Rue de la Loi 200, B-1049 Bruxelles — Tél. (32-2) 299 11 11

Eurostat hat die Aufgabe, den Informationsbedarf der Kommission und aller am Aufbau des Binnenmarktes Beteiligten mit Hilfe des europäischen statistischen Systems zu decken.

Um der Öffentlichkeit die große Menge an verfügbaren Daten zugänglich zu machen und Benutzern die Orientierung zu erleichtern, werden zwei Arten von Publikationen angeboten: Statistische Dokumente und Veröffentlichungen.

Statistische Dokumente sind für den Fachmann konzipiert und enthalten das ausführliche Datenmaterial; Bezugsdaten, bei denen die Konzepte allgemein bekannt, standardisiert und wissenschaftlich fundiert sind. Diese Daten werden in einer sehr tiefen Gliederung dargeboten. Die Statistischen Dokumente wenden sich an Fachleute, die in der Lage sind, selbständig die benötigten Daten aus der Fülle des dargebotenen Materials auszuwählen. Diese Daten sind in gedruckter Form und/oder auf Diskette, Magnetband, CD-ROM verfügbar. Statistische Dokumente unterscheiden sich auch optisch von anderen Veröffentlichungen durch den mit einer stilisierten Graphik versehenen weißen Einband.

Veröffentlichungen wenden sich an eine ganz bestimmte Zielgruppe, wie zum Beispiel an den Bildungsbereich oder an Entscheidungsträger in Politik und Verwaltung. Sie enthalten ausgewählte und auf die Bedürfnisse einer Zielgruppe abgestellte und kommentierte Informationen. Eurostat übernimmt hier also eine Art Beraterrolle.

Für einen breiteren Benutzerkreis gibt Eurostat Jahrbücher und periodische Veröffentlichungen heraus. Diese enthalten statistische Ergebnisse für eine erste Analyse sowie Hinweise auf weiteres Datenmaterial für vertiefende Untersuchungen. Diese Veröffentlichungen werden in gedruckter Form und in Datenbanken angeboten, die in Menütechnik zugänglich sind.

Um Benutzern die Datensuche zu erleichtern, hat Eurostat Themenkreise, d. h. eine Untergliederung nach Sachgebieten, eingeführt. Daneben sind sowohl die Statistischen Dokumente als auch die Veröffentlichungen in bestimmte Reihen, wie zum Beispiel „Jahrbücher“, „Konjunktur“, „Methoden“, untergliedert, um den Zugriff auf die statistischen Informationen zu erleichtern.

Y. Franchet  
Generaldirektor

It is Eurostat's responsibility to use the European statistical system to meet the requirements of the Commission and all parties involved in the development of the single market.

To ensure that the vast quantity of accessible data is made widely available, and to help each user make proper use of this information, Eurostat has set up two main categories of document: statistical documents and publications.

The statistical document is aimed at specialists and provides the most complete sets of data: reference data where the methodology is well-established, standardised, uniform and scientific. These data are presented in great detail. The statistical document is intended for experts who are capable of using their own means to seek out what they require. The information is provided on paper and/or on diskette, magnetic tape, CD-ROM. The white cover sheet bears a stylised motif which distinguishes the statistical document from other publications.

The publications proper tend to be compiled for a well-defined and targeted public, such as educational circles or political and administrative decision-makers. The information in these documents is selected, sorted and annotated to suit the target public. In this instance, therefore, Eurostat works in an advisory capacity.

Where the readership is wider and less well-defined, Eurostat provides the information required for an initial analysis, such as yearbooks and periodicals which contain data permitting more in-depth studies. These publications are available on paper or in videotext databases.

To help the user focus his research, Eurostat has created 'themes', i.e. subject classifications. The statistical documents and publications are listed by series: for example, yearbooks, short-term trends or methodology in order to facilitate access to the statistical data.

Y. Franchet  
Director-General

Pour établir, évaluer ou apprécier les différentes politiques communautaires, la Commission européenne a besoin d'informations.

Eurostat a pour mission, à travers le système statistique européen, de répondre aux besoins de la Commission et de l'en sembler des personnes impliquées dans le développement du marché unique.

Pour mettre à la disposition de tous l'importante quantité de données accessibles et faire en sorte que chacun puisse s'orienter correctement dans cet ensemble, deux grandes catégories de documents ont été créées: les documents statistiques et les publications.

Le document statistique s'adresse aux spécialistes. Il fournit les données les plus complètes: données de référence où la méthodologie est bien connue, standardisée, normalisée et scientifique. Ces données sont présentées à un niveau très détaillé. Le document statistique est destiné aux experts capables de rechercher par leurs propres moyens, les données requises. Les informations sont alors disponibles sur papier et/ou sur disquette, bande magnétique, CD-ROM. La couverture blanche ornée d'un graphisme stylisé démarque le document statistique des autres publications.

Les publications proprement dites peuvent, elles, être réalisées pour un public bien déterminé, ciblé, par exemple l'enseignement ou les décideurs politiques ou administratifs. Des informations sélectionnées, triées et commentées en fonction de ce public lui sont apportées. Eurostat joue, dès lors, le rôle de conseiller.

Dans le cas d'un public plus large, moins défini, Eurostat procure des éléments nécessaires à une première analyse, les annuaires et les périodiques, dans les quels figurent les renseignements adéquats pour approfondir l'étude. Ces publications sont présentées sur papier ou dans des banques de données de type vidéotext.

