dänemark	2,7 % E	1,9 %	Griechenland	9,8 %	11,0 %
Österreich	2,8 % E	3,0 %			
EUR 15	3,3 % p	3,2 %			

\* Der Verbraucherpreisindex für die Bundesrepublik Deutschland bezieht sich weiterhin auf den Gebietsstand vor dem 3.10.90. In den neuen Ländern war der Preisindex im Mai um 1,4 % höher als vor Jahresfrist. Im Mai '94 hatte die Teuerungsrate bei 3,4 % gelegen.

p Vorläufig

E Eurostat Schätzung, Daten nicht verfügbar.

**ARBEITSLOSENQUOTE: Februar bis Mai 1995: 10,9 % Arbeitslose in der Europäischen Union der 15**

Laut Eurostat betrug die Arbeitslosenquote der Europäischen Union der 15 im Mai 1995 saisonbereinigt 10,9 %. Nach revidierten Schätzungen hatte die Arbeitslosigkeit in den vorhergehenden drei Monaten auf dem gleichen Niveau gelegen. Im Mai des Vorjahres lag die Arbeitslosenquote bei 11,4 %.

In den meisten Mitgliedstaaten blieb das Niveau der Arbeitslosigkeit im Zeitraum von Februar bis Mai sowohl für die Frauen als auch für die Männer relativ stabil. Der zuletzt in Spanien, das mit 23 % die höchste Quote in der Europäischen Union der 15 aufweist, und Dänemark (8,8 %) beobachtete Rückgang setzte sich im Mai nicht fort. Anders dagegen in Frankreich (12,3 %) und dem Vereinigten Königreich (8,6 %), hier sanken die Arbeitslosenquoten geringfügig.

Mit 3,9 % hatte im Mai wiederum Luxemburg die niedrigste Arbeitslosenquote in der Europäischen Union der 15.

Nach den Schätzungen von Eurostat waren im Mai 1995 EU-weit etwa 18 Millionen Menschen arbeitslos. Dabei handelt es sich um eine saisonbereinigte Zahl, die sich an den Kriterien der Internationalen Arbeitsorganisation (ILO) orientiert.

**Anmerkungen**

Die Arbeitslosenquote und die Zahl der Arbeitslosen werden nach den Empfehlungen der ILO und unter Berücksichtigung der unterschiedlichen nationalen Methoden zur Erfassung der Arbeitslosigkeit geschätzt.

**INDUSTRIEPRODUKTION: Europäischen Union der 15 industrieproduktion steigt weiter**

In den Mitgliedstaaten der Europäischen Union der 15 ist der Trend\* der Industrieproduktion im ersten Quartal 1995 gegenüber dem letzten Quartal 1994 um 1,1 % gestiegen.

„Das Wachstum ist ununterbrochen, aber nicht so kräftig wie Mitte '94, als es ungefähr 2 % betrug“, so Eurostat.

In den USA betrug der entsprechende Anstieg 1,4 %.

Das Wachstum der Europäischen Union der 15 ist besonders ausgeprägt im Kraftfahrzeugbau (2,9 % zwischen Q4 '94 und Q1 '95), Nachrichtentechnik, TV-Geräte (2,4 %) und im Maschinenbau (1,8 %).

In den Mitgliedstaaten sind die Daten (in Prozent), soweit vorhanden, wie folgt (E = geschätzt):

EUR 15	1,1	Frankreich	1,0
Schweden	4,1	Portugal E	0,6
Dänemark	2,7	Ver. Königreich	0,5
Finnland	2,3	Niederlande	0,5
Spanien	2,0	Österreich	0,4
Italien	1,3	Griechenland	0,1

\* „Trend“ bedeutet bereinigt um den Saisoneinfluß und irreguläre Schwankungen.

**Außenhandel: 1994 stiegen die Einfuhren der Europäischen Union etwas stärker als die Ausfuhren (Differenz: 0,7 Prozentpunkte)**

Im Dezember 1994 erzielte die Europäische Union der 12 einen Handelsbilanzüberschuß von 2,7 Mrd. ECU gegenüber 7 Mrd. ECU im gleichen Vorjahresmonat. Die Folge war eine Verschlechterung der kumulierten Handelsbilanz für Januar-Dezember 1994: Aus dem im gleichen Zeitraum des Vorjahres verzeichneten Überschuß von 2 Mrd. ECU wurde ein Defizit von 1 Mrd. ECU.