Pour aider l'utilisateur à s'orienter dans ses recherches, Eurostat a créé les thèmes, c'est-à-dire une classification par sujet. Les documents statistiques et les publications sont répertoriés par série — par exemple, annuaire, conjoncture, méthodologie — afin de faciliter l'accès aux informations statistiques.

## **FARM STRUCTURE**

### **1995 survey : main results**

**CA-17-98-588-EN-S**

In the publication mentioned above, the data published under the item "Specialist grazing livestock" (Farm type 4) were only related to (Farm type 44) – "sheep, goats and other grazing livestock."

This corrigendum contains data regarding the whole of Farm type 4 "Specialist grazing livestock".

## INTRODUCTION

The purpose of the Community farm structure surveys is to obtain reliable data on the structure of agricultural holdings in the European Union of the Fifteen, particularly as regards land use, livestock farming and labour force.

Community structure surveys are carried out regularly at roughly two-yearly intervals, the first being conducted in 1966/67, followed by surveys in 1970/71, 1975, 1977, 1979/80, 1983, 1985, 1987, 1989/90, 1993 and 1995. Approximately every ten years (1970/71, 1979/80 and 1989/90), a full survey is carried out in the form of an agricultural census.

The 1995 farm structure survey was the eleventh in the series of Community surveys and the first for the Community of the Fifteen. It was carried out as a sample survey in the majority of the Member States, and provides results at regional as well as national level. Only Belgium, Luxembourg, the Netherlands and Austria carried out a full survey.

It should be noted that for some characteristics and some countries, the results of this survey may differ significantly from those obtained from other sources. The problems inherent in designing multi-purpose samples such as those used in some parts of the survey on the structure of agricultural holdings make such differences inevitable, especially where characteristics are relatively uncommon or apply very specifically to specialised holdings. Needless to say, everything possible has been done to ensure accurate results, and we consider that the tables give a reliable picture of farm structure in the Community.

More detailed information on the methodology of the Community structure surveys can be found in "Farm structure - Methodology of Community surveys" (Theme 5, Series E). Readers should refer to this publication on questions related to the methodology of the Community surveys.

## SYMBOLS AND ABBREVIATIONS

### Symbols

0.0 data value less than half a unit  
- none

### Abbreviations

Ha : hectares  
AA : agricultural area  
ESU : European size unit (ESU 1= ECU 1200)  
LSU : livestock unit  
AWU: annual work unit  
SGM : standard gross margin  
Mill. : million  
% : percent

## ROUNDING ERROR

In general the figures have been rounded up or down without reference to the total, so the sum of the individual data may differ from the total.

## ADDITIONAL INFORMATION

The main results of the Community's farm structure surveys are published by the Statistical Office of the European Communities (Theme 5, Series C). At irregular intervals, the Statistical Office of the European Communities publishes special reports on specific aspects of the Community's agricultural structure, such as the "Overview on the structure of agricultural holdings - 1993 survey: North-South Comparison" (Theme 5, Series C).

Further information and suggestions about the Community structure surveys can be addressed to the following address:

## METHODOLOGICAL NOTES

### 1. General

Community farm structure surveys have been carried out at regular intervals since 1966 (every two years). They provide comparable data on farm structure in the European Union.

Council Regulation (EEC) No 571/88 of 1 December 1988<sup>1)</sup> provides the basis for the implementation of the surveys between 1988 and 1997.

**Table 1: Community structure surveys, 1966/67 - 1995**

Survey type	Year of survey	Coverage
Sample survey	1966/67	-
Agricultural census	1970/71	-
Sample survey	1975	01.03.1975 – 01.03.1976
Sample survey	1977	-
Agricultural census	1979/80	01.04.1979 – 15.06.1980
Sample survey	1983	01.10.1982 – 31.01.1984
Sample survey	1985	01.12.1984 – 01.03.1986
Sample survey	1987	01.12.1986 – 01.03.1988
Agricultural census	1989/90	01.12.1988 – 01.03.1991
Sample survey	1993	01.12.1992 – 01.03.1994
Sample survey	1995	01.12.1994 – 01.03.1995

However, in years when an agricultural census was carried out, Member States were allowed to use sample surveys for certain characteristics (e.g. labour force). Member States which carried out a full census for national purposes in sample survey years, were allowed to transmit the results in census format (see Table 2).

**Table 2: Survey types used for the 1995 structure survey**

Member State	Survey type	Sampling rate (in %)
Belgium	Census	100.0
Denmark	Sample survey	35.4
Germany <sup>2)</sup>	Sample survey	18
Greece	Sample survey	10.0
Spain	Sample survey	3.7
France	Sample survey	7.6
Ireland	Sample survey	33.0
Italy	Sample survey	2.7

Netherlands	Census	100.0
Austria	Census	100.0
Portugal	Sample survey	12.8
Finland	Sample survey	35.5
Sweden	Sample survey	33.9
United Kingdom	Sample survey	29.7

1) OJ L 56, 2.3.1988, p. 1

2) Germany send tabular results rather than individual data.

## 2. Legal basis

A set of regulations, directives and decisions published in the Official Journal of the European Communities provide the legal basis for the survey on the structure of agricultural holdings. The legal basis governs:

- the organisation of the survey
- the deadlines for transmitting survey results to Eurostat
- the list of survey characteristics
- the definitions of the characteristics and of the agricultural products for the survey
- the Community programme of tables to be stored in the Tabular Data Bank (BDT) of the Eurofarm system
- the Community typology for agricultural holdings.

The following documents constitute the legal basis of the 1995 Community structure survey:

**Table 3: Legal basis**

Description	Legal basis	Number	Official Journal N°	Date
Organisation of the survey	Council Regulation (EEC)	571/88	L 56	2.03.1988
Transmission of results	Commission Decision	96/14/EC	L 4	6.01.1996
Survey characteristics	Commission Decision	96/170/EC	L 47	15.02.1996
Definitions	Commission Decision	89/651/EEC	L 391	26.10.1989
Tabular results	Commission Decision	97/341/EC	L 149	20.03.1997
Typology	Commission Decision	85/377/EEC	L 220	7.06.1985
	Commission Decision	96/393/EC	L 163	2.07.1996

## 3. Survey unit and field of observation

### 3.1 Community farm structure survey

For the purposes of the Community farm structure survey, a holding is defined as a technical-economic unit under single management engaged in agricultural production.

The field of observation of the Community farm structure surveys extends to the following survey units:

- agricultural holdings with a utilised agricultural area of 1 ha or more;
- agricultural holdings with a utilised agricultural area of less than 1 ha if they produce on a certain scale for sale or if their production unit exceeds certain natural thresholds.

### 3.2 National features

#### Belgium

All natural and legal persons whose holdings were established in Belgium and who belonged to one of the following categories on 15 May 1995 are required to provide information:

1. All persons whose main occupation is farming and/or stockbreeding.
2. All persons whose main occupation is market gardening.
3. All persons, not mentioned under 1 and 2 who, in addition to other activities, produce crop and animal products on a commercial basis. Persons doing contract work on holdings are not required to provide information.
4. Penal institutions, boarding schools, convalescent and retirement homes and similar establishments, religious and other communities, experimental and research establishments, public authorities' cultivation departments which produce for their own requirements, and holdings attached to educational establishments, provided they have at least one are of utilised agricultural area (UAA), or keep any of the animals referred to in the questionnaire, whether or not the products are marketed.

5. Persons, firms or establishments whose main or subsidiary activity is to do agricultural or horticultural work for farmers or market gardeners, or to provide them with agricultural or horticultural machinery or plant, insofar as they produce crop or animal products for commercial purposes.
6. Persons, firms or establishments whose main or subsidiary activity is to do agricultural or horticultural work for farmers or market gardeners, or to provide them with agricultural or horticultural machinery or equipment, whether or not they produce crop or animal products for commercial purposes.
7. Agricultural and horticultural machinery co-operatives.

### Denmark

In its field of observation, Denmark includes holdings with a minimum of 5 ha AA or an economic size of at least ECU 3 000 at 1980 prices.

Around 6300 holdings are therefore excluded which represent less than 0.5% of total agricultural production.

Denmark submitted a sample of data collected. For certain characteristics of labour force, a further sample has been taken from the first. The obtained results show differences with the results of previous surveys.

### Germany

The survey units are holdings:

1. with a utilised agricultural area (UAA) of at least one hectare.
2. with natural production units which correspond to the average annual value of the market production of one hectare of utilised agricultural area.

The production units that correspond to the average annual value of the market production of one hectare of utilised agricultural area are as follows:

#### Land categories

30 ares vineyard (producing or not producing)  
 30 ares orchards (producing or not producing)  
 30 ares hops  
 30 ares tobacco  
 30 ares tree nurseries  
 30 ares fresh vegetables, outdoor  
 10 ares flowers and ornamental plants outdoor  
 1 are cultivation under glass of vegetables for commercial purposes  
 1 are cultivation under glass of flowers and ornamental plants for commercial purposes  
 1 are aromatic and culinary plants or horticultural seeds for commercial purposes

#### Animal categories

8 heads of cattle of any age  
 8 pigs of any weight  
 50 sheep of any age  
 200 laying hens  
 200 chickens for fattening, broilers and other chickens  
 200 geese, ducks and turkeys

### Greece

The survey units are agricultural holdings:

1. with a utilised agricultural area (UAA) of at least one stremma (0.1 hectare). Utilised agricultural area includes arable land, kitchen gardens, permanent pasture and permanent crops.
2. with a utilised agricultural area of less than one stremma (0.1 hectare) provided that on 30 September of the survey year, the holding has at least one cow or two heads of other large livestock, or at least 5 heads of small livestock (sheep, goats or pigs), or more than 50 heads of poultry, or more than 20 beehives.

## Spain

The survey units are agricultural holdings:

1. with a utilised agricultural area of at least one hectare.
2. with a utilised agricultural area of at least 0.2 hectares for the cultivation of vegetables and flowers, crops under glass, irrigated fruit or nurseries.
3. that on the survey date had one or more animal units (AU) with a total standard gross margin of 0.75 European Size Units (ESUs) or more.

Special cases:

A holding has to be considered as single agricultural holding if:

- it is under single management and is a technical-economic unit;
- it is divided up between several people for tax or other purposes;
- two or more formerly independent holdings are taken over by one holder;
- holdings in different districts are farmed by one and the same holder.