Im Jahr 1994 erzielte Deutschland nicht nur den höchsten Extra-EU-Überschuß aller EU-Mitgliedstaaten (25,6 Mrd. ECU), sondern auch die deutlichste Verbesserung seines Handelsbilanzsaldos gegenüber dem Vorjahr (+5,6 Mrd. ECU).

Der italienische Handelsbilanzüberschuß erhöhte sich um 1,7 Mrd. ECU von 11 Mrd. ECU im Jahr 1993 auf nunmehr 12,7 Mrd. ECU.

Am stärksten verschlechterte sich zwischen 1993 und 1994 der Handelsbilanzsaldo der Niederlande. Ihr Extra-EU-Defizit stieg um 9,9 Mrd. ECU auf 22 Mrd. ECU und war damit höher als in allen anderen EU-Staaten.

Das Vereinigte Königreich verzeichnete 1994 von allen EU-Mitgliedstaaten mit 20,5 Mrd. ECU das zweitgrößte Handelsbilanzdefizit.

Der Extra-EU-Handelsbilanzüberschuß Frankreichs erhöhte sich 1994 gegenüber dem Vorjahr um 1,4 Mrd. ECU (von 9,4 Mrd. ECU auf 10,8 Mrd. ECU).

Infolgedessen entwickelten sich die Auslandspositionen der BLWU und Griechenlands gegensätzlich: Während sich die griechische Handelsbilanz von 1993 bis 1994 um 1,5 Mrd. ECU verbesserte, weitete sich das Defizit der BLWU von 0,6 Mrd. ECU im Vorjahr auf 1 Mrd. ECU aus.

Die Handelsbilanzüberschüsse Dänemarks und Irlands gingen im Vergleich zu 1993 leicht zurück, nämlich auf 2,5 Mrd. ECU bzw. 0,8 Mrd. ECU.

Die Auslandspositionen Spaniens und Portugals blieben zwischen 1993 und 1994 nahezu unverändert: Ihre Defizite im Extra-EU-Handel beliefen sich 1994 auf 4,3 Mrd. ECU bzw. 2,7 Mrd. ECU.

## Foreword

*Eurostatistics - data for short-term economic analysis* is a monthly publication aimed at providing, as rapidly as possible, the latest statistical data on the European Community as a whole (EUR12), each Member State, the United States and Japan.

*Eurostatistics* does not present all the statistics held by Eurostat, but a selection of the most relevant series on the economic situation.

Speed of publication and punctuality are the main features of this publication; that is why it is deliberately streamlined and does not contain any methodological notes, which are given in Eurostat's specialized publications.

The data published in *Eurostatistics* are taken from Eurostat's on-line database, New Cronos. New Cronos includes old Cronos and Regio, both represented not by chronological series but through multi-dimensional tables. New Cronos is a dissemination product directly from Eurostat's Reference Environment. The data are also available via the Commission host Eurobases in the Eurocron database.

Further information on Eurostat and its products can be obtained from the following addresses:

## EUROSTATISTICS: in brief

### EXCHANGE RATES: greater stability in June

Foreign exchange markets returned to relative calm in June, with the US dollar trading in a narrow range against both the German mark (at around DM 1.40) and Japanese yen (at around 84.5). The dollar had recovered somewhat in May, having reached record lows against both currencies in the previous month of DM 1.35 and 81.1.

The extent of the dollar's depreciation this year remains very significant: a fall of 10% against the mark and over 15% against the yen since the end of 1994. The G7 economic summit in Halifax (Canada) in mid-June resulted in no major initiatives on exchange rate policy coordination.

Tensions in the EMS remained low in June, having eased during April and May. The Spanish peseta and Portuguese escudo was almost unchanged against the German mark, but the Irish punt steadily depreciated, falling below the French franc to the bottom of the exchange rate mechanism. Meanwhile the French franc was stable against the German mark, following a period of greater volatility around the time of the presidential elections in April and May, trading in a range of FF 3.50-3.52.