## France

The survey units are agricultural holdings that meet one of the three conditions below:

1. The utilised agricultural area must be one hectare or more.
2. The area under specialised crops must be over 20 ares.
3. There must be a minimum output of one of the following animal species or crops, whatever the area of the holding:
  - 3.1 A minimum number of animals of the following species
    - 1 reproductive male covering females on a regular basis (stallion, bull, ram, boar, he-goat, etc.)
    - 1 breeding mare or mule
    - 1 cow
    - 2 cattle of two years or older
    - 1 breeding sow
    - 6 breeding ewes
    - 10 breeding rabbits
    - 100 laying hens
    - 10 beehives
    - incubation capacity for 1 000 eggs.
  - 3.2 Existence of at least one of the following livestock activities:
    - horse breeding with at least one breeding mare
    - fur farming (mink, coypu, chinchillas, etc.)
    - game breeding in captivity for slaughter or sale.
  - 3.3 Annual output must amount to:
    - 2 horses for slaughter
    - 5 battery calves
    - 10 sheep for slaughter
    - 10 goats for slaughter
    - 5 pigs
    - 200 rabbits for meat
    - 500 poultry for meat
    - 50 force-fed poultry
    - 10 000 eggs.

3.4 Existence of a minimum area under one of the following crops:

- 20 ares of asparagus
- 20 ares of cabbage for sauerkraut
- 15 ares of strawberries
- 5 ares of fresh vegetables
- 5 ares of flowers or shrubs
- 10 ares of vineyards (wine with appellation of origin)
- 5 ares of Champagne vineyards
- 5 ares of nurseries (shrubs, flowers, forestry or fruit trees)
- 40 single fruit trees yielding fruit

3.5 Actual output in the previous agricultural year of:

- 2 tonnes of endives
- 1 tonne of mushrooms
- cress for sale

### **Ireland**

The survey units are agricultural holdings with a utilised agricultural area (UAA) of at least one hectare or holdings engaged in intensive production (e.g. pig and poultry farming).

Utilised agricultural area (UAA) includes:

- arable land
- areas for the production of silage or hay
- permanent pasture and meadow
- rough grazings.

### **Italy**

The survey units are agricultural holdings:

- with a utilised agricultural area (UAA) of at least one hectare
- engaged in livestock farming or combining livestock farming with forestry
- with less than 1 hectare of utilised agricultural area (UAA) if the marketed output is normally valued at LIT 2 millions or more per farming year.

### **Luxembourg**

The survey units are:

- holdings with 1 hectare or more of cultivated area (including arable land, meadows and pastures, kitchen gardens, fruit and berry plantations, vineyards, nurseries and osieries)
- all holders of commercially operated units producing vegetables, fruit or flowers, and owners of nurseries and osieries, even if the cultivated area is less than 1 hectare
- all holders of vineyards with a total area of at least 10 ares
- all holders of commercial livestock- or poultry-breeding establishments.

The survey does not cover holdings with less than 1 hectare of cultivated area which:

- possess woodland and "Lohhecken" (coppice woodland with a high proportion of oak)
- keep riding horses
- fatten pigs for their own requirements
- grow vegetables, strawberries, etc. for their own requirements.

### **Netherlands**

The survey units are holdings with an economic size class of more than 3 NGEs (Dutch units of measurement).

One NGE is valued at ECU 1 235.

## Austria

The survey unit is the holdings having:

- a utilised agricultural area (UAA) of at least 1 hectare
- a utilised agricultural area (UAA) of less than 1 hectare if the following minimum thresholds are exceeded :
  - 25 ares of commercial vineyards
  - 15 ares of orchards
  - 10 ares of berries, strawberries, vegetables, flowers or ornamental plants, vine or tree nurseries, 1 greenhouse on the holding
  - mushrooms
  - livestock farming without land but having at least 3 cattle, 5 pigs, 10 sheep, 10 goats or 100 head of poultry.

## Portugal

The survey unit is the holding having:

- a utilised agricultural area (UAA) of at least 1 hectare;
- a utilised agricultural area (UAA) of less than 1 hectare if the holding includes one of the following units:

Characteristics	Continent	Açores	Madeire
Potatoes, horticultural and floricultural crops, hops, tobacco, seed and seedlings, vines, orchards, olive groves and nurseries	50 ares	-	-
Flowers and ornamental plants	5 ares	-	-
Greenhouses	5 ares	1 are	1 are
Nurseries	5 ares	-	-
Horticultural crops	-	5 ares	1 are
Intensive horticultural crops	10 ares	-	-
Flowers/pots of flowers for sale	-	-	1 are
Banana plantations	-	-	1 are
Seeds and seedlings	10 ares	-	1 are
Hops	20 ares	-	-
Orchards	20 ares	5 ares	1 are
Vines	20 ares	5 ares	1 are
Bulls for rearing	1	1	1

guinea-fowl	250	-	-

## Finland

The survey covers:

- holdings with at least 1 hectare of arable land
- holdings with an economic size class of at least 1 ESU.

## Sweden

The survey covers:

- holdings with more than 2 hectares of arable land, of which at least 0.3 hectares must be used for agricultural purposes
- holdings with at least 50 milking cows or 250 bovines or 500 sheep/lambs or pigs or 1 000 hens/chicks (whether or not the holding has arable land)
- holdings and other units (institutions, etc.) with market gardens of at least 200 m<sup>2</sup> under glass or at least 2500 m<sup>2</sup> outdoors. Products grown in kitchen gardens or for personal consumption are not covered.