Currencies showed little reaction to official interest rate changes in June: Spanish short-term interest rates were increased by 0.75% on 2 June, and on 6 June the Swedish central bank raised its 'repo' rate by 0.25%. Belgian and Dutch short-term rates were edged lower on 8 June.

Outside of the EMS exchange rate mechanism, the Italian lira, Swedish krona and Finnish markka were stable in June, but sterling weakened late in the month as a result of political uncertainty ahead of the Conservative party leadership election, falling to DM 2.2084 at the close in London on 26 June.

### GOVERNMENT BOND YIELDS: European market rally ends

Bond markets saw an abrupt reversal of trend in early June, ending a rally lasting for several months. The trend then resumed, however, driven largely by expectations of slowing economic growth and low inflation. In the month to 26 June, yields on 10-year government bonds were almost unchanged in several countries, including Germany, France, and the Netherlands. Yields tended to rise among the higher-yielding government bonds, including those of Italy, Portugal, Spain and Sweden, partly because of concerns over inflation.

In reaction to increased political uncertainty in the UK, the 10-year gilt rose to 8.4% on 26 June, although this was only 0.2 percentage points higher than a month earlier. The market response to the supplementary budget of the new government in France, on 22 June, was muted.

Despite the bond market reversal in early June, the downward trend in US and Japanese yields continued. With expectations that US short-term interest rates may have peaked, the yield on 10-year government bonds fell 0.4 percentage points in the month to 26 June, to 6.1%. Meanwhile, amid fears that the Japanese economy might slide back into recession, the equivalent Japanese bond yield dropped to 2.7%, down 0.6 percentage points on the month.

### MONEY SUPPLY: behaviour varies widely

Money supply behaviour continues to vary widely between countries. Broad money measures are showing persistently strong growth in Spain, Portugal, Ireland and Greece, whereas growth rates are negative in Denmark, Germany, Italy, the Netherlands, and Finland in the year to March 1995.

In the UK, M4 growth has been slowly rising towards the mid-point of its 3-9% monitoring range. The annual rate of growth was 5.3% in April. M2 growth in France has shown a similar trend, but is still below the 5% target for 1995, reaching 3.4% in March. M3 growth in Austria has been fairly steady: in the year to March 1995 the rate was 4.7%.

The trend in narrow money supply growth is not always the same as that for broad money. For example, M1 growth in Finland was 7.4% in the year to March, compared with a decline in M3 of 0.3%.

### FOREIGN OFFICIAL RESERVES:

When valued in ecu terms, foreign official reserves have tended to decline in recent months because of the weaker dollar, since the dollar is still the leading reserve currency.

The most significant declines in reserve levels (excluding gold) in the first quarter of 1995 have been in Spain, down 7.7bn ecus to 26.1bn, and Italy, down 5.2bn ecus to 21.1bn. In the case of Spain this represents the lowest level of reserves during the period of the peseta's participation in the EMS exchange rate mechanism (since June 1989). In the case of Italy it is the lowest level since the lira left the exchange rate mechanism in September 1992.

One country whose official reserves increased in the first quarter of 1995 was Austria, which joined the EU on 1 January. Reserves (excluding gold) increased from 13.7bn ecus at the end of 1994, to 15.5bn.

### EUROPEAN UNION ANNUAL INFLATION: unchanged at 3.3% in May 1995

European Union of Fifteen annual inflation was a provisional 3.3% in May 1995, unchanged from March and April. In May last year it was 3.2%. Belgium had the lowest rate - 1.4%. France with 1.6% (provisional) and Finland (1.6%) came next. Only countries above the European Union of Fifteen average were the United Kingdom (3.4%), Portugal (4.3%), Spain (5.1%), Italy (5.4% - provisional) and Greece (9.8%).

May rates in Member States, in ascending order of inflation, with corresponding figures for a year earlier, are as follows:

	Mai 95 Mai 94	Mai 94 Mai 93		Mai 95 Mai 94	Mai 94 Mai 93
Belgium	1.4%	2.6%	Ireland	2.8%	2.7%
Finland	1.6%	0.2%	Sweden	3.2%	2.3%
France	1.6% p	1.7%	United Kingdom	3.4%	2.6%
Netherlands	2.1%	2.9%	Portugal	4.3%	5.7%
Germany*	2.2%	3.0%	Spain	5.1%	4.9%
Luxembourg	2.2%	2.1%	Italy	5.4% p	4.0%
Denmark	2.7% E	1.9%	Greece	9.8%	11.0%
Austria	2.8% E	3.0%			
EUR 15	3.3% p	3.2%			

\* The CPI for Germany continues to reflect the geographical borders prior to 3 October 1990. Annual inflation in the new Länder in May was 1.4% compared to May 1994, when it was 3.4%.

p Provisional

E Eurostat estimate, data not available

### UNEMPLOYMENT: European Union of Fifteen unemployment - 10.9% February to May 1995

Eurostat estimates European Union of Fifteen seasonally-adjusted unemployment in May 1995 at 10.9%. Revised estimates suggest this was also the level in the three previous months. In May last year it was 11.4%.

The rate in most Member States was fairly stable from February to May, for both men and women. Recent downward trends in Spain (which has the European Union of Fifteen's highest rate, 23%) and Denmark (8.8%) were not evident in this latest month. However, slow falls continued in France (12.3%) and the United Kingdom (8.6%).

Luxembourg continues to enjoy the European Union of Fifteen's lowest rate - 3.9%.

Eurostat estimates that around 18 million people were unemployed in the European Union of Fifteen in May 1995. This is a seasonally-adjusted figure in line with ILO criteria.

### Note

The unemployment rate and numbers of unemployed are estimated according to ILO recommendations after taking account of the differences between national methods of recording unemployment.

### EU INDUSTRIAL OUTPUT STILL RISING

European Union of Fifteen industrial production trend\* rose by 1.1% in first quarter this year compared to Q4 '94.

Eurostat comments that although growth is continuing it is not as high as in mid-'94 when it was around 2%.

Comparable rise in the United States was 1.4%.

European Union of Fifteen growth is strong in motor vehicles (2.9% between the quarters), communications and television equipment (2.4%) and mechanical engineering (1.8%).

Figures (in %) for Member States, where available, are (E = estimate):

EUR 15	1.1	France	1.0
Sweden	4.1	Portugal E	0.6
Denmark	2.7	United Kingdom	0.5
Finland	2.3	Netherlands	0.5
Spain	2.0	Austria	0.4
Italy	1.3	Greece	0.1

\* 'Trend' means adjusted for both seasonal and irregular fluctuations.

**EXTERNAL TRADE: European Union of twelve's imports increased slightly more than exports during 1994 (+0.7 percentage points).**

In December 1994 the European Union of Twelve's external trade balance recorded a surplus of ECU 2.7 billion compared to the ECU 7 billion registered in the same month of 1993. As a consequence the cumulated balance for January-December 1994 went down to ECU 1 billion deficit from ECU 2 billion surplus registered in the same period a year earlier. In the year 1994 Germany registered both the largest extra-EU surplus among the European Union of Twelve member states (ECU 25.6 billion) and the most important improvement compared to the previous year (ECU 5.6 billion). During the year 1994 the Italian trade balance improved its surplus by ECU 1.7 billion, reaching ECU 12.7 billion, from ECU 11 billion recorded in 1993.

The Dutch extra-EU deficit recorded the most important deterioration between 1993 and 1994 (ECU 9.9 billion) and became the largest among the European Union of Twelve countries (ECU 22 billion). In the year 1994 the United Kingdom was the European Union of Twelve country that experienced the second largest trade deficit, totalling ECU 20.5 billion. France's extra-EU trade surplus improved by ECU 1.4 billion in 1994 compared to a year earlier (from ECU 9.4 billion to ECU 10.8 billion). The external positions of the BLEU and Greece followed a different evolution: while the Greek trade balance improved by ECU 1.5 billion between 1994 and 1993, the BLEU's deficit went up to ECU 1 billion from ECU 0.6 billion registered a year earlier. The external trade surpluses of Denmark and Ireland slightly reduced compared to 1993: respectively to ECU 2.5 billion and ECU 0.8 billion in 1994. The external positions of Spain and Portugal were almost stable between 1993 and 1994: their extra-EU deficits registered in 1994 ECU 4.3 billion and ECU 2.7 billion respectively.