## United Kingdom

The survey unit is the agricultural holding. The guideline definition is pragmatic and operational and subject to agreement with the individual farmer. An agricultural holding comprises the land on which agricultural activities are carried out and which is farmed as one unit, as far as supplies such as machinery, livestock, fodder crops, labour force and the distance between any separate areas of land and their type of farming are concerned. The farm business is run by a farmer, who is a person, a partnership of individuals, a limited company or an institution of some kind. Some farm businesses occupy more than one holding.

A distinction is made between "main" and "minor" holdings. Only main holdings are covered in the Community structure survey. Minor holdings are defined differently in England, Northern Ireland, Scotland and Wales.

In **England and Wales** a holding is classified as minor if it meets the following five conditions:

- the total area of the holding is less than 6 hectares
- there is no regular full-time farmer or worker
- the estimated annual labour requirement is less than 100 days
- the greenhouse area is less than 100 m<sup>2</sup>
- the occupier does not farm any other holding.

In **Northern Ireland** a holding is classified as minor if it meets the three conditions below:

- the total area of the holding owned or taken on long-term lease is less than 6 hectares
- the economic size (SGM) of the holding is less than ECU 2000 as expressed in 1980 standard gross margins
- there is no regular full-time farmer.

In **Scotland** a holding is classified as minor if it meets the following conditions:

- the total area of the holding is less than 1 hectare
- or
- the economic size of the holding is less than ECU 2 000 as expressed in 1980 standard gross margins
- and
- there is no regular full-time farmer
- and
- the holder does not farm any other holding
- and
- the holding is not a large poultry unit.

Transfers of holdings between main and minor are normally made immediately after a minor holdings census. Many of the national results include estimated contributions for minor holdings.

#### 4. Survey date

Council Regulation (EEC) No 571/88 of 29 February 1988<sup>1)</sup> lays down the time period for carrying out the 1995 farm structure survey. It states that the 1995 agricultural structure survey shall be carried out in one or more stages in the form of full or sample surveys between 1 December 1994 and 1 March 1996, covering the crop year corresponding to the crop to be harvested in 1995. Table 4 provides an overview of the dates/periods of the surveys carried out in the individual Member States.

**Table 4: Survey date/period**

Member State	Livestock	Land use	Labour force
Belgium	15 May 1995: structural characteristics		1 December 1995 – Winter cereals
Denmark	2 June 1995	2 June 1995	1 February 1995
Germany	3 December 1994	Mai 1995	April 1995 (2)
Greece	30 September 1995 - 30 November 1996		
Spain	1 October 1995 - 31 December 1995		
France	1 September 1995 - 30 January 1996		
Ireland	1 June 1995		
Italy	November 1995 – 15. December 1996		
Luxembourg	15 May 1995		
Netherlands	End of March 1995 to beginning of June 1995		
Austria	3 December 1995	1 July 1995	1 July 1995
Finland	June 1995		
Sweden	June 1995		
Portugal	November 1995 to end of March 1996		
United Kingdom	1 June 1995	1 June 1995	1 September 1995

(2) Sample (15,7%)

**Table 5: Reference period**

Member State	Livestock	Land use	Labour force
Belgium	15 May 1995	15 May 1995	Twelve-month period preceding the survey
Denmark	2 February 1995	2 February 1995	Twelve-month period preceding the survey
Germany	3 December 1994	May 1994	April 1994
Greece	30 September 1995	1 October 94-30 September 95	1 October 94-30 September 95
Spain	Survey date	1 October 94 – 30 September 95	
France	Survey date	1 November 94-31 October 95	Survey date
Ireland	1 June 1995	1 June 1995	1 June 1994-31 May 1995
Italy	1 December 1995	1 November 94-31 October 95	1 November 1994-31 October 1995
Luxembourg	15 May 1995	15 May 1995	Twelve-month period preceding the survey
Netherlands	Date of the survey between the end of March 1995 and the beginning of June 1995		
Austria	3 December 1995	1 July 1995	Twelve-month period preceding the survey
Portugal	Survey date	1 January 94-31 October 95	Twelve-month period preceding the survey
Finland	1 May 1995	15 May 1995	1 December 1994-30 November 1995
Sweden	June 1995	June 1995	Twelve-month period preceding the survey
United Kingdom	1 June 1995	1 June 1995	1 September 1994-31 August 1995

## 5. Sampling plan

Four Member States, Belgium, Luxembourg, the Netherlands and Austria carried out a full survey for the 1995 structure survey, while the remaining Member States did a sample survey.

The table provides an overview of the sampling plans of the various Member States for the 1995 Community structure survey.