## Avant-propos

*Eurostatistiques - Données pour l'analyse de la conjoncture* est une publication mensuelle qui a pour but de fournir dans les meilleurs délais les données statistiques les plus récentes pour la Communauté européenne en tant qu'ensemble (EUR12), pour les pays membres ainsi que pour leurs principaux partenaires extra-communautaires (États-Unis d'Amérique et Japon).

*Eurostatistiques* ne publie pas d'une manière exhaustive toutes les statistiques disponibles auprès d'Eurostat, mais les plus importantes parmi celles-ci.

Cette publication se veut rapide et facilement maniable. Pour cette raison, elle ne comporte pas de notes méthodologiques, qui sont par ailleurs disponibles dans les publications spécialisées d'Eurostat.

Les données publiées dans *Eurostatistiques* proviennent de la base de données New Cronos. New Cronos se compose de l'ancien Cronos et de Regio, représentés non plus sous forme de séries chronologiques mais de tableaux multidimensionnels. New Cronos constitue en fait un des produits de diffusion émanant directement de l'environnement de Référence. Ces données sont aussi disponibles dans la base de données Eurocron, accessible par l'intermédiaire du serveur Eurobases de la Commission.

De plus amples informations concernant Eurostat et ses produits peuvent être obtenues aux adresses suivantes :

**TAUX DE CHANGE: une plus grande stabilité en juin 1995**

Les marchés des changes ont retrouvé un calme relatif en juin 1995, avec un dollar US se négociant dans une fourchette étroite tant par rapport au mark allemand (à environ DM 1,40) qu'au yen japonais (à environ Y 84,5). Le dollar a récupéré légèrement en mai, après avoir atteint des records de baisse vis-à-vis de ces deux monnaies le mois précédent, en s'échangeant respectivement à DM 1,35 et 81,1.

L'ampleur de la dépréciation du dollar en cette année reste très significative, la monnaie américaine ayant en effet perdu 10 % par rapport au mark et plus de 15 % par rapport au yen depuis la fin de 1994. Le sommet économique du G7 à Halifax (Canada) de la mi-juin n'a débouché sur aucune initiative majeure en matière de coordination politique de taux de change.

Les tensions au sein du SME sont restées faibles en juin, après la détente observée en avril et en mai. La peseta espagnole et l'escudo portugais sont demeurés quasiment stables par rapport au mark allemand, mais la livre irlandaise s'est dépréciée à un rythme régulier, pour tomber au-dessous du franc français et se placer en dernière position au sein du mécanisme de change. Dans le même temps, le franc français faisait preuve de stabilité vis-à-vis du mark allemand, à l'issue d'une phase de plus grande volatilité autour de la période des présidentielles (avril et mai), en s'échangeant dans une fourchette de FF 3,50 à 3,52.

Les monnaies n'ont que peu réagi aux changements des taux officiels d'intérêt intervenus en juin. Les taux courts espagnols ont été majorés de 0,75 % le 2 juin et le 6 juin la banque centrale suédoise a relevé son taux de prise en pension de 0,25 %. Les taux courts belges et néerlandais ont été revus à la baisse le 8 juin.

A l'extérieur du mécanisme de change du SME, la lire italienne, la couronne suédoise et le mark finlandais sont restés stables en juin, mais la livre sterling s'est affaiblie vers la fin du mois en raison de l'incertitude politique liée à la perspective des élections à la présidence du parti conservateur et s'est échangée à DM 2,2084 à la clôture du marché londonien le 26 juin.