**SAMPLING PLANS OF THE INDIVIDUAL MEMBER STATES**

Member States <sup>1)</sup>	Sampling base	Sampling method	Geographical stratification	Other stratification criteria			
				A <sup>2)</sup>		B <sup>2)</sup>	
				Number <sup>3)</sup>	Description	Number <sup>3)</sup>	Description
DK	1989 agricultural census, updated by the 1990-94 sample surveys	Stratified random sampling	Counties	8	Economic size class of holding	12	Type of farming
D	Agricultural report 1993	Combination of systematic and random sample	By "Länder"	20	Size class of UAA Holding having a specific type of production	-	-
GR	General agricultural and livestock census 1991	Multi stage stratified random sampling of area	NUTS III	3	Urban character	3	Less-favoured areas and others

P	1989 agricultural census	Systematic random sampling within strata	Regions	17	Principal farm type	3	Size classes of AA
FIN		Stratified random sampling	Survey districts	7	Type of farming (main and individual types)	6	Economic size class of holding
SV	1995 agricultural census	Stratified random sampling		3	Principal farm type	11 4	Type of farming Size of the holding
UK	1995 census of agriculture	Stratified random sampling within strata	England, Wales Scotland Northern Ireland	9 9 8 6	Economic size class of holding	-	-

1) D=Germany, F=France, UK=United Kingdom, IRL=Ireland, DK=Denmark, GR=Greece, E=Spain, I=Italy, P=Portugal, FIN=Finland et SV=Sweden.

2) A and B represent independent sampling criteria..

3) Number of strata.

## 6. Community farm structure survey 1995

All Member States apart from Germany sent Eurostat individual data from which the tabular results were compiled. Germany drew up its own tabular results.

To ensure the confidentiality of individual data, the tabular results are processed before publication.

The data are treated as follows :

- table cells representing fewer than 5 holdings are given a value of zero,
- table cells in which dominance is apparent (where one or two holdings account for at least 85% of the value of the cell) and which represent fewer than 9 holdings, are given a value of zero.

The remaining table cells are rounded as follows:

- The number of holdings is rounded to the nearest ten.
- The value cells (land, livestock population, etc.) are treated so that the average cell value is preserved after the individual values are rounded.

The overall totals are calculated from the individual data, meaning that they may differ from the totals obtained from the individual columns.

## 7. Geographical breakdown

As is the case for all previous sample surveys, the results of the 1995 structure survey are produced at two geographical levels: for national and regional level. The results of the 1989/90 basic survey, on the other hand, are available for the regions and districts of each Member State.

## 8. Community typology for agricultural holdings

From the very first survey on the structure of agricultural holdings in 1966/67 it was clear that in order to facilitate and develop the interpretation of results, a typology was needed to classify holdings into uniform groups according to their production structure. Such a typology, which was also intended to facilitate comparisons between the different Member States, could not be based on physical criteria alone, particularly as the link between area and production capacity was becoming less rigid as a result of the expansion of indoor livestock production.

A typology of this kind has become even more necessary with the development of the common agricultural policy, since information on specific groups of holdings is very often required. This has led to a rapid proliferation of studies and research on Community agriculture, for which homogeneous groups are required for sampling and estimation purposes.

A Community typology was therefore developed, first of all on an experimental basis for the 1966/67 survey, then on a new basis as from the 1975 survey. A first holding classification system was established by Commission Decision 78/463/EEC of 7 April 1978<sup>1)</sup> and was used to analyse the 1975, 1977, 1979/80 and 1983 surveys. The system was revised by Commission Decision 85/377/EEC of 7 June 1985<sup>2)</sup>, and the new typology was applied as from the 1985 survey. Changes to this last Decision were made by Commission Decision 94/376/EEC of 30 May 1994<sup>3)</sup> leaving the typology unaltered. To take into account the measures introduced in the 1992 common agricultural policy reform, further changes were necessary. Amendments had to be made to the list of survey characteristics. As the list of characteristics is the basis for the classification of agricultural holdings, it was necessary to amend Commission Decision 85/377/EEC of 7 June 1985 to take into account the altered list of characteristics. The Decision 85/377/EEC was therefore amended by Commission Decision 96/393 (EC) of 13 June 1996<sup>4)</sup>, in this context the classification system was also modified. (see paragraph 8.2).

## 8.1 The basis of the Community typology: standard gross margins

Most classification systems for agricultural holdings currently applicable are based on two essential economic characteristics: the type of farming and the economic size class of the holding. It is also generally accepted that the standard used to measure size should be the same as that used for classification purposes, although this is not compulsory. The Community typology respects both these principles, which are clearly set out in Article 1 of these Commission Decisions.

There is a wide choice of measuring standards: some classifications are based on labour force requirements, some on output value, and others on the concept of value-added. The Community typology has opted for a concept close to the latter: that of gross margin.

Gross margin is the difference between the monetary value of agricultural output (gross output) and the main proportional specific costs associated with the output concerned. It is therefore an indicator of the potential net income of the holding, and also has the advantage of not favouring input-intensive types of production.

However, directly measuring the gross margins of each agricultural holding is a very complicated operation, particularly as a very large volume of data must be processed. Consequently, it was decided to measure the gross margin indirectly, using standard coefficients calculated by applying uniform definitions in each country. Standard gross margins (SGM) thus correspond to an average for each type of production within a given region.

The basis for establishing the SGM is therefore the value of gross output. This comprises sales, payments in kind, increases in stocks and the inputs necessary for certain types of production within the holding (intra-branch consumption). In principle, it is based on ex-farm prices net of VAT.

The products to be considered are not just agricultural products in the strictest sense, but also include packaged and processed products where packaging or processing generally takes place on the farm in the region in question. The more advanced the packaging or processing stage of the products leaving the holding, the higher the ex-farm prices and the costs to be deducted.

In addition to the value of the main products, gross output also includes the value of any by-products and product-linked subsidies.

Proportional specific costs are costs which can be directly attributed to a type of production. They therefore exclude general operating costs, labour, machinery, buildings and contract work (with a few exceptions).

In practice, the proportional specific costs deducted from gross output are as follows:

- crop production: seeds and planting stock, fertilisers purchased, crop protection products and various specific costs (water for irrigation, heating, drying, marketing, insurance),
- livestock production: livestock replacement costs, animal feed and various specific costs (veterinary fees, milk testing, animal selection, heating, marketing, insurance).

The costs of means of production originating on the holding are in principle calculated on the basis of ex-farm prices; for those purchased on the market the purchase price is used. Calculations are net of VAT, and any input-linked subsidies are deducted.

The output figure used to calculate SGMs is for a period of 12 months, and the costs involved are those which relate to this output. However, SGMs are calculated from the arithmetic averages for three calendar or marketing years. Thus, for example, the SGMs for 1992 are calculated either on the basis of the calendar years 1991, 1992 and 1993 or on the basis of the marketing years 1991/92, 1992/93 and 1993/94.

SGMs are first calculated in national currency, then converted into ecus using the average exchange rate for the reference period.

It was also decided<sup>1)</sup> that the SGMs would be updated every two years.

---

<sup>1)</sup> cf. Commission Decision 85/377/EEC of 7 June 1985, Annex I.3b

## 8.2 Use of standard gross margins

### Economic size of holdings

SGMs calculated in this way take account of every hectare and every animal belonging to a holding. The aggregate of the results obtained for each type of production is used to determine the total standard gross margin of the holding. This is referred to as the "economic size of the holding".

Economic size is expressed in European size units (ESU). Until 1983 one ESU corresponded to a standard gross margin of ECU 1 000. For the 1985 survey its value was fixed at ECU 1 100, for the 1987 survey at ECU 1 200 and in the future it will be adjusted regularly to take account of overall agro-economic trends throughout the Community. The value of the ESU was ECU 1 200 for the 1989/90, 1993 and 1995 surveys.

### Type of farming

In the Commission decisions the type of farming of a holding is determined by the relative contribution of the various types of production to its total standard gross margin.

This means that for each holding the contribution of each type of animal or crop production to the total standard gross margin has to be established. The provisions of the decision<sup>2)</sup> are then applied to the results in order to classify the holding under a type of farming. For example, if the gross margin for cereals accounts for more than two-thirds of the total gross margin, the holding will be classified under "cereals".

The classification scheme used has a four-level tree structure:

- Level 1 comprises eight general types of farming, i.e. four types of crop farming (field crops, horticulture, permanent crops and mixed cropping), three types of animal farming (grazing livestock, granivores and mixed livestock holdings) and one crop-livestock mix.
- Level 2 comprises 17 principal types of farming, which are subdivisions of the general types of farming. This is the level at which Community surveys on the structure of agricultural holdings are usually processed and to which most of the results in this publication refer.
- Level 3 comprises around 50 particular types of farming, which are subdivisions of the principal types of farming. Structure surveys provide only limited information at this level, which is already very specific, i.e. number of holdings, total gross margin and utilised agricultural area (UAA).
- The final level is used only by certain Member States to subdivide particular types of farming that are of importance to their agriculture.

Although the general principles for the classification of holdings have not changed since the 1975 survey, the typology itself has been amended as from the 1985 survey, primarily to adapt it to the new character of European agriculture following the accession to the Community of three Mediterranean countries. The typology was again amended as from the 1995 survey to adapt it to the new common agricultural policy requirements.

---

<sup>2)</sup> cf. "Farm structure: Methodology of Community surveys", pp. 155 et seq. (old typology) and pp. 257 et seq. (new typology), amended by Commission Decision No 94/376/EEC of 30 May 1994

In amending the typology, however, care was taken to maintain the continuity of series wherever possible, particularly with regard to the principal types of farming. The following table summarises the old and new classifications:

### Type of farming

Decision 78/463/EEC	Decision 85/377/EEC	Decision 96/393/EC
11	11	13
12	12	14
21	20	20
31	31	31
32	32 + 33 + 34	32 + 33 + 34
41	41	41
42	42	42
43	43	43
44	44	44
51	501	501
52	502 + 503	502 + 503
61	601	601
62	602 + 603 + 604 + 605 + 606	602 + 603 + 604 + 605 + 606
71	71	71
72	72	72
81	81	81
82	82	82

### 8.3 Interpretation of the typology

The Community typology of agricultural holdings allows relatively homogeneous groups of holdings to be constituted, with the application of identical rules in all Member States. However, a number of problems have to be pointed out, as to a certain extent they affect the results obtained.

### 8.4 Livestock units (LSU)

Data on animals are converted into livestock units using the following coefficients :

Equidae	0.8
Bovine animals	
- under one year old	0.4
- one year or over but under two years	
- male	0.7
- female	0.7
- two years old and over	
- male	1.0
- heifers	0.8
- dairy cows	1.0
- other cows	0.8
Sheep, all ages	0.1
Goats, all ages	0.1
Pigs	
- piglets having a live weight under 20 kg, per 100 heads	2.7
- breeding sows weighting 50 kg and over	0.5
- other pigs	0.3
Poultry	
- broilers, per 100 heads	0.7
- laying hens, per 100 heads	1.4
- other poultry (ducks, turkeys, geese, guinea-fowl), per 100 heads	3.0
Rabbits, breeding females, per 100 heads	2.0

Source : these conversion coefficients have been agreed in collaboration between Member States and Eurostat.