**RENDEMENT DES OBLIGATIONS D'ETAT: Fin de la reprise sur les marchés européens**

Les marchés obligataires ont connu un brusque renversement de tendance début juin, avec la fin de la remontée des cours que l'on observait depuis plusieurs mois. La tendance a néanmoins repris, en grande partie sous l'effet des perspectives de ralentissement de la croissance économique et d'inflation modérée. Jusqu'au 26 juin, le rendement des obligations publiques à 10 ans est demeuré presque inchangé dans de nombreux pays, dont l'Allemagne, la France et les Pays-Bas. Les rendements ont eu tendance à augmenter pour les obligations à forte rentabilité en Italie, au Portugal, en Espagne et en Suède, en partie du fait des craintes inflationnistes.

En réaction à l'incertitude politique accrue au Royaume-Uni, le rendement des fonds d'Etat à dix ans a atteint 8,4 % le 26 juin, ce qui ne représente néanmoins qu'une hausse de 0,2 point par rapport au mois précédent. Les marchés sont restés silencieux à l'annonce du collectif budgétaire présenté par le nouveau gouvernement français le 22 juin.

En dépit du renversement de tendance du marché obligataire début juin, la propension à la baisse se confirme au niveau des rendements des obligations américaines et japonaises. Dans la perspective d'une flambée des taux courts américains, le rendement des titres publics à dix ans a fléchi de 0,4 point pour atteindre 6,1 % le 26 juin. En même temps, dans la crainte d'une récession de l'économie japonaise, le rendement des fonds d'Etat japonais équivalents a perdu 0,6 point par rapport au mois précédent pour tomber à 2,7 %.

**MASSE MONÉTAIRE: comportement très variable**

Le comportement de la masse monétaire continue à fluctuer considérablement d'un pays à l'autre. En ce qui concerne la masse monétaire au sens large, on continue d'observer une expansion soutenue en Espagne, au Portugal, en Irlande et en Grèce, tandis que les taux de croissance ont été négatifs au Danemark, en Allemagne, en Italie, aux Pays-Bas et en Finlande jusqu'en mars 1995.

Au Royaume-Uni, la croissance M4 a lentement progressé pour atteindre le point médian de sa fourchette indicative comprise entre 3 et 9 %. Le taux d'expansion annuel était de 5,3 % en avril. La croissance M2 en France a suivi une évolution similaire, sans toutefois réaliser l'objectif des 5 % pour 1995, puisqu'elle atteignait 3,4 % en mars. La croissance M3 en Autriche a été assez régulière et a atteint 4,7 % en mars 1995.

En ce qui concerne la masse monétaire au sens étroit, l'expansion ne suit pas toujours la même évolution que pour la masse monétaire au sens large. C'est ainsi, par exemple, qu'en Finlande, la croissance M1 a atteint 7,4 % en mars 1995 alors que M3 a reculé dans le même temps de 0,3 %.

**RESERVES EXTERIEURES OFFICIELLES:**

En termes d'écu, les réserves extérieures officielles ont eu tendance à diminuer ces derniers mois, en raison de la faiblesse du dollar, celui-ci constituant toujours la principale monnaie de réserve.

Au cours du premier trimestre de 1995, les reculs les plus significatifs des niveaux de réserve (à l'exclusion de l'or) ont été observés en Espagne avec une diminution de 7,7 milliards d'écus pour atteindre 26,1 milliards d'écus et en Italie avec une diminution de 5,2 milliards d'écus pour atteindre 21,1 milliards d'écus. Dans le cas de l'Espagne, il s'agit là du niveau de réserve le plus bas depuis que la peseta est entrée dans le mécanisme de change du SME (juin 1989). En ce qui concerne l'Italie, il s'agit là du niveau de réserve le plus faible depuis que la lire est sortie du mécanisme de change en septembre 1992.

A l'inverse, l'Autriche, pays qui a rejoint l'UE le 1<sup>er</sup> janvier dernier, a augmenté ses réserves officielles au cours du premier trimestre de 1995. Les réserves monétaires autrichiennes (à l'exclusion de l'or) sont passées de 13,7 milliards d'écus en 1994 à 15,5 milliards d'écus actuellement.

**INFLATION ANNUELLE DANS L'UNION EUROPEENNE: inchangée à 3,3 % en mai 1995**

L'inflation annuelle dans l'Union européenne des Quinze s'élève à 3,3 % (taux provisoire) en mai 1995. Le taux est inchangé par rapport à mars et avril. En mai 1994, il était de 3,2 %.