## 8.5 Non-classifiable holdings.

Some holdings cannot be classified, as the SGM for each of their production types is zero, meaning that their total standard gross margin is also zero. The following table gives the number of holdings (in thousands) in each Member State which could not be classified for the purposes of the 1987, 1989/90, 1993 and 1995 surveys.

Member State	Total number of holdings (in 1000)				Non-classified holdings							
					Number (in 1000)				Percentage			
	1987	89/90	1993	1995	1987	89/90	1993	1995	1987	89/90	1993	1995
B	92.60	85.00	76.30	71.00	0.20	0.20	0.20	0.2	0.22	0.28	0.30	0.4

P	635.50	598.70	489.00	450.60	4.10	0.20	0.20	0.2	0.65	0.03	0.0	0.0
FIN	-	-	-	101.00	-	-	-	0.0	-	-	-	0.0
S	-	-	-	88.80	-	-	-	0.1	-	-	-	0.1
UK	260.10	243.10	243.40	234.50	10.90	1.80	2.20	1.0	4.19	0.73	0.90	0.4

In most countries non-classification is due to an assumption that a type of production does not exist in a given region, with an SGM of zero being allocated to it. If during the survey it is found that this type of production does exist on a holding in the region, the result is a distortion of the classification, regardless of whether the total SGM of the holding in question is greater than zero or not.

The high number of non-classified holdings in Austria is explained by the relatively high number of cooperatives and farming communities that have large areas of grassland, mostly in the Alps. These holdings have no animals and no SGM is calculated for these grassland areas.

Up to 1983, Ireland and the United Kingdom had a substantially higher proportion of non-classified holdings than the other Member States. This may be explained by the way in which fodder crops are treated. In general, the SGM for fodder crops is regarded as being equal to zero, the variable costs of fodder being deducted when the SGMs of grazing livestock are calculated. If there is no grazing livestock on the holding on the survey date, fodder crops, which are then normally intended for sale, are treated in the same way as other crops and specific SGMs are applied to them.

However, in the United Kingdom and Ireland there is no market to allow the price of green fodder to be determined, and it is generally not possible to calculate these specific SGMs. As a result, up to 1983, some 10% of UK and Irish holdings were not classified under the Community typology.

In order to rectify this situation, it was decided, when the typology was revised, to allocate small SGMs (flat-rate estimates) to permanent pastures and meadows not occupied by grazing livestock on the survey date.

This decision, applied for the first time in connection with the 1985 survey, clearly affects the way in which results can be interpreted, as almost all holdings classified in this manner come under the particular type of farming "various grazing livestock - no dominant type of farming" (code 444).

## 8.6 The monetary aspect of SGMs

SGMs are calculated in national currencies and then converted into ecus. The fact that they are updated regularly (currently every two years) obviously raises the problem of the comparability over time of the results of the structure surveys, particularly as far as the economic size of holdings is concerned.

The reader should remember that the Community surveys have been analysed using the SGMs for the reference years as shown below:

Survey	1975	1977	79/80	1983	1985	1987	89/90	1993	1995
SGM	SGM	SGM	SGM	SGM	SGM	SGM	SGM	SGM	SGM
	73	73	80	80	82	84	86 <sup>1)</sup>	90	92

Over the years there has been a big increase in SGMs in keeping with the general agro-economic trend.

In order to try to counteract the monetary erosion phenomenon, it was decided, as part of the revision of the typology, that the definition of the European size unit (ESU) would be amended whenever SGMs were changed (i.e. every two years). Updating would be carried out by multiplying the basic value of the ESU (ECU 1000 in 1980) by a coefficient taking account of overall agro-economic trends in the Community. Consequently, for the 1985 survey (1982 SGM), the ESU was fixed at ECU 1100 and for the 1987, 1989/90, 1993 and 1995 surveys at ECU 1200.

To make this clearer, the following table shows the SGM reference period and the value of the ESU for each survey since 1975:

Surveys	SGM reference period	ESU 1 = ECU ...
1975	"1973"	1 000
1977	"1973"	1 000
1979/80	"1980"	1 000
1983	"1980"	1 000
1985	"1982"	1 100
1987	"1984"	1 200
1989/90	"1986" <sup>1)</sup>	1 200
1993	"1990"	1 200
1995	"1992"	1 200

Furthermore, it should be remembered that changes in SGMs to a certain extent affect the classification of holdings. The SGMs for all types of production do not change at the same rate, and those which increase more quickly "attract" holdings towards the types of farming concerned.

Recently, subsidy measures have been associated with the set-aside of productive land, which has affected the classification of holdings: on the one hand there has been an effect on the total SGM which influences the breakdown by economic size classes, and on the other there has been a reduction in crops which define the specialisation of holdings.

The 1989/90 survey was not influenced by these measures, or at least not to any great extent. The 1993 and 1995 surveys were impacted by these measures and subsidised fallow land was included in the determination of the main type of farming.

<sup>1)</sup> For Germany SGM "88"

# RESULTS FOR 1995