La Belgique détient le taux le plus faible (1,4 %). La France avec 1,6 % (provisoire) et la Finlande (1,6 %) arrivent en deuxième position. Les seuls pays au-dessus de la moyenne de l'Union européenne des Quinze sont le Royaume-Uni (3,4 %), le Portugal (4,3 %), l'Espagne (5,1 %), l'Italie (5,4 %, provisoire) et la Grèce (9,8 %).

Voici les taux enregistrés en mai, classés par ordre croissant, pour chaque Etat membre ainsi que les chiffres correspondants pour l'année précédente:

	mai 95 mai 94	mai 94 mai 93		mai 95 mai 94	mai 94 mai 93
Belgique	1,4 %	2,6 %	Irlande	2,8 %	2,7 %
Finlande	1,6 %	0,2 %	Suède	3,2 %	2,3 %
France	1,6 % p	1,7 %	Royaume-Uni	3,4 %	2,6 %
Pays-Bas	2,1 %	2,9 %	Portugal	4,3 %	5,7 %
Allemagne*	2,2 %	3,0 %	Espagne	5,1 %	4,9 %
Luxembourg	2,2 %	2,1 %	Italie	5,4 % p	4,0 %
Danemark	2,7 % E	1,9 %	Grèce	9,8 %	11,0 %
Autriche	2,8 % E	3,0 %			
EUR 15	3,3 % p	3,2 %			

\* L'IPC pour l'Allemagne continue de refléter les frontières d'avant le 3 octobre 1990. En mai, l'inflation annuelle dans les nouveaux Länder était de 1,4 %. En mai 1994, elle était de 3,4 %.

p Provisoire

E estimation Eurostat, donnée non disponible

**CHOMAGE: Le chômage dans l'Union européenne des Quinze: à 10,9 % de février à mai 1995.**

Le chômage dans l'Union européenne des Quinze, corrigé des variations saisonnières, s'élève à 10,9 % en mai 1995. Des estimations révisées indiquent que le taux était également à ce niveau durant les trois mois précédents. En mai 1994, le taux était de 11,4 %.

De février à mai le taux de chômage a été relativement stable dans la plupart des Etats membres pour les hommes ainsi que pour les femmes. Les récentes tendances à la baisse en Espagne (qui avait le taux le plus élevé de l'Union européenne des Quinze, 23 %) et au Danemark (8,8 %) n'étaient pas évidentes ces derniers mois. Cependant, de lentes baisses ont continué à se produire en France (12,3 %) et au Royaume-Uni (8,6 %).

Le Luxembourg avec 3,9 % continue d'enregistrer le taux le plus bas de l'Union européenne des Quinze.

Eurostat estime qu'environ 18 millions de personnes sont au chômage dans l'Union européenne des Quinze au mois de mai 1995. Ce chiffre, corrigé des variations saisonnières, est établi en accord avec les critères du Bureau International du Travail (BIT).

## Remarque

Le taux de chômage et le nombre de chômeurs sont estimés selon les recommandations du BIT après correction des différences entre les méthodes nationales de recensement du chômage.

## PRODUCTION INDUSTRIELLE: La production industrielle dans l'Union européenne des Quinze toujours en hausse

La tendance-cycle de la production industrielle dans l'Union européenne des Quinze \* a augmenté de 1,1 % au cours du premier trimestre de cette année par rapport au dernier trimestre 1994.

Eurostat indique que, bien que la croissance se poursuive, elle n'atteint pas le niveau de mi-1994 qui était d'environ 2 %.

Aux États-Unis, le taux de variation correspondant est de 1,4 %.

La croissance dans l'Union européenne des Quinze est forte dans l'industrie automobile (2,9 % entre le premier trimestre 95 et le dernier trimestre 94), les télécommunications et récepteurs de télévision (2,4 %) et la construction mécanique (1,8 %).

Voici les chiffres (en %) pour les États membres pour lesquels des données sont disponibles (E = estimation):

EUR 15	1,1	France	1,0
Suède	4,1	Portugal E	0,6
Danemark	2,7	Royaume-Uni	0,5
Finlande	2,3	Pays-Bas	0,5
Espagne	2,0	Autriche	0,4
Italie	1,3	Grèce	0,1

\* On entend par tendance-cycle les séries corrigées des influences saisonnières et des variations irrégulières.

## COMMERCE EXTÉRIEUR: Les importations de l'Union européenne des Douze ont augmenté un peu plus que les exportations au cours de 1994 (+0,7 points en pourcentage).

En décembre 1994, le commerce extérieur de l'Union européenne des Douze a enregistré un excédent commercial de 2,7 milliards d'écus contre 7 milliards d'écus pour le même mois en 1993. En conséquence, le déficit cumulé pour la période janvier-décembre 1994 a été de 1 milliard d'écus alors qu'on enregistrerait un excédent de 2 milliards d'écus un an avant à la même période.

Au cours de 1994, l'Allemagne a enregistré à la fois l'excédent extra-UE le plus important des États membres de l'Union européenne des Douze (25,6 milliards d'écus) et la hausse la plus forte par rapport à la même période de l'année précédente (5,6 milliards d'écus).

Au cours de 1994, l'excédent de la balance commerciale italienne s'est accru de 1,7 milliards d'écus, atteignant 12,7 milliards d'écus contre 11 milliards d'écus en 1993.

Le déficit extra-UE néerlandais a enregistré sa plus forte détérioration entre 1993 et 1994 (9,9 milliards d'écus), atteignant 22 milliards d'écus soit le niveau le plus élevé de l'Union européenne des Douze.

Au cours de 1994, le Royaume-Uni a, parmi les pays de l'Union européenne des Douze, enregistré le deuxième plus fort déficit commercial (20,5 milliards d'écus).

L'excédent commercial extra-UE de la France s'est accru de 1,4 milliard d'écus en 1994 par rapport à l'année précédente (passant de 9,4 milliards d'écus à 10,8 milliards d'écus).

La situation commerciale extérieure de l'UEBL et de la Grèce a suivi des courbes différentes: alors que la balance commerciale grecque s'est redressée de 1,5 milliards d'écus, le déficit commercial de l'UEBL est passé de 0,6 milliard d'écus à 1 milliard d'écus entre 1993 et 1994.

Entre 1993 et 1994, les excédents commerciaux du Danemark et de l'Irlande se sont légèrement réduits pour atteindre respectivement 2,5 et 0,8 milliards d'écus en 1994.

De 1993 à 1994, les positions extérieures de l'Espagne et du Portugal sont restées presque stables: les déficits extra-UE de ces deux pays ont atteint respectivement en 1994, 4,3 et 2,7 milliards d'écus.

## ES Clasificación de las publicaciones de Eurostat

### TEMA

- 0 Diversos (rosa)
- 1 Estadísticas generales (azul oscuro)
- 2 Economía y finanzas (violeta)
- 3 Población y condiciones sociales (amarillo)
- 4 Energía e industria (azul claro)
- 5 Agricultura, silvicultura y pesca (verde)
- 6 Comercio exterior (rojo)
- 7 Comercio, servicios y transportes (naranja)
- 8 Medio ambiente (turquesa)
- 9 Investigación y desarrollo (marrón)

### SERIE

- A Anuarios y estadísticas anuales
- B Estadísticas coyunturales
- C Cuentas y encuestas
- D Estudios e investigación
- E Métodos
- F Estadísticas breves

## GR Ταξινόμηση των δημοσιεύσεων της Eurostat

### ΘΕΜΑ

- 0 Διάφορα (ροζ)
- 1 Γενικές στατιστικές (βαθύ μπλε)
- 2 Οικονομία και δημοσιονομικά (βιολετί)
- 3 Πληθυσμός και κοινωνικές συνθήκες (κιτρινο)
- 4 Ενέργεια και βιομηχανία (μπλε)
- 5 Γεωργία, δάση και αλιεία (πράσινο)
- 6 Εξωτερικό εμπόριο (κόκκινο)
- 7 Εμπόριο, υπηρεσίες και μεταφορές (πορτοκαλί)
- 8 Περιβάλλον (τουρκουάζ)
- 9 Έρευνα και ανάπτυξη (καφέ)
